BILLET D'ÉTAT

TO THE MEMBERS OF THE STATES OF THE ISLAND OF GUERNSEY

I hereby give notice that a Meeting of the States of Deliberation will be held at **THE ROYAL COURT HOUSE**, on **WEDNESDAY**, the **27th November, 2019** at **9.30 a.m.**, to consider the items listed in this Billet d'État and Billet d'État XXII dated 18th October, 2019 which have been submitted for debate.

R. J. COLLAS
Bailiff and Presiding Officer

The Royal Court House
Guernsey

12th November, 2019

**ELECTION OF A MEMBER OF THE
ELIZABETH COLLEGE BOARD OF DIRECTORS**

The States are asked:

- (1) To elect a member of the Elizabeth College Board of Directors, who need not be a member of the States, to replace Mrs Anne-Marie Collivet whose term of office will expire on the 5th January 2020, in accordance with Rule 16 of The Rules of Procedure of the States of Deliberation, as set out in Section 1 of The Rules of Procedure of the States of Deliberation and their Committees.

N.B. Nominations may be made from the floor of the Assembly.

ELIZABETH COLLEGE

The Grange St Peter Port Guernsey GY1 2PY

9 October 2019

Sir Richard Collas
The Bailiff
Bailiff's Chambers
The Royal Court House
St Peter Port
GY1 2NZ

Dear Sir

I am directed by the Elizabeth College Board of Directors to say that it would be grateful if you could request the States to appoint a member of the Board to replace Mrs Anne-Marie Collivet, whose 6-year term is due to complete on 5 January 2020.

Whilst nominations may be made by any Member of the States, it has become the practice that one nomination is made on behalf of the Board. In considering this year's nomination the Board's Selection Sub-Committee considered the appropriate skills and experience of likely candidates, whilst also maintaining the balance across the Board. In particular, the next 6 years (a Director's period of office) will include the procurement and conversion of Canada Court, and the delivery of a Master Estates Plan for the whole future site. It was therefore deemed appropriate to bring some senior property management expertise onto the Board. They have therefore approached Mrs Rosy Bowyer.

Mrs Rosemary Anne (Rosy) Bowyer was born and educated in the U.K. Since 2002 she has worked for the States of Guernsey as Head of the Strategic Property Unit, Director of States Property Services and, latterly, Head of Corporate Real Estate. She is a qualified Chartered Surveyor with many years' experience at Director level in private practice, not for profit organisations and Government property and construction roles. She is a Fellow of the Royal Institution of Chartered Surveyors (FRICS) and acts as Chair for RICS examination and appeals panels. She is currently President of the Chambre de Discipline of the Guernsey Bar. The Board believes her experience, both as a senior civil servant in the States of Guernsey and expertise in property management, makes her an outstanding candidate to join the Board.

Mrs Bowyer has confirmed her great interest in this opportunity and is honoured for her name to be put forward to the States for consideration. It is intended that her proposer in the States will be Deputy Lyndon Trott. She has signed a Declaration of Interest that she has no conflict.

I trust this letter both sufficiently informs you and is compliant with Rules 16(3) and 36 of the Rules of Procedure of the States of Deliberation and their Committees.

Yours faithfully

Mike Spiller
Clerk to the Board of Directors

Dear Sir

Declaration of Interest

I am satisfied that currently I would have no conflict of interest were I to be appointed as a Director of Elizabeth College, and if potentially one were to emerge, that it would be managed appropriately.

Yours faithfully

Rosy Bowyer

STATUTORY INSTRUMENTS LAID BEFORE THE STATES

The States of Deliberation have the power to annul the Statutory Instruments detailed below.

No. 98 of 2019

THE FINANCIAL SERVICES OMBUDSMAN (CASE FEE AND LEVIES) (BAILIWICK OF GUERNSEY) AMENDMENT ORDER, 2019

In pursuance of Section 27(3) of The Financial Services Ombudsman (Bailiwick of Guernsey) Law, 2014, as amended, "The Financial Services Ombudsman (Case Fee and Levies) Bailiwick of Guernsey) (Amendment) Order, 2019", made by the Committee *for* Economic Development on 12th September, 2019, is laid before the States.

EXPLANATORY NOTE

This Order amends the Financial Services Ombudsman (Case Fee and Levies) (Bailiwick of Guernsey) Order, 2015 ("the Order") in relation to the levy scheme prescribed by the Office of the Financial Services Ombudsman ("OFSO").

Article 5 of the Order is amended to allow the finances of OFSO and the equivalent Jersey body to be united by substituting the calculation which produces the total amount required in levies. In future, the total amount will be shared across the relevant financial services business in both the Bailiwick and the Bailiwick of Jersey, rather than being halved and subsequently levied on those businesses in each Bailiwick.

This Order comes into force on the 28th November, 2019.

No. 99 of 2019

THE WEIGHTS AND MEASURES (PRESCRIBED QUANTITIES) (EXEMPTIONS) REGULATIONS, 2019

In pursuance of sections 20(1) and 61(1) of the Weights and Measures (Guernsey and Alderney) Law, 1991, The Weights and Measures (Prescribed Quantities) (Exemptions) Regulations, 2019, made by the Committee *for* Home Affairs on 30th September 2019, is laid before the States.

EXPLANATORY NOTE

These Regulations exempt from the requirement to sell only in prescribed quantities certain pre-packed miscellaneous foods listed in Table A of Part II of Schedule 4 to the Weights and Measures (Guernsey and Alderney) Law, 1991.

These Regulations come into force on the 30th day of September, 2019.

No. 100 of 2019

**THE WEIGHTS AND MEASURES (INTOXICATING LIQUOR) (AMENDMENT) REGULATIONS,
2019**

In pursuance of sections 18(1) and (2) and 61(1) of the Weights and Measures (Guernsey and Alderney) Law, 1991, The Weights and Measures (Intoxicating Liquor) (Amendment) Regulations, 2019, made by the Committee *for* Home Affairs on 30th September 2019, is laid before the States.

EXPLANATORY NOTE

These Regulations amend the Weights and Measures (Intoxicating Liquor) Regulations, 1999 so as to amend those provisions which require liquors to be prepacked only in prescribed quantities and to make the regulations more consistent with the equivalent provisions in the UK.

