
WHO CAN ACCESS A SERVICE

The Reparative Care Team provide direct therapeutic services to Looked After and Adopted children and their families. We also provide services for children whose carers are in receipt of a residence order allowance.

The NSPCC 'Letting the Future In' therapeutic programme is for any child in Guernsey who has experienced child sexual abuse.

OUR STORY

The Children & Young People's Plan 2017- 2022 outlines the way in which the Children & Family Community Services will meet the requirements of 'the Children Law' (2008).

The Reparative Care Team forms part of the Corporate Parenting Strategy and Children & Young People's Plan in line with the 2020 vision.

Additionally the Adoption Reform Law will require a legal framework around adoption support services provided to adopters, adopted children, their siblings and close birth family members.

REPARATIVE CARE TEAM

HELPING YOU GROW

States of Guernsey
Children and Family
Community Services

OUR MISSION

Some children who do not live in the care of their birth parents may have had a difficult start in life. The Reparative Care Team works with these children and their carers to understand their emotional and psychological needs to support the recovery of developmental traumas.

The Reparative Care Team know that parenting some children who are adopted or in care can present challenges and can require significant emotional resilience. In order to support carers and help create change, the Reparative Care Team provides evidence based interventions that best meet the needs of these children and their families.

We appreciate each family has different strengths and needs therefore we provide a personalised therapeutic intervention based on a structured assessment of need with clearly defined goals and regular reviews as agreed.

We believe that every child requires a contextual assessment of their distress.

HOW TO MAKE A REFERRAL

If you meet the criteria to access a service you are able to make a referral directly to the Reparative Care Team or via MASH in order to receive one of the highlighted services.

In the first instance please contact us to discuss your best route of referral.
