

# Guernsey Annual Housing Stock Bulletin

31st December 2017  
Issue date 29th March 2018

The Guernsey Annual Housing Stock Bulletin provides a snapshot of Guernsey's domestic property stock.

States of Guernsey  
Data and Analysis

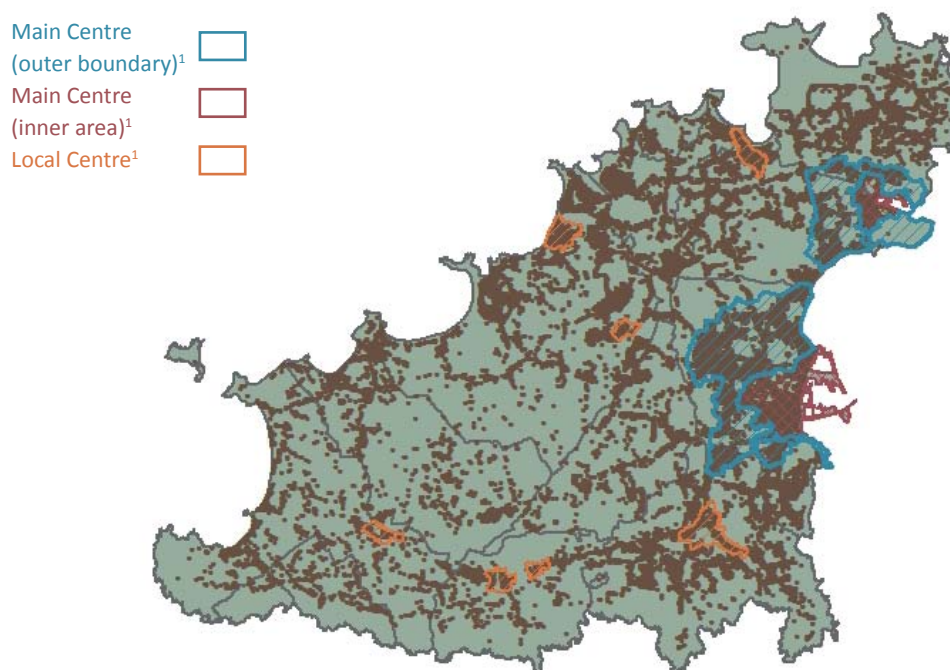

## 1.1 Introduction

The Guernsey Annual Housing Stock Bulletin provides a snapshot of Guernsey's domestic property stock. Data first became available in 2010 and is sourced from several States of Guernsey Departments. This data is brought together in a system which enables statistical and spatial analysis, provided by Digimap Ltd. The data analysis is performed by the Data and Analysis team, which produces this bulletin.

## 1.2 Headlines

- At the end of December 2017, the total number of domestic property units in the island was 26,993, of which 1,589 (5.9%) were Open Market.
- 74.7% of all domestic property units were houses or bungalows and 24.3% were apartments, a slightly higher proportion of apartments than in December 2011.
- Almost a third of all domestic property units (32.0%) had 3 bedrooms.
- 59.8% of the units were owner occupied, 28.2% were privately rented, 8.6% were Affordable social rented units and 0.6% were Affordable intermediate (partially owned) housing units. The remaining 2.8% of units were of other tenure types or vacant.
- During 2017, 127 new units were created and 41 units were removed which is a net increase of 86, a 0.3% increase since December 2016.

**Figure 1.2.1: Map of Guernsey domestic property units**

<sup>1</sup> More information about the "Main Centre" (shown with a blue outline on the maps throughout this bulletin) and the "Local Centres" (shown in orange) is available on page 12 and [www.gov.gg/planningpolicy](http://www.gov.gg/planningpolicy).

## 2.1 Domestic property units - total units and summary of annual changes

At the end of December 2017, there were 26,993 domestic property units in Guernsey.

A domestic property unit is defined (for the purposes of this bulletin) as being a building, or part of a building, which has its own postal address, is self-contained and is used for residential purposes (including those which are vacant).

**Table 2.1.1** shows the change in the total recorded number of domestic property units since 2012. At the end of 2017, there were 86 (0.3%) more domestic property units than at the end of 2016. 2017 and 2016 have seen the smallest increase in domestic units since data first became available in 2010. The smallest increase was at the end of 2016. There was a net change of three administrative amendments in 2017, compared with a net change of zero administrative amendments in 2016 and 25 in 2015. An administrative amendment includes, for example, the inclusion of a small domestic property above a commercial unit, the existence of which was not previously known.

Of the 26,993 domestic property units, 94.1% were Local Market and the remaining 5.9% were Open Market units.

The change in the total number of Local and Open Market units over time can be seen in **Table 2.1.2** and **Figures 2.1.1** and **2.1.2**. The number of Local Market domestic property units has increased by 3.4% since 2012. Open Market property units have decreased by 0.4% since 2012.

\*The number of Open Market domestic property units had been decreasing every year since 2010. **Figure 2.1.2** shows an increase of 1.2% from 2014 to 2015. This is due to an administrative adjustment to the Open Market Part B register to reflect twelve domestic property units, the majority of which are used for staff accommodation, which had previously been misclassified as Local Market domestic property units.

More information on the change in the number of units is available in **Section 5** on **page 23**.

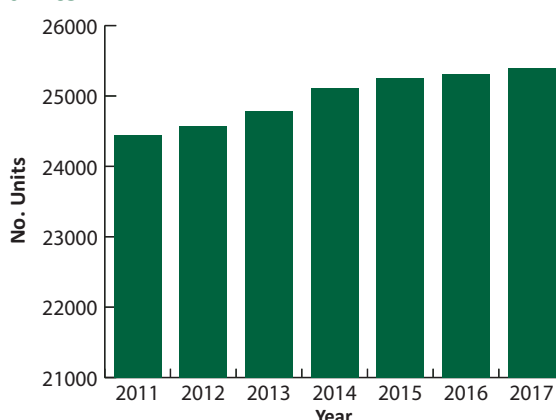

**Table 2.1.1: Total domestic units**

Year	Total no. units	Net change	Administrative amendments	Annual % change in total
2012	26,172	84	36	0.5%
2013	26,372	171	29	0.8%
2014	26,692	296	24	1.2%
2015	26,861	144	25	0.6%
2016	26,904	43	0	0.2%
2017	26,993	86	3	0.3%

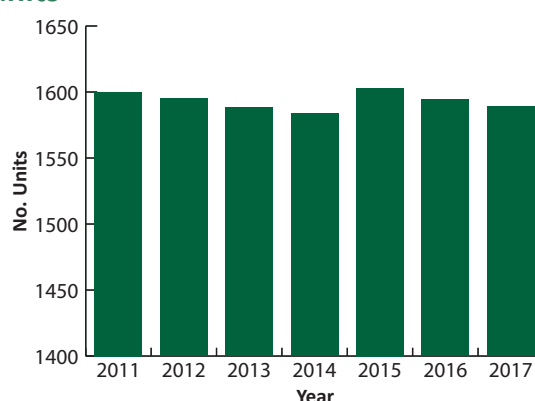

**Table 2.1.2: Units by Market**

Year	Total no. Local Market units	% change in total Local Market units	Total no. Open Market units	Annual % change in total Open Market units
2012	24,577	0.5%	1,595	-0.3%
2013	24,784	0.8%	1,588	-0.4%
2014	25,108	1.3%	1,584	-0.3%
2015	25,258	0.6%	1,603	1.2%*
2016	25,310	0.2%	1,594	-0.6%
2017	25,404	0.4%	1,589	-0.3%

**Figure 2.1.1: Total Local Market domestic units**

**Figure 2.1.2: Total Open Market domestic units\***

## 2.2 Domestic property units - market and type

**Table 2.2.1: Type of units by Market**

Type	2017					
	No. units			% of units		
	Local	Open	Total	Local	Open	Total
Apartment	6,401	162	6,563	25.2	10.2	24.3
Bungalow	9,842	359	10,201	38.7	22.6	37.8
House	8,919	1,052	9,971	35.1	66.2	36.9
Other	242	16	258	1.0	1.0	1.0
Total	25,404	1,589	26,993	100	100	100

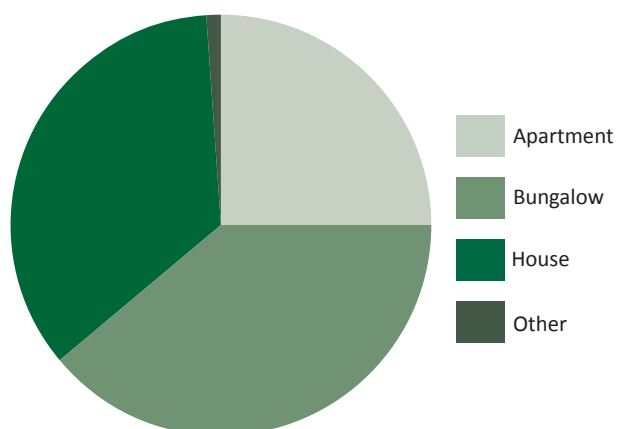

Domestic property units can be categorised by type; apartment, bungalow, house and other.

Please see [page 30](#) for more information on the definitions of a “unit” and Open and Local Market categories, as well as more detail on the types of properties included under the headings used in [Table 2.2.1](#) and throughout this report.

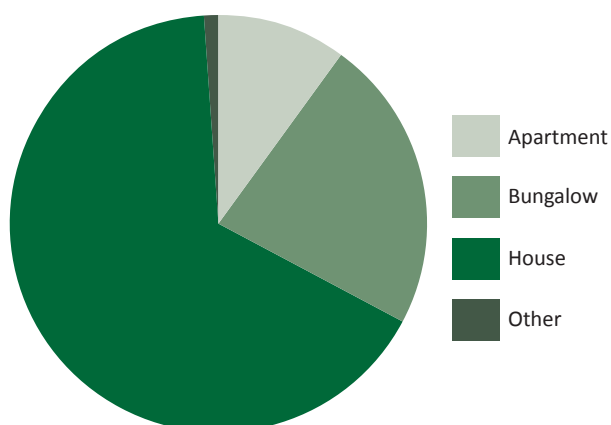

The distribution of property unit types has remained consistent between 2011 and 2017. In 2017, bungalows and houses accounted for the largest proportion of domestic property units (Local and Open Market combined), comprising 37.8% and 36.9% of the total respectively. 24.3% of domestic property units were apartments and the remaining 1.0% were other types of unit (see [Table 2.2.1](#)).