These Regulations come into force on the 30th day of September, 2019.

THE STATES OF DELIBERATION
of the
ISLAND OF GUERNSEY

**THE SOCIAL INSURANCE (RATES OF CONTRIBUTIONS AND BENEFITS, ETC.)
ORDINANCE, 2019**

The States are asked to decide:-

Whether they are of the opinion to approve the draft Ordinance entitled "The Social Insurance (Rates of Contributions and Benefits, etc.) Ordinance, 2019", and to direct that the same shall have effect as an Ordinance of the States.

This proposition has been submitted to Her Majesty's Procureur for advice on any legal or constitutional implications in accordance with Rule 4(1) of the Rules of Procedure of the States of Deliberation and their Committees.

EXPLANATORY MEMORANDUM

This Ordinance sets the percentage rates of Class 1 to 3 social insurance contributions which are unchanged for 2020. It sets the upper and lower income limits, amounts of contributions and the Class 3 income allowance; it also increases the amounts of the contributory social insurance benefits set out in the First Schedule. All rates and benefits are increased by 2.4%. The Ordinance prescribes the percentages for the Guernsey Health Service Fund Allocation and the Long-term Care Insurance Fund Allocation which are unchanged from those set for 2019. The provisions set rates and benefits etc. for 2020, under the Social Insurance (Guernsey) Law, 1978. The Ordinance comes into force on 1st January, 2020 except for section 7 in relation to social insurance benefits which comes into force on the 6th January, 2020.

The Social Insurance (Rates of Contributions and Benefits, etc.) Ordinance, 2019

THE STATES, in pursuance of their Resolution of the 16th October, 2019^a, and in exercise of the powers conferred upon them by sections 5, 6, 8, 19, 48(2), 49(4), 61, 101, 101A and 116 of the Social Insurance (Guernsey) Law, 1978^b, and all other powers enabling them in that behalf, hereby order:-

Percentage rates of primary and secondary Class 1 contributions.

1. For the purposes of the Social Insurance (Guernsey) Law, 1978, ("the Law") -

- (a) the percentage rate of a primary Class 1 contribution shall be 6.6%, and
- (b) the percentage rate of a secondary Class 1 contribution shall be 6.6%.

^a Article VI of Billet d'État No. XX of 2019.

^b Ordres en Conseil Vol. XXVI, p. 292; amended by Ordres en Conseil Vol. XXVII, pp. 238, 307 and 392; Vol. XXIX, pp. 24, 148 and 422; Vol XXXI, p. 278; Vol. XXXII, p. 59; Vol. XXXIV, p. 510; Vol. XXXV(1), p. 164; Vol. XXXVI, pp. 123 and 343; Vol. XXXVIII, p. 59; Vol. XXXIX, p. 107; Order in Council No. X of 2000; No. IX of 2001; No. XXIII of 2002; No. XXIV of 2003; No. XI of 2004; No. XVIII of 2007; No. V of 2012; No. IV of 2014; No. III of 2016 and No. IV of 2018; Recueil d'Ordonnances Tome XXV, p. 148; Tome XXVI, p. 177; Ordinance No. XXXIII of 2003; No. XLIV of 2007; Nos. VII and XLII of 2009; No. XVII of 2011; No. XXXVIII of 2012; No. XXX of 2013; Nos. IX and XXX of 2016; Nos. XIII, XXIII and XXXIV of 2017; Nos. XXVII and XXXVI of 2018; and Alderney Ordinance No. VIII of 2018.

Upper weekly and upper monthly earnings limits for the purpose of Class 1 contributions.

2. For the purposes of the Law -

- (a) the upper weekly earnings limit for primary and secondary Class 1 contributions shall be £2,880, and
- (b) the upper monthly earnings limit for primary and secondary Class 1 contributions shall be £12,480.

Lower income limit.

3. For the purposes of the Law, the lower income limit for Class 3 contributions shall be £18,720.

Percentage rate and amount of Class 2 contributions.

4. For the purposes of the Law -

- (a) the percentage rate of a Class 2 contribution shall be, in respect of any person other than a person to whom the following paragraph of this section applies, 11.0%, and
- (b) the amount of a Class 2 contribution shall be, in respect of an overseas voluntary contributor, being a person who is not resident in Guernsey and who, satisfying prescribed conditions, is desirous of paying Class 2 contributions under the Law, £108.86 per week.

Percentage rates and amount of Class 3 contributions.

5. (1) For the purposes of the Law -

- (a) the percentage rates of a Class 3 contribution shall be -
 - (i) in respect of a voluntary contributor, being a person who is not liable to pay a Class 3 contribution but, satisfying prescribed conditions, is desirous of paying contributions in accordance with section 8(4) of the Law, 5.7%,
 - (ii) in respect of a person who has attained pensionable age, 3.4%, and
 - (iii) in respect of all other persons, 10.4%, and
- (b) the amount of a Class 3 contribution shall be, in respect of an overseas voluntary contributor, being a person who is not resident in Guernsey and who, satisfying prescribed conditions, is desirous of paying Class 3 contributions under the Law, £98.47 per week.

(2) The percentage of a minimum Class 3 contribution payable in accordance with section 8(5) of the Law by a person who is normally in employed contributor's employment shall be 100%.

Amount of the Class 3 income allowance.

6. For the purposes of the Law, the amount of the Class 3 income allowance shall be £8,460.

Rates and amounts of benefits.

7. (1) For the purposes of the Law, the weekly rate of each description

of benefit set out in column 1 of Part I of the first schedule to this Ordinance shall be the rate specified in relation thereto in column 2, and the amounts by which that rate may be increased in respect of an adult dependant shall be the amount specified in column 3.

(2) For the purposes of the Law, where the extent of the disablement is assessed for the period to be taken into account as amounting to 20% or more, industrial disablement benefit shall be payable for that period at the appropriate weekly rate specified in Part II of the first schedule to this Ordinance.

(3) For the purposes of the Law, the amounts of death grant, maternity grant, adoption grant and bereavement payment shall be the appropriate amounts specified in relation thereto in Part III of the first schedule to this Ordinance.

