

GUERNSEY CENSUS

1991

Price £5.00

FOREWORD

The Census of Population was taken on the night of 21/22 April under powers conferred by "The Census Ordinance, 1990". The States Supervisor, F. Norman Le Cheminant, I.S.O., B.Sc.(Econ)., F.C.I.S., served as Chief Registrar, and the Head of Economics and Statistics, John Dickson, Ph.D., B.Sc., as the Census Supervisor.

The Census Report has been prepared for the Chief Registrar and the President of the Population and Migration Committee by the Census Supervisor. The Committee in its turn has discharged its responsibilities by transmitting a copy of this Report to the President of the States of Guernsey for the information of States Members.

The Committee wishes to acknowledge the co-operation it received from the public during the taking of the Census and the assistance it had from States departments. It wishes to record its gratitude to the United Kingdom Office of Population, Censuses and Surveys for the help afforded to it and also to the Urban Research and Policy Evaluation Regional Research Laboratory at the University of Manchester for help with analysing the Census.

E. Gaudion
President
States Population and Migration Committee

SAMPLE

Guernsey Census Form

EXPLANATORY NOTES

GUERNSEY CENSUS 1991

GENERAL EXPLANATORY NOTES

1. Census Population

The census is a count of all persons resident in Guernsey, Herm, Jethou or Lihou at midnight, 21/22 April 1991, whether those persons are present or temporarily absent from the Islands at the time. The census population figure does not include visitors to the Islands, whether from the U.K. or elsewhere, or the crews or passengers of ships moored in the Island harbours (unless permanently resident). This definition is different to those of earlier censuses (1971 and before) when all persons present at midnight would have been counted as the censal population. The current "residential" definition requires a considerable follow up of the resident population (up to three months after the census) to ensure that all persons normally resident in Guernsey are included in the census population.

2. Censal Population

The censal population refers to all persons present at midnight on 21/22 April 1991. The censal population, therefore, includes visitors to Guernsey and excludes absent residents. Less effort is expended in deriving this total, since all reports and tables refer to the resident population.

3. Visitor

A visitor is defined as any person who normally resides outside Guernsey, Herm, Jethou or Lihou and is not working or seeking work in Guernsey and is visiting Guernsey for less than one month from the date of arrival. All other persons are considered as resident. Note that persons who had been guests in hotels and guesthouses for over one month would have been considered resident, even if they considered themselves visitors.

4. Comparison with earlier censuses

No changes have been made in the boundaries of civil parishes. As noted above, the figures for censuses prior to 1976 included visitors and excluded absent residents, whereas those for 1976 onwards are of the resident population.

5. The census form

A copy of the main census form is attached to this report. There was also a private census form for those individuals who were part of another household wishing to make a separate personal return.

6. Definitions

Dwelling

A building or part of a building which included some separate living accommodation was counted as a dwelling, whether that accommodation was occupied or not. Thus, a building containing at least one household, occupied or unoccupied, is counted as a dwelling. Buildings without accommodation are considered solely as buildings and will not be included in any count of dwellings. Where houses or other buildings have been adapted to provide residential accommodation in smaller units, these units were regarded as dwellings only if they were structurally separate and self-contained. Households separated from each other by a common staircase or landing were not counted as separate dwellings.

Room

An interior portion of a dwelling divided off by walls or sliding or fixed partitions. However, small rooms not used for sleeping or living accommodation were excluded. Therefore, the number of rooms in a household's accommodation excluded small kitchens less than 2 metres wide; bathrooms and toilets; closets; pantries; garages; halls, landings, lobbies or recesses; small storerooms; offices or shops used solely for business purposes. A large room divided by a fixed or sliding partition is counted as two rooms, but one divided by curtains or portable screens is one room.

Private Household

A private household is taken to be one person or a group of persons living at the same address sharing common housekeeping (shared meals or shared lounge). A lodger who has one meal per day with a household (e.g. breakfast) is included with that household. However, a person having no meals with the household and no shared lounge or T.V. viewing area would be classified as a separate household, even if the kitchen and bathroom facilities were shared. Further, a group of persons sharing one room, but not necessarily eating together on a regular basis and not taking meals provided by another household in the same dwelling, would be classed as one household. Thus, a group of hostelry workers sharing a room would be classified as one household and not as several separate households.

Communal households

Communal households are taken as those which include five or more unrelated persons. In general these would be residential homes, hospitals, hotels and other large establishments. However, also included would be lodging houses classified as such and large shared flats or informal lodging houses discovered during the course of the census.

Tenure

Householders were asked whether their dwelling was inscribed on the Housing Register and then whether they owned or rented the dwelling. If owning, they were asked whether this was owned outright or through a loan, whether from the States or otherwise. If renting, they were asked whether furnished or unfurnished and whether from the States or from a private landlord.

7. Position in Household

The first named person on the census form was taken to be the householder. The householder was generally that person identified by the census enumerator as willing to be responsible for the completion of the personal and household details on the census form. Householders were asked to indicate the relationship of each person in the household to themselves.

8. Economically active persons

These were all persons other than visitors aged over 15 who were either in employment at any time during the week prior to census night; either as an employee, self-employed alone, or self-employed employing others. Employment includes, in addition to working for an employer, work on ones own account, part-time work even if only for a few hours, casual or temporary work of any kind and unpaid work in a family business.

9. Economically inactive

The economically inactive population comprises those who were either under 15 or full-time at school; wholly retired; full-time students; permanently sick or disabled, or otherwise full-time at home.

10. Duration of stay of migrants

The census analysis relies on the division of newcomers into three categories:-

- (a) Short-term. That is, being in the Island under a year. More specifically, anyone taking up residence in 1990 or 1991 will be classified as short-term.
- (b) One to Five years. That is, being in the Island between one and five years. More specifically, anyone taking up residence between and including the years of 1985 and 1989.
- (c) Over Five years. That is, being in the Island over five years. More specifically, anyone taking up residence in or before 1984.

COMMENTARY

INTRODUCTION

The States resolved on 27th July 1989 to conduct a Census on 21st April 1991; the Census Ordinance being approved on 13th December 1990. A Census has been held every ten years from 1821 until 1971, and every five years since 1971. The population reported has been censal until 1971, and resident from 1976 onwards. The censal population is a count of persons present in the Island on census night.

RESIDENT POPULATION

The term 'resident population' was taken to comprise all persons normally resident in Guernsey, Herm or Jethou at midnight on Census Day whether or not they were actually present in the Island at that time. Census Day in 1991 was 21st April. Residents returning to the Island after Census Day and before the end of July had an opportunity to complete a census form.

