

Housing Monitoring Report

Third Quarter of 2016 (July-September)

For Information

Introduction

The primary purpose of the quarterly Housing Monitoring Report is to monitor whether a two year supply of housing is being maintained in accordance with Policy HO1 of the Urban Area Plan. In addition, other statistics are presented to provide a more in depth analysis of the source and spatial distribution of new dwellings and the take up of planning permissions.

This monitoring report refers to the net change in new dwellings. For example, a scheme to demolish one house and replace it with five flats is counted as +4 dwellings and a scheme to demolish a house and replace it with another house involves no net gain in dwellings and is counted as 0. A dwelling is defined as a self-contained unit of accommodation, i.e. where the dwelling is designed for the occupants to share the kitchen, bathrooms and living rooms. The monitoring does not include dwellings that are within the Use Classes that include sheltered accommodation or nursing homes or similar.

Approvals to date (running totals)

Policy HO1 in the Urban Area Plan requires the Development & Planning Authority to ensure that a two-year housing supply is 'effectively available for housing development' at any one time. Given the current annual target of 300 additional new dwellings per year, this equates to 600 new dwellings.

Dwellings are deemed to be effectively available (in the pipeline) where planning permission has been granted but the development is not yet complete, and where the development of new housing is acceptable in principle. The figures below demonstrate the number of dwellings in the pipeline this quarter:

Full permits (work not commenced): 741 dwellings (516 urban / 225 rural)

Outline permissions: 319 dwellings (319 urban / 0 rural)

Under Construction: 331 (262 urban / 69 rural)

Effective Housing Supply: 1,391 additional dwellings (1,097 urban, 294 rural) are under construction or have some form of permission, representing an increase since the second quarter of 2016. The current housing supply represents a 79/21% split between the supply arising from urban and rural areas, respectively.

At the end of Q3, there are two extant outline planning permissions providing for 319 dwellings in total. These include a proposal for 16 dwellings at Admiral Park, St Peter Port granted on 24th August 2016, Outline permission was granted for 4 dwellings on the same site in September 2015. The permission for 16 dwellings replaces the permission for 4 dwellings on the same site. An application for 303 dwellings at Leale's Yard, Vale, was granted outline planning permission on 24th August 2016.

24% of the pipeline is under construction, which represents a significant decrease when compared to 34% in the second quarter of 2016. This is due to the large number of dwellings granted an outline permission. Comparison with other jurisdictions in this respect is not always easy due to different ways in which data is collected and the frequency at which it is reported. However a number of other local authorities also monitor the percentage of their pipeline under

construction and some of these figures are shown below. This indicates that our percentage figure is below average, when compared to other jurisdictions.

Jersey	January 2013	29%
Chiltern District Council	March 2015	48%
North Norfolk	March 2016	44%

The Parishes

The status of new housing development in the pipeline in each parish is illustrated below. The figures represent a running total and not just the permissions granted during the quarter.

Parish	Dwellings upon which work has not yet started		Units under construction (c)	Total Units (a) + (c) "Pipeline figure"
	(a) All types incl. outline permissions	(b) Permits alone (PMT+COU)		
St Peter Port	356	340	172	528
St Sampson's	78	78	41	119
Vale	433	130	80	513
Castel	58	58	10	68
St Martin's	80	80	10	90
St Saviour's	26	26	7	33
Forest	4	4	5	9
Torteval	8	8	0	8
St Andrew's	11	11	0	11
St Peter's	6	6	6	12
TOTAL	1,060	741	331	1,391

Figure 1: Planning permissions for new dwellings by Parish

Third Quarter Statistics 2016

Approvals this quarter

Full planning permission was granted for a total of 219 additional dwellings during the third quarter of 2016. This represents a split of 174 [79%] in the urban area and 45 [21%] in the rural area and is significantly higher than the second quarter of 2016 where 148 new dwellings were granted permission. The largest permissions granted this quarter were for 109 dwellings at Leale's Yard, Bridge Avenue. 35 new flats by conversion of St Martins Hotel, Les Merriennes and 17 new dwellings at Vrangue Manor, La Vrangue, St Peter Port. ,

Two developments were granted outline permission this quarter, including 303 dwellings at Leale's Yard, Vale and 16 dwellings at Admiral Park, St Peter Port. The application for the site at Admiral Park supersedes the outline permission previously granted for 4 dwellings in September 2015.

