

STATES OF DELIBERATION

29th July, 2009

**Billet d'État No. XXI
Article 12**

Requête

Kerbside Collection of Recyclables

AMENDMENT

Proposed by: Deputy B M Flouquet

Seconded by: Deputy S J Ogier

In Proposition 1, to delete “January 2010” and substitute “May 2010”.

EXPLANATORY NOTE

The Public Services Department is of the firm opinion that if the States wish to receive a properly considered Report on a scheme for kerbside collection of dry recyclables on an Island-wide basis to be funded by either additional charges on the disposal of waste or by charges at the point of sale on bags, it will require extensive research and consultation with various parties, including the Parish Authorities. It is anticipated that such consultation in particular will take several months to carry out. For the matter to be discussed in January 2010 would mean the Report from the Public Services Department would have to be completed and submitted to the Policy Council in November and the Department does not believe that a four-month period would be adequate and that an eight-month period would be more realistic.
