## Guernsey Annual Earnings Bulletin

31st December 2014 - Issue date 30th March 2015

## POLICY COUNCIL

the states of guernsey

### 1.1 Introduction

The Guernsey Annual Earnings Bulletin monitors average earnings of all employees in the Bailiwick (excluding Sark) and provides a headline analysis of trends in average earnings. The data shown in Table 2.1.1 have been published in the States Strategic Monitoring Report (see www.gov.gg/kpi) since 2011. However, this bulletin contains additional information, which first became available in 2012. All monetary values presented are nominal unless otherwise stated.

Data is supplied by the Social Security Department and includes all (full and part-time) employed people earning over the lower earnings limit. Incomes from self-employment, secondary employments and other non-earned sources are not included. This, therefore, gives a measure of the average change in primary earnings from employment and reflects the underlying change.

### 1.2 Headlines

- The median of all employees' earnings was $£ 30,290$ in 2014 , which, compared with 2013 , is $2.2 \%$ higher in nominal terms and 1.0\% higher in real terms.
- The median of male employees' earnings was $£ 33,280$ in $2014,1.6 \%$ higher in nominal terms and 0.4\% higher in real terms than in 2013.
- The median of female employees' earnings was $£ 27,040$ in $2014,4.0 \%$ higher in nominal terms and 2.8\% higher in real terms than in 2013.
- Employees aged 40 to 44 had the highest median earnings in 2014 at $£ 37,180$, whilst 15 to 19 year old employees had the lowest median earnings at $£ 15,990$.
- The median earnings of finance sector employees was $41.2 \%$ higher than the overall median in 2014.

| :---: | :---: | :---: | :---: | :---: |
| 2005 | 15,600 | 20,007 | 33,020 | 42,348 |
| 2006 | 15,990 | 19,636 | 34,580 | 42,465 |
| 2007 | 16,900 | 19,784 | 36,400 | 42,611 |
| 2008 | 17,680 | 20,460 | 38,610 | 44,680 |
| 2009 | 18,460 | 20,894 | 39,650 | 44,878 |
| 2010 | 18,720 | 20,721 | 40,300 | 44,607 |
| 2011 | 19,240 | 20,641 | 41,990 | 45,048 |
| 2012 | 19,890 | 20,673 | 43,160 | 44,859 |
| 2013 | 20,150 | 20,387 | 43,550 | 44,062 |
| 2014 | 20,670 | 20,670 | 44,980 | 44,980 |

Earnings data is recorded by the Social Security Department each quarter and is used to calculate median earnings of employees. The median is the middle value when data are sorted into numerical order. It is a measure of earnings from primary employment, unadjusted for the number of hours worked i.e. the level can be impacted both by changes in the number of hours worked and rates of pay. The measure does not include earnings which employees may also gain from self-employment, secondary employments or income from any other sources.

Figure 2.1.1 and Table 2.1 .1 show that median earnings have increased in nominal terms every year since 2005, when data first became available. Nominal median earnings increased by $2.2 \%$ between 2013 and 2014 to £30,290.

Real earnings are presented to show trends after the effects of inflation have been removed. All real figures shown in this report have been adjusted to 2014 prices.

Median annual earnings, in real terms, were 1.0\% higher in 2014 than in 2013.

The lower and upper quartile earnings for 2014 and the previous nine years are presented in Table 2.1.2. The inter-quartile range increased by $2.7 \%$ in real terms over the year between 2013 and 2014 and increased by $1.4 \%$ over the five years ending in 2014. In contrast, the inter-quartile range decreased over the five years ending in 2013. Prior to 2013, there were increases in the inter-quartile range over the five year periods ending in 2010, 2011 and 2012, indicating that earnings from employment were becoming more widely spread. Whilst there has been an increase in the inter-quartile range in the five years ending in 2014, this is a smaller increase than recorded in the previous years.

Figure 3.1.1: Distribution of earnings (all employees) at 2014

The percentage of employees in each income band for 2014 is shown as a distribution graph in Figure 3.1.1. It provides a comparison between earnings of all employees, male and female employees.

Please note that differences between male and female earnings may result from differences in numbers of hours worked as well as differences in rates of pay for different jobs. This is not intended to be used as a measure of pay equality.

The distribution of all earnings shows a peak in the $£ 20,801$ to $£ 26,000$ band. The highest percentage of female employees' earnings was in the $£ 15,601$ to $£ 20,800$ category, whilst that for male earnings showed a peak in the $£ 26,001$ to $£ 31,200$ category.

Median earnings and annual percentage changes for male and female employees are presented in Tables 3.1.1 and 3.1.2. The median earnings of male employees was $£ 33,280$ in 2014, $0.4 \%$ higher than in 2013 in real terms. Female employees' earnings increased, in real terms, by $2.8 \%$ between 2013 and 2014 to $£ 27,040$.