[Figures 2.2.1](#) and [2.2.2](#) illustrate the different proportions of unit types which comprise the Open and Local Markets. For example, 35.1% of Local Market domestic property units were houses, compared with 66.2% of Open Market domestic property units.

**Figure 2.2.1: Type of Local Market units**

**Figure 2.2.2: Type of Open Market units**

## 2.3 Domestic property units - bedrooms

Information on the number of bedrooms per domestic property unit was originally sourced from the 2001 Census. Until October 2017, this data was manually updated and maintained using information sourced from property sale adverts, Cadastre and other States sources. Since October 2017 this process has been automated by Cortex, increasing the accuracy of bedroom information collected from Estate Agents' websites. Bedroom data is currently unavailable for 8.7% of the island's domestic property units, compared to 9.2% in 2016.

At the end of December 2017, the highest proportion (32.0%) of domestic property units had three bedrooms (see [Table 2.3.1](#)). This is true for both Local and Open Market units, for which three bedroom units accounted for 32.1% and 29.8% respectively.

17.1% of Local Market units had one bedroom, compared with 3.8% of Open Market units at the end of December 2017. At the other end of the scale, 18.7% of Open Market units had more than 4 bedrooms, compared with 4.3% of Local Market units.

[Figure 2.3.1](#) shows how the distribution of units by number of bedrooms differs between the Local and Open Market. The majority of Local Market property units have three bedrooms or fewer, whereas the majority of Open Market units have three or more bedrooms.

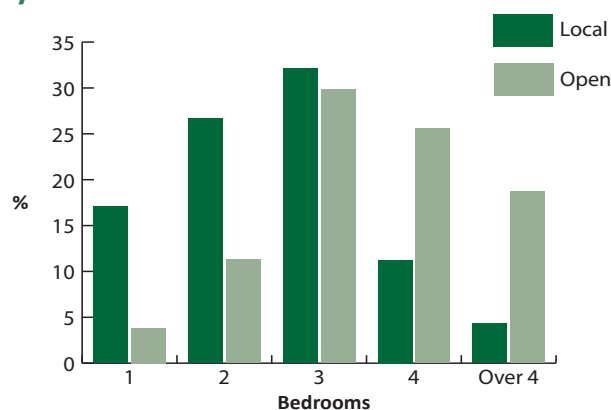

[Table 2.3.2](#) shows the number of Local Market domestic property units split by the number of bedrooms for the six years ending in 2017. The distribution of units by number of bedrooms in the Local Market has changed very little since 2012.

The proportion of units by number of bedrooms has remained fairly stable in the Open Market since 2012. (See [Table 2.3.3](#).)

**Table 2.3.1: Number of bedrooms per unit by Market**

No. bedrooms	2017

Combining the information on unit types and numbers of bedrooms gives a more detailed picture of Guernsey's domestic properties. The data regarding number of bedrooms is updated throughout the year as new information becomes available.

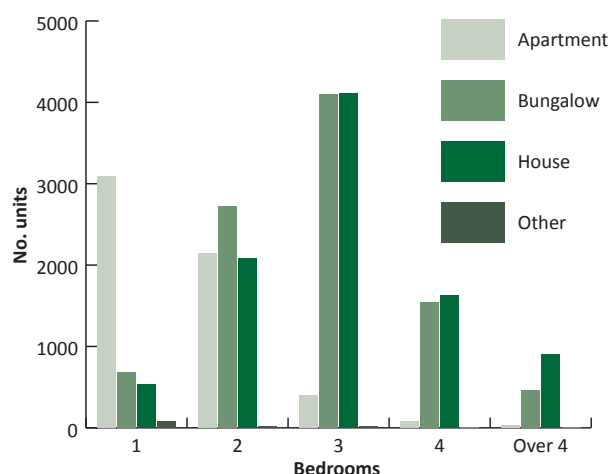

At the end of December 2017, three bedroom bungalows and three bedroom houses made up the largest proportions (both forming 15.2%) of the total units (see [Table 2.4.1](#) and [Figure 2.4.1](#)).

One bedroom apartments and two bedroom bungalows contributed the next largest proportions (accounting for 11.5% and 10.1% of the total respectively).

Two bedroom apartments and houses formed 7.9% and 7.7% of the total respectively.

Please see [page 30](#) of this report for more information on the property types referred to above.

**Figure 2.4.1: Number of bedrooms distribution by type of unit**

## 2.5 Domestic property units - TRP

The number of domestic Tax on Real Property [TRP] units represents a measure of the size (based on square metres of floor area) of a domestic property unit, excluding land. This information is based on Cadastre records and only property units which have their own individual measure of domestic TRP are included. As such, the sample represents 72% of all the island's property units.

The TRP distributions shown in **Table 2.5.1** and **Figure 2.5.1** highlight the differences in the typical sizes of Local and Open Market property units.

At the end of December 2017, the largest proportion of Local Market domestic property units fell into the 101 to 150 TRP units band. By comparison, the modal band for Open Market domestic property units was 251 to 300 TRP units. This has been a stable trend since 2012.

19.7% of Open Market domestic property units had a TRP of over 500 units, compared with 1.1% of the Local Market domestic property units. This compares with 19.3% and 1.1% for the Open and Local Market respectively in 2016 and 19.1% and 1.1% respectively in 2015. Open Market property units tend to be, in general, larger than those in the Local Market.

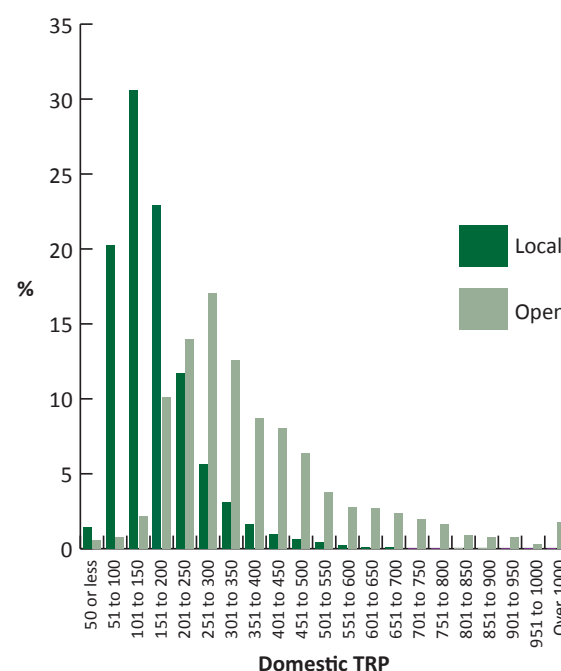

The overall TRP distributions shown here are broken down by property types and number of bedrooms on **pages 9, 14, 17 and 21**.

**Table 2.5.1: Domestic TRP distribution by Market**

Domestic TRP units	2017		
	% of Local Market units	% of Open Market units	% of total units
50 or less	1.4%	0.6%	1.4%
51 to 100	20.2%	0.8%	18.9%
101 to 150	30.6%	2.2%	28.6%
151 to 200	22.9%	10.1%	22.0%
201 to 250	11.7%	14.0%	11.9%

## 2.6 Domestic property units - TRP, type and bedrooms

**Table 2.6.1: Domestic TRP distribution by number of bedrooms**

Year	Overall median TRP for all domestic property units
2012	153
2013	154
2014	154
2015	154
2016	154
2017	154

**Table 2.6.2: Domestic TRP of units by type and number of bedrooms**

Type	No. bedrooms	2017
		Median TRP
Apartment	1	65
	2	86
	3	124
	4	141
	Over 4	85
Bungalow	1	103
	2	136
	3	163
	4	200
	Over 4	250
House	1	108
	2	116
	3	156
	4	231
	Over 4	335
Overall median for all domestic property units		154

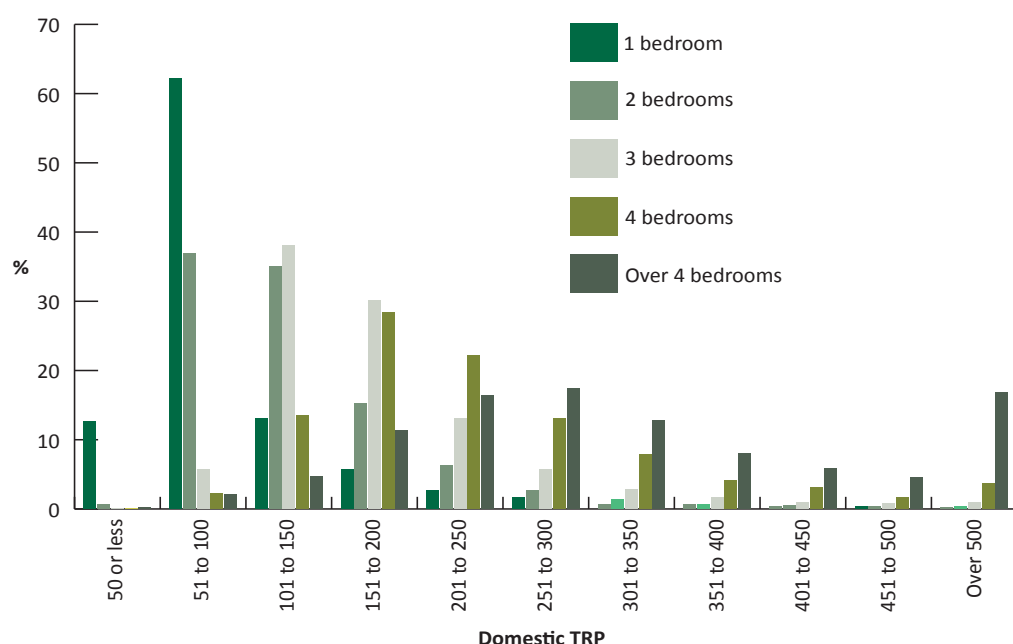

As previously noted, the number of domestic TRP units represents a measure of the size (based on square metres of floor area) of a domestic property unit, excluding land.