The census date coincided with that chosen by the United Kingdom, but not with that of Jersey. It occurred some three weeks after Easter in contrast to that of 1986, which was held one week before Easter (23rd March). Typically censuses are held in mid-April and so the 1991 census is comparable with most previous years.

The resident population was found to be 58,867, an increase of 3,385 over 1986. The population total and population increases for previous censuses are shown in Table 1. There were 2,718 residents absent from Guernsey and 1,799 non-residents or visitors present on census night. Thus the censal population was 57,948 as compared to the resident population of 58,867.

MIGRATION

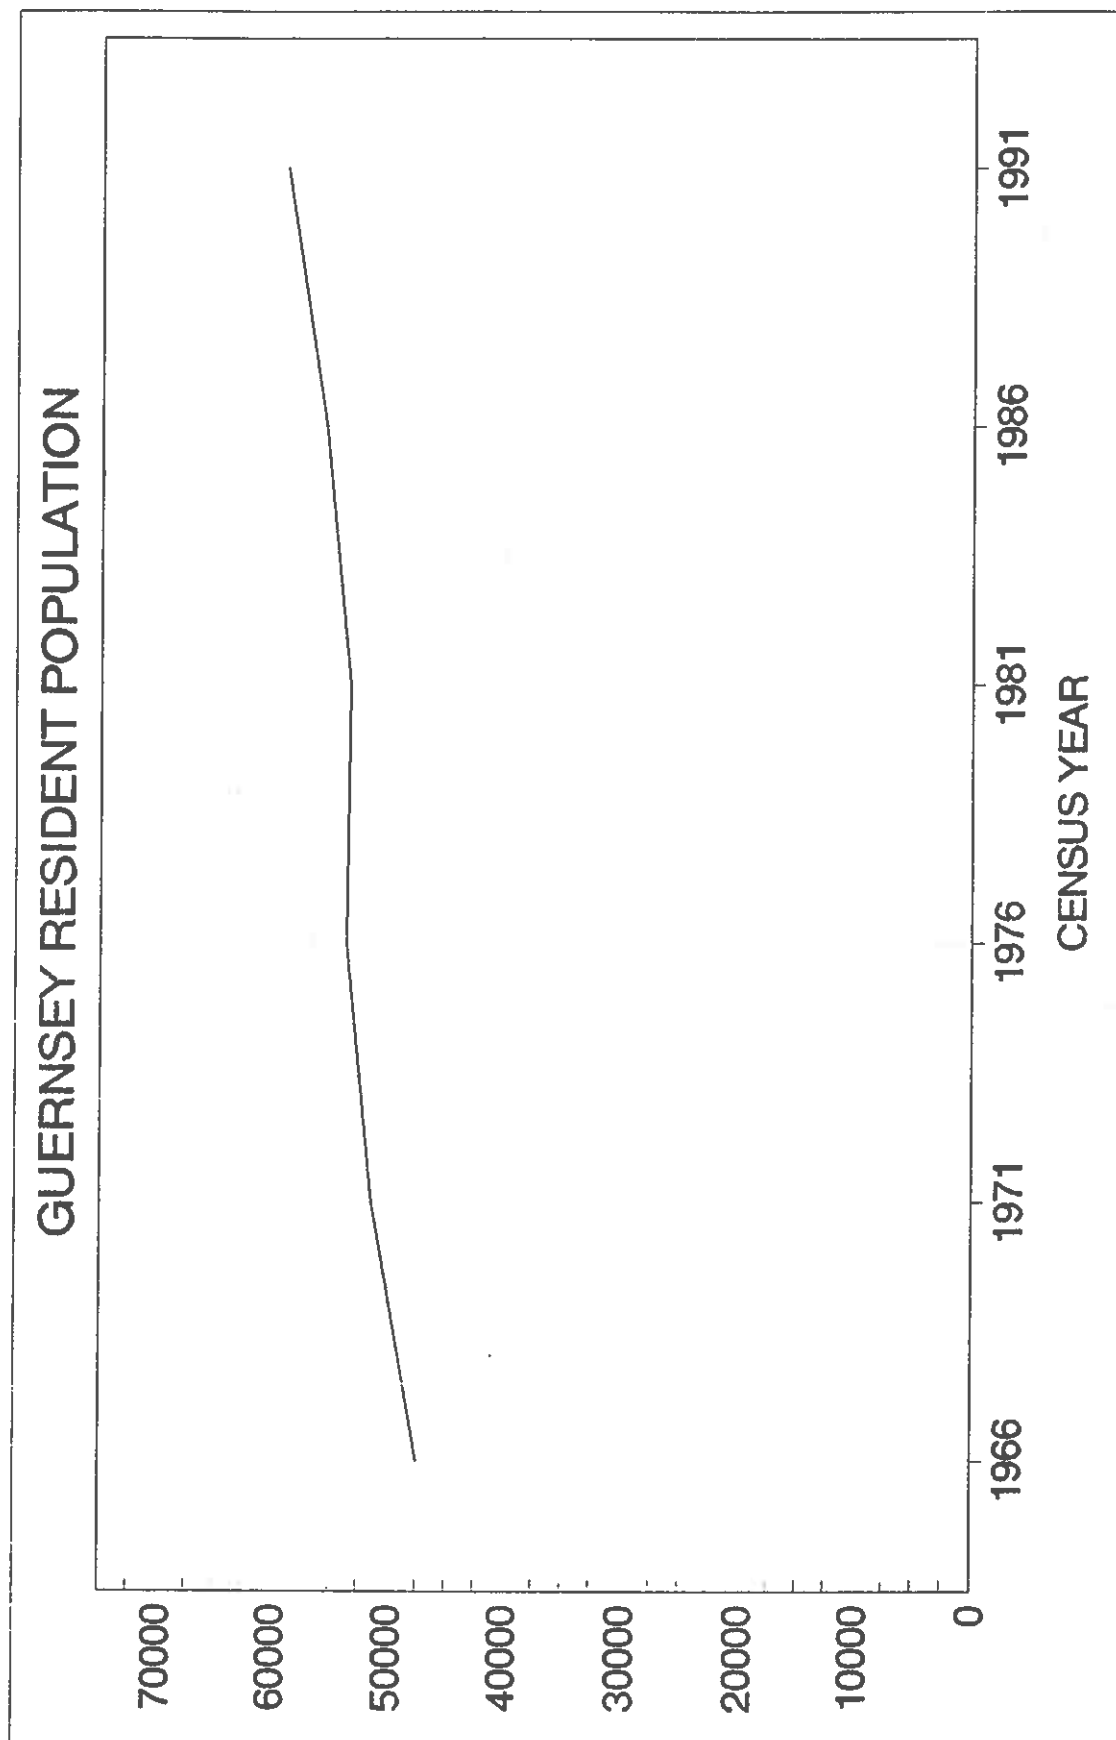

The increase of 3,385 from 1986 to 1991 can be divided between net migration and natural increase. Of this, 2,901 is due to net migration and 484 to natural increase. This is summarised below:-

Census and Natural Increase changes by Inter-Censal Periods

	1961-66	1966-71	1971-76	1976-81	1981-86	1986-91

NET MIGRATION	2139	3129	1741	-422	2138	2901
TOTAL POPULATION	47455	51458	53637	53313	55482	58867

BIRTHS AND DEATHS ARE FROM THE PREVIOUS 5 CALENDAR YEARS

FIGURE 1

PARISH

About two-thirds of the total increase in population has been in the parishes of Castel, Vale and St. Sampson's (Table 2).