Guernsey Health Service Fund Allocation and Long-term Care Insurance Fund Allocation.

8. The percentages determined in respect of the contribution year for the purposes of sections 101 (the Guernsey Health Service Fund Allocation) and 101A (the Long-term Care Insurance Fund Allocation) of the Law are those specified in columns 2 and 3 of the second schedule to this Ordinance of the aggregate amount paid in respect of each of the classes of contribution specified in column 1 of that schedule.

Repeal.

9. The Social Insurance (Rates of Contributions and Benefits, etc.) Ordinance, 2018^c is repealed.

^c Ordinance No. XXXVI of 2018.

Interpretation.

10. In this Ordinance, "**prescribed conditions**" means conditions prescribed by Regulations under the Law.

Citation.

11. This Ordinance may be cited as the Social Insurance (Rates of Contributions and Benefits, etc.) Ordinance, 2019.

Extent.

12. This Ordinance shall have effect in the Islands of Guernsey, Alderney, Herm and Jethou.

Commencement.

13. (1) Section 7 of this Ordinance shall come into force on the 6th January, 2020.

(2) All other sections of this Ordinance shall come into force on the 1st January, 2020.

THE STATES OF DELIBERATION
of the
ISLAND OF GUERNSEY

THE LONG-TERM CARE INSURANCE (GUERNSEY) (RATES) ORDINANCE, 2019

The States are asked to decide:-

Whether they are of the opinion to approve the draft Ordinance entitled "The Long-term Care Insurance (Guernsey) (Rates) Ordinance, 2019", and to direct that the same shall have effect as an Ordinance of the States.

This proposition has been submitted to Her Majesty's Procureur for advice on any legal or constitutional implications in accordance with Rule 4(1) of the Rules of Procedure of the States of Deliberation and their Committees.

EXPLANATORY MEMORANDUM

This Ordinance amends rates of long-term care benefit and the weekly payment which a claimant must make, towards the cost of the claimant's care, under the Long-term Care Insurance (Guernsey) Law, 2002, with effect from 6th January, 2020. The benefits are increased by 1.9%.

The Long-term Care Insurance (Guernsey) (Rates)

Ordinance, 2019

THE STATES, in pursuance of their Resolution of the 16th October 2019^a, and in exercise of the powers conferred on them by sections 5 and 31 of the Long-term Care Insurance (Guernsey) Law, 2002^b and all other powers enabling them in that behalf, hereby order:-

Rates of benefit.

1. (1) The maximum weekly rates of care benefit shall be -
 - (a) for persons resident in a residential home -
 - (i) £463.89, or
 - (ii) where also receiving EMI care, £611.24, and
 - (b) for persons resident in a nursing home or the Guernsey Cheshire Home, £866.11.
- (2) The maximum weekly rates of respite care benefit shall be -
 - (a) for persons receiving respite care in a residential home-
 - (i) £673.26 or

^a Article VI of Billet d'État No. XX of 2019.

^b Order in Council No. XXIII of 2002; amended by No. IV of 2014; Ordinance No. XXXIII of 2003; Ordinance No. XLII of 2007.

- (ii) where also receiving EMI care, £820.61, and
- (b) for persons receiving respite care in a nursing home or the Guernsey Cheshire Home, £1,075.48.

Co-payment by way of contribution.

2. The weekly co-payment which a claimant shall make by way of contribution towards or for the cost of that claimant's care -

- (a) as a condition of the right to care benefit, and
- (b) which shall be taken into account for the purposes of determining the rate of care benefit,

shall be £209.37.

Interpretation.

3. In this Ordinance, unless the context requires otherwise -

"**EMI care**" means care which, in the opinion of the Administrator, is necessary to meet the needs of a person who is assessed by the Panel as having the characteristics of an elderly and mentally infirm person, and

"**nursing home**" and "**residential home**" have the meanings given by section 18(1) of the Nursing Homes and Residential Homes (Guernsey) Law,

1976^c.

Repeal.

4. The Long-term Care Insurance (Guernsey) (Rates) Ordinance, 2018^d is repealed.

Citation.

5. This Ordinance may be cited as the Long-term Care Insurance (Guernsey) (Rates) Ordinance, 2019.

Extent.

6. This Ordinance shall have effect in the Islands of Guernsey, Alderney, Herm and Jethou.

Commencement.

7. This Ordinance shall come into force on the 6th January, 2020.

^c Ordres en Conseil Vol. XXVI, p. 71; amended by Ordres en Conseil Vol. XXXI, p. 278; Order in Council No. VI of 2007; Ordinance No. XXXIII of 2003; and Ordinance No. IX of 2016.

^d Ordinance No. XXXVIII of 2018.

THE STATES OF DELIBERATION
of the
ISLAND OF GUERNSEY

THE SEVERE DISABILITY BENEFIT AND CARER'S ALLOWANCE ORDINANCE, 2019

The States are asked to decide:-

Whether they are of the opinion to approve the draft Ordinance entitled "The Severe Disability Benefit and Carer's Allowance Ordinance, 2019", and to direct that the same shall have effect as an Ordinance of the States.

This proposition has been submitted to Her Majesty's Procureur for advice on any legal or constitutional implications in accordance with Rule 4(1) of the Rules of Procedure of the States of Deliberation and their Committees.

EXPLANATORY MEMORANDUM

This Ordinance amends the weekly rate of severe disability benefit and carer's allowance and the annual income limits for the same under the Severe Disability Benefit and Carer's Allowance (Guernsey) Law, 1984 with effect from 6th January, 2020. The benefits are increased by 1.9%.

The Severe Disability Benefit and Carer's Allowance

Ordinance, 2019

THE STATES, in pursuance of their Resolution of the 5th November, 2019^a, and in exercise of the powers conferred upon them by sections 1(4), 2(3)(b), 3 and 23 of the Severe Disability Benefit and Carer's Allowance (Guernsey) Law, 1984^b, and all other powers enabling them in that behalf, hereby order:-

Entitlement to severe disability benefit.

1. The amount determined for the purposes of section 1(4) of the Law is £101,200.

Entitlement to carer's allowance.