The overall median number of TRP units per property unit was 154 at the end of December 2017. As shown in [Table 2.6.1](#), the overall median has remained stable, at 154 each year except 2012 when it was 153.

As expected, the number of TRP units generally increases as the number of bedrooms increases and tends to be higher for houses than bungalows and lowest for apartments. This is shown in [Table 2.6.2](#).

[Figure 2.6.1](#) shows the distribution of TRP values for domestic property units split by number of bedrooms. Over half of the one bedroom units (62.2%) are concentrated within the 51 to 100 TRP units band. The distribution of units with more than one bedroom, however, is broader. The largest concentration of TRP units for properties with over four bedrooms is within the 251-300 TRP units band (17.5%).

**Figure 2.6.1: Domestic TRP distribution by number of bedrooms**

## 2.7 Domestic property units - tenure

The tenure of domestic property units (shown in [Table 2.7.1](#)) can be ascertained from Cadastre ownership information. The tenure categories have been changed since the last edition of this Bulletin to better align with the "Land Planning and Development (Use Classes) Ordinance, 2017" and facilitate analysis of housing need. The Affordable category is divided into "Social" (social rented) and "Intermediate" (partially owned) units. Please see [page 31](#) for more information.

At the end of 2017, 16,137 (59.8%) of the domestic property units in Guernsey were owner occupied (0.1 percentage points higher than at the end of 2016). There were 7,602 (28.2%) privately rented domestic units (0.1 percentage points higher than at the end of 2016). Affordable social units accounted for 8.6% of all domestic property units and Affordable intermediate properties made up 0.6% of units. Please note that these categories were combined in previous editions of this Bulletin. The remaining 754 units (2.8%) had other tenure types including staff accommodation and self-catering units as well as properties that are known to be vacant. More information on vacant units is provided on [page 27](#). Please see [pages 28-29](#) for information regarding specialised housing that includes care provision.

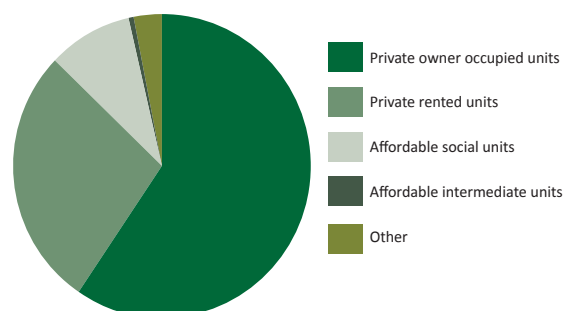

Of the 26,993 domestic property units, 1.5% (392 units) were specifically for people over the age of 55. Key worker housing, provided by the Guernsey Housing Association, contributed 0.8% of the total.

The proportions by tenure differ between the Local and Open Market. The proportion of Local Market owner occupied domestic property units has increased by 0.1 percentage points between 2016 and 2017. During this time, the proportion of privately rented units also increased by 0.1 percentage points and the proportion of other tenure types decreased by 0.06 percentage points compared to 2016. The proportion of Open Market owner occupied domestic property units has been decreasing since 2011, falling by 0.2 percentage points between 2016 and 2017. There was an increase of 0.1 percentage points in the proportion of rented Open Market domestic property units.

**Table 2.7.1: Tenure of units by Market**

Tenure		2017					
		No. units			% of total units		
		Local	Open	Total	Local	Open	Total

## 2.8 Domestic property units - location

**Table 2.8.1: Number and density of units by location**

Parish	2017		
	No. units	% of total units	No. units per km <sup>2</sup>
Castel	3,516	13.0	345
Forest	641	2.4	157
St Andrew	933	3.5	207
St Martin	2,765	10.2	378
St Peter Port	8,816	32.7	1,374
St Pierre du Bois	894	3.3	140
St Sampson	3,900	14.4	624
St Saviour	1,140	4.2	178
Torteval	404	1.5	130
Vale	3,984	14.8	446
Local Centres	1,399	5.2	1,363
Main Centre	10,804	40.0	1,825
Outside of the Centres	14,790	54.8	268
<b>Total and overall density</b>	<b>26,993</b>	<b>100.0%</b>	<b>425</b>

The information on property units can be mapped spatially as well as being analysed numerically.

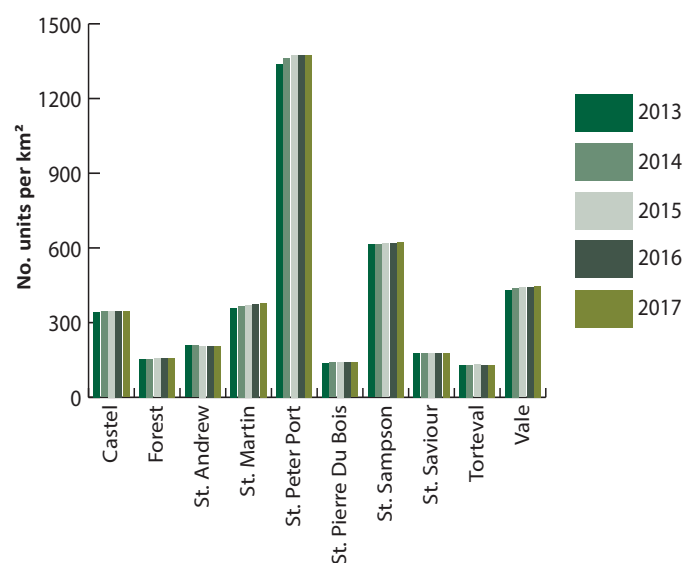

At the end of December 2017, 32.7% of all property units (8,816 of the total 26,993) were concentrated within the parish of St Peter Port (see [Table 2.8.1](#)).

St Sampson and Vale each contained 3,900 or more units, with 14.4% and 14.8% of the island's property units respectively. Castel, which is the island's largest parish by area, contained 3,516 (13.0%) of the units. Torteval, which is the smallest parish by area, contained the smallest number of property units, at 404 (1.5%).

The parish of St Peter Port had the highest density of units, with 1,374 units per square kilometre, the same as 2016. This is more than double the density of any other parish. The parish with the lowest density of property units was Torteval, which had 130 units per square kilometre. Vale showed the largest increase (41) in the number of units since 2016 (see [Table 2.8.2](#)).

[Figure 2.8.1](#) shows the change in the density of domestic property units by location since 2013, with the greatest increase in density being seen in St Peter Port (227 units since 2013).

**Figure 2.8.1: Density of units by parish**

**Table 2.8.2: Number of units by parish**

Parish	2012	2013	2014	2015	2016	2017
Castel	3,476	3,481	3,507	3,521	3,523	3,516
Forest	631	630	633	641	641	641
St Andrew	928	935	935	931	931	933
St Martin	2,598	2,627	2,680	2,715	2,740	2,765
St Peter Port	8,459	8,589	8,742	8,816	8,813	8,816
St Pierre du Bois	884	884	894	898	898	894
St Sampson	3,830	3,837	3,842	3,860	3,871	3,900
St Saviour	1,127	1,139	1,140	1,143	1,140	1,140
Torteval	403	404	405	406	404	404
Vale	3,836	3,846	3,914	3,930	3,943	3,984
<b>Total</b>	<b>26,172</b>	<b>26,372</b>	<b>26,692</b>	<b>26,861</b>	<b>26,904</b>	<b>26,993</b>

[Table 2.8.3](#) on [page 12](#) shows the proportion of Local and Open Market units per parish. The proportion of Open Market units was highest in St Peter Port and St Martin (accounting for 9.6% and 9.5% in each respectively) and lowest in St Sampson where only 1.4% of the units were Open Market.

[Figures 2.8.2](#) and [2.8.3](#) show the distribution of Local and Open Market units spatially. Just over half (53.0%) of the Open Market units in the island are situated in St Peter Port, in comparison to just under a third (31.4%) of all Local Market property units.

## 2.8 Domestic property units - location

In 2016, the States approved the Island Development Plan (IDP), which divides the island into three main administrative areas, Main Centres, Local Centres and Outside of the Centres. These areas operate different policies for the control of development. The introduction of these Centres replaces the Urban & Rural area plans reported in this Bulletin before 2016.

In line with the 2016 IDP, the Main Centre (marked with a blue outline on the maps throughout this bulletin) covers 10% of the island's land mass. The Main Centre is comprised of an Inner and Outer area as can be seen in **Figures 2.8.2** and **2.8.3**. Throughout this Report, 'Main Centre' refers to the inner and outer areas of the Main Centre combined. Further information can be found at [www.gov.gg/planningpolicy](http://www.gov.gg/planningpolicy).

Local Centres (in orange) are comprised of 7 small existing settlements beyond the Main Centre, incorporating a range of facilities and services which support the local population and act as community focal points. The remainder of the island is referred to as 'Outside of the Centres'.

Policies outlined in the IDP allow for housing development in the Main and Local Centres. In order to conserve and enhance the area, new development is only possible Outside of the Centres by converting a redundant building or by subdividing an existing dwelling. The IDP allocates 15 sites specifically for housing which are all located in the Main Centre.

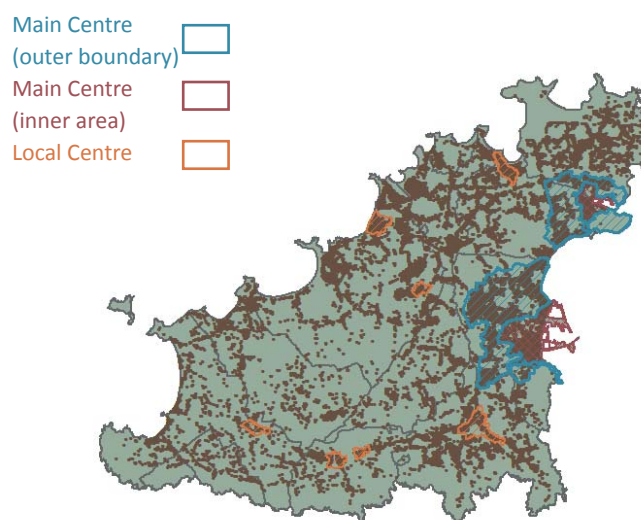

The density of residential property units per square kilometre is nearly seven times greater in the Main Centre than Outside of the Centres. At the end of December 2017, 40.0% of all units were located within the Main Centre, 5.2% in the Local Centres and 54.8% Outside of the Centres.