The average number of dwellings approved per quarter over the past 3 years was 90 units. Therefore this quarter's approvals are significantly above average. The majority of approvals granted this quarter were for redevelopments in the urban area. It is believed that the high number of approvals is due to a high volume of applications being submitted prior to the expected adoption of the Island Development Plan (IDP) which supersedes the existing UAP and the RAP. There was one application resulting in a loss of units. This was a conversion from 3 flats to one house. (Belvedere House)

The sources of dwellings arising from this quarter's full permissions are as follows:

	Urban area	Rural area	Total
New build	25	1	26
Re-development	144	3	147
Sub-division	1	3	4
Conversion	4	40	44
Loss of units	0	-2	-2
Total	174	45	219

Figure 2: Full planning permissions for new dwellings given this quarter by area and source

Brownfield / Greenfield development

The Urban Area Plan and Rural Area Plan only allow the development of greenfield sites in exceptional circumstances; therefore approvals on greenfield sites are closely monitored.

0 dwellings were permitted on greenfield sites this quarter.

Appeal decisions

For completeness, from 2015 the number of dwellings permitted through applications allowed following appeal decisions have been incorporated.

No new dwellings were approved on appeal this quarter.

Lapsed permissions

Full planning permission is generally granted for a period of three years, after which time the permission will expire, unless building works have already commenced. The data in this section therefore relates to those full planning permissions expiring in the third quarter of 2016 which were approved in the third quarter of 2013.

During this quarter, 1 full permission lapsed without being taken up for development, which was for the demolition of a building and the erection of three dwellings, resulting in a net increase in two dwellings. This redevelopment related to a site within the Urban Area.

	Permissions	Permissions %	Dwellings	Dwellings %
Conversion	0	0	0	0
New Build	0	0	0	0
Redevelopment	1	100	2	100
Subdivision	0	0	0	0
Loss of units	0	0	0	0
Total	1	100	2	100

Long Term Trends

Urban/Rural development

Whilst the Urban Area Plan makes provision for 90% of the housing requirement to come forward in the urban area, this is not to be interpreted as a target. Figure 4 suggests that on average 67% of permissions have been granted per year, in the urban area, since 1995. It is also noticeable that since 2000 the proportion of new dwellings within the urban area is generally higher than the preceding years. 2010 is an anomaly due to the number of dwellings demolished at the Bouet, St. Peter Port.

It is useful to monitor these trends of permissions between the urban and rural area, as it helps to show the proportion of development in each area.

