

GUERNSEY CENSUS

1981

FOREWORD

The Census of Population was taken on the night of 5th April, 1981, and was conducted by officers of the States Advisory and Finance Committee under powers conferred by "The Census Ordinance, 1980". The States Supervisor, Alec S. Forty, C.B.I.M., F.I.T.E., served as Chief Registrar, and the Economic Assistant, Tim Davison, B.A., as the Census Supervisor.

The Census Report has been prepared for the Chief Registrar by the Census Supervisor. In presenting the report to the Advisory and Finance Committee the Chief Registrar has discharged himself of the responsibilities conferred upon him by the Ordinance. The Committee in its turn has discharged its responsibilities by transmitting a copy of this Report to the President of the States of Guernsey for the information of States Members.

The statistical analysis of the Census returns has been conducted by the computer department of the States Electricity Board.

The Committee wishes to acknowledge the co-operation it has received from the public and from States departments during the taking of the Census. It also wishes to record its appreciation for the help that has been afforded by the United Kingdom Office of Population, Censuses and Surveys.

APPENDICES

I	Classification of Occupation and Industry	55
II	Census Forms	after 58

1. Census Night Population

All persons in Guernsey, Herm, Jethou or Lihou at midnight 5/6 April, 1981, irrespective of nationality or normal place of residence (i.e. inclusive of visitors and exclusive of residents absent from the Islands), including persons on board vessels moored in the harbours or marinas.

2. Resident Population

All persons resident in Guernsey, Herm, Jethou or Lihou at midnight 5/6 April, 1981, whether present in, or temporarily absent from the Islands at that time. The 1981 Census statistics relate to this Resident Population.

3. 1976 and Earlier Census Figures

No changes have been made since 1976 in the boundaries of Civil Parishes. However, the figures for Censuses prior to 1976 included visitors and excluded residents who were temporarily absent from the Island on Census night. This difference must be allowed for in making comparisons.

4. Schedules

A copy of the main schedules used in Guernsey is attached as Appendix II to this report.

5. Definitions, etc.

Dwelling, structurally separate

A building containing residential accommodation with access from outside. (For example, a block of flats with a common entrance is regarded as one dwelling, but a building converted into two flats each with an outside entrance would be regarded as two dwellings).

Room

An interior portion of a dwelling divided off by walls, or sliding or fixed partitions; other than a kitchen less than six feet wide, a bathroom, a toilet, a scullery not used for cooking, a closet, a pantry, a storeroom, a landing, a hall, a lobby, a recess, or an office or shop used solely for business purposes.

Household, private

One person living alone or a group of persons (who may or may not be related) living at the same address with common housekeeping, including any person staying temporarily with the household and not resident in Guernsey, Herm, Jethou or Lihou.

Communal establishment

An establishment such as an hotel, boarding school, or hospital, in which some form of communal catering is provided.

Visitor

A person normally resident outside Guernsey, Herm, Jethou or Lihou, not working or seeking work in the Islands, and visiting the Islands for less than a month.

Resident

A person not being a visitor.

Economically active population

All persons, being part of the resident population and aged fifteen or over, either in employment (including self-employment), whether full or part-time, whether temporary or permanent, at any time in the week prior to 5 April, or unemployed during the period but seeking work or waiting to take up a job (including persons temporarily in ill health).

Economically inactive population

All persons, being part of the resident population, not classified as economically active.

COMMENTARY

1. INTRODUCTION

The formal decision to undertake the 1981 Census was made by the States in July 1980 and the necessary legislation was enacted in December 1980. The Census was taken at midnight on 5/6 April, 1981. Some questions that were asked in 1976 were dropped as they no longer provided useful information - examples of these are night parking arrangements; and information concerning household facilities such as cookers, kitchen sinks, flush toilets with outside entrances, refrigerators and deep-freeze cabinets. More relevant information was sought, concerning energy for space heating, cooking and water heating and the installation of a telephone. In the main, however, the tables are directly comparable with those published in 1976 which was the first Census to relate to the resident population. Prior to the 1976 Census, statistics were based on Census night population.

	1976	1981
A Census night including visitors	54,381	53,464
B Census night excluding visitors	51,447	51,407
C Resident population ((B) plus absentee residents)	53,637	53,313

The total resident population (C) therefore declined by 324.

This situation is due to the following factors:-

1. In the five years 1971/75 the number of births exceeded deaths of residents by 87 a year, in the five years 1976/80 births exceeded deaths by only 20 a year.
2. The recession has had a marked effect on the level of economic activity in the Guernsey economy. This in turn has depressed the number of employment opportunities and has been a strong inhibiting factor on the number of immigrants. There is also some evidence that there is a tendency for people not to remain for so long in Guernsey and this results in an increase in the rate of emmigration.
3. The Housing Laws are having a significant effect on the control of immigration.

The date of the Census was not significant in the overall result. The 1976 Census was held on the 25th April, one week after Easter, whereas the 1981 Census was held on the 5th April, two weeks before Easter. This was done to conform to the Census date fixed in the United Kingdom and in Jersey and this enables comparisons to be valid. There is an intake of seasonal workers into Guernsey during this three week period and these count as resident population, but it has been established, using figures supplied by the Insurance Authority, that during the three week period 5th April, 1981, to 26th April, 1981, a maximum of 200 seasonal workers would have entered the Island. This figure has no significant effect on the overall Census results.

3. POPULATION CHARACTERISTICS

3.1. The table below shows the age distribution changes which have occurred since 1961.

Age	Census night Population		Resident Population	
	1961	1971	1976	1981
	%	%	%	%
14 and Under	24.1	23.3	21.9	19.5
15 - 24	12.2	14.9	14.9	15.6
25 - 34	12.0	12.0	13.8	14.7
35 - 44	12.7	11.4	11.7	12.0
45 - 54	13.6	12.0	11.7	11.4
55 - 64	11.7	12.1	11.2	10.9
65 and over	13.7	14.3	14.8	15.9
TOTAL	100.0	100.0	100.0	100.0
PERCENTAGE OF WORKING AGE (women 15 - 60) (men 15 - 65)	59.3	59.3	60.4	61.9