More information on the location of units that were created or removed in 2017 is provided on [pages 23-25](#).

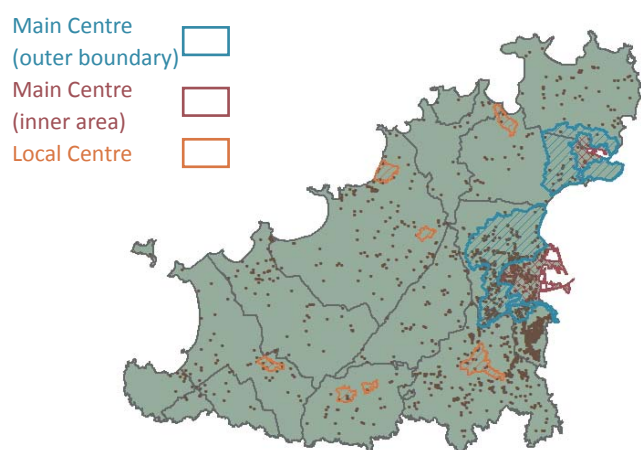

**Table 2.8.3: Location of units by Market**

Location	2017

Outside of the Centres	9.3	22.1	38.3	15.1	6.5	8.7
Total	16.3	25.8	32.0	12.1	5.2	8.7

\* Numbers may not sum with those presented in the table due to rounding.

Table 2.9.1 shows the distribution of domestic property units across the island by their number of bedrooms.

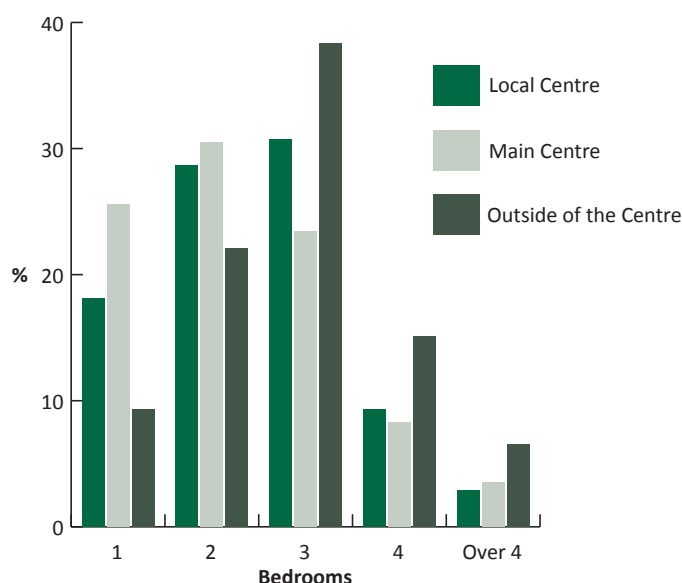

It can be seen from Figure 2.9.1 that the Local and Main Centres tend to have more one and two bedroom property units (46.8% and 56.1% respectively) than Outside of the Centres (31.4%). In fact, the Main Centre has more than double the concentration of one bedroom property units than Outside of the Centres (25.6% compared with 9.3%)\*.

Property units Outside of the Centres are more likely to contain three or four bedrooms than those in the Local and Main Centres (at 53.4%, 40.0% and 31.8% respectively).

57.8% of domestic property units across the island have two or three bedrooms, whilst only 5.2% have more than four bedrooms.

Three bedroom units make up the greatest proportion (32.0%) of all domestic property units across the island. This is true in all parishes except St Peter Port, where there are more one and two bedroom property units than three bedroom property units (25.4% and 29.6% versus 22.4% respectively).

**Figure 2.9.1: Number of bedrooms distribution by location of unit**

## 2.10 Domestic property units - location , TRP, type and bedrooms

By comparing the median number of domestic Tax on Real Property (TRP) units (i.e size) of units by Centre and the type and number of bedrooms, it can be seen that properties Outside of the Centre tend to be larger than those in Local and Main Centres.

The median number of domestic TRP units in 2017 was 154, remaining consistent since 2013. (See [page 9](#).)

As described on [page 13](#), property units Outside of the Centres tend to have a higher number of bedrooms than those in the Local and Main Centres, so could be expected to have a higher TRP. **Table 2.10.1** shows that in a like-for-like comparison, properties Outside of the Centres tend to be larger. For example, the median three bedroom house Outside of the Centres was larger by 18 TRP units than its comparator in the Local Centre and by 24 TRP units than its comparator in the Main Centre at the end of December 2017.

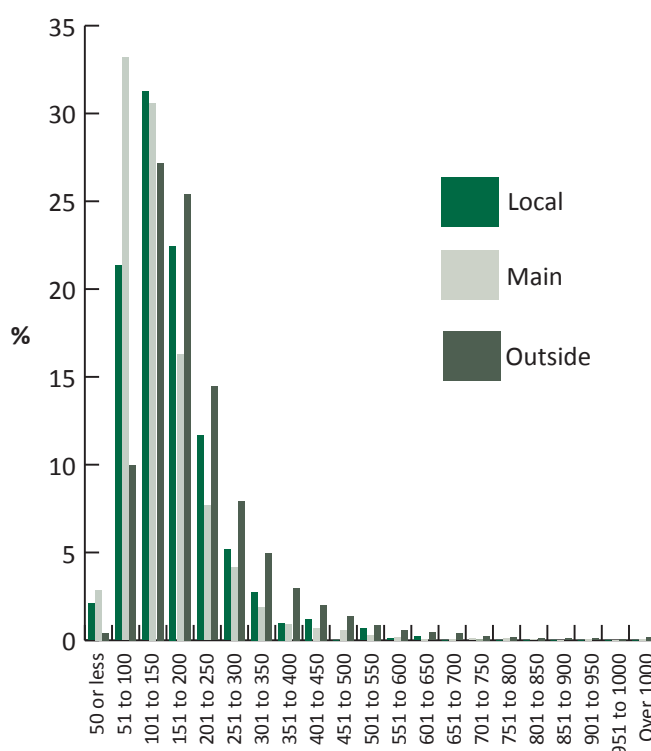

Overall, the median domestic TRP units Outside of the Centres was 51 units higher than in the Main Centre and 30 units higher than in the Local Centres at the end of December 2017.

The TRP distributions in **Figure 2.10.1** illustrate that the majority of Main Centre units fall into the 51 to 150 TRP units bands (63.8%), the majority of the Local Centre and the Outside of the Centres units fall into the 101 to 200 bands (53.7% and 52.6% respectively).

**Table 2.10.1: Domestic TRP of Local, Main and Outside of the Centre units by type and number of bedrooms**

\* Numbers may not sum with those presented in the table due to rounding.

This section focuses on Local Market domestic property units. Local Market properties can be occupied by people who have the appropriate Residence Certificates or Employment Permits.

**Table 3.1.1** shows the proportions by tenure of different types of property units at the end of December 2017. Please refer to **page 31** for more information about tenure group classifications.

In total, 63.4% of Local Market apartments were privately rented, compared with 15.1% of bungalows and 16.2% of houses.

Affordable Social and Intermediate units together comprised 15.4% of houses, 2.5% of bungalows and 13.9% of apartments in the Local Market\*.

The proportion of privately owned and rented domestic property units increased in 2017 compared with 2016, by 0.1 percentage points. The proportion of Affordable domestic property units increased by 1.0 percentage points between 2016 and 2017. See **Table 2.7.2** on **page 10** for the number of Local Market units by tenure each year since 2012.

Please refer back to **Table 2.4.1** on **page 7** for the number of Local Market units by type and number of bedrooms.

## 3.1 Local Market units - tenure, type and number of bedrooms

The distribution of number of bedrooms by property unit type is shown for Local Market owner occupied, privately rented, Affordable socially rented and Affordable Intermediate (partially owned) units in **Figures 3.1.1, 3.1.2, 3.1.3.** and **3.1.4** respectively.

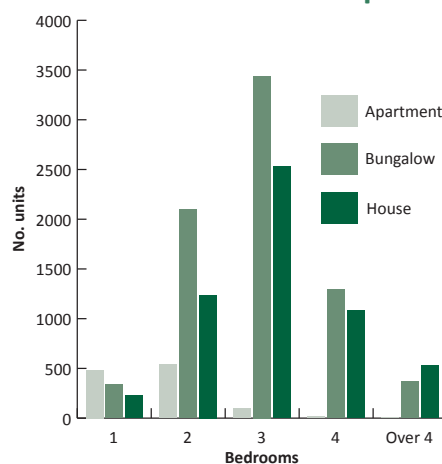

The distributions are significantly different between each of the tenures.

The owner occupied units were predominantly houses and bungalows, the largest proportion of which had three bedrooms. However, of the one bedroom owner occupied units, more were apartments than houses or bungalows.

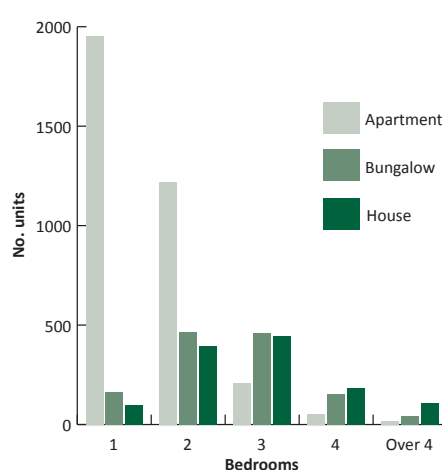

Apartments constituted the majority of privately rented units and most of these contained one or two bedrooms.