The percentage changes by parish from 1971 onwards are shown below:-

Percentage change in Parish Population

	1971-76	1976-81	1981-86	1986-91
CASTEL	15.7	5.7	6.9	9.8
FOREST	-5.3	-6.9	.4	7.2
ST ANDREWS	2.8	-2.8	2.3	3.3
ST MARTINS	-1.4	-3.8	.6	3.5
ST PETER PORT	-.1	-4.3	3.2	3.5
ST PETERS	5.7	4.3	1.9	9.0
ST SAMPSONS	4.1	2.1	7.6	7.6
ST SAVIOURS	9.7	4.8	-1.2	.6
TORTEVAL	8.7	-3.6	5.1	5.4
VALE	9.2	.8	5.4	8.7
TOTAL	4.2	-6.0	4.1	6.1

Parish population totals for the ten parishes since 1901 are shown in Figures 2 and 3.

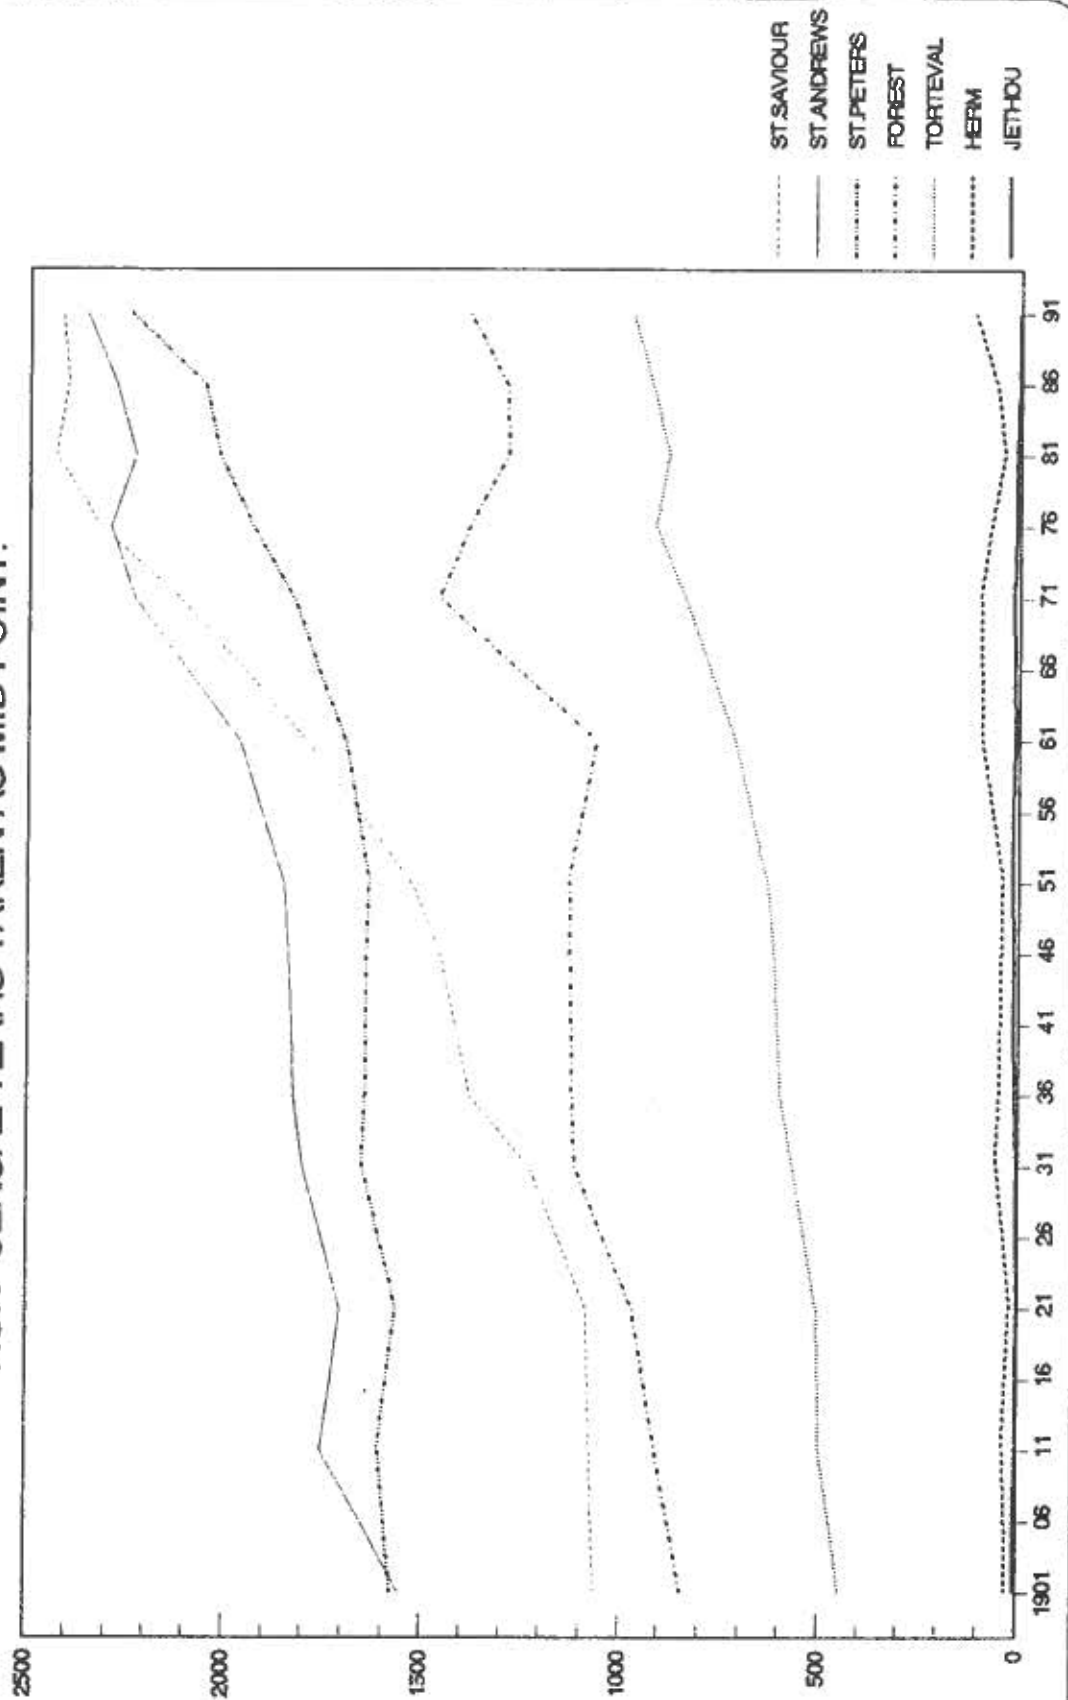

Figure 2

PARISH POPULATION 1901-1991 NON-CENSAL YEARS TAKEN AS MID POINT.

Figure 3

PARISH POPULATION 1901-1991 NON-CENSAL YEARS TAKEN AS MID POINT.

MIGRATION AND POPULATION

As stated in the 1976 Guernsey Census report, "It was States concern about the apparent rapid rise in the Island's population which led them as early as March 1973, to resolve that a limited housing census be carried out in 1976" (Billet d'Etat II 1973). In addition in 1975 a Working Party was formed to estimate population. This was dissolved in 1982, but again, continuing concern about population and unemployment led to the formation of the Population and Migration Committee on 30th January 1985, which has overseen the 1991 census.

It is against the concern for population and employment that the census of 1976 and later can be compared. The 1991 census shows the following main findings:-

1. A large increase in the number of economically active. We have to go back to the 1976 census to find an increase of a similar magnitude.
2. A similar level of immigration to previous censuses and a lower level of emigration comparable to the 1981-86 period.

Inter-Censal Emigration

CALENDAR YEARS	PERSONS TAKING UP RESIDENCE (INCLUDING BIRTHS)	BIRTHS	IMMIGRATION	NET MIGRATION	EMIGRATION	DEATHS	PERSONS DEPARTING (INCLUDING DEATHS)
1966-70	9061	3899	5162	3129	2033	3025	5058
1971-75	9837	3498	6339	1741	4598	3060	7658
1976-81	8452	3060	5392	-422	5814	2962	8776
1981-85	7898	3106	4792	2138	2654	3075	5729
1986-90	9163	3436	5727	2901	2826	2952	5778

BIRTHS AND DEATHS REFER TO PREVIOUS 5 CALENDAR YEARS

3. A larger natural increase than the last census due to those members of the last baby boom (up to 1973) reproducing.
4. A larger number (about 800) of short-term workers (staying under one year) in the population. Of these, 300 should be discounted because the 1991 census was one month later than the 1986 census. This leaves an increase of 500 short term workers in 1991 compared to 1986.

6. The remaining increase in the economically active is due to increased participation by females of all ages and males aged 55-59. Contrary-wise the economic activity of those aged 15-19 has fallen no doubt due to fewer leaving school before the age of 19.

There can be little doubt that the economic boom of recent years which peaked in 1986 has brought more immigrants (Table C in Appendix). States policies in recent years have encouraged the use of more short-term labour and the effectiveness of these policies is shown in the greater number of these workers in the population. The strength of the economy, in particular the Island's per capita income, which in 1991 stands at about £14,000 (higher than the U.K.), contributes to the lower rate of emigration experienced this decade.

A simplistic picture of migration