2. The amount determined for the purposes of section 2(3)(b) of the Law is £101,200.

Rates of allowances.

3. (1) The weekly rate of a severe disability benefit determined for the purposes of section 3 of the Law is £108.43.

(2) The weekly rate of a carer's allowance determined for the purposes of section 3 of the Law is £87.72.

^a Article II of Billet d'État No. XXI of 2019.

^b Ordres en Conseil Vol. XXVIII p. 353; amended by Ordres en Conseil Vol. XXIX, p. 198; Vol. XXXI, p. 278, Vol. XXXIII, p. 238; Vol. XXXIV, p. 458; Vol. XXXIX, p. 107; Order in Council No. X of 2003; Order in Council No. IV of 2014; Recueil d'Ordonnances Tome XXVI, p. 177; Ordinance No. XXXIII of 2003; No. VII of 2009; No. XXX of 2013; No. IX of 2016 and No. XXVII of 2018.

Interpretation.

4. In this Ordinance the expression "**the Law**" means the Severe Disability Benefit and Carer's Allowance (Guernsey) Law, 1984.

Repeal.

5. The Severe Disability Benefit and Carer's Allowance Ordinance, 2018^c is repealed.

Citation.

6. This Ordinance may be cited as the Severe Disability Benefit and Carer's Allowance Ordinance, 2019.

Extent.

7. This Ordinance shall have effect in the Islands of Guernsey, Alderney, Herm and Jethou.

Commencement.

8. This Ordinance shall come into force on the 6th January, 2020.

^c Ordinance No. XXXIX of 2018.

THE STATES OF DELIBERATION
of the
ISLAND OF GUERNSEY

THE INCOME SUPPORT (IMPLEMENTATION) (AMENDMENT) ORDINANCE, 2019

The States are asked to decide:-

Whether they are of the opinion to approve the draft Ordinance entitled "The Income Support (Implementation) (Amendment) Ordinance, 2019", and to direct that the same shall have effect as an Ordinance of the States.

This proposition has been submitted to Her Majesty's Procureur for advice on any legal or constitutional implications in accordance with Rule 4(1) of the Rules of Procedure of the States of Deliberation and their Committees.

EXPLANATORY MEMORANDUM

This Ordinance amends the benefit limitation rates (in effect the maximum amount of benefit a claimant can receive), the short term and long-term requirement rates on which calculation of income support is based and the level of maximum rent allowances added in calculating a claimant's requirements under the Income Support (Guernsey) Law, 1971 (formerly known as the Supplementary Benefit (Guernsey) Law, 1971) with effect from 10th January, 2020. Rates are increased by 1.9%.

The Income Support (Implementation) (Amendment)

Ordinance, 2019

THE STATES, in pursuance of their Resolution of the 5th November, 2019^a, and in exercise of the powers conferred on them by sections 3(2), 15 and 15B of the Income Support (Guernsey) Law, 1971^b, and all other powers enabling them in that behalf, hereby order:-

Amendment of Ordinance.

1. The Income Support (Implementation) Ordinance, 1971^c ("**the Ordinance**") is amended as follows.

2. For Tables 1 to 4 set out in the Appendix to the First Schedule to the Ordinance, substitute the numbered Tables 1 to 4 set out in the Schedule to this

^a Article II of Billet d'État No. XXI of 2019.

^b Ordres en Conseil Vol. XXIII, p. 26; amended by Ordres en Conseil Vol. XXVI, p. 292; Vol. XXXI p. 278; Vol. XXXIX, p. 107; Order in Council No. XIII of 2014; No. VII of 2015; No. VI of 2016; No. IV of 2018; Recueil d'Ordonnances Tome XXVI, p. 177; Ordinance No. XXXIII of 2003; No. XXXIX of 2009; No. VII of 2010; No. IX of 2016; No. XIII of 2017; No. XIII of 2018; and Alderney Ordinance No. VIII of 2018; applied to Alderney by Recueil d'Ordonnances Tome XVII, p. 168 as amended by Tome XXVI, p. 462 and Ordinance Nos. XXVI and XLIX of 2014. Order in Council No. IV of 2018 is applied to Alderney by Ordinance No. XIV of 2018.

^c Recueil d'Ordonnances Tome XVII, p. 139; amended by Order in Council No. IV of 2014; No. IV of 2018; Recueil d'Ordonnances Tome XVIII, p. 119; Tome XXIV, pp. 471 and 495; Tome XXV, p. 49; Tome XXVI, p. 177, Ordinance No. XXXV of 2004; Nos. THE STATES OF DELIBERATION
of the
ISLAND OF GUERNSEY

27th November, 2019

Proposition No. P.2019/112

Committee for Employment & Social Security

The Income Support (Implementation) (Amendment) Ordinance, 2019

AMENDMENT

Proposed by: Deputy M K Le Clerc

Seconded by: Deputy S L Langlois

In the Income Support (Implementation) (Amendment) Ordinance, 2019, immediately after section 1 add the following section -

- "**1A.** In paragraph 6 (rent) of the First Schedule to the Ordinance –
- (a) in subparagraph (1)(b), for "£75" substitute "£76.50", and
 - (b) in subparagraph (2A)(a), for "£75" substitute "£76.50"."

Explanatory Note

This proposed amendment to the draft Income Support (Implementation) (Amendment) Ordinance, 2019 is to correct an omission. The amendment will increase the maximum amount of income support to be paid (in addition to a person's normal requirements) to a person who is not a householder and the assumed contribution for each person aged 18 years or over living in a household who is not a dependant of the householder, from £75 to £76.50 per week, with effect from 10th January 2020, as approved by the States on 8th November 2019 following consideration of the Committee for Employment & Social Security Department's Policy Letter entitled "Non-Contributory Benefit Rates for 2020" (Billet d' État XXI of 2019).

THE STATES OF DELIBERATION
of the
ISLAND OF GUERNSEY

THE FINANCIAL SERVICES OMBUDSMAN (BAILIWICK OF GUERNSEY) (AMENDMENT)
(NO. 2) ORDINANCE, 2019

The States are asked to decide:-

Whether they are of the opinion to approve the draft Ordinance entitled "The Financial Services Ombudsman (Bailiwick of Guernsey) (Amendment) (No. 2) Ordinance, 2019", and to direct that the same shall have effect as an Ordinance of the States.