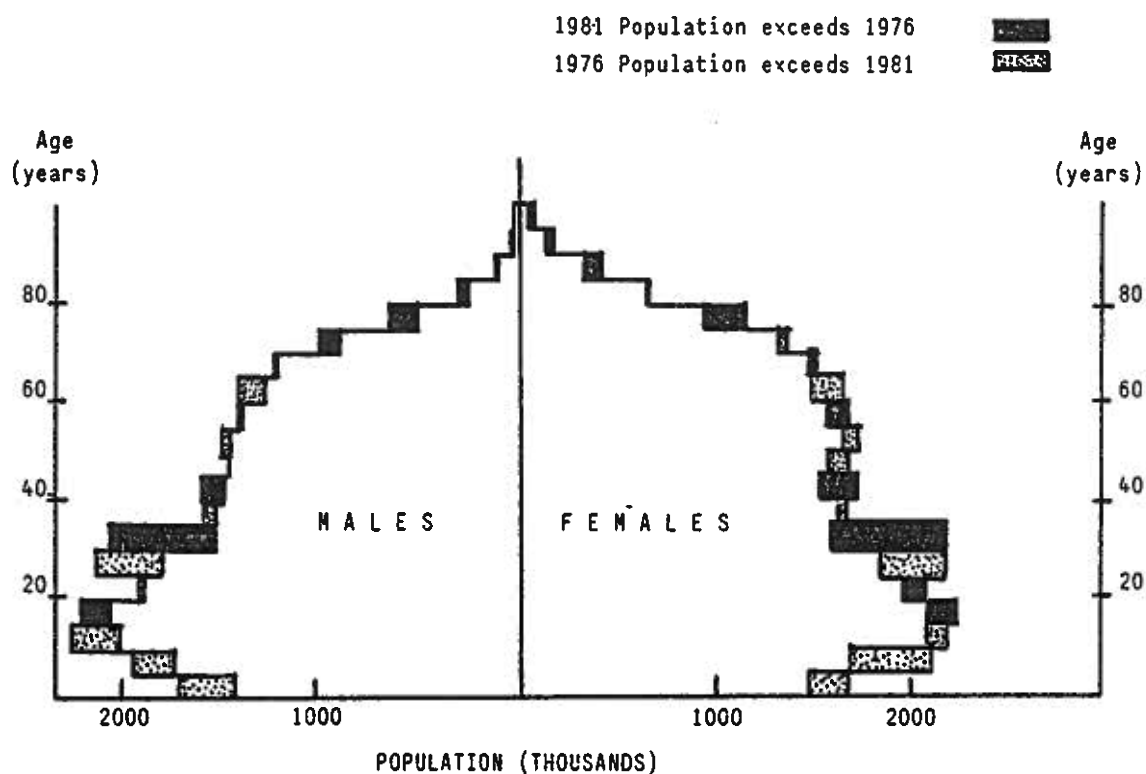

Breakdown of the 0 - 14 year age group

Age Years	1976	1981	Actual Change	% Change
0 - 4	3,344	2,915	- 429	- 12.8
5 - 9	4,007	3,382	- 625	- 15.6
10 - 14	4,407	4,081	- 326	- 7.4
TOTAL	11,758	10,378	- 1,380	- 11.7

The significant features are:

1. The fall in the proportion of children since the high point of 1961-64.
2. The effect of the higher 1961-64 birth rate on the 'late teens' age group in subsequent years.
3. The continuing growth in the proportion of persons over working age (65 years for men, 60 years for women). The actual figures for this age group show an increase from 4,813 in 1976 to 5,849 in 1981.

Age and Sex Structure 1976-81

3.2. SEX DISTRIBUTION AND MARITAL STATUS

The proportion of males to females has changed only marginally since 1961 and between 1976 and 1981 the proportion of females per 1,000 population changed only from 517 to 518. Changes in the different age groups are shown in the following table, but these changes are not really significant.

Females per 1,000 Population

Age Group			Difference
	1976	1981	
			+
			-
0 - 19	491	491	0
20 - 39	497	502	+ 5
40 - 59	516	515	- 1
60 and over	582	577	- 5
Overall	517	518	+ 1

The marital status distribution is, however, continuing to change, as the following table indicates:

Sex and Marital status of the population 1961-81

		Population Census Night		Resident Population	
		1961	1971	1976	1981
		%	%	%	%
Sex	Male	48.1	48.2	48.3	48.2
	Female	51.9	51.8	51.7	51.8
<hr/>					
Marital Status: Percentage of Persons aged 16 and over	Single	21.3	20.5	21.4	22.7
	Married	67.7	68.7	67.4	65.2
	Widowed	10.0	9.5	9.2	9.2
	Divorced	1.0	1.3	2.0	2.9
	TOTAL	100.0	100.0	100.0	100.0

Three points of interest are evident from this table:

- i. The proportion of single persons has shown a steady, albeit small, increase since 1971.
- ii. The decrease in the proportion of married persons appears to have slightly accelerated since 1971.
- iii. There is acceleration in the rate of divorce since 1961.

3.3. DISTRIBUTION THROUGHOUT PARISHES

		Census night population			Resident Population	
		1951	1961	1971	1976	1981
		%	%	%	%	%
Castel		8.6	10.6	12.3	13.7	14.5
Forest		2.6	2.4	2.9	2.6	2.4
St Andrews		4.2	4.4	4.4	4.3	4.2
St Martins		10.5	11.6	12.0	11.3	11.0
St Peter Port		38.6	34.9	31.6	30.4	29.3
St Peter		3.8	3.8	3.6	3.6	3.8
St Sampson		13.0	13.1	12.7	12.7	13.0
St Saviours		3.5	4.0	4.1	4.3	4.5
Torteval		1.5	1.6	1.7	1.7	1.7
Vale		13.7	13.6	14.7	15.4	15.6
TOTAL		100.0	100.0	100.0	100.0	100.0

The distribution of the population throughout the Island continues to change and there are three distinct trends;

- (i) St Peter Port continues its steady decline in its percentage of the Island's population.
- (ii) The Vale and the Castel Parishes continue their steady increase.
- (iii) The other Parishes show little change.

3.4. PROJECTION OF SCHOOL POPULATION

The following table shows a continuation of the trend revealed in 1976, of a declining school population. Over the next five years, assuming no migration over this period, the resident population aged 5 - 14 can be expected to decrease by about 15%, which would represent a 25% fall over the period 1976 - 1986. These figures will not correspond exactly with the Education Council's records of schoolchildren, because some children will be educated privately, some educated outside Guernsey and some will stay on at school beyond the statutory minimum leaving age.

Schoolchildren (5 - 14) Population

September 1, 1976	8,364	September 1, 1981	7,345
" 1977	8,245	" 1982	7,070
" 1978	8,027	" 1983	6,865
" 1979	7,774	" 1984	6,675
" 1980	7,496	" 1985	6,466
		" 1986	6,257

The position beyond 1986 will depend upon future trends in the birth rate and the rate of migration.