### 4.1 Median, lower quartile and upper quartile earnings - all employees by age

Table 4.1.1: Median earnings (all employees) by age at 2014

| Age group | Lower quartile earnings (£) | Median earnings <br> (£) | Upper quartile earnings (£) |
| :---: | :---: | :---: | :---: |
| 15-19 | 12,740 | 15,990 | 19,500 |
| 20-24 | 19,760 | 26,780 | 33,800 |
| 25-29 | 20,670 | 28,080 | 37,050 |
| 30-34 | 23,920 | 33,670 | 46,540 |
| 35-39 | 24,180 | 35,620 | 51,610 |
| 40-44 | 25,610 | 37,180 | 54,990 |
| 45-49 | 24,440 | 35,750 | 54,600 |
| 50-54 | 22,880 | 33,930 | 51,350 |
| 55-59 | 21,710 | 32,240 | 47,710 |
| 60-64 | 18,330 | 27,300 | 38,610 |
| 65 \& over | 12,220 | 18,850 | 30,030 |

Figure 4.1.1: Median, lower and upper quartile earnings (all employees) by age at 2014

Figure 4.1.2: Median earnings (all employees) by age in 2014 compared with 2009

Table 4.1.1 and Figure 4.1 .1 show the median, lower and upper quartile earnings of all employees by age group. The highest median earnings $(£ 37,180)$ occurred in the 40-44 age group. The lowest median earnings were in the youngest and oldest age groups, at $£ 15,990$ and $£ 18,850$ respectively.

This could result more from differences in numbers of hours worked than differences in rates of pay.

The largest inter-quartile range was in the $45-49$ age group ( $£ 30,160$ ) and the smallest was in the 15-19 age group ( $£ 6,760$ ). This shows the difference in the relative spreads of earnings by age group.

Figure 4.1.2 also shows median earnings of all employees by age group. It provides a comparison between 2009 and 2014. Increases can be seen across all age groups. The highest median earnings level in 2009 $(£ 32,500)$ was in the 35-39 age group, compared with the 40-44 age group in 2014.

Median earnings of all employees by sector are presented in Table 5.1.1 and in Figure 5.1.1.

Finance sector employees had the highest median earnings ( $£ 42,770$ ) in 2014, which was $41.2 \%$ higher than the overall median.

The Hostelry sector had the lowest median earnings $(£ 17,810)$ in 2014 which was $41.2 \%$ lower than the overall median.

### 5.1 Median earnings - all employees by sector

Table 5.1.1: Median earnings (all employees) by sector at 2014

| Sector | Lower quartile earnings (£) | Median earnings <br> (£) | Upper quartile earnings (£) |
| :---: | :---: | :---: | :---: |
| Agriculture, horticulture, fishing and quarrying | 19,110 | 26,650 | 35,100 |
| Manufacturing | 18,850 | 26,260 | 34,580 |
| Electricity, gas, steam and air conditioning supply | 28,470 | 34,840 | 45,500 |
| Water supply, sewerage, waste management and remediation activities | 22,620 | 30,290 | 35,880 |
| Construction | 23,790 | 30,940 | 38,610 |
| Wholesale, retail and repairs | 16,380 | 22,360 | 30,680 |
| Hostelry | 14,950 | 17,810 | 23,010 |
| Transport and storage | 21,320 | 26,650 | 35,360 |
| Information and communication | 26,650 | 35,750 | 49,790 |
| Finance | 29,510 | 42,770 | 65,130 |
| Real estate activities | 21,970 | 32,760 | 53,560 |
| Professional, business, scientific and technical activities | 26,780 | 38,740 | 60,060 |
| Administrative and support service activities | 19,500 | 26,130 | 36,400 |
| Public administration | 23,660 | 33,670 | 47,060 |
| Education | 18,330 | 26,390 | 47,450 |
| Human health, social and charitable work activities | 16,250 | 22,490 | 31,200 |
| Arts, entertainment and recreation | 16,770 | 24,310 | 32,500 |
| Other service activities | 14,170 | 18,720 | 26,000 |
| Activities of households as employers | 14,170 | 21,190 | 27,300 |

Figure 5.1.1: Median earnings (all employees) by sector at 2014

### 6.1 Methodology

The data used in this bulletin are supplied by the Social Security Department and include all employed people in the Bailiwick (excluding Sark) earning over the lower earnings limit. The numbers of hours worked by people are not currently recorded, so the trends in this bulletin reflect variations in hours worked as well as levels of pay.

Only incomes from primary employment are included. Other incomes which people may receive from self-employment, secondary employments and other non-earned sources (such as benefits, property or investments) are not included.

Data are based on the weekly earnings recorded at regular points throughout the year. These include a pro rata amount for wages paid as a regular salary or wages paid for hours worked. Annual earnings are derived by scaling up the weekly figures.

Nominal earnings are expressed at monetary values of the stated time period, i.e. without making allowance for changes in inflation over time. Real earnings are presented to show trends after the effects of inflation have been removed. All real figures shown in this report have been adjusted to 2014 prices.