This proposition has been submitted to Her Majesty's Procureur for advice on any legal or constitutional implications in accordance with Rule 4(1) of the Rules of Procedure of the States of Deliberation and their Committees.

EXPLANATORY MEMORANDUM

This Ordinance amends Schedule 2 to the Financial Services Ombudsman (Bailiwick of Guernsey) Law, 2014 to allow the finances of the Office of the Financial Services Ombudsman, established by that Law, to be united with the Jersey equivalent body established by the Financial Services Ombudsman (Jersey) Law, 2014.

The Financial Services Ombudsman (Bailiwick of Guernsey) (Amendment) (No. 2) Ordinance, 2019

THE STATES, in pursuance of their Resolutions of the 27th November 2013^a and of the 26th September 2019^b, and in the exercise of the powers conferred on them by sections 1(6)(c), 6 and 27 of the Financial Services Ombudsman (Bailiwick of Guernsey) Law, 2014^c, and all other powers enabling them in that behalf, hereby order:-

Amendment of the Law.

1. For paragraph 2(7) of Schedule 2 to the Financial Services Ombudsman (Bailiwick of Guernsey) Law, 2014 ("**the Law**"), substitute the following paragraph -

"(7) Subparagraph (8) applies in relation to any financial year if at any time in that year -

- (a) there is in force in or under the Jersey Law a provision equivalent to subparagraph (8)(b) requiring cooperation with OFSO, and
- (b) there is an arrangement described in section 6(1)(a) for the sharing of resources, which

^a Article XII of Billet d'État No. XX of 2013.

^b Article XIII of Billet d'État No. XVIII of 2019.

^c Order in Council No. I of 2015; as amended by Ordinance No. XVII of 2015, No. IX of 2016 and No. XX of 2019.

provides for the finances of the schemes to be united.".

2. Immediately after paragraph 2(7) of Schedule 2 to the Law, insert the following subparagraphs -

"(8) In relation to that financial year –

- (a) the references in subparagraphs (1) to (6) to financial service providers, fees, levy, resources, OFSO, income, functions and reserve are to be read as including references to the equivalents of those terms in any enactment in or under the Jersey Law,
- (b) OFSO must cooperate with the body that is equivalent to OFSO under the Jersey Law in adopting and operating a joint budget, including a joint reserve,
- (c) OFSO must publish the arrangement mentioned in subparagraph (7)(b) and ensure that an electronic copy is freely available to the public,
- (d) paragraph 1 is to be read as referring to joint accounts, records and reports for OFSO and the body that is equivalent to OFSO under the Jersey Law, and OFSO must cooperate with that

body in carrying out its functions under that paragraph, and

- (e) OFSO must report to the Committee if it becomes aware that the condition in subparagraph (7)(a) is no longer met.

(9) For the purposes of subparagraphs (7) and (8), the "Jersey Law" means the Financial Services Ombudsman (Jersey) Law 2014, as amended from time to time."

Citation.

2. This Ordinance may be cited as the Financial Services Ombudsman (Bailiwick of Guernsey) (Amendment) (No. 2) Ordinance, 2019.

Commencement.

3. This Ordinance shall come into force on the 28th November, 2019.

THE STATES OF DELIBERATION

THE ELECTORAL ROLL ORDINANCE, 2019

The States are asked to decide:-

Whether they are of the opinion to approve the draft Ordinance entitled "The Electoral Roll Ordinance, 2019", and to direct that the same shall have effect as an Ordinance of the States.

This proposition has been submitted to Her Majesty's Procureur for advice on any legal or constitutional implications in accordance with Rule 4(1) of the Rules of Procedure of the States of Deliberation and their Committees.

EXPLANATORY MEMORANDUM

This Ordinance closes the Electoral Roll at 11.59pm on Saturday 30th November, 2019, and provides for the distribution of application forms for inclusion on the (new) Roll on or before Monday 2nd December, 2019.

The Electoral Roll Ordinance, 2019

THE STATES, in pursuance of their Resolutions of the 25th April, 2019^a, and in exercise of the powers conferred on them by Articles 25(3), 34(1) and 34(11)(a) of the Reform (Guernsey) Law, 1948 as amended^b, and all other powers enabling them in that behalf, hereby order:-

Cessation of current Electoral Roll.

1. The Electoral Roll in existence at 11.59 p.m. on 30th November, 2019 shall, at that time, cease to be valid, and shall be replaced by a new Electoral Roll which shall be compiled by the Registrar-General in accordance with the provisions of the Reform (Guernsey) Law, 1948 ("**the Reform Law**").

Distribution of application forms for inclusion on Electoral Roll.

2. Pursuant to and in accordance with Article 34(1) of the Reform Law, on or before 2nd December, 2019 the Registrar-General shall cause to be distributed to each dwelling in the Island such number of forms of application for inclusion on the Electoral Roll as he or she may consider necessary for the number of voters living therein.

THE STATES OF DELIBERATION
of the
ISLAND OF GUERNSEY

COMMITTEE *FOR THE* ENVIRONMENT & INFRASTRUCTURE

ENVIRONMENTAL POLLUTION (GUERNSEY) LAW, 2004
PART VII – AIR POLLUTION
SUPPLEMENTARY POLICY LETTER

The States are asked to decide whether, after consideration of the Policy Letter entitled "Environmental Pollution (Guernsey) Law, 2004, Part VII – Air Pollution – Supplementary Policy Letter", dated 17th October 2019, they are of the opinion –

1. To prescribe the following as operations requiring a licence under Part III of the Environmental Pollution (Guernsey) Law, 2004 –
 - a) the 'Part B' processes described in paragraphs 2.3 to 2.5 of that Policy Letter; and
 - b) the 'Part A' processes described in paragraphs 2.8 to 2.10 of that Policy Letter.
2. To approve the additional powers for the Director of Environmental Health and Pollution Regulation to make statutory instruments in relation to the technical matters set out in paragraph 2.13 of that Policy Letter.
3. Only if propositions 1 and 2 have been approved, to approve the draft Ordinances entitled –
 - a) "The Environmental Pollution (Guernsey) Law, 2004 (Commencement) Ordinance, 2019", as set out in Appendix 1;
 - b) "The Environmental Pollution (Air Pollution) Ordinance, 2019", as set out in Appendix 2; and
 - c) "The Environmental Pollution (Enforcement and Appeals) Ordinance, 2019", as set out in Appendix 3,and to direct that each of the same shall have effect as an Ordinance of the States.