3.5. BIRTHPLACE OF POPULATION

Proportion of population born in Guernsey

	%
1951	75.7
1961	73.4
1971	71.4
1976	67.2
1981	67.7

For the first time since the war, the proportion of Guernsey born residents has risen. The next table shows that the number of persons continually resident since birth has also increased from 52.6% in 1976 to 53.5% in 1981.

Birth Place of Resident Population

	1976	%	1981	%	Actual Change
Resident since Birth	28216	52.6	28533	53.5	+ 317
Returned Guernsey born persons	7833	14.6	7539	14.2	- 294
Other Channel Islands	903	1.7	795	1.5	- 108
United Kingdom	14399	26.8	14179	26.6	- 220
Elsewhere	2286	4.3	2267	4.2	- 19
	<u>53637</u>	<u>100.0</u>	<u>53313</u>	<u>100.0</u>	<u>- 324</u>

There are wide variations in the proportion of Guernsey born persons as between the different age groups and there are also several changes since 1976.

Proportion of Guernsey born persons
in different age groups

	1976	1981
	%	%
0 - 9	77	88
10 - 19	56	77
20 - 29	50	68
30 - 39	66	53
40 - 49	66	64
50 - 59	60	63
60 - 69	63	61
70 +	65	65

Perhaps naturally, the highest incidence of Guernsey born residents is in the age group 0 - 9 which increased from 77% in 1976 to 88% in 1981. As there has been a drop in the birth rate, this higher ratio can only have been caused by a reduction in the numbers of immigrants bringing children aged 0 - 9 into the Island. This is confirmed by the fact that the 1976 Census showed that 839 children aged 0 - 9 took up residence between 1971 and 1975, whereas the 1981 Census showed that the inflow of migrants in this age group between 1976 and 1980 was 611.

There are also significant increases in the proportion of Guernsey born residents in the 10 - 19 age group (from 56% to 77%) and the 20 - 29 group (from 50% to 68%).

It is interesting to note that people aged 20 - 29 years are generally considered to be those most likely to enter the Island to seek work, yet the above figures indicate a reduction in the rate of immigration for this age group.

4. MIGRATION (NET DIFFERENCE IMMIGRATION/EMIGRATION)

The position with regard to immigration can be seen from the following tables:-

Year of Arrival	Census Years		1981 as a % of 1976
	1976	1981	
Resident since birth	28,216	28,533	100.1
Before 1950	7,881	6,869	87.2
1950 - 1959	2,831	2,311	81.6
1960 - 1969	6,353	5,134	80.8
1971 - 1975	6,379	4,508	70.7
1976 - 1980	-	5,393	-

The number of immigrants during the period 1976 - 1980 was 5,393. It is known that, in the same period the excess of births over deaths was 100 and the resident population declined by 324, which indicates that 5,817 people emigrated over this period. This compares with the 1976 Census which showed that there were 6,379 immigrants and 4,093 emigrants during the equivalent period 1971 - 1975.

Immigration by Individual Years - 1971-1981

Year of Arrival	Census Years		1981 as a % of 1976
	1976	1981	
1971	880	652	74.1
1972	1,190	700	58.8
1973	1,150	702	61.0
1974	1,534	936	61.0
1975	1,625	838	51.6
1976	1,106*	833	
1977		864	
1978		1,085	
1979		1,262	
1980		1,349	
1981		510**	

* To Census night 25th April, 1976

** To Census night 5th April, 1981

This table indicates that many people remain in the Island for a relatively short time. For example, of the 1,625 persons shown in the 1976 Census as having taken up residence in Guernsey in 1975, only 838 (51.6%) remained in 1981.

Immigration in the five years preceding the 1976 and the 1981 Censuses was as follows:-

	Total Immigrants 1971 - 75 @ Census 1976	Total Immigrants 1976 - 80 @ Census 1981	Numerical Differences	% Differences
Guernsey born	1303	1291	- 12	- 1.0
Other C.I.	126	76	- 50	- 39.7
United Kingdom	4198	3347	- 851	- 20.3
Other	752	679	- 73	- 9.7
TOTAL	6379	5393	- 986	- 15.5

Clearly there has been a substantial reduction in the inflow of immigrants; which, as previously stated, can be attributed to the recession dampening down the level of growth in the Guernsey economy and also to the effectiveness of the Housing Control Laws.

The age distribution of immigrants reveals very different characteristics from those of the resident population:-

	Immigrants by age (for year 1980)	Resident Population (as at Census)
	%	%
0 - 19	25.4	27.7
20 - 39	49.9	27.9
40 - 59	15.9	23.4
60 and over	8.8	21.0
TOTAL	100.0	100.0

The above table shows that a high proportion of those who come to the Island are in the range 20 - 39 and a relatively low proportion are of retirement age.

5. EMPLOYMENT

5.1. Since 1976 the number of males in the workforce has dropped by 70 (-0.4%) to 16086, whereas the number of females in the workforce has increased by 897 (9.5%) to 10318. The total economically active population is 26404, an increase of 821 (3.2%).

As a proportion of the population, those who are economically active increased from 47.7% in 1976 to 49.5% in 1981. In 1976, economically active males comprised 63.2% (96.0% full-time) and females 36.8% (64.3% full-time), whereas in 1981 the figures were 60.9% males (95.3% full-time) and 39.1% females (64.5% full-time).

The proportion of total population who are of working age rose from 60.4% in 1976 to 61.9% in 1981. 89.4% of the males of working age were economically active, the same figure as in 1976. However, the corresponding figure for females increased from 54.4% in 1976 to 58.5% in 1981. 729 men over 65 and 899 women over 60 were still economically active in 1981, compared with 996 and 946 in 1976. This is a decrease of 16% for these age groups, against an increase of 3.8% in total persons over working age.

The proportion of married women who are economically active increased from 39.3% (5,587) in 1976 to 44.5% (6,119) in 1981. However, as a percentage of all economically active women, the figure for married women remained constant at 59.3%.

Of the economically active population, 84.1% were employees (1976 : 82.0.), 6.9% self-employed with employees (1976 : 7.4%) and 9.0% self-employed without employees (1976 : 10.6%). The incidence of self-employment among men, 20.9% is much greater than among women, 8.0% (corresponding figures for 1976 being 23.3% and 8.8%).