It is possible to give a simplistic picture of an "average" year in 1980s based on both the census results and the annual migration studies of persons working as recorded by the States Insurance Authority.

- (a) About 100 more of the population have become economically active each year.
- (b) Immigration has averaged about 800 per year (excluding short-term workers) roughly split between 500 economically active and 300 economically inactive.
- (c) The net increase in migrant population (that is excluding short-term workers) is about 450 per year with 300 of these being economically active.
- (d) By subtraction (column c below) emigration is 200 economically active and 150 economically inactive per year.

	a	b	c	d ²	e ³
	In	Local transfers ¹	Out	Net change	Net Migrants only
Economically Active	500	+100	200	400	300
Economically Inactive	300	-100	150	50	150
ALL	800	0	350	450	450

¹ Transfers between economic inactivity and economic activity.

² $d = a + b - c$

³ $e = a - c$

Note: The above table is based on a ratio of 1.60 between economically active and economically inactive on FIRST taking up residence.

Net migration 1986 to 1990

	Economically Active	Economically Inactive	Total
Short-term (under 1 year)	800		800
1-5 year immigrants	500	300	800
Over 5 year migrants	800	500	1,300
TOTAL	2,100	800	2,900

or, in more simplistic form:

Short-term	800	-	800
Others	1,300	800	2,100
TOTAL	2,100	800	2,900

Immigrants: 1991 and 1986 compared

A comparison between the 1986 and 1991 censuses show that the difference in immigration is due to both short-term and long-term workers. There has been a decrease in those who are economically inactive. It may be that States' policies of encouraging more short-term workers has prevented a larger increase in long-term workers and the economically inactive.

	1986	1991	Difference 1991 over 1986
Short-term			
Active	1,435	2,140	705
Inactive	1,047	776	-271
All	2,482	2,916	434
Long-term			
Active	1,510	2,111	601
Inactive	946	936	-10
All	2,456	3,047	591
Total			
Active	2,945	4,251	1,306
Inactive	1,993	1,712	-281
All	4,938	5,963	1,025

Note: This table includes both Guernsey and non-Guernsey born immigrants and differs from that of Table D in the Appendix which is for non-Guernsey born only.

AGE

The ages and five year age groups of the 1991 Census are shown in Table 3. Further combination into three age groups reveals:-

- (a) after falling for several years, the number of children has increased;
- (b) the continuing growth in those of working age (15-64);
- (c) the continuing smaller growth in those aged over 65.

The concern of many countries is the ageing population and the number of people of working age who support those who are not working (the dependency ratio). Projections of the 1986 census population showed an increasing ageing population in Guernsey which would need to be supported by proportionately fewer economically active persons. However, the 1991 census shows an increase in those of working age and this has the effect of reducing, in the short-term, concern about the number of dependants per person of working age. The 1991 census shows that most of the increase in population is among working age people (i.e. aged 15-64). (Figure 4)

Age Groups

AGE	1971	1976	1981	1986	1991

Figure 4

Comparison of the 1991 Census with 1986 Census age projections

The 1986 census ages were projected with an allowance for mortality. Comparison of these ages with the 1991 census age shows a higher than expected number of persons of working age, presumably because of net migration.