The above Propositions have been submitted to Her Majesty's Procureur for advice on any legal or constitutional implications in accordance with Rule 4(1) of the Rules of Procedure of the States of Deliberation and their Committees.

EXPLANATORY MEMORANDUM

The Environmental Pollution (Guernsey) Law, 2004 (Commencement) Ordinance, 2019

This Ordinance commences Part VII (air pollution) of the Environmental Pollution (Guernsey) Law, 2004 (2004 Law) under which most of the Air Pollution (Guernsey) Ordinance, 2019 is made. Part VII is commenced with effect from 2nd December 2019.

The Air Pollution (Guernsey) Ordinance, 2019

This Ordinance is made under the Environmental Pollution (Guernsey) Law, 2004 ("the 2004 Law") and provides for all the air pollution legislation directed by the States in 2017 except in relation to civil enforcement and appeals which are set out in a separate Ordinance.

Part I and Schedule 1 establish air quality standards. These comprise objectives for ambient air quality (outdoor air), maximum limits for certain pollutants in ambient air and target values for concentrations of certain pollutants in particulates (i.e. solid and liquid matter suspended in the air including soot from diesel vehicles and smoke). The Director of Environmental Health and Pollution Regulation ("the Director") has to take the quality standards into account when considering an application for a licence under the 2004 Law and may attach conditions intended to ensure that the maximum limits are met.

Part II prescribes the carrying out of operations described in Schedule 2, which involve a risk of air pollution, as requiring a licence under the 2004 Law.

The operations prescribed include the high-risk installations controlled by legislation in the European Union and in the UK which takes an integrated approach to pollution control. These reflect operations set out in the Industrial Emissions Directive (IED) in the European Union and legislation in the UK which implements the IED. An integrated approach means that in assessing an operation, account is taken of emissions into all media-air, water and land and the generation of waste; the same approach is taken for licensed operations under the 2004 Law.

As this is a highly technical area and the policy is to align with international standards, the wording of Schedule 2 is closely based on similar the UK legislation. A number of these high-risk operations do not exist in Guernsey but the Ordinance ensures controls will be applied if such an operation were to be set up. One exception is that the threshold for licensing of combustion operations (e.g. burning of fuel in a furnace or commercial boiler) is set lower than in the EU and UK legislation so as to provide control over certain local operations.

Other operations controlled under local authority air pollution controls in England have been added to Schedule 2 for the reasons set out in the supplementary policy letter. A number of these smaller scale operations which cause air pollution take place in Guernsey e.g. dry cleaning.

The new operations will not overlap with the current waste operations the carrying on of which require a licence under the Environmental Pollution (Waste Control and Disposal) Ordinance, 2010, as under section 2(2) of this Ordinance such an operation will be treated as being prescribed only under the 2010 Ordinance.

There are transitional provisions in section 24 so that any person carrying on a new prescribed operation on the date the Ordinance comes into force will be deemed to have a licence providing they apply for a permanent one within two months.

Section 3 applies the licence exemptions and applications provisions under the 2010 Ordinance to operations prescribed under this Ordinance. This means the Director can provide for general exemptions by Regulations or specific exemptions by written notice.

The Director also intends to use the powers in section 49(4)(c) of the 2004 Law which state that a licence may provide that compliance with specified licence conditions is deemed to constitute compliance with specified provisions in the Ordinance. This is because the policy intention is to regulate prescribed operations primarily through their licence conditions.

Parts III and IV provide for controls on emissions of dark smoke, installation of non-domestic furnaces and boilers and emissions of grit and dust from the same which are similar to those provided for under the Clean Air Act 1993 in the UK.

Part III, made under section 50 of the Law, sets out prohibitions in relation to emissions of dark smoke from the chimneys of non-domestic buildings, other chimneys of fixed boilers or industrial plant, the burning of commercial waste on land and from ships. There is a power for the Director to provide for exemptions and a defence, based on that in the Clean Air Act, for smoke emissions caused by initial start-up and shut down of combustion processes.

Part IV, made under section 51 of the 2004 Law, controls the installation of furnaces or boilers in non-domestic premises so that they must be installed to operate without emitting smoke. Those installed in accordance with plans and specifications approved by the Director are treated as meeting this requirement.

Occupiers of non-domestic premises must comply with the limits on emissions of grit and dust from chimneys of furnaces as set out in section 6 and Schedule 3. For boilers with no furnace or furnaces for which no limit is prescribed in Schedule 6, occupiers must use any practicable means for minimising the emission of grit and dust. There are

also regulation making powers to amend section 6 and Schedule 3 to apply them to other pollutants.

Section 7 provides for requirements on occupiers of non-domestic premises to fit plant approved by the Director to reduce emissions of grit and dust from furnaces and boilers being used in certain potentially more polluting ways. Section 8 and Schedule 4 provide for exemptions from these requirements for certain furnaces used for specified purposes. There is also a power for the Director to grant a specific exemption for a boiler or furnace in certain circumstances. Section 9 sets out procedural provisions relating to applications to the Director for an approval of the installation of a furnace or boiler or arrestment plant.

The wording in Schedules 3 and 4, relating to limits on emissions of grit and dust from furnaces and exemptions from the requirement to fit arrestment plant, is technical and based closely on provisions in place in the UK for a considerable time. It was considered prudent to base the wording closely on these provisions so as not to change the technical meaning and as use of similar wording will allow environmental health officers to make use of UK guidance and case law on similar provisions.

Section 10 provides a power for the Director to apply further powers to require occupiers of non-domestic premises, where boilers or furnaces are used for certain potentially polluting purposes, to comply with the requirements in Schedule 5 in relation to the installation of equipment to record emissions of grit and dust and provide measurements to the Director. Schedule 5 allows for the Director to specify apparatus required to be installed and measurements to be taken to measure and record emissions in accordance with relevant best practice from time to time.

