

STATES OF DELIBERATION

27th May, 2009

Billet d'État No. XII

Article 1

AMENDMENT

Proposed by: Deputy J A B Gollop

Seconded by: Deputy

Environment Department

Proposed Amendments to the Urban Area Plan - Review No.1

Longue Hougue Land Reclamation Site and Key Industrial Area Solid Waste Management

To insert at the end of the words in the Proposition:

“, but to direct that in respect of any significant waste planning applications all of the Inspector's findings and observations should be taken into account, and particularly:

1. That all necessary licences and permits will be obtained prior to planning permission being granted.
2. That the Public Health Department will enforce the necessary standards, especially with respect to pollution control and environmental protection, and effects on the health of neighbours.
3. That the Environment Department will not give permission for a plant structure that had a significant larger capacity than necessary, and that every effort is made to re-use and recycle the waste.
4. That Planning Policy needs to be sufficiently flexible to permit approval of the best technical solutions available for the treatment and disposal of the Island's waste.”.