Age Groups and Projection

AGE	1986 Census	1986 Projected to 1991	1991 Census	Actual less Projected
0-14	9,692	9,356	9,999	643

65+	8,796	8,830	9,280	450
TOTAL	55,482	55,134	58,867	3,733

Age Group Percentages

	1986 Census	1986 Projected to 1991	1991 Census
0-14	17.5%	17.0%	17.0%
15-64	66.7%	67.0%	67.2%
65+	15.8%	16.0%	15.8%
TOTAL	100.0%	100.0%	100.0%

SEX AND MARITAL STATUS

The number of females relative to males has increased.

Male and Female Differences

It should be noted that the increase in female population is, in the main, due to temporary workers, e.g. from Portugal, who may not remain within the population at the time of the 1996 census.

SEX	1971	1976	1981	1986	1991
Male	24,792	25,909	25,701	26,867	28,297
Female	26,666	27,728	27,612	28,615	30,570
Difference	-1,874	-1,819	-1,911	-1,748	-2,273

Marital Status

Most of the long-term trends already seen in the 1986 census have been continued into the 1991 census. There is an increase in single persons as well as those divorced and a corresponding decrease in those married and widowed. This is in keeping with social trends within the U.K.

Census Marital Status: Percentage of Population aged over 15

MARITAL STATUS	1971	1976	1981	1986	1991
Single	19.1	19.8	20.9	23.1	25.7

Widowed	9.7	9.4	9.5	9.2	8.9
Divorced	1.3	2.1	2.9	4.1	6.6
TOTAL	100.0	100.0	100.0	100.0	100.0

ECONOMIC ACTIVITY

1. Definition

The economically active were all persons aged over 15 who were in employment at any time during the week prior to census night.

Conversely, the economically inactive were those not in employment at the time of the census, even though they may have worked at other times of the year, for example in summer jobs. Many of these persons would have considered themselves full-time at home. Those at school or university during term time were excluded, even if they did paid work during the holiday period around the census.