Bungalows formed a small portion of Affordable units, whilst three bedroom houses comprised the largest proportion of Affordable social units, followed by one bedroom apartments. One bedroom apartments accounted for the largest proportion of Affordable intermediate units, followed by two bedroom houses.

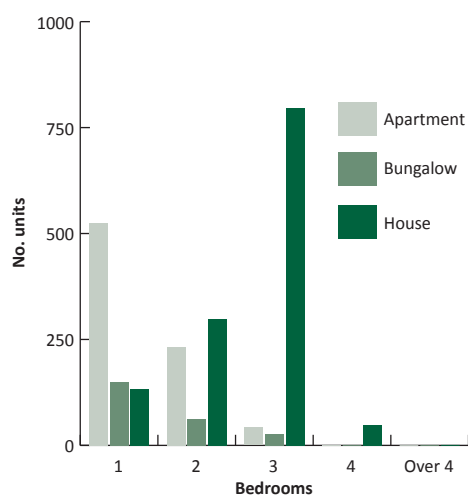

**Figure 3.1.1: Number of bedrooms by type of Local Market owner occupied units**

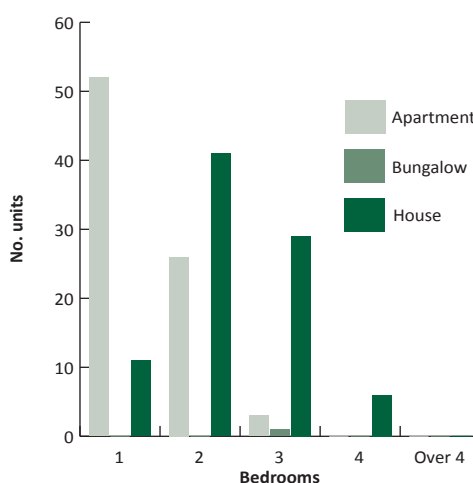

**Figure 3.1.2: Number of bedrooms by type of Local Market rented units**

**Figure 3.1.3: Number of bedrooms by type of Local Market Affordable social units**

**Figure 3.1.4: Number of bedrooms by type of Local Market Affordable intermediate units**

## 3.2 Local Market units - tenure, TRP, type and number of bedrooms

**Table 3.2.1: Domestic TRP of Local Market units by type and number of bedrooms by tenure**

Type	No. bedrooms	2017	
		Median TRP of Local Market owner occupied units	Median TRP of Local Market rented units
Apartment	1	65	66
	2	86	85
	3	122	110
	4	91	133
	Over 4	72	86
Bungalow	1	109	79
	2	137	119
	3	163	147
	4	197	172
	Over 4	243	260
House	1	114	88
	2	117	107
	3	150	146
	4	213	206
	Over 4	293	294
All	1	79	69
	2	121	98
	3	157	143
	4	204	195
	Over 4	272	280
Overall median for all units		155	112

Table 3.2.1 provides the median number of domestic TRP units of Local Market owner occupied and private rental units. It is broken down by unit types and number of bedrooms to enable comparison on a like-for-like basis.

At the end of December 2017, the overall median number of domestic TRP units for Local Market owner occupied units was 155 which was the same as at the end of 2016 and one TRP unit more than at the end of 2013 and 2014. This compares to a median TRP of 112 for rental units, which was one TRP unit lower than at the end of 2016 and two less than at the end of 2015.

Rented bungalows with over four bedrooms saw a rise in their median TRP of twenty eight TRP units in 2017.

Tracking these figures over time will provide an indication of changes in sizes of domestic property units.

Tables 3.2.2 and 3.2.3 show the change in the median TRP of owner occupied and rented domestic property units over time. The median TRP of owner occupied domestic property units with one bedroom was one lower than in 2016, whilst two and three bedroom property units remained the same as in 2016. The median TRP of four bedroom domestic property units increased by one TRP unit. There was an increase in the size of domestic property units with over four bedrooms, with their median TRP increasing by three TRP units. The median TRP of two and three bedroom privately rented domestic property units remained stable in 2017 compared with 2016 and there was a small increase of one TRP unit in the median TRP of one bedroom units. There was also an increase in the size of domestic properties with four and more than four bedrooms, with their median TRP increasing by two and four TRP units respectively.

**Table 3.2.2: Median domestic TRP of owner occupied Local Market units by number of bedrooms**

	No. bedrooms					
	1	2	3	4	Over 4	Overall
2012	82	124	157	201	256	154
2013	81	124	157	201	258	154
2014	81	123	158	201	260	154

2017	69	98	143	195	280	112

### 3.3 Local Market units - tenure and location

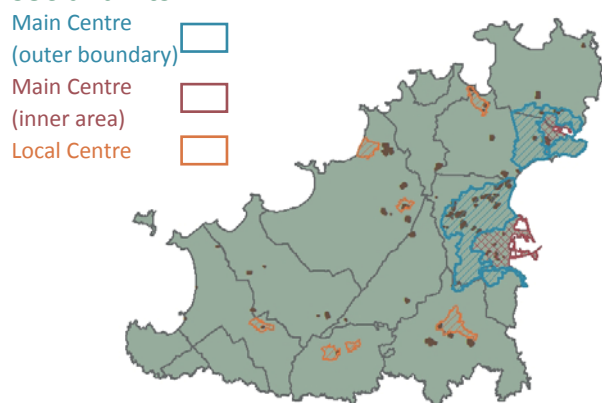

**Table 3.3.1** gives the location (by parish and by Local, Main and Outside Centres) of Local Market property units by tenure. Units are mapped individually by tenure in **Figures 3.3.1, 3.3.2, 3.3.3** and **3.3.4**. For the purposes of this bulletin, 'Main Centre' refers to the outer and inner areas of the Main Centre combined.

In 2017, St Peter Port had the highest proportion (41.9%) of privately rented units, as well as the highest proportion of Affordable intermediate housing units (1.5%). St Martin had the highest proportion of Affordable social housing units (13.4%). There was a higher concentration of Affordable housing units in the Local and Main Centres (18.8% and 12.1% respectively) compared with Outside of the Centres (7.4%). In the Main Centre, 46.0% of domestic property units were owner occupied, compared with 53.7% in the Local Centres and 70.2% Outside of the Centres (which was, respectively, 0.1 and 0.3 percentage points higher and 0.1 percentage points lower than at the end of 2016).

**Figure 3.3.1: Map of Local Market owner occupied units**

	Unknown	50.9%	39.8%	9.4%
	Total	62.4%	35.9%	1.8%

This section gives more detailed information on Open Market domestic property units. Open Market properties can be occupied by anybody regardless of their residential qualifications.

**Table 4.1.1** shows the proportions by tenure of different types of property units at the end of December 2017. Please refer to [page 31](#) for more information about tenure group classifications. Please note that some of these categories contain low numbers of property units, particularly the “other” category.

The proportion of owner occupied Open Market domestic property units decreased by 0.2 percentage points when compared to 2016, whilst the proportion of privately rented Open Market domestic property units increased by 0.1 percentage points. The proportion of other domestic property units also increased by 0.1 percentage points, compared to the previous year.

Of Open Market apartments, bungalows and houses, apartments saw the biggest change in the proportion of owner occupied domestic property units, with an increase of 1.8 percentage points compared to 2016.

The proportion of rented Open Market houses increased by 0.4 percentage points, whilst there was a decrease (0.7 percentage points) in the proportion of owner occupied houses. The proportion of Open Market houses of other tenure types increased by 0.3 percentage points since 2016.

Please refer back to [Tables 2.2.1](#) and [2.3.1](#) on [pages 5](#) and [6](#) for the number of Open Market units by type and number of bedrooms.

## 4.1 Open Market units - tenure, type and number of bedrooms

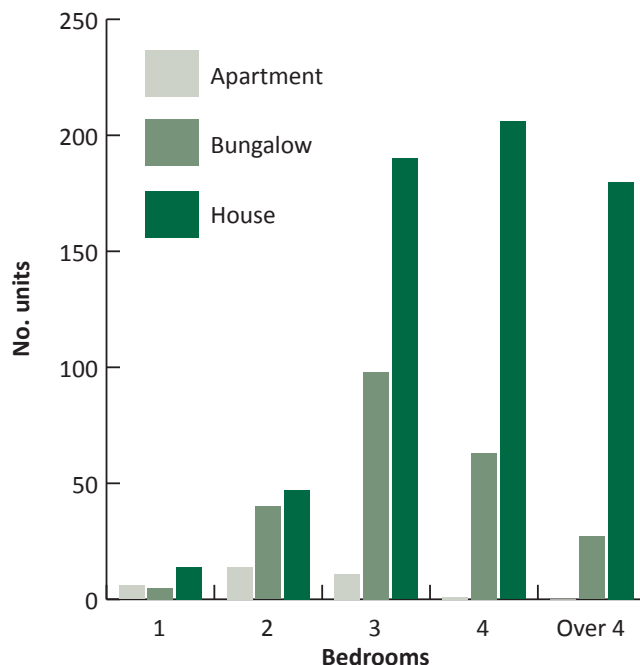

The distribution of number of bedrooms by property unit type at the end of December 2017 is shown for Open Market owner occupied and rented units in **Figures 4.1.1** and **4.1.2** respectively.

The two distributions are more similar to each other than the Local Market owner occupied and rental distributions.

