I would like to ask the President of the Committee *for the* Environment & Infrastructure two questions on the Paris Agreement and Climate Change

### **Question 1**

Climate change is considered the greatest existential threat facing our planet today.

The 2015 Paris Agreement brought all the nations together to undertake ambitious efforts and rapid action to combat climate change.

What is Guernsey doing to accelerate the extension of the Paris Agreement to it?

### **Question 2**

The UN's Intergovernmental Panel on Climate Change reported this month the urgent need for drastic environmental action in order to keep global warming from exceeding 1.5 degrees Celsius.

In light of this report and our responsibilities to future generations what further mitigation measures is Guernsey now going to take to combat climate change?