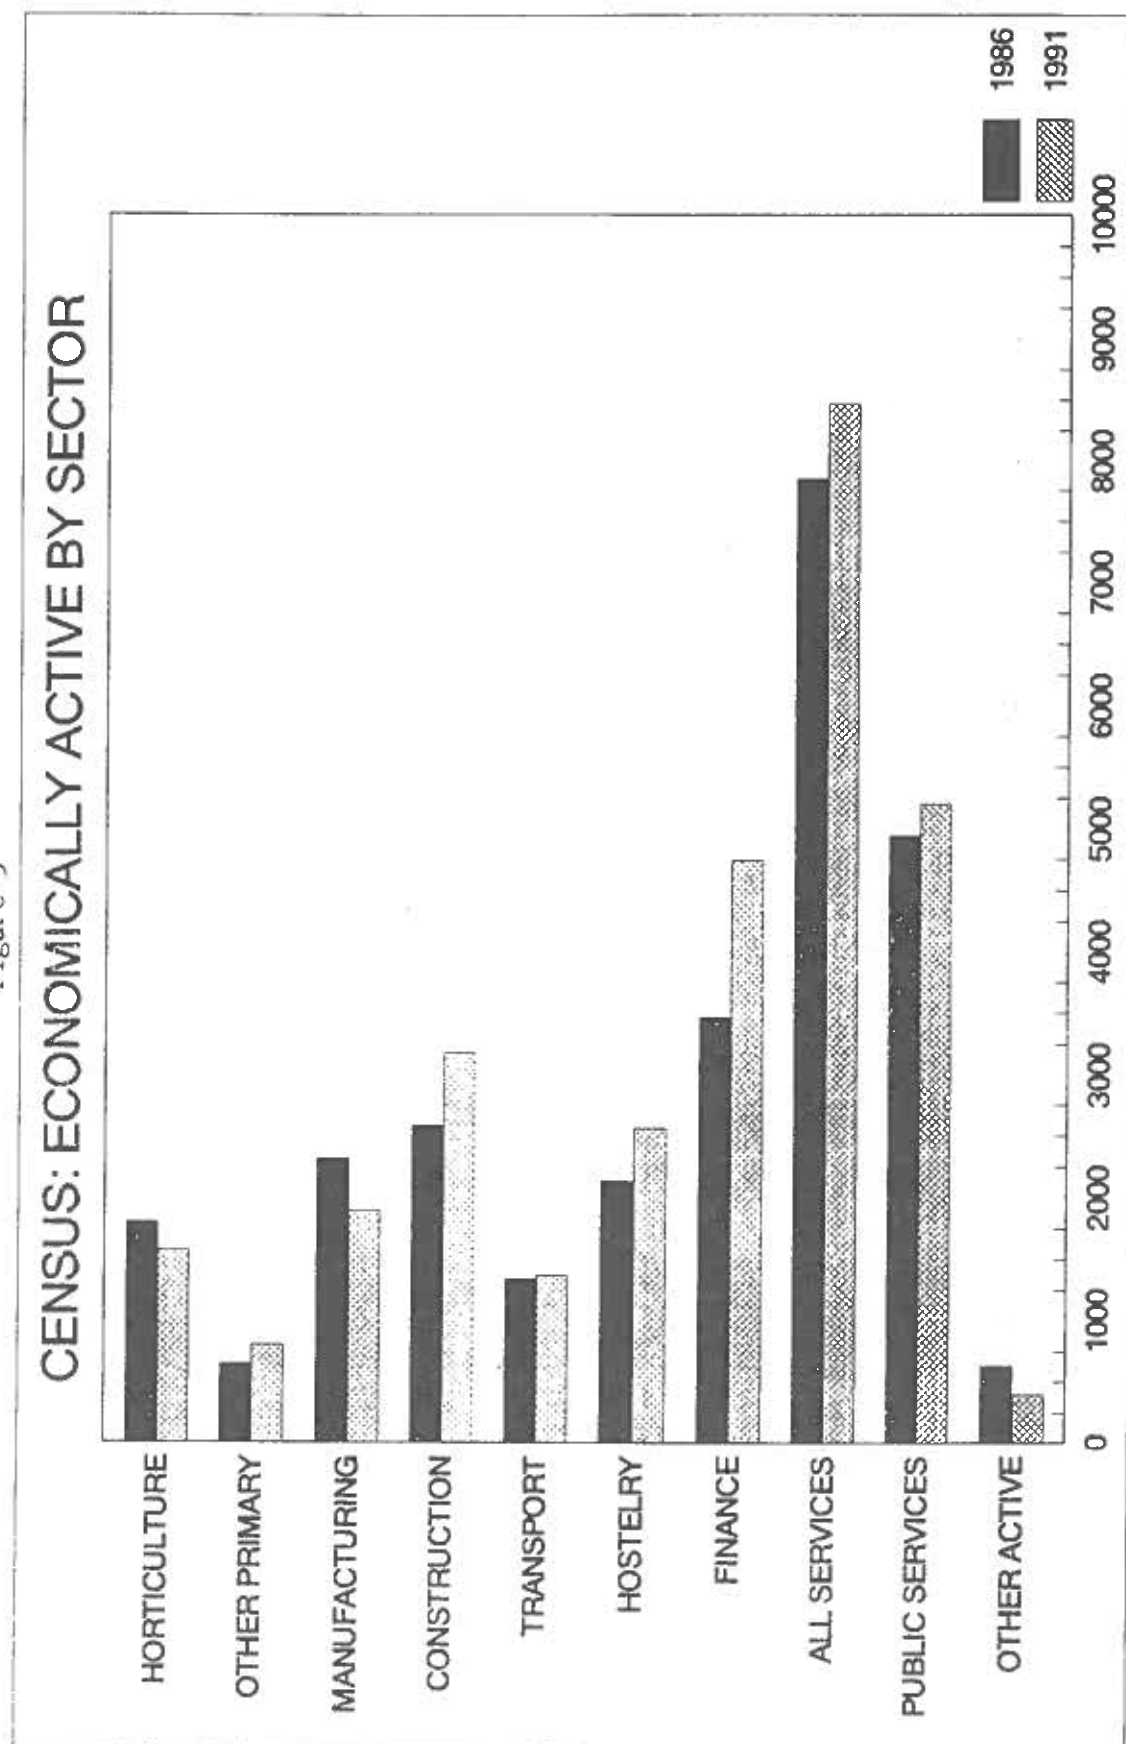

2. Where they work

The total economically active have risen from 27,689 in 1986 to 30,162 in 1991, an increase of 8.9%. This compares with an increase of 5.0% in the 1986 census. The most significant increase was in the finance sector, which has increased by 37% from 3,464 in 1986 to 4,743 in 1991. There were also increases in construction, selling and health, as well as a significant increase in hostelry. Much of this latter increase is due to residential homes (which are considered part of hostelry) and restaurants rather than hotels. There has been a decline in the number employed in manufacturing and horticulture. The move from a "producing" economy to a "service" economy is further highlighted by the total increase of those in services (personnel, recreational, cultural, business and information). The service sector increased by 613, reflecting increased use of services by both businesses and individuals. The increase of 593 in construction reflected the buoyancy in building at the time but is overstated because some of the "other active" classified in 1986 were employed in construction. There was a decline of 416 in manufacturing. (Figure 5)

1986 Census: Economically Active by Sector

	1986	1991	Difference
Horticulture	1,798	1,573	-225
Other Primary	642	793	151
Manufacturing	2,309	1,893	-416
Construction	2,578	3,171	593
Transport	1,342	1,369	27
Hostelry	2,131	2,556	425
Finance	3,464	4,743	1,279
All Services	7,853	8,466	613
Public Services	4,947	5,200	253
Other Active	625	398	-227
TOTAL	27,689	30,162	2,473

Figure 5

3. Occupations of the Economically Active

The comparison of occupation between the 1991 and 1986 census reflects the changes in the economy (Table 8).

Growers	-273
Electronic workers	-353
Accommodation and	
Catering workers	-475
Finance/Legal/Accountant Managers	+332
Hostelry Managers	-197

Many occupations were not as well coded in 1986 as they were in 1991, so making detailed comparisons difficult.

4. Economically Active by Age

The economically active have increased to 51.2% of the population. Thus, the trend towards greater economic activity within the population has continued. The increase in those economically active from 50.0% to 51.2% is larger than the increase from 49.5% to 50.0% over the period 1981 to 1986. In numbers the economically active of working age have increased from 26,848 to 29,364, an increase of 2,516. (Net migration increased by 2,901). The economically active within the 15 to 64 age group was 74.2%, a considerable increase over the last census. This is mainly due to net migration, and secondly to internal factors such as the increased participation of married women in the labour force.

Census: Economic Activity by Age & Year

Female				60.2	63.3

5. Economically Active by Sex

After being stagnant since 1976, the number of economically active males has increased by 1,055 during the intercensal period 1986 to 1991. There has been a corresponding increase for females of 1,418. Much of this increase has been due to increased economic activity among those of working age (15 to 64) and thus the long-term trend towards females being economically active continues. These increases mean that 56.8% of those economically active are male and 43.2% female.

6. Employment Status

The continuing trend to those working as employees rather than being self-employed has continued in 1991, with 26,017 classifying themselves as employees compared to 23,282 in 1986. This means that the self-employed are a decreasing proportion of the Island's work force.

Economically Active by Work Status - Numbers

OCCUPIED HOUSEHOLDS

Households were divided between communal and private.

Communal households

Communal households are taken as those which include five or more unrelated persons. In general these would be residential homes, hospitals, hotels and other large establishments. However, also included would be lodging houses classified as such and large shared flats or informal lodging houses discovered during the course of the census.

A total of 432 communal establishments containing 3,464 persons were found as shown in Table 13. This was a considerable increase in the numbers found in previous censuses.

Private households

There were 21,215 private households containing 55,403 residents. The trend in household creation shows a large increase in the last five years; a similar magnitude to that of 1971 to 1976. The increase in household formation has meant a consequent fall in the number of persons per household; density has fallen from 2.70 in 1986 to 2.61 in 1991.

	Private Households	Five year Change	Ten year Change
1951	12,411	-	
1961	13,610	-	1,199
1971	16,446	-	2,836
1976	18,127	1,681	
1981	18,707	580	2,261
1986	19,660	953	
1991	21,215	1,544	2,497

n/a - Not available

Household tenure

The 1991 Census showed an increase in the percentage of households in private let (21.2% compared to 20.7% in 1986) and States let (10.4% compared to 10.1% in 1986) and a consequent decrease in owner occupied households (68.5% compared to 69.2% in 1986). In actual numbers, owner occupied households have risen from 13,606 to 14,516 from 1986 to 1991.

The density (number of persons per household) is smallest in private lets and greatest in States lets. Owner occupied densities are somewhere in between. In all types of tenure, household density has fallen each census since 1971. This is consistent with modern economic trends toward small households.

Domestic Facilities

The exclusive use of a bath or shower and the exclusive use of an indoor toilet has now become almost ubiquitous. Rented accommodation from the States is the leading category of tenure. Just over 50% of all households have central heating in all rooms.