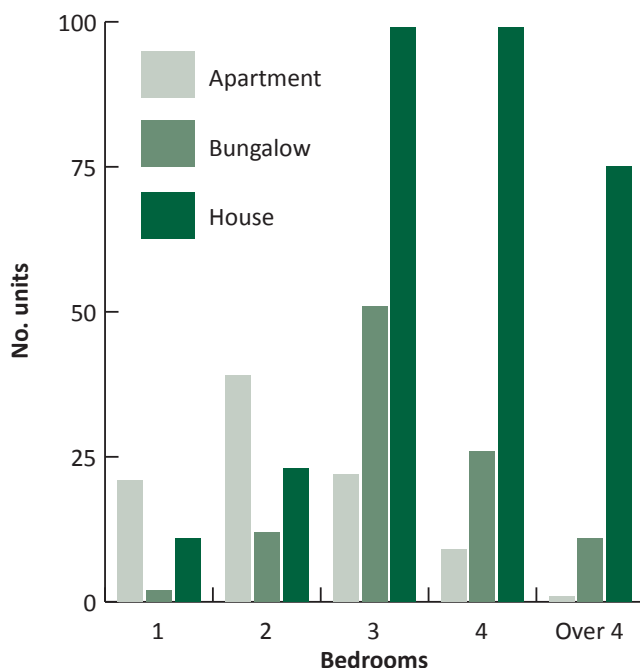

The distribution by number of bedrooms of Open Market bungalows and houses are similar for owner occupied and rented units. In 2017, as in 2016, the largest proportion of owner occupied and rented Open Market bungalows were those with three bedrooms, whilst the four bedroom category comprised the greater proportion of owner occupied Open Market houses.

Both owner occupied and rented Open Market apartments showed a peak in units with two bedrooms, but the proportion was greater in the rented Open Market apartments.

**Figure 4.1.1: Number of bedrooms by type of Open Market owner occupied units**

**Figure 4.1.2: Number of bedrooms by type of Open Market rented units**

## 4.2 Open Market units - tenure, TRP, type and number of bedrooms

**Table 4.2.1: Domestic TRP of Open Market units by type and number of bedrooms by tenure**

Type	No. bedrooms	2017	
		Median TRP of Open Market owner occupied units	Median TRP of Open Market rented units
Apartment	1	104	44
	2	120	166
	3	174	251
	4	-	211
	Over 4	-	-
Bungalow	1	317	193
	2	273	263
	3	283	250
	4	324	279
	Over 4	396	355
House	1	327	278
	2	317	249
	3	321	260
	4	341	320
	Over 4	512	431
All	1	281	106
	2	263	214
	3	301	254
	4	337	295
	Over 4	474	422
Overall median for all units		340	279

**Table 4.2.1** provides the median number of domestic TRP units of Open Market owner occupied and rental units. It is broken down by unit types and number of bedrooms to enable comparison on a like-for-like basis.

At the end of December 2017, the overall median number of domestic TRP units of Open Market owner occupied property units was 340, the same as at the end of December 2016. The median number of TRP units for rented Open Market domestic property units was 279, which was also the same as a year earlier.

On the whole, in the Open Market, rented units of the same type and number of bedrooms have a consistently lower number of TRP units (i.e. are smaller in floor area) than their owner occupied equivalents.

**Tables 4.2.2** and **4.2.3** show the change in the median TRP of owner occupied and rented Open Market domestic property units over time. The median TRP of Open Market domestic property units increased or remained the same across all bedroom categories since 2016, with the exception of owner occupied one bedroom and four bedroom domestic property units and four bedroom rented units.

**Table 4.2.2: Median domestic TRP of owner occupied Open Market units by number of bedrooms**

	No. bedrooms					
	1	2	3	4	Over 4	Overall
2012	317	269	292	340	456	331
2013	327	267	292	346	457	334
2014	317	264	297	350	459	334
2015	327	264	304	342	442	339
2016	300	261	300	342	457	340
2017	281	263	301	337	474	340

**Table 4.2.3: Median domestic TRP of rented Open Market units by number of bedrooms**

	No. bedrooms					
	1	2	3	4	Over 4	Overall
2012	196	206	260	294	397	275
2013	208	218	261	307	419	280
2014	220	220	257	292	423	280
2015	208	214	245	289	435	275
2016	106	212	253	299	422	279
2017	106	214	254	295	422	279

The median TRP of owner occupied properties with four bedrooms decreased by five TRP units whilst the median TRP of properties with more than four bedrooms increased by seventeen TRP units between December 2016 and 2017 (see **Table 4.2.2**). The median TRP of rented properties with four bedrooms decreased by four TRP units between 2016 and 2017 (see **Table 4.2.3**).

## 4.3 Open Market units - tenure and location

**Table 4.3.1** gives the location of Open Market property units by tenure. Units are mapped individually by tenure in **Figures 4.3.1** and **4.3.2**. For the purposes of this bulletin, 'Main Centre' refers to the outer and inner areas of the Main Centre combined.

Torteval had the highest proportion of owner occupied domestic property units (80.0%), whilst the Forest had the lowest proportion (53.3%). Please note that Torteval and Forest have the smallest number of Open Market units.

St Peter Port had the highest proportion of Open Market rented units (43.3%) at the end of December 2017. This was 0.5 percentage points lower than at the end of December 2016.

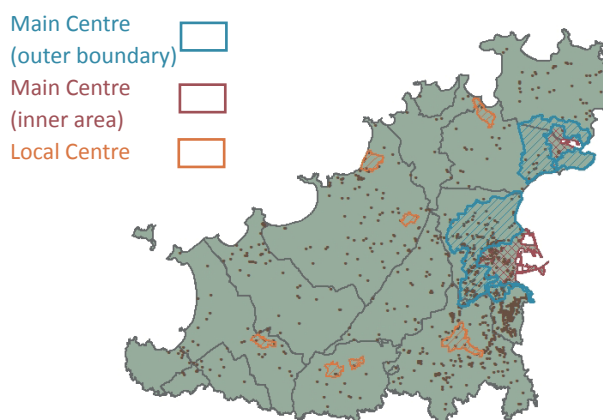

As seen in the Local Market, there was a higher proportion of owner occupation in the Local Centres and Outside of the Centres (68.6% and 69.1% respectively) compared with the Main Centre (52.6%). The proportion of owner occupied domestic property units rose across the Local and Main Centres at the end of December 2017 compared with the end of December 2016, increasing by 2.9 and 0.4 percentage points respectively. The number of units Outside of the Centres decreased by 0.7 percentage points since 2016. There was a decrease in the proportion of rented domestic property units in the Local and Main Centres since 2016 and an increase in rented units Outside of the Centres, with a change of 2.9, 0.1 and 0.4 percentage points respectively.

Over half (53.0%) of Open Market domestic property units are located in St Peter Port where owner occupation was 0.6 percentage points higher in 2017 than in 2016.

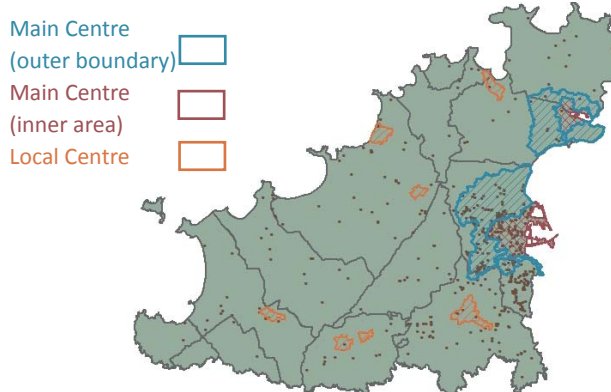

**Table 4.3.1: Tenure of Open Market units by location**

Location	2017		
	% of units		
	Owner occupied	Rented	Other
Castel	70.0%	28.5%	1.5%
Forest	53.3%	40.0%	6.7%
St Andrew	73.6%	26.4%	0.0%
St Martin	71.2%	26.9%	1.9%
St Peter Port	55.0%	43.3%	1.7%
St Pierre du Bois	72.2%	25.9%	1.9%
St Sampson	67.9%	30.4%	1.8%
St Saviour	73.0%	23.8%	3.2%
Torteval	80.0%	20.0%	0.0%
Vale	71.4%	27.3%	1.3%
Local Centres	68.6%	28.6%	2.9%
Main Centre	52.6%	45.4%	2.0%
Outside of the Centres	69.1%	29.4%	1.5%
Total	62.4%	35.9%	1.8%

**Figure 4.3.1: Map of Open Market owner occupied units**

**Figure 4.3.2: Map of Open Market rented units**

## 5.1 Changes to the number of units

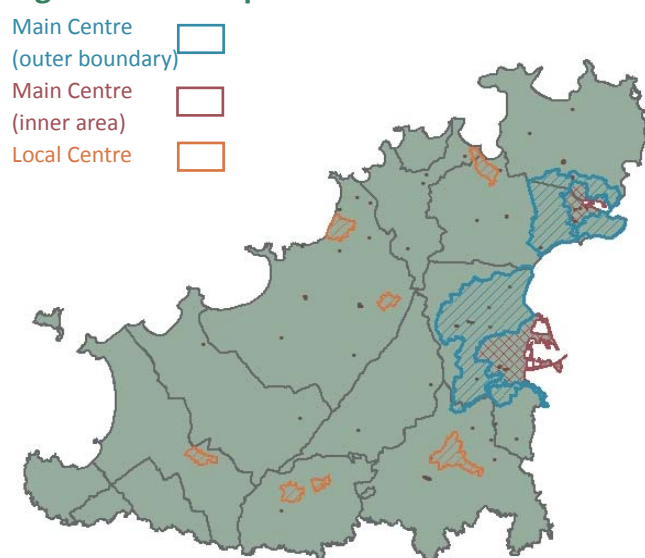

**Table 5.1.1: Change in number of units by type of change**

Type of change	2017		
	Plus	Minus	Net change
New build	102	0	102
Demolition	0	34	-34
Subdivision	16	0	16
Amalgamation	0	2	-2
Conversion	9	5	4
<b>Total</b>	<b>127</b>	<b>41</b>	<b>86</b>
Administrative amendments	8	5	3
<b>Total including administrative amendments</b>	<b>135</b>	<b>46</b>	<b>89</b>

Since December 2010, changes to the number of domestic property units have been recorded by the type of change, as shown in **Table 5.1.1**.

Additional units created are classified as being new builds (when new units have been constructed either as a replacement to a previously demolished property or as a new development or extension), subdivisions (when existing units have been divided to create more units) or conversions (when an existing building has been changed from non-domestic to domestic use).

