

Access to Public Information Request

Date of receipt: 18th September 2019

Date of response: 14th October 2019

Redundant Glasshouses

In the API request received by email on 18th September 2019, request was made for the following information:

-) Section 2.9 of the Island Development Plan's Approach to Redundant Glasshouse Sites (October 2014) report states that a database was created along with mapping to aid in its writing. I would like a copy of that data, excluding anything that is considered persona/private data according to data protection principles. I would also like a copy of any new data collected since the compilation of the 2014 report and confirmation that the data is the latest available to the States.
-) Section 2.8 of the report indicates that site visits were made. If the condition of each site isn't included in the data at 2.9, please could you include this along with the physical addresses identified and the area coverage (along with a split between actual glasshouse coverage and total land coverage at each site, e.g. a one acre site with a half-acre glasshouse).

In response to this request the data below has been provided by the Planning Service. Although this data represents the best available information, the Planning Service does not accept responsibility for any inaccuracy in the data which has been compiled from various sources and may be subject to change over time.