APPENDIX

APPENDIX

MIGRATION AND GUERNSEY BORN

1. A comparison between the 1986 and 1991 censuses shows many similarities:
 - (a) The numbers of returning Guernsey born in the intercensal periods 1981-85 (913) and 1986-90 (862) are quite similar.
 - (b) Excluding Guernsey born persons, there was an increase of 687 in the number of intercensal immigrants (from 4,178 in the period 1981 to 1985 to 4,865 in the period 1986 to 1990).
 - (c) The summary table in paragraph 2 shows that the increase was almost entirely due to economically active persons.
 - (d) Many of the increased migrants are short-term workers.

2. Economic sectors of immigrants

	1981-1985		1986-1990	
	All	Excluding Guernsey born	All	Excluding Guernsey born

(Portugal)	36	346

Detailed analyses are shown in Tables A and B of this Appendix.

GUERNSEY BORN

Birth Place

The number of persons who are Guernsey born in the population has increased more slowly than the overall population. Consequently the percentage of Guernsey born in the population has declined steadily from 75.7% in 1951 to 64.5% in 1991.

Numbers of Persons Born in Guernsey

	Guernsey born	Persons continually resident since birth	Persons taking up residence in previous 5 years	Persons taking up residence in census year
1951	33,045			
1961	33,080			
1971	36,741

For each of the economic sectors the following applies:-

The short-term workers for 1986 have been taken as (a) all those who entered in 1986 plus (b) all those who entered in 1985 but were no longer present in the 1991 census.

The short-term workers for 1991 have been taken as (a) all those who entered in 1991 plus (b) all those who entered in 1990 less the number remaining in 1991 of those who entered in 1985.

Note: The 1991 census was some three months later than the 1986 census. About 300 more short-term workers would be present in 1991.

1991 GUERNSEY CENSUS

(includes Herm and Jethou)

H form for Private Households

To the Head or Joint Heads or members of the Household

The census provides reliable statistical information about people and households. The information helps the States plan and run services and to distribute resources to best effect.

There is a legal obligation to complete this form and any person knowingly supplying false information or refusing to complete the form is liable to prosecution and a fine or conviction.

Your answers will be treated in the strictest confidence and will be used only for statistical purposes. No information on identified individuals or households will be passed to anyone outside the Census organisations.

If any member of the household who is aged 15 or over does not wish you or other members of the household to see his or her personal information, please ask the Enumerator for a separate form and an envelope. The Enumerator will then explain how to proceed.

Please have the completed form ready for collection by the Enumerator who will call on Monday 22nd April or soon after.

F. N. LE CHEMINANT
Chief Registrar

Please read these instructions before filling in the form

Check **Panel B**.

Answer questions **H1** and **H2** on this page and **H3** to **H5** on the back page about your household and the rooms which it occupies.

A Household:

A household comprises either one person living alone or a group of persons (not necessarily related) living at the same address with common housekeeping – that is, sharing at least one meal a day or sharing a living room or sitting room.

Persons staying temporarily with the household are included.

If there is more than one household in this building, answer for your household only.

When you have answered the household questions, answer the questions on the inside pages about each member of your household.

Then complete **Panel C** and **Panel D** on the back page.

Answer each question by ticking the appropriate box or boxes ☒ where they are provided.

Please use ink or ball point pen.

Panel A

To be completed by the Enumerator

Serial Number

☐

☐

☐

☐

☐

☐

☐

☐

If not a private household otherwise name

H1 Rooms

Please count the number of rooms your household has for its own use.

Do not count:

small kitchens under 2 metres (6 feet 6 inches) wide

bathrooms

toilets

Do count:

living rooms

bedrooms

kitchens at least 2 metres (6 feet 6 inches) wide

all other rooms in your accommodation

Total number of rooms is

Panel B

To be completed by the Enumerator and amended, if necessary, by the person(s) signing this form.

Tick one box to show the type of accommodation which this household occupies.

A caravan or other mobile or temporary structure

☐

1

A whole house or bungalow that is

detached

☐

2

semi-detached

☐

3

terraced (includes end of terrace)

☐

4

The whole of a purpose built flat or maisonette

in a commercial building (for example in an office building or hotel or over a shop)

☐

5

in a block of flats or tenement

☐

6

Part of a converted or shared house or flat

separate entrance into the building

☐

7

shared entrance into the building

☐

8

H2 Accommodation

If box 7 or box 8 in Panel A is ticked, tick one box below to show the type of accommodation which your household occupies.

A one roomed flatlet with private bath or shower, WC and kitchen facilities.

☐

1

One room or bedsit, not self contained (to move from your room to bathroom, WC or kitchen facility you have to use a hall, landing or stairway open to other household(s)).

☐

2

A self-contained flat or accommodation with 2 or more rooms, having bath or shower, WC and kitchen facilities all behind its own private door.

☐

3

2 or more rooms not self-contained (to move between rooms or to bathroom, WC, or kitchen facilities you have to use a hall, landing or stairway open to other household(s)).

☐

4

Please turn over ➡

1-3 Name, sex and date of birth of persons to be included

Important please read the notes before answering the questions.

In answering the rest of the questions please include:

- ▶ all person's who spend census night (21-22 April) in this household.
- ▶ any other persons who are usually members of the household but on census night are absent on holiday, at school or college, or for any other reason, even if you know they are being included on another census form elsewhere.
- ▶ anyone who is a visitor who spends the Census night in the household
- ▶ persons living temporarily with the household on census night.
- ▶ any newly born baby born before the 22 April, even if still in hospital. If not yet given a name write **BABY** and the surname.

Write the names in **BLOCK CAPITALS** starting with the head or joint head of household

4 Marital status

On the 21 April what is this person's marital status?

If separated but not divorced please tick 'Married (first marriage)' or 'Re-married' as appropriate.

Please tick one box.

5 Relationship in household

Tick the box which indicates the relationship of each person to the person in the first column.

A step child or adopted child should be included as the son or daughter of the step or adoptive parent.

Write in relationship of 'Other relative' - for example, father, daughter-in-law, niece, uncle, cousin.

Write in position in household of an 'Unrelated' person for example, boarder, housekeeper, friend, flatmate, foster child.

6 Whereabouts on night of 21-22 April 1991

Please tick the appropriate box to indicate where the person was on the night of 21-22 April 1991.

7 Usual address

If the person usually lives here please tick 'This address'.

If not tick 'Elsewhere' and write in the person's usual address.

A person who is working, including contract work, or seeking work in Guernsey should put their Guernsey address.

A person visiting Guernsey for one month or more should put their Guernsey address

For students and children away from home during term time, the home address should be taken as the usual address.

8 Usual address one year ago

If the person's usual address one year ago, on the 21 April 1990, was the same as his/her current usual address (given in answer to question 7), please tick 'Same'. If not, tick 'Different' and write the usual address one year ago.