Section 11 provides the Director with information powers in relation to furnaces and boilers on non-domestic premises and section 12 sets out how Part IV applies to boilers or industrial plant attached to buildings (as opposed to being installed inside them) or located on land rather than in a building.

Part V prohibits the use of heavy fuel oils and gas oils with a certain sulphur content subject to certain disapplications including in relation to marine fuels used or intended for use on board a ship. The purpose is to decrease the use of sulphur owing to the known negative effects of sulphur on human health, the environment and ecosystems.

Part VI provides for a prohibition on the burning of any waste on land in the open air other than dry plant matter grown on that land i.e. controls on bonfires. The prohibition does not apply to the burning of waste which is carried out in a receptacle designed and constructed for that purpose and so as to prevent or reduce emissions or which is carried out in accordance with a licence for a prescribed operation or with an exemption from a licence requirement. There is a general exemption in Schedule 6 for small scale social, sporting or similar events where waste is burnt provided that no more than 20 individuals are present and subject to meeting specified conditions.

There are also powers for the Director to issue individual exemptions by written notice for such small-scale events where one or more of the conditions set out in the general exemption are not met and to exempt similar larger scale events. Large scale events include those to celebrate Guy Fawkes Night, New Year's Eve and Liberation Day. The individual exemptions are subject to the burning not resulting in significant environmental pollution and compliance with such conditions as the Director may specify in the exemption notice.

Part VII provides the Director with a wide power to issue notices requiring owners of non-domestic premises, vessels, plant or machinery to provide information on air pollution from emissions of pollutants from the same. The provisions are based on similar powers under the Clean Air Act 1993 in the UK. The information notices do not apply to owners of vehicles as the obligations in the Ordinance are directed at owners of premises, vessels and plant and as certain controls on emissions from motor vehicles are now included within Road Traffic legislation.

There are certain safeguards placed on these information notice powers and, in view of the breadth of the information that may be required, a right of appeal against the notice under section 20(8).

The Ordinance also creates other rights of appeal in relation to decisions on approvals in relation to furnaces or boilers (section 9(8)) and on decisions to issue notices requiring the fitting of apparatus to record emissions and the making of such records (section 10(7)). Rights of appeal in relation to decisions concerning licences under the 2004 Law are already set out in section 25 of the Law.

Civil enforcement of requirements under the Ordinance are set out in a separate Ordinance and there are existing rights of appeal in section 25 of the 2004 Law against the issue of such civil enforcement notices (compliance notices).

The criminal offences are set out in sections 65 and 66 of the 2004 Law; under section 65 any breach of a prohibition under the Ordinance is an offence under the Law. The general offence and defence provisions in sections 67 to 70 of the 2004 Law also apply.

The Environmental Pollution (Enforcement and Appeals) Ordinance, 2019

Certain provisions relating to enforcement and appeals under the Environmental Pollution (Guernsey) Law, 2004 (the 2004 Law) are currently set out in the Environmental Pollution (Waste Control and Disposal) Ordinance, 2010 ("2010 Ordinance"). As the title and other content of the 2010 Ordinance relate to waste, these provisions have been included in this Ordinance which repeals and re-enacts the current provisions and adds further compliance notice powers in relation to provisions of the Air Pollution Ordinance. Minor adjustments have been made to the original wording to modernise it.

Part I of the Ordinance restates the current powers of entry and for the Director of Environmental Health and Pollution Regulation (the Director) to make requirements currently set out in sections 35 to 40 of the 2010 Ordinance.

Part II sets out the provisions relating to civil enforcement notices (compliance notices) under the 2004 Law. Section 7 restates the current compliance notice provisions in section 41(1) to (2)(c) of the 2010 Ordinance which will apply in the future in relation to operations prescribed as requiring a licence under the 2010 Ordinance and the Air Pollution Ordinance.

Section 8 provides for a new compliance notice provision, in relation to contraventions of approvals (e.g. in relation to furnaces or boilers), prohibitions (e.g. sulphur content of fuels or bonfire controls) or a contravention of an exemption (e.g. in relation to dark smoke or boiler/furnace controls) under the Air Pollution Ordinance.

Section 9 restates the provisions currently set out in section 41(2)(d) of the 2010 Ordinance which apply to all compliance notices but amended to apply also to the new compliance notices under section 8 issued in relation to provisions of the Air Pollution Ordinance.

Part III restates the provisions currently set out in sections 7 to 16 of the 2010 Ordinance in relation to the Environmental and Public Health Appeals Panel and the related Tribunal drawn up and appointed under the 2004 Law. Minor amendments have been made in section 12(2) to refer to approvals and to notices other than compliance notices to reflect the new provisions in the Air Pollution Ordinance.

Part IV sets out miscellaneous provisions including section 20 which sets out the relationship of the enforcement functions in the Ordinance with those under the 2004 Law.

Section 22 and the Schedule make consequential amendments to the 2010 Ordinance and to other legislation which previously referred to that Ordinance.

THE STATES OF DELIBERATION
of the
ISLAND OF GUERNSEY

COMMITTEE *FOR THE* ENVIRONMENT & INFRASTRUCTURE

ENVIRONMENTAL POLLUTION (GUERNSEY) LAW, 2004

PART VII – AIR POLLUTION

SUPPLEMENTARY POLICY LETTER

The Presiding Officer
States of Guernsey
Royal Court House
St Peter Port

17th October 2019

Dear Sir

1 Executive Summary

1.1 This supplementary Policy Letter seeks approval for amendments to the proposals agreed in February 2017, when the States of Deliberation directed the drafting of legislation to commence Part VII (Air Pollution) of the Environmental Pollution (Guernsey) Law, 2004 (Article III of Billet d'État No III of 2017) and certain legislation under that Part. The legislation directed included prescribing certain operations, which involve a risk of air pollution, as requiring a licence from the Director of Environmental Health and Pollution Regulation (the Director) under Part III of the Environmental Pollution (Guernsey) Law, 2004 (the Law). Those operations were listed in the Director's report attached to the Policy Letter (the Director's report). The Policy Letter also provides clarification regarding terminology and details within the Director's report.