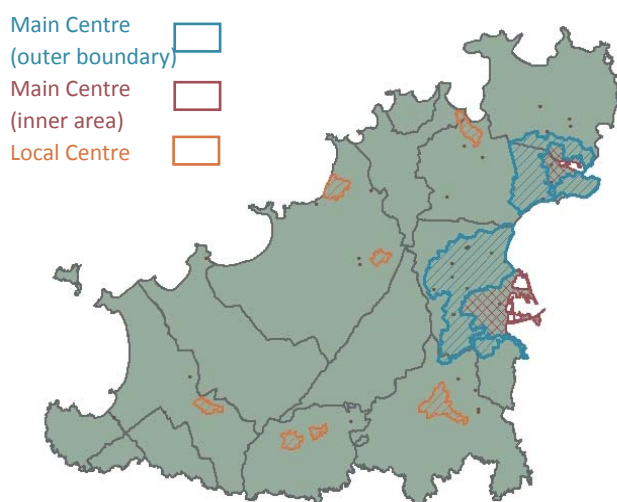

**Figure 5.1.1: Map of units created in 2017\***

Units are classed as having been created when the building has both been surveyed and had a postal address allocated to it by Guernsey Digimap Services. **Figure 5.1.1** shows the location of the units created during 2017.

Units removed are classified as being demolitions (when they have been wholly or partially razed to the ground, including those that are subsequently replaced with a new build), amalgamations (when existing units have been joined to create fewer units) or conversions (where an existing building has been changed from domestic to non-domestic use). **Figure 5.1.2** shows the location of the units removed during 2017.

**Figure 5.1.2: Map of units removed in 2017\***

Subdivision can also result in the removal of units (albeit with a net increase in units), when the original unit no longer exists as a result of the division into a larger number of units.

Units are classed as having been removed when the building has either been partially or completely removed or the address has been “de-activated” by Guernsey Digimap Services.

Further additional units have been included or removed from the total since 2013 as a result of administrative changes as further information on existing properties has become available.

\* Maps include administrative amendments

## 5.1 Changes to the number of units

During 2017, using the definitions on [page 23](#), 127 new units were created and 41 were removed; a net change of 86.

There was a further net increase of 3 due to administrative amendments at the end of 2017. An administrative amendment includes, for example, the inclusion of a small domestic property above a commercial unit, the existence of which was not previously known (see [Table 5.1.1](#)).

[Tables 5.1.2, 5.1.3, 5.1.4](#) and [Figures 5.1.1 and 5.1.2](#), along with the analysis below, refer to the changes resulting from units created and removed only i.e. excluding the administrative amendments.

As shown in [Table 5.1.2](#), the two parishes with the largest net change in units were St Martin and St Sampson (both 24). The second and third largest net changes in the number of units were in Castel and Vale, with an overall increase of 20 units and 13 units respectively.

Overall, there was a net change of 1 unit in Local Centres, which was 27 less than the net change at the end of 2016 and the same as at the end of 2011 (see [page 25](#)). There was a net change of 31 units in the Main Centre during 2017, and 54 Outside of the Centres, which was 7 and 63 units more than during 2016, respectively.

Of the 86 net additional units in 2017, 56 were Affordable housing units and 30 were either private market housing units (owner occupied and rented) or other housing types (staff, self-catering and vacant accommodation).

**Table 5.1.2: Net change\* in number of units by parish and type of change**

Location	2017			
	Net change from new builds and demolitions	Net change from amalgamations and subdivisions	Net change from conversions	Net change total

## 5.1 Changes to the number of units

**Table 5.1.5: Change in the total number of units by year**

Change	Year				
	2013	2014	2015	2016	2017
Plus	241	367	185	132	127
Minus	70	71	41	89	41
Net Change	171	296	144	43	86
Administrative amendments	29	24	25	0	3
Change in total no. of units	200	320	169	43	89

**Table 5.1.5** shows the change in the total number of units from 2013 to 2017. The number of administrative changes has decreased from 29 in 2013 to 3 in 2017. During 2017, there was an increase of 127 units, the lowest for at least five years. The number of removed units was the same as in 2015, with a loss of 41 units.

**Tables 5.1.6** and **5.1.7** show the change in the total number of units by parish and area (i.e. Local, Main and Outside of the Centres) respectively. In the five years ending in 2017, 45.1% of the increase in the total number of domestic property units has been situated within St Peter Port. Torteval and St Andrew have contributed the smallest proportion of the change, accounting for 0.1% and 0.3% of the increase in domestic property units respectively.

Information on properties located in Local Centres, Main Centres and Outside of the Centres is available for 2011, 2016 and 2017 only. In future years, we will be better able to track trends over time.

Affordable (social and intermediate) housing units, (see **Table 5.1.8**) accounted for 65.1% of the increase in the total number of domestic property units in 2017. These included several GHA developments, containing both social rented and intermediate (partially owned) units.

**Table 5.1.6: Net change\* in the total number of units by parish**

Parish	Year				
	2013	2014	2015	2016	2017
Castel	2	23	13	-1	20
Forest	0	2	6	0	-1
St Andrew	5	-1	-4	0	2
St Martin	27	50	34	23	24
St Peter Port	116	141	64	3	10
St Pierre du Bois	0	8	0	0	-5
St Sampson	7	3	15	11	24
St Saviour	6	2	3	-3	-1
Torteval	1	2	0	-2	0
Vale	7	66	13	12	13
Total	171	296	144	43	86

**Table 5.1.7: Net change\* in the total number of units by area**

Area	Year		
	2011	2016	2017

Main Centre	176	24	31
Outside of the Centres	54	-9	54
Total	231	43	86

**Table 5.1.8: Net change\* in the total number of units by tenure type**

Tenure	Year				
	2013	2014	2015	2016	2017
Affordable Market	102	135	54	35	56
Private Market (and other)	69	161	90	8	30
Total	171	296	144	43	86

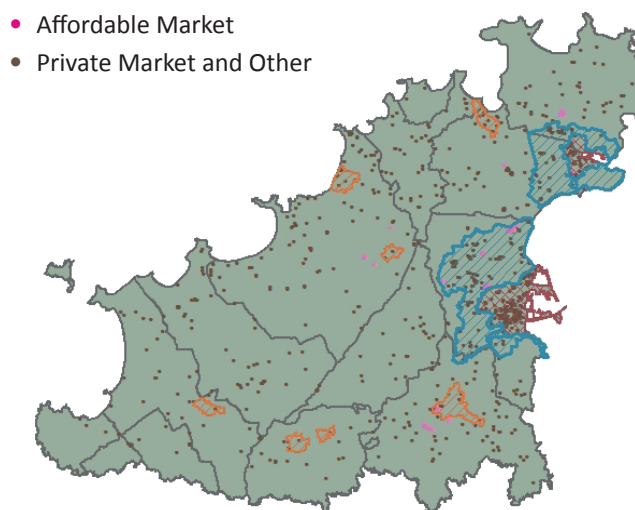

\* Net change excludes administrative amendments

## 5.1 Changes to the number of units

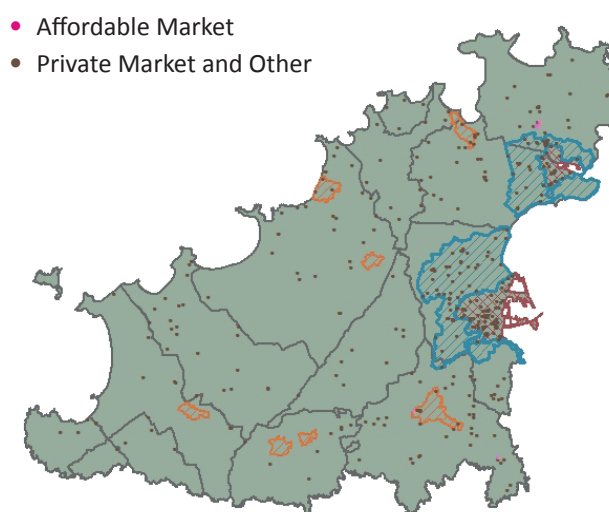

Information on properties created and removed between 2011 and 2017 are shown on the maps in **Figures 5.1.3** and **5.1.4**.

In 2011, 70.6% of new units created were located in the Main Centre (see **Figure 5.1.3**) compared to 53.0% of new units in 2016 and 36.3% in 2017. In 2011, 43.8% of removed units were in the Main Centre compared to 51.7% in 2016 and 43.5% in 2017 (see **Figure 5.1.4**).

**Figure 5.1.3: Map of units created between 2011 and 2017 inclusive**

**Figure 5.1.4: Map of units removed between 2011 and 2017 inclusive**

## 6.1 Vacant units

**Table 6.1.1: Number of vacant units by market**

Year	No. vacant units			% of island total units
	Local	Open	Total	
2014	187	8	195	0.7%
2015	212	13	225	0.8%
2016	135	6	141	0.5%
2017	131	7	138	0.5%

The methodology for calculating the number of vacant domestic property units is currently being refined and therefore this data should be used with caution.

As in previous years, properties with low or zero electricity consumption over the year (and without other evidence to suggest that they have been occupied) were classified as potentially vacant. This list of vacant properties was then matched against address data taken from the Rolling Electronic Census in 2017. Properties which showed low or zero electricity consumption for a year or more, which also had no record of anyone living at that address at the beginning of 2017, were classified as vacant. This methodology results in lower levels of vacant properties than previously reported. It is not possible to extract accurate address data from the Rolling Electronic Census for years prior to 2014, so earlier comparisons of vacant units using this method cannot be made.

**Table 6.1.2: Tenure of vacant units by market**

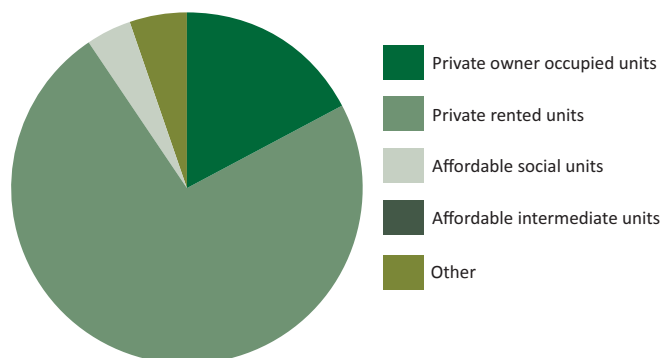

Tenure		2017			
		Local	Open	Total	% of unit
Private Market	Owner Occupied	20	4	24	0.1%
	Rented	98	3	101	1.3%
Affordable Market	Social	6	0	6	0.3%
	Intermediate	0	0	0	0.0%
Other		7	0	7	0.9%
Total		131	7	138	0.5%

All residential tenures of domestic units (e.g. self-catering and social units) are included.