If everyone on the form has moved from the same address, please write the address in full for the first person and indicate with an arrow that this applies to the other people on the form.

For a child born since the 21 April 1990, tick 'Child under one'.

For those aged 15 and more – Activity Last Week

14

Whether working, retired, looking after the home, etc. last week.

Which of the following things was the person doing last week? Please tick the ones that apply.

Casual or temporary work should be included in boxes 1, 2 or 3. Also tick boxes 1, 2 or 3 if the person had a job last week but was off sick, on holiday, temporarily laid off or on strike.

Include persons wanting a job but prevented from looking by holiday or temporary sickness.

Do not count training given or paid for by an employer

Was working for an employer full time or part time (one hour or more per week) ☐ 1

Was self employed, employing other people ☐ 2

Was self employed not employing other people ☐ 3

Was on a States employment training scheme ☐ 4

Was unemployed and looking for a job ☐ 5

Was at school or in other full time education ☐ 6

Was unable to work because of long term continuous sickness or disability lasting over six months ☐ 7

Was retired from paid work ☐ 8

Was otherwise at home, e.g. looking after the home or family ☐ 9

Other, please specify

Questions about present or previous employment

For persons, in a job last week, or having had a paid job within the last 10 years, complete questions 15 to 17 with respect to the current or most recent job.

15 Occupation

Give the full title of the person's present or last job and describe the main things he/she does or did in the job.

At part a. give the full title by which the job is known, for example: 'packing machinist'; 'poultry processor'; 'jig and tool fitter'; 'supervisor of typists'; 'accounts clerk' – rather than general titles like 'machinist'; 'process worker'; 'supervisor' or 'clerk'.

At part b. write down the main things the persons actually does or did in the job. If possible ask him/her to say what these things are and write them down.

If here on contract work please specify occupation and put contract work in brackets.

16 Name and business of employer (if self-employed give the name and nature of the person's business)

At part a., give the name of the employer. Give the trading name, if one is used. Do not use abbreviations or initials.

States' employees are asked to give the States' department for which they work (e.g. Board of Health).

If a non-Guernsey based employer, please specify country of employer in brackets.

17 Hours worked per week

How many hours usually worked per week?

If you worked last week put the hours worked last week

a. First job title 	a. First job title
b. Main things done in first job. 	b. Main things done in first job.
c. Second job title if applicable 	c. Second job title if applicable

20 **Degrees professional and vocational qualifications**

Has the person obtained any qualifications such as:

- degrees, diplomas, HNC, HND, BTECH
- nursing qualifications
- teaching qualifications
- graduate or corporate membership of professional institutions,
- other professional, educational or vocational qualifications, such as City and Guilds, RSA, Pitman?

Do not count qualifications normally obtained at school such as GCE, CSE, GCSE, SCE and school certificates.

If box 2 is ticked write in all qualifications even if they are not relevant to the person's present job or if the person is not working.

Please list the qualifications in the order in which they were obtained.

For persons with school teaching qualifications give the full title of the qualification, such as 'Certificate of Education' and the subject(s) which the person is qualified to teach. The subject 'education' should then only be shown if the course had no other subject specialisation.

If more than three, please enter in a spare column and link with an arrow.

H3 Tenure

Tick the box which best describes how you and your household occupy your accommodation.

If buying by stages from a Housing Association (under shared ownership, co-ownership or equity sharing scheme) answer as an owner-occupier.

If your accommodation is occupied by lease originally granted for, or extended to more than 21 years, answer as an owner occupier. For shorter leases answer 'By renting'.

Private Landlords may be persons or companies or other organisations apart from those mentioned at 5, 6 or 7 above.

As an owner-occupier:

- owning the property outright (no loan) ☐ 1
- buying a property through a
 - States Loan ☐ 2
 - Other Loan ☐ 3
 - Both ☐ 4

By renting, rent free or by lease:

- from States of Guernsey ☐ 5
- from a private landlord furnished ☐ 6
- from a private landlord unfurnished ☐ 7

In some other way:

- please give details ☐ 8

H4 Open or Local Market

Is the dwelling inscribed on the Housing Register (i.e. Open Market)?

- Yes (open market) ☐ 1
- No (local market) ☐ 2

H5 Amenities

Does your household - that is, you and any persons who usually live here with you - have the use of:

- a. A bath or shower? ☐ 1 Yes - for use only by this household
- ☐ 2 Yes - for use also by another household
- ☐ 3 No - no bath or shower available

- b. A flush toilet (WC) with entrance inside the building?
- ☐ 1 Yes - for use only by this household
- ☐ 2 Yes - for use also by another household
- ☐ 3 No - flush toilet with outside entrance only
- ☐ 4 No - no flush toilet indoors or outdoors

- c. Central heating in living rooms and bedrooms (including night storage heaters, warm air or under-floor heating) whether actually used or not?
- ☐ 1 Yes - all living rooms and bedrooms centrally heated
- ☐ 2 Yes - some (not all) living rooms and bedrooms centrally heated
- ☐ 3 No - no living rooms or bedrooms centrally heated

H6 Cars and vans

Please tick the appropriate box to indicate the number of cars and vans normally available for use by you and members of your household (other than visitors).

- Include any car or van provided by employers if normally available for use by you or members of your household, but exclude vans used only for carrying goods
- None ☐ 0
- One ☐ 1
- Two ☐ 2
- Three or more ☐ 3

H7 Sewage Arrangements

Is your accommodation connected to a public sewer, a cesspit, a septic tank, or is there some other sewage arrangement?

- Public Sewer (connected after 1975) ☐
- Public Sewer (connected prior to or during 1975) ☐
- Communal Cesspit ☐
- Individual Cesspit ☐
- Communal Septic Tank ☐
- Individual Septic Tank ☐
- None of the above ☐

Panel C

Was there anyone else (such as a visitor) here on the night of 21st April whom you have not included because there was no room on the form?

No ☐

Yes ☐

If yes ticked, please ask the Enumerator for another form

Have you left anyone out because you were not sure whether they should be included on the form?

No ☐

Yes ☐

If yes ticked, please give their name and address and the reason why you were not sure about including them

Name

Reason

Name

Reason

For office use only ☐

Panel D

Before you sign the form will you please check

- ☐ that all questions which should have been answered have been answered for every member of your household
- ☐ that you have included everyone who spent the night of 21-22 April in your household
- ☐ that you have included everyone who usually lives here but was away from home on the night of 21-22 April
- ☐ that no visitors, boarders or newly born children, even if still in hospital, have been missed.

May the Enumerator telephone you if we have a query on your form? If so, please write your telephone number here