Employment Status	1976				1981			
	Men		Women		Men		Women	
	Number	%	Number	%	Number	%	Number	%
Employee	12,395	76.7	8,594	91.2	12,721	79.1	9,491	92.0
Self-employed employing others	1,570	9.7	313	3.3	1,474	9.2	347	3.4
Self-employed without employees	2,190	13.6	514	5.5	1,891	11.7	480	4.6
TOTAL	16,156	100.0	9,421	100.0	16,086	100.0	10,318	100.0

5.2. AGE DISTRIBUTION OF EMPLOYED PERSONS

Economically active, as a percentage in their age group

Age Group	Men		Women	
	1976	1981	1976	1981
	%	%	%	%
15/19	65	63	57	55
20/29	95	95	60	68
30/39	99	99	54	58
40/49	98	98	55	62
50/59	92	92	45	48
60/64	79	78	31	33
65 and over	31	21	8	8

The only significant change so far as men are concerned was in the group aged 65 and over, in which the proportion economically active declined from 31% to 21%, no doubt caused by the current depressed economic climate creating employment problems for older men.

With regard to women, there was an increase in each of the age groups between 20 and 59, resulting in an overall increase in the proportion of this age group economically active from 54% to 59.4%.

5.3. OCCUPATION

Main occupational groups, as a percent of the total
economically active Population

	1976			1981		
	Total	Male	Female	Total	Male	Female

TOTALS	100.0	100.0	100.0	100.0	100.0	100.0

The above table shows:

1. Those working in offices now comprise the largest single occupational group, both for males and females.
2. The numbers of greenhouse workers has declined markedly, both for males and females.

5.4. INDUSTRY

The industry analysis uses the same classifications for 1981 as in 1976. The main changes from 1976 to 1981 have been as follows:

1. The reduction of labour in the growing industry from 3,921 to 2,743.
2. The increase of labour in manufacturing for export from 853 to 1,386.
3. The increase of labour in the banking and insurance sector from 1,078 to 1,515.
4. The increase of labour in Private Professional Services (Accountants, Doctors, etc.) from 944 to 1,333.

The main results are illustrated below:

Industry of the economically active population

	1976 Census Total	Took up Residence in 1976-80	1981 Census Total

TOTAL	100.0	100.0	100.0
TOTAL as a % of economically active	100.0	11.4	100.0

The table shows the difference in the employment characteristics of persons who took up residence 1976-80 by comparison with the total economically active population. e.g.

1. Glasshouse crop production comprised 3.9% of all economically active immigrants 1976-80 compared with the total of 10.4% of the Island workforce so employed.
2. Construction comprised 5.2% of all economically active immigrants, 1976-80 compared with the total of 9.0% of the Island workforce so employed.
3. Banking and Insurance comprised 9.8% of all economically active immigrants 1976-80 compared with the total of 5.7% of the Island workforce so employed.
4. Accommodation and Catering comprised 21.8% of all economically active immigrants 1976-80 compared with the total of 8.5% of the Island workforce so employed.
5. Professional Services comprised 9.8% of all economically active immigrants 1976-80 compared with the total of 5.0% of the Island workforce so employed.

5.5. LENGTH OF RESIDENCE OF EMPLOYED PERSONS

The number of economically active persons, who came to Guernsey between 1971 and 1980 and were still here on Census day 1981 is as follows:

	1971/75	1976	1977	1978	1979	1980	1976/80
Economically Active, arriving in the year shown	2,005	450	449	597	697	822	3,015
As a % of the Island's economically active	7.6	1.7	1.7	2.3	2.6	3.1	11.4

The above figures must not be interpreted as indicating an upward trend in immigration, since they refer only to those who came into the Island and take no account of the numbers who left - see Section 4 Migration.

% of immigrants who are economically active by year of taking up residence

	1971-75	1976	1977	1978	1979	1980	1981	Whole Population
	%	%	%	%	%	%	%	%
Males	64	65	63	66	66	72	77	63
Females	41	44	41	44	45	50	57	37
All Immigrants	52	54	52	55	55	61	66	50

This table shows that the percentage of newly arrived immigrants who are economically active is much higher than for the population as a whole.

5.6. ECONOMICALLY INACTIVE POPULATION

Note: Unemployed people are considered potentially "Economically Active" and are therefore categorised against their previous occupation. The description Economically Inactive relates to those who are not directly employed in commerce, industry, etc.

	1976		1981	
	Persons 15 and over	%	Persons 15 and over	%
Inactive 'Retired' (Women over 60, Men over 65)	4,813	11	5,849	14
Permanently disabled	648	2	797	2
Full-time education	1,684	4	1,968	5
Housewives	8,413	20	7,280	17
Other inactive	744	2	637	1
Total Economically Inactive	16,302	39	16,531	39

The proportion of the population aged 15 and over who were economically inactive remained constant at 39% for both 1976 and 1981. However, although the proportion remained constant, there were two significant changes within this total.

1. An increase in the number of 'retired' persons from 4,813 to 5,849.
2. A decrease in the number of housewives from 8,413 to 7,280 (principally explained by the increase in the number of economically active married women over the same period from 5,587 to 6,119).

6. COMMUNAL ESTABLISHMENTS

Communal establishments (see Table 13) provided the place of normal residence for 1,629 persons (3.1% of the resident population). Perhaps the most significant change was in the number of residents in old people's homes which rose from 265 to 445; this reflects the already noted trend of increased longevity. Despite the 1981 Census being held two weeks before Easter, as against one week after Easter in 1976, the number of residents in tourist accommodation (staff) in 1981 was 775 compared to 463 in 1976. This reflects not only the growth of the hotel industry but the extension of its 'season'.

7. DWELLINGS, ROOMS AND PRIVATE HOUSEHOLDS

- 7.1. The number of structurally separate dwellings increased during the period 1976/81 from 17,824 to 18,716, an increase of 5%; the 1971/76 increase was 11.2%. Parishes that showed relatively high rates of growth of dwellings between 1976 and 1981 were Castel (12.2%), St Peters (11.3%), St Sampsons (11.2%), St Saviours (7.0%) and Vale (6.1%).

Total household spaces rose from 19,282 in 1976 to 20,287 in 1981, an increase of 1,005 or 5.2%. Vacant dwellings in 1981 numbered 1,287 compared with 1,040 in 1976. As in 1976, the largest single group of these were self-catering accommodation (35%). Those for sale accounted for 12%, and those in the process of being renovated or restored for 10%. Of the balance, 29% could not be categorised, but were habitable and probably vacant pending new occupiers or for sale.

- 7.2. The increase in the proportion of larger dwelling units has continued, but the rate of increase has slowed down since 1976.

1981	18.2	33.7	17.8	19.2	7.7	3.4

which shows that two person households are the most common.