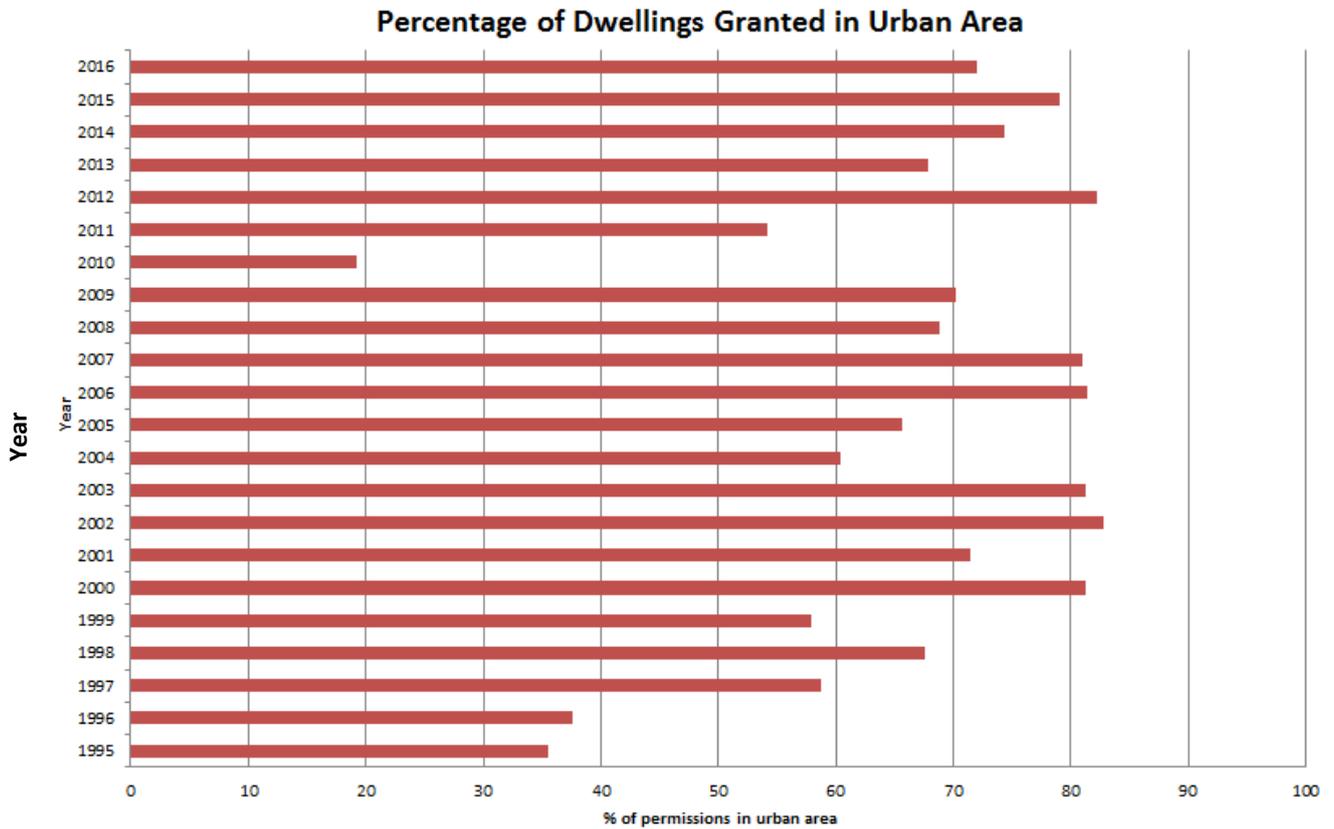

Figure 4: Percentage of planning permissions for new dwellings given in the urban area

Take up of permissions and completions

Whilst the housing supply requirement in the UAP relates only to the number of permissions granted, it is also useful to monitor how many of these permissions get built (are taken up) and the rate of take up over the 3 year life of permissions. As well as some permissions not being taken up, there is also a delay between planning permissions being granted and ability to put a spade in the ground due to the requirement for other consents, completing negotiations or legal drafting or simply awaiting the availability of a builder. Monitoring this rate of take up trend informs the nature of pipeline supply and how many dwellings this is likely to result in on the ground. This information is available for a 22 year period, but for ease of presentation only information since 1995 is shown in Figure 5. It shows that after 1 year of being granted planning permission approximately one quarter of permissions for residential development are taken up, after 2 years nearly half of permissions are taken up and after 3 years over two thirds of permissions are taken up. The trends for this quarter are back inline with those observed in the past, and when compared to last quarter may indicate a recovery in the housing market.