In December 2017, 138 (0.5%) of the island's domestic property units had been vacant for a year or more. This compares with 141 in the year ending December 2016. (See [Table 6.1.1](#)).

[Table 6.1.2](#) shows the number of vacant properties broken down by market and tenure. 1.3% of privately rented units (101 units) had been classified as vacant for a year or more at the end of December 2017.

**Figure 6.1.1: Tenure of vacant units**

As can be seen from [Figure 6.1.1](#), privately rented units had the highest proportion of vacant units (73.2%), compared with 17.4% for owner occupied units and 4.3% for social rented properties. No Affordable intermediate properties had been vacant for a year or more at the end of December 2017.

## 7.1 Specialised housing

An additional section has been added this year to provide more detail on specialised housing which exists within the private and Affordable parts of the Local Market and in the Open Market.

Specialised housing refers to units that involve some element of care; Residential and Nursing homes as well as any extra care accommodation are categorised as specialised. Specialised housing can accommodate people of any age, however some developments have age restrictions for residents. Residential and Nursing homes are not included in the data presented in any other section of this Bulletin, resulting in a higher grand total of units.

In previous Bulletins the term "supported" was used to refer to sheltered and extra-care accommodation. Specialised housing does not include sheltered accommodation and therefore the number of supported housing units published in previous Bulletins and the number of specialised housing units reported within this Bulletin are not comparable, but a full time series is included here.

At the end of 2017, 273 (1%) of the 27,018 property units in Guernsey, including Residential and Nursing homes, were specialised. Of these, 60.4% (165 units) were located in the Affordable market and 108 units were located in the private market, 98 in the Local Market and 10 in the Open Market (see **Figure 7.1.1**). Non-specialised housing made up 96.2% of the 27,018 total (**Table 7.1.1**)\*.

The proportion of specialised housing differs between the Local and Open Market. The proportion of Open Market specialised housing units made up 0.6% of the total number of Open Market units compared to 1.0% of Local Market units.

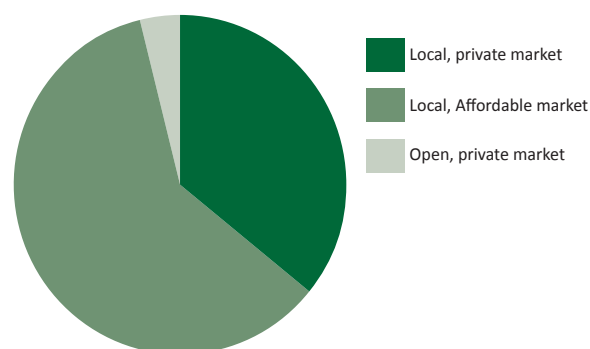

**Table 7.1.2** shows an increase in specialised housing since 2013, especially in the Affordable market.

**Table 7.1.1: Specialised housing by Market\*\***

Tenure		2017					
		No. units			% of total units		
		Local	Open	Total	Local	Open	Total
Specialised	Private Market	98	10	108	0.4%	0.6%	0.4%
	Affordable Market	165	0	165	0.6%	0.0%	0.6%
Non-specialised	Private Market	22,093	1,561	23,654	86.9%	97.6%	87.5%
	Affordable Market	2,337	0	2,337	9.2%	0.0%	8.6%
Other		726	28	754	2.9%	1.8%	2.8%
Total		25,419	1,599	27,018	100.0%	100.0%	100.0%

\* Numbers may not sum with those presented in the table due to rounding.

**Table 7.1.2: Specialised Local Market units\*\***

	Specialised		Non-specialised		Other
	Private Market	Affordable Market	Private Market	Affordable Market	
2013	78	2	21,590	2,201	928
2014	97	102	21,770	2,255	898
2015	97	119	21,955	2,298	803
2016	95	151	22,041	2,297	738
2017	98	165	22,093	2,337	726

**Table 7.1.3: Specialised Open Market units\*\***

	Specialised	Non-specialised	Other
	Private Market	Private Market	
2013	9	1,562	26
2014	11	1,554	30
2015	11	1,571	32
2016	10	1,567	27
2017	10	1,561	28

\*\* including Residential and Nursing homes

## 7.2 Specialised housing- number of bedrooms and location

**Table 7.2.1: Number of bedrooms of specialised housing units**

No. bedrooms	2017	
	Private Market	Affordable Market
1	20.9%	37.4%
2	10.3%	22.3%
3	0.0%	0.0%
4	0.0%	0.0%
Over 4	8.4%	0.7%
Unknown	0.0%	0.0%
Total	39.6%	60.4%

\* Numbers may not sum with those presented in the table due to rounding.

This section focuses on specialised housing by number of bedrooms and location.

**Table 7.2.1** shows that 58.3% of specialised housing units had one bedroom; 37.4% in the Affordable market. Two bedroom apartments accounted for 32.6% of the total specialised housing units. The remaining 9.2% consisted of Residential and Nursing homes.\*

At the end of December 2017, no bungalows or houses were categorised as specialised.

96.3% of all specialised housing units were located in the Local Market. The remaining 3.7% of Open Market units were Residential or Nursing homes and had more than four bedrooms.

In total, over 60% of all specialised housing units were located in the Affordable market ([see Table 7.2.1](#)).

Le Grand Courtil and Nouvelle Maraitaine are located in St Martin and Vale respectively. These parishes had the highest proportion of specialised units (3.3% and 1.9% of all property units) at the end of December 2017. St Peter Port had the third highest proportion of specialised housing units, where Rosaire Court and Gardens is located.

At the end of December 2017, every parish contained a Residential or Nursing home with the exception of St Pierre du Bois.

## 8.1 Definitions and categories used

### Domestic Property Units

A domestic property unit is defined (for the purposes of this bulletin) as being a building, or part of a building, which has its own postal address, is self contained and is used for residential purposes (including those which are vacant). For example, an individual flat is counted as one unit, as is a farmhouse. A building containing several individually rented rooms, but shared access and shared cooking and washing facilities (i.e. the individual rooms are not self contained) is also counted as one unit.

All domestic property units owned by individuals, businesses and the States of Guernsey are included. Business property units, which have a residential element (such as hotels, lodging houses, nursing or care homes) are not included in this data, other than **Section 7** where Residential and Nursing homes are included. Domestic units in multiple occupancy (i.e. those occupied by a number of unrelated people, typically on separate tenancy agreements) are included in this Bulletin.

### Open and Local Market Units

The island's housing stock is split into two categories: Open Market and Local Market and the Population Management Law governs which housing is Open Market. Open Market housing is divided into four parts (A, B, C and D), which relate to the use type (see [www.gov.gg/pmopenmarket](http://www.gov.gg/pmopenmarket) for more information). The data in this bulletin, with the exception of **Section 7**, only includes private and social housing units, so any references to Open Market units relate to Open Market Part A housing, plus a small number of Open Market Part B properties which are used as staff accommodation. A small number of Open Market Part C properties are included in **Section 7** which relate to Residential and Nursing homes.

### Building Types of Domestic Property Unit

The building types used throughout this bulletin are grouped into four categories; apartment, bungalow, house and other. The category of building type a unit falls into is determined by its physical properties and proximity to other buildings:

Apartment is the category for a unit of accommodation that is attached to or contained within a larger building (the remainder of which may or may not be used for domestic purposes). This category covers flats, bedsits, wings, annexes, maisonettes, dower units and similar, where the unit has a separate postal address to other units within the building. These units can span one or more storeys.

Bungalow is the category for a property unit (including chalet bungalows and cottages), which has one or one and a half storeys, is not contained within a larger building and can be detached, semi-detached or terraced. It can also have an apartment attached to or contained within it (e.g. a wing or a flat) - each unit is identified by having a separate postal address.

Units which have two or more storeys and (as per bungalows), are not contained within a larger building, can be detached, semi-detached or terraced and can have an apartment attached or contained within them, are categorised as houses.

The "other" category captures building types which do not fall within any of the above categories. They tend to be property units which were not initially designed for domestic use (e.g. commercial buildings or barns), but have since had their use changed without physical alteration to the building.

## 8.1 Definitions and categories used

### Tenure of Domestic Property Units

The tenure categories have been changed this year to better show trends in particular types of housing. Historic figures have been re-aligned with the new groupings to enable a like-for-like comparison. The changes only impact on Local Market units. The tenure describes the basis on which households occupy the property unit and the categories used are defined as follows:

The Owner Occupied category covers units which are occupied by their owners' household (and possibly also other households). This includes properties which can be purchased only by older people.

The Rented category covers units which are occupied by a household (or households) other than their owners' household. This includes properties which can be rented only by older people and sheltered accommodation. It includes properties on short- and long-term leases and could include properties owned by people who ordinarily live at a different address (either on or off island).

The Affordable category includes accommodation provided by the States of Guernsey and the Guernsey Housing Association, where the allocation criteria are based primarily on household incomes. In this Report, it has been divided into Social (socially rented) and Intermediate (partially owned) units, which had previously been combined.

Specialised housing covers all units that involve an element of care. This includes all extra care accommodation provided by the States, the Guernsey Housing Association and other housing associations, where the allocation criteria are based primarily on care needs. It includes social rented, partially owned, private rented and owner occupied units, as well as Residential and Nursing homes. Residential and Nursing homes are only included in relation to Specialised housing (**Section 7**).

The Other category includes self-catering, staff accommodation and units that are known to be vacant.

## 9.1 Contact details and further information

This bulletin will be published annually each March, but information on property prices is published quarterly in the **Residential Property Prices Bulletin**. You may also be interested in other States of Guernsey Data and Analysis publications, which are all available online at [www.gov.gg/data](http://www.gov.gg/data). Please contact us for further information.