The actual figures for 1976/81 are:

Size of Household	1976	1981	Change Actual
1 Person	2916	3396	+ 480
2	6084	6309	+ 225
3	3350	3336	- 14

5	1504	1446	- 58
6+	879	628	- 251
TOTAL	18127	18707	+ 580

The overall average number of persons per room in all households was 0.49, an improvement of 0.03 since 1976.

	1 Person	2 Persons	3 Persons	4 Persons	5 Persons	6 or more Persons	All Households

1976	.22	.38	.53	.66	.78	.99	.52
1981	.22	.37	.51	.64	.76	.90	.49

These figures show two main features:

- (i) The improvement between 1971 and 1981 has been general through all sizes of households.
- (ii) Not surprisingly, larger households generally live in the most crowded conditions.

7.3. Overcrowding

Measured on the basis of the percentage of households having 1.50 persons or more to a room, overcrowding declined from 203 households (1.1%) in 1976 to 100 (0.5%) in 1981.

7.4. Tenure

	Percentage of all Households		Average number of rooms per household		Average number of persons per household		Average number of persons per room per household

All Tenures	100.0	100.0	5.5	5.6	2.9	2.8	0.52	0.49

Of all households, 65.7% are owner occupied, a total of 21.0% privately let and 10.5% rented from the States. Corresponding figures in the United Kingdom for 1980 were 55.2% of households owner occupied, 13.0% privately let and 31.8% rented from local authorities.

There has been a slight reduction in the average number of persons per household, the overall average having been reduced from 2.9 in 1976 to 2.8 in 1981. Similarly there has been a reduction in the average number of persons per room, the overall average being down from 0.52 in 1976 to 0.49 in 1981.

* No information in previous Census.

The above table confirms that there has been an overall general improvement of facilities in households. It should be noted, however, that standards in private lets are still well below average.

9. MAIN SOURCE OF ENERGY FOR HEATING OF ROOMS, COOKING AND WATER HEATING

	Owner Occupiers	Rented with States	Unfurnished Private Let	Furnished Private Let	Held by Virtue of Employment	Rented with Business	All Tenures

Oil	27.7	0.2	4.8	6.9	27.4	20.2	20.0
Other	0.5	0.3	2.4	0.8	0.2	-	0.8

For room heating, coal (39.7%) was the main source, followed by electricity (21.2%), oil (20.6%) and gas (16.7%). For cooking, electricity (55.7%) is the most popular form of energy, followed by gas (38.7%) with only marginal contributions from coal (2.8%) and oil (2.7%). For water heating, electricity is also the main source of energy (49.0%) followed by oil (20.0%), gas (17.4%) and coal (12.8%).

It should be borne in mind that many people have more than one source of energy available and use them according to circumstances or at different times of the year. Some caution should therefore be applied to the interpretation of these energy source figures.

10. SEWERAGE ARRANGEMENTS

The proportion of occupied dwellings connected to the main sewerage system increased from 50.7% in 1976 to 52.9% in 1981. Other methods of sewerage disposal were cesspits (45%), septic tanks (1.3%) and other (0.8%).

There remains a very wide variation between the Parishes in the proportion of households linked to the public sewers e.g. St Peter Port 94.7% and St Peters (2.0%) and St Saviours (2.4%).

Occupied Households linked to a Public Sewer, by Parish

	1976	1981
	%	%
Castel	39.5	50.4
Forest	-	9.3
St Andrew	31.1	31.2
St Martin	57.3	57.8

St Sampson	39.0	40.9
St Saviour	-	2.4
Torteval	0.7	6.9
Vale	28.2	32.4
Island Average	50.7	52.9

11. CARS

The number of cars available for domestic use increased from 19,147 to 21,650, or 1.152 per household compared with 1.056 in 1976.

Households by availability of cars for domestic use 1971 - 1981

	1971	1976	1981
	%	%	%
No car	31.0	25.3	22.8
1 car	48.1	48.8	47.2
2 cars	17.6	21.9	23.8
3 cars	2.7	3.1	5.0
4 cars	0.4	0.7	0.9
5 cars or more	0.2	0.2	0.3
TOTAL	100.0	100.0	100.0

Those households with no car are distributed throughout the Island as follows:

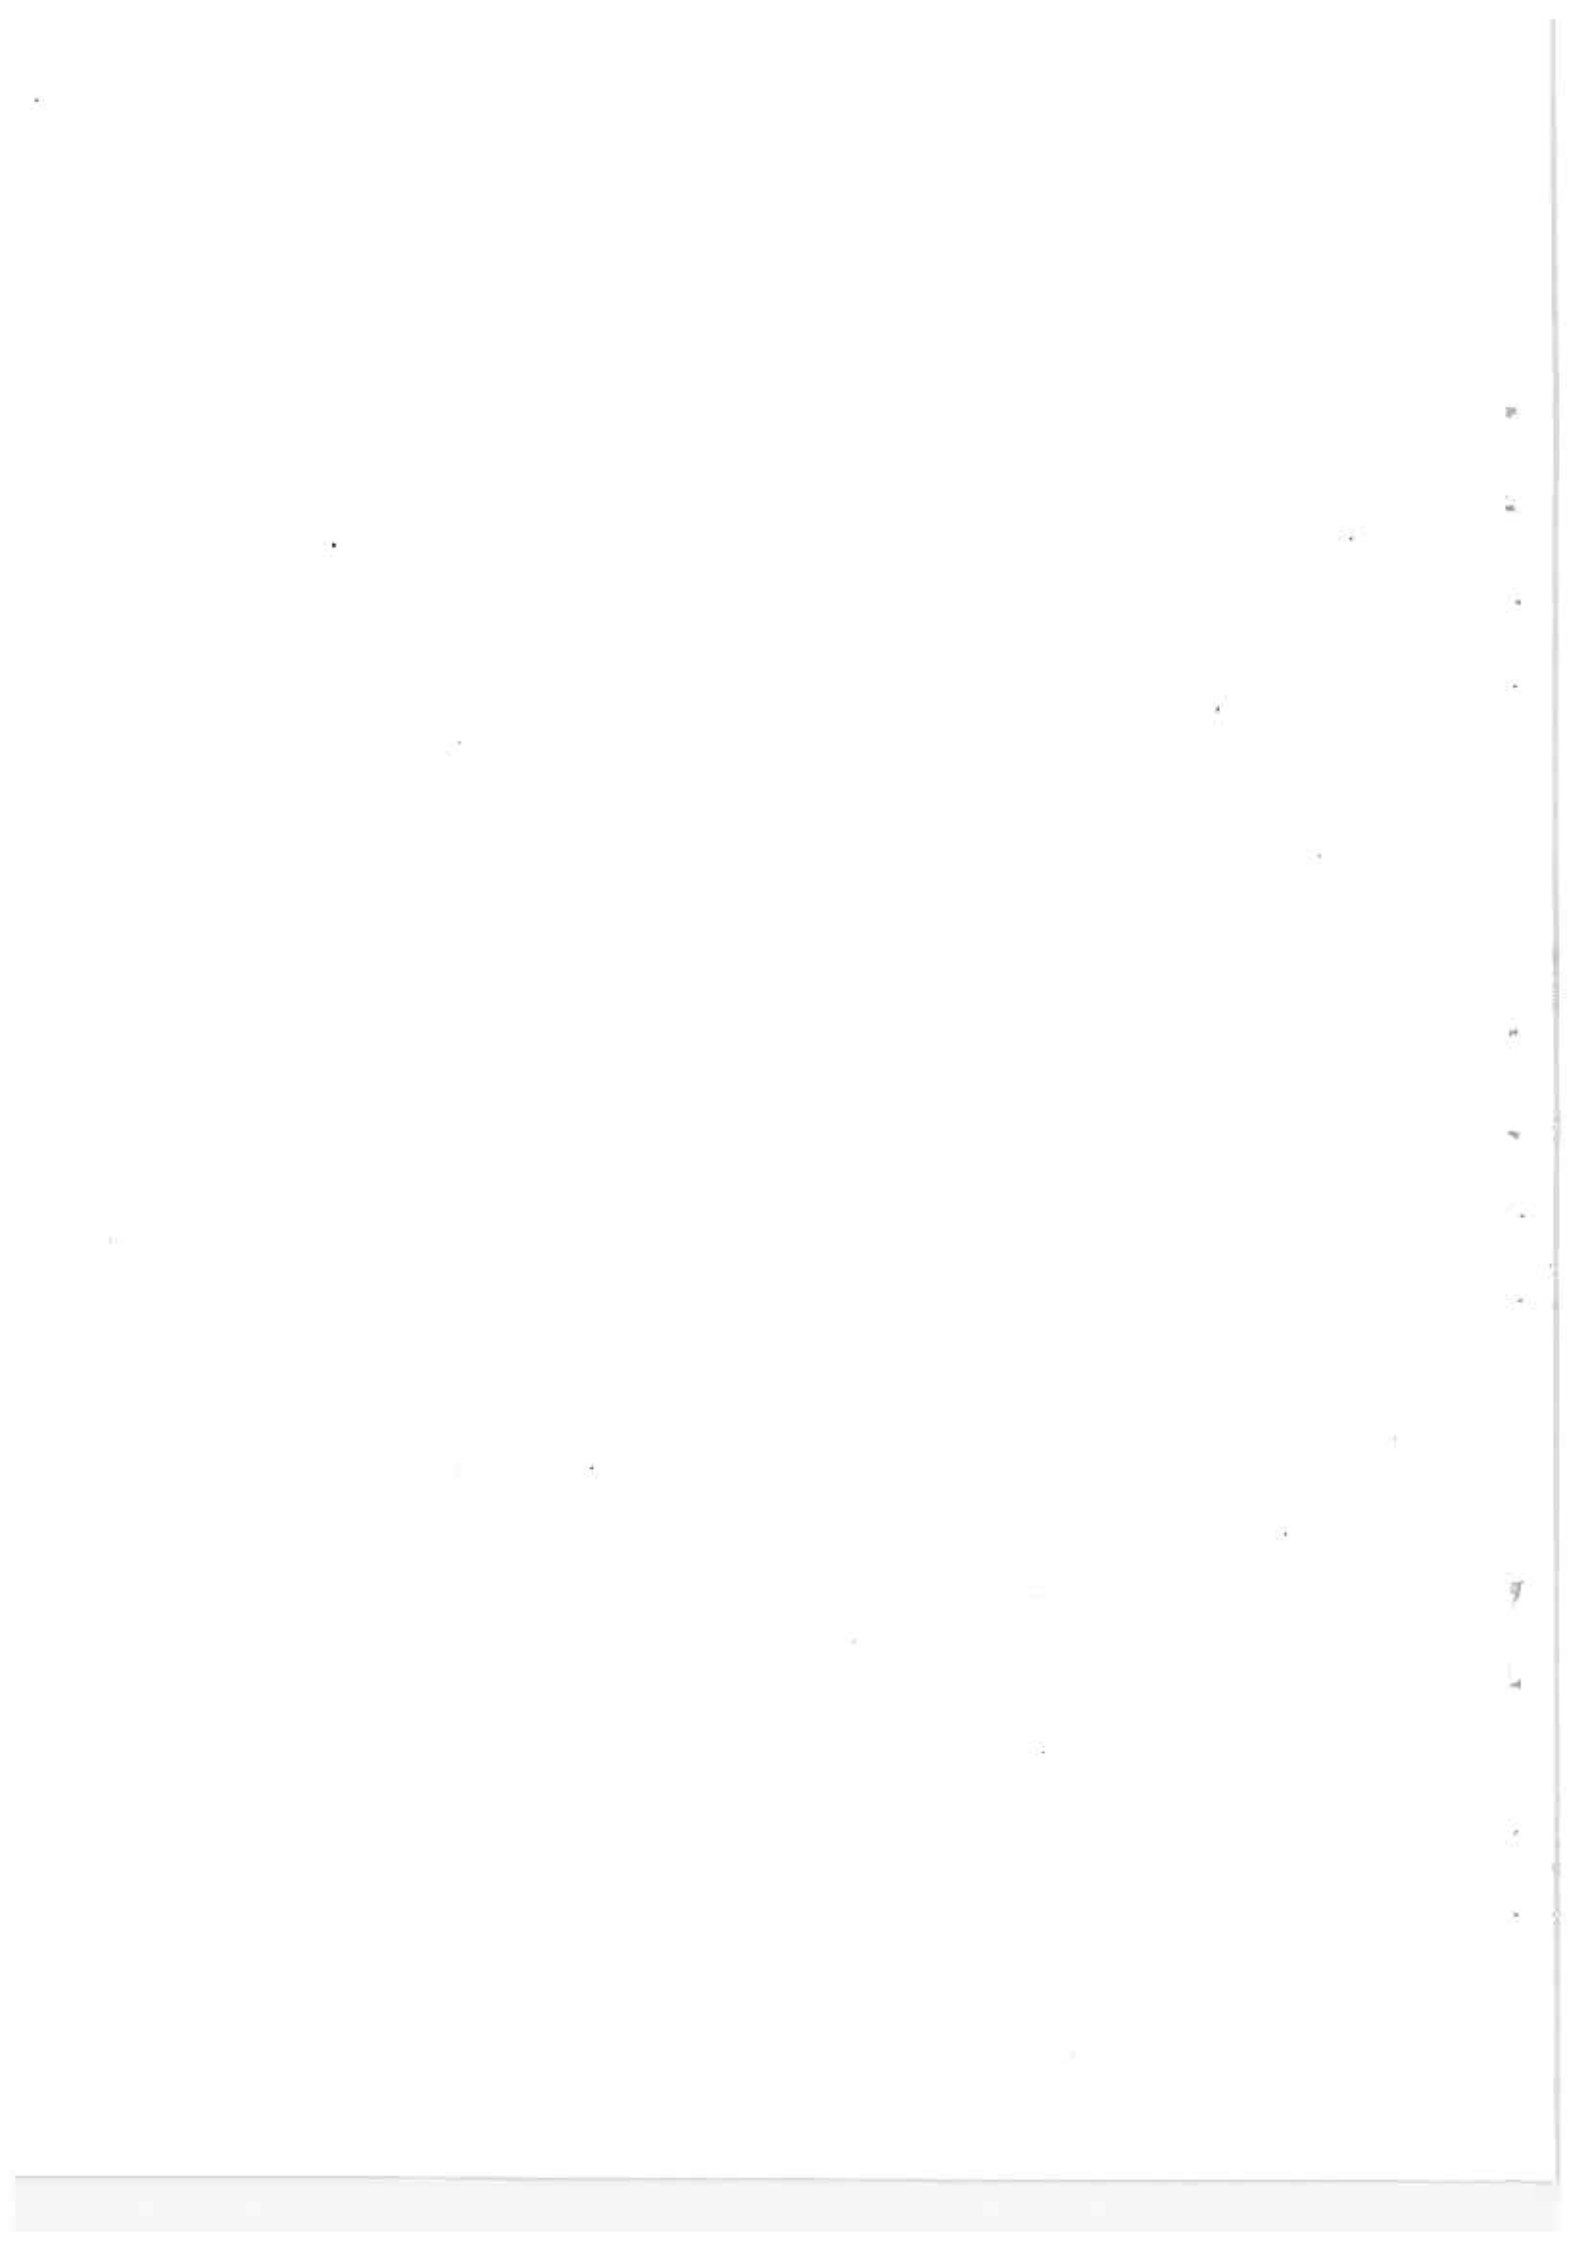

Percentage of households in each Parish with no car

	1971	1976	1981
	%	%	%
Castel	20.1	16.6	14.6
Forest	20.5	16.4	13.5
St Andrew	21.2	18.3	15.8
St Martin	24.0	21.5	18.5
St Peter Port	43.5	37.4	35.0
St Peters	21.0	16.5	13.9
St Sampson	32.3	23.4	21.9
St Saviour	18.0	13.3	11.4
Torteval	20.4	13.5	11.7
Vale	26.6	20.6	18.4
Islands average of households with no car	31.0	25.3	22.8

The number of households with no car has declined at each Census. St Peter Port still has by far the highest number of households without a car, its figure of 35% being the only one above the Island average (22.8%).

P FORM FOR MAKING A PERSONAL RETURN

Will you please complete this form and have it ready for collection by Monday, 6th April. If you find that you need help do not hesitate to ask the Enumerator when he or she calls to collect the form.

Before you complete the form, please read all the questions and the explanatory notes very carefully. In most cases all you have to do is to put a cross (X) in the box next to the appropriate answer.

The Enumerator may have to ask you some questions to check that you have filled in the form correctly.

The information you give on the form will be treated as CONFIDENTIAL and used only for compiling statistics. Please be assured that NO information about named persons will be passed by the Census Staff to any other person. If anyone employed on the Census discloses information which you provide, he or she will be liable to prosecution.

May I draw your attention to the fact that there is a legal obligation to complete this form and that failure to do so or the inclusion of false information may incur penalties.

When you have completed the form will you please ensure that you sign the declaration.

Thank you for your co-operation.

A. S. FORTY
Chief Registrar
Census Office, P.O. Box 43, St. Peter Port, Guernsey.

EXPLANATORY NOTES

These notes are provided to help you fill in your answers to some of the questions on the form. If, after reading them you find you are still in difficulty with any of the questions, or if you have any other problems to do with the Census, please ask the Enumerator about them when he (or she) calls to collect your form.

GENERAL The law relating to the Census is "The Census Ordinance, 1980". Copies may be obtained from the Greffe. The term 'Census Area' means Guernsey, Herm and Jethou.