Take-up of Permissions

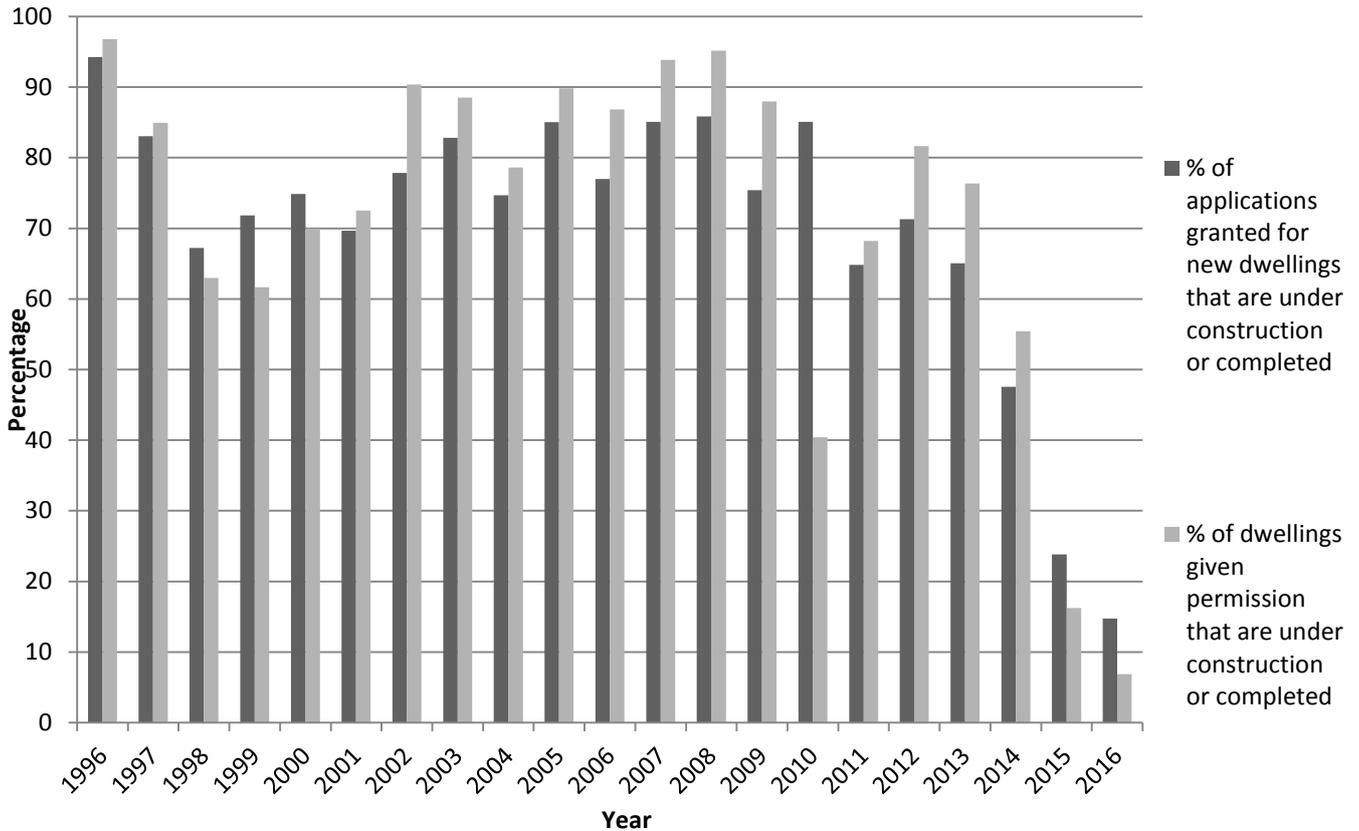

Figure 5: Monitoring the proportion of dwellings permitted that get built

Figure 6 sets out the number of dwellings that were approved in the given year (column 2) and how many of those have been constructed or are under construction (column 3) (i.e. it does not relate to the year in which they were built). Column 4 sets out the percentage of dwellings that have been built as a proportion of the total number of dwellings granted permission. For example, of the 249 additional dwellings given permission in 2009, 219 of those are under construction or have been constructed. Because developers are given 3 years in which to start development once planning permission has been granted, the figures in columns 3 and 4 for 2013 onwards are the totals to date.

Year	No. of dwellings approved in the given year	No of dwellings constructed or under construction from the applications granted in the given year	% dwellings take up as a proportion of the total no. of dwellings granted permission
2007	195	183	94
2008	186	177	95
2009	249	219	88
2010	94*	38*	40
2011	321	219	69
2012	316	258	82
2013	234	171	76
2014	323	158	55
2015	191	31	16
2016	435	30	7
10 yr total	2496	1484	59

Figure 6: Proportion of dwellings given planning permission that get built

*The low figure is explained by permission being granted for demolition of Le Bouet in 2010 and permission being given for the redevelopment of Le Bouet in 2011.

It is also of interest to note the proportion of planning permissions for new residential development which are implemented. This is set out in the table below. Again, because developers are given 3 years in which to start development once planning permission has been granted, the figures for 2013 onwards are the totals to date.

Year	No. of planning permissions involving new dwellings	No. of planning permissions that have been implemented from the permissions given in that year	% applications granted for new dwellings that have been implemented
2007	87	74	85
2008	99	85	86
2009	126	95	75
2010	114	97	85
2011	199	129	65
2012	115	82	71
2013	111	69	65
2014	105	49	48
2015	84	20	24
2016	95	14	15
10 yr total	1125	714	63

Figure 7: Proportion of planning applications consented for dwellings that get implemented

Lapsed permissions

As occurs elsewhere, a small percentage of permissions never come to fruition. This can be for a variety of reasons, such as difficulty accessing finance, a change in the market or, as is often the case, due to permission being superseded by more recent slightly different permissions for the same site.

Monitoring of this information commenced in 2014.

During this quarter a further 1 full permission has lapsed without being taken up for development. This equates to a total of 2 dwellings, within the urban area.