D. RESIDENT OR VISITOR (Q.17) Persons who usually reside in the Census Area are regarded as Residents. Any period of temporary absence from the Census Area, such as a holiday or medical treatment, should be ignored. So should periods of full-time education outside the Census Area. A visitor is any person, who normally resides outside the Census Area, is not working or seeking work in the Census Area, and is visiting the Census Area for less than one month from the date of arrival. For such visitors do not complete Questions 18-23.

E. COUNTRY OF BIRTH (Q.18) Guernsey includes Herm and Jethou.

F. YEAR OF TAKING UP RESIDENCE (Q.19) If you have at any time been a resident outside the Census Area, the year in which your PRESENT period of residence began must be entered in the boxes marked YEAR. If, for example, you were born in Guernsey, left the Island in 1940, returned in 1945, and have lived in Guernsey ever since, 1945 would be entered on the form.

G. JOB LAST WEEK (Q.20). This Question must be answered in respect of every person (other than visitors) who is aged 15 and over on Monday 6th April 1981. A job means any work for payment or profit. It includes, for example, work on your own account, jobbing, paid domestic work, casual work of any kind (such as seasonal work or week-end work), or unpaid work in a family business (such as a shop or a vinery). If you are out of work through sickness but intend to seek work when sufficiently well, put a cross in box 3.

Do not count yourself as a full-time student if you are on day release courses from work, or attend night school only, or attend an educational establishment provided by your employer or are an apprentice.

A "school child" is a person aged 15 years or over still at school during the term started April/May 1981. A "full-time student" is a person aged 15 years or over at university, college or some other institution of further education, during the term started April/May 1981. Ignore any part time temporary work undertaken by both school children and full-time students.

H. EMPLOYMENT STATUS (Q.21) 'Self-employed employing others' means having one or more employees other than 'family workers'. A 'family worker' is one who lives in the same household as the employer and is related to him.

I. OCCUPATION (Q.22) Full details should be given. If your job is known by a special name, use that name. Descriptions such as 'technician', 'engineer', 'fitter', or 'foreman' should not be used by themselves. Further information is required such as 'woodworking machinist', 'civil engineer', or 'toolroom foreman'.

If you work for the States, give your job title or rank.

If you are a member of the armed forces, give your rank or rating only.

J. INDUSTRY (Q.23) Describe the business fully. Avoid general terms such as manufacturer, agent, engineering or farming. Whenever possible give information about the product dealt with, grown or manufactured.

If you are a member of the armed forces, give the arm or branch of the service only.

H Form for Private Households

TO THE HEAD (OR ACTING HEAD) OF THE HOUSEHOLD

Will you please complete this form, and have it ready for collection by Monday, 6th April. If you find that you need help, do not hesitate to ask the Enumerator when he or she calls to collect the form.

Before you complete the form, please read all the questions and the explanatory notes very carefully. In most cases all you have to do is to put a cross (X) in the box next to the appropriate answer.

The Enumerator may have to ask you some questions to enable him or her to complete the Enumerator Section of the form, or to check that you have filled in your section of the form correctly.

Please note that a household means either one person living alone, or a group of persons, related or unrelated, living at the same address and sharing housekeeping arrangements. Visitors to the Census Area who are staying temporarily with the household should be included on the Census form.

The information you give on the form will be treated as CONFIDENTIAL and used only for compiling statistics. Please be assured that NO information about named persons will be passed by the Census staff to any other person. If anyone involved in the Census discloses information which you provide, he or she will be liable to prosecution. Similarly, information which anyone (for example, a lodger) gives you to enable you to complete the form must not be disclosed by you in any other way.

The legal obligation to fill in the whole form rests on YOU, but each person who has to be included is required to give you the information you need. However, anyone who wishes can ask the Enumerator or the Census Office for a Personal Form which can be returned either to the Enumerator or direct to the Census Office.

If you cannot give the completed form to the Enumerator, please arrange for some other person to do so on your behalf. You can, if you wish, give the completed form to the Enumerator in a sealed envelope.

May I draw your attention to the fact that there is a legal obligation to complete this form and that failure to comply with the requirements described above, or the inclusion of false information may incur penalties.

When you have completed the form, will you please ensure that you sign the declaration at the foot of the last page.

Thank you for your co-operation.

1981 CENSUS NOTES

These notes are provided to help you fill in your answers to some of the questions on the form. If, after reading them, you find you are still in difficulty with any of the questions, or if you have any other problems to do with the Census, please ask the Enumerator about them when he or she calls to collect your form.

GENERAL The law relating to the Census is "The Census Ordinance, 1980". Copies may be obtained from the Greffe. The term "Census Area" means Guernsey, Herm and Jethou.

PERSONS TO BE INCLUDED ON THE FORM Complete a line for every person who usually lives in the household whether or not they are related to you and regardless of whether or not they actually spend Census night in the household. Include full-time students who may be away from home (say, at college in the United Kingdom) as persons who usually live in the household.

Also complete a line for any visitor to the Census Area who spends Census night in the household.

You do not have to complete a line for a person (say, a babysitter) who spends Census night in the household but who usually lives elsewhere in the Census Area. Such persons will be enumerated by the head of the household in which they usually live.

NOTES ON THE QUESTIONS

- A. **ROOMS (Q.2)** Count all rooms in the household's accommodation except small kitchens less than 6 feet wide, bathrooms and toilets, sculleries not used for cooking, closets, pantries and storerooms, landings, halls, lobbies or recesses, offices or shops used solely for business purposes. A large room divided by a sliding or fixed partition should be counted as two rooms. A room divided by curtains or portable screens should be counted as one room.
- B. **CARS AND VANS (Q.3)** Exclude vans used solely for the carriage of goods.
- C. **ENERGY (Q's.7 - 9)** 'Other' includes fuels such as paraffin.
- D. **RESIDENT OR VISITOR (Q.17)** Persons who usually reside in the Census Area are regarded as residents. Any period of temporary absence from the Census Area, such as holiday or medical treatment, should be disregarded. So should periods of full-time education outside the Census Area. A visitor is any person who usually resides outside the Census Area, is not working or seeking work in the Census Area, and is visiting the Census Area for less than one month from the date of arrival. For such visitors, do not complete Questions 18-23.
- E. **COUNTRY OF BIRTH (Q.18)** Guernsey includes Herm and Jethou.
- F. **YEAR OF TAKING UP RESIDENCE (Q.19)** For persons who have at any time been resident outside the Census Area, the year in which the present period of residence began must be entered in the boxes marked YEAR. If, for example, a person was born in Guernsey, left the Island in 1940, returned in 1945 and has lived in Guernsey ever since, 1945 would be entered on the form.
- G. **JOB LAST WEEK (Q.20)** This question must be answered in respect of every person (other than visitors) who is aged 15 and over on Monday, 6th April, 1981. A job means any work for payment or profit. It includes, for example, work on a person's own account, jobbing, paid domestic work, casual work of any kind (such as seasonal work or week-end work), or unpaid work in a family business (such as a shop or viney).
For any person who is out of work through sickness but who intends to seek work when sufficiently well, put a cross in box 3. Do not count as full-time students persons who are on day release courses from work, or attend night school only, or attend an educational establishment provided by their employers or are apprentices.
A "school child" is a person aged 15 years or over still at school during the term started April/May 1981. A "full-time student" is a person aged 15 years or over at university, college or some other institution of further education, during the term started April/May 1981. Ignore any part time temporary work undertaken by both school children and full-time students.
- H. **EMPLOYMENT STATUS (Q.21)** 'Self-employed employing others' means having one or more employees other than 'family workers'. A 'family worker' is one who lives in the same household as the employer and is related to him.
- I. **OCCUPATION (Q.22)** Full details should be given. If a person's job is known by a special name, use that name. Descriptions such as 'technician', 'engineer', 'fitter', or 'foreman' should not be used by themselves. Fuller information is required such as 'woodworking machinist', 'civil engineer', or 'toolroom foreman'.
For persons who work for the States, give their job title or rank.
For members of the armed forces, give their rank or rating only.
- J. **INDUSTRY (Q.23)** Describe the business fully. Avoid general terms such as 'manufacturer', 'agent', 'engineering', or 'farming'. Wherever possible give information about the product dealt with, grown or manufactured.
For members of the armed forces, give the arm or branch of the service only.