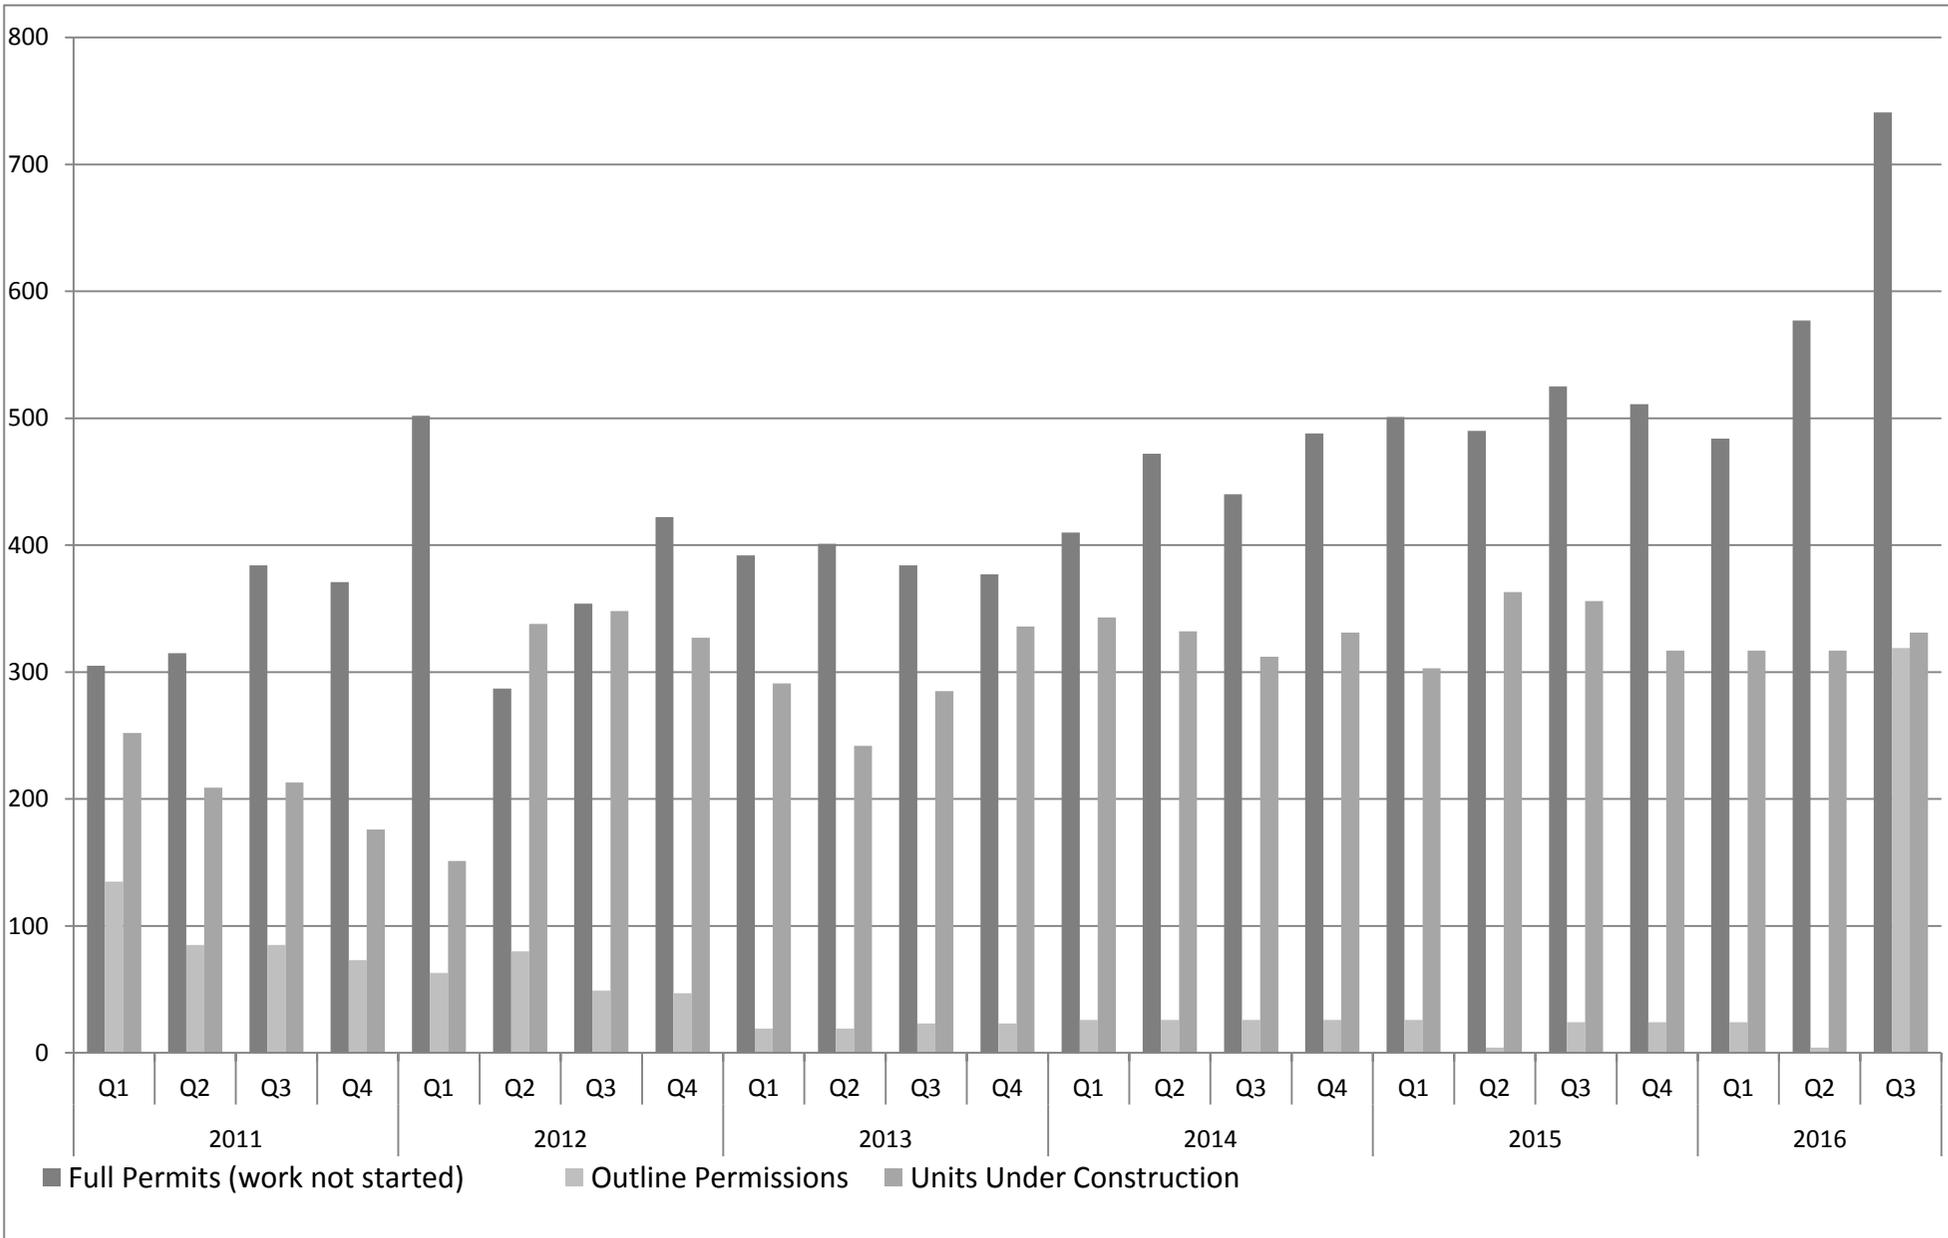

One outline permission for 4 dwellings at Admiral Park granted in September 2015 has been superseded by an outline permission for 16 dwellings at Admiral Park, granted in August 2016.

It is the intention to begin to display this information in a table and chart form once an adequate number of entries have been collated.

Housing Land Availability - (Figures based on Development & Planning Authority's Housing Database)

	<i>Dwellings approved during period</i>					<i>Running totals at end of period</i>				<i>Total (Potential housing stock)</i>

April-June	148	0	148	80	68	577	4	581	302	883
July- Sept	219	319	538	493	45	741	319	1060	331	1391

- Please note that the number in the 'Total for 200X' row (from 2010-2012) is smaller than the apparent aggregate for that year. This is because the 'Total' figure weeds out duplicate applications approved for any one scheme during that year. It is not uncommon for several permissions to be issued for a single scheme as plans are amended either before or during construction. A change in methodology negates this from 2013 onward.

The graph gives a 'snapshot' of the status of housing land availability at the end of each quarter. The numbers are not cumulative.