1.2 The amendments recommended are –

- Prescribing, 'Part B' processes, which involve a risk of air pollution and are described in paragraph 2.3 to 2.5 of this Policy Letter, as prescribed operations requiring a licence under the Law;
- Prescribing certain 'Part A' processes, which involve a risk of air pollution and are described in paragraph 2.8 of this Policy Letter, as prescribed operations requiring a licence under the Law; these processes were not specifically detailed within the Director's report; and

- Additional powers for the Director to make statutory instruments relating to certain technical details.

1.3 The points of clarification relate to –

- Guidance being issued regarding uncontrolled burning and bonfires;
- The exclusion for ships from the prohibition relating to the sulphur content of fuels; and
- Fees not being charged for the approval of boiler and furnace installations.

1.4 As the principle of the air pollution legislation was approved and the drafting directed in 2017, approval of the policy for the additional amendments and of the Ordinances are being sought at the same time as set out in paragraph 5.1 of the Directive relating to submission of propositions to the States. The proposed draft Ordinances are attached to the Policy Letter at Appendices 1 to 3.

1.5 The Ordinances provide for –

- Commencement of the Air Pollution Part of the Law;
- The main air pollution provisions; and
- Enforcement and appeals; this carries forward existing enforcement and appeals provisions previously contained in waste control and disposal legislation which has been amended so as to apply in relation to both the waste and new air pollution provisions.

1.6 This Policy Letter is being brought to the Assembly by the Committee *for the Environment & Infrastructure* (CfE&I). Although the Director of Environmental Health and Pollution Regulation is the independent statutory official appointed to carry out the functions, exercise the powers and perform the regulatory functions under the Environmental Pollution (Guernsey) Law, 2004, CfE&I has the policy mandate for the protection of the natural environment.

2 Recommended amendments to the air pollution legislation

Part B processes

2.1 Resolution 1(c) following the debate on the 2017 Policy Letter approved proposals to “prescribe the operations listed in paragraph 4.1 of the Director’s report as operations requiring a licence under Part III of the Law”. Section 4 details ‘Prescribed Operations’ and paragraph 4.1 lists a series of prescribed operations. The operations listed within the Director’s report are processes referred to as Part A process under the United Kingdom’s (UK) Environmental Permitting (England) / Pollution Prevention and Control (PPC) (Scotland) regimes. These are the highest risk processes and they are regulated, in

England, by the Environment Agency and in Scotland by the Scottish Environment Protection Agency. The UK regimes provide for a system of integrated pollution prevention and control covering emissions, for the most polluting operations, into all parts of the Environment. As paragraph 4.2 of the Director's report highlights, these are not operations that commonly exist in Guernsey, or are likely to exist and they were included to provide future-proofed controls over high risk activities. Their inclusion will also assist in demonstrating Guernsey's compliance with international standards for regulation of the most polluting activities.

- 2.2 Section 13(1) of the Law states that "The States may by Ordinance prescribe any description of operation which, in the opinion of the States, may involve a risk of environmental pollution".
- 2.3 In addition to the PPC regime, in England so called 'Part B' processes are generally regulated by local authorities¹ under environmental permits. Part B processes were not specifically mentioned within the Director's report and it is proposed that these processes are specified as prescribed operations within local legislation. The Part B system in England is known as Local Authority Pollution Prevention and Control (LAPPC) and Part B processes are smaller-scale industrial processes which present an air pollution risk and are more likely to be found in Guernsey.
- 2.4 Part B processes mainly fall within six general sectors which include activities involving production and other operations in relation to products made from e.g. chemicals, minerals –
- Animal and vegetable processing sectors and food industries;
 - Combustion;
 - Minerals sector²;
 - Metals sector;
 - Chemicals sector;
 - Petroleum and coating sectors; and
 - Solvents Sector.
- 2.5 Due to the small-scale of the industrial sectors on Guernsey, there are still only a small number of 'Part B' industrial processes that would currently fall within the proposed wider context of prescribed operations in respect of air pollution, however, failure to include these types of processes would prevent pollution prevention measures being applied to smaller-scale industrial processes locally. These Part B processes also include any operations falling within the

¹ In Scotland these processes are regulated by the Scottish Environment Protection Agency.

² This is a wide category including certain operations in relation to glass, glass products, cellulose fibre and ceramics.

descriptions in paragraph 2.8 which are classified as Part B in the UK because of a relatively lower pollution risk than Part A processes.

- 2.6 The inclusion of Part B processes as prescribed operations is clearly within the powers in section 13(1) of the Law and it is within the framework and spirit of the original policy proposals. The scale of the proposed operations that would be prescribed and require licensing, also mirrors the approach that was applied to waste operations prescribed as requiring a licence under the Environmental Pollution (Waste Control and Disposal) Ordinance, 2010 where polluting operations of a smaller, local scale were also prescribed.
- 2.7 As there is a single environmental licensing regulator in Guernsey, the draft Ordinance has not separated Part A and Part B processes as per the two-tier UK model, as this is not necessary and would make the legislation harder to follow. The conditions that would be attached to licences would be proportionate to the risk and impact of the activities and would automatically include a condition relating to the best available technique (BAT) for eliminating or reducing to the minimum any such risk of pollution, consistent with sections 1(2) and 16(1) of the Law.

Extent of Part A processes

- 2.8 Paragraph 4.1 of the Director's report listed a series of activities that were controlled as high risk or Part A installations under the UK's regimes. This list was not described as exhaustive but there are a number of operations which are prescribed as higher risk Part A operations within the UK legislation that were not explicitly listed. The scale of the operations determines whether, in the UK, they would be regulated as Part A or Part B operations. For transparency, these additional activities are listed in full below and it is proposed that these are included as prescribed operations requiring a licence under Guernsey's legislation –

- Energy operations other than energy production;
- Combustion other than in relation to boilers;
- Certain operations at larger service stations;
- Operations in relation to metals other than production and processing (e.g. storage, unloading, handling etc.);
- Surface treatment of plastics;
- Operations in relation to magnesium oxide and other mineral operations which do not relate just to production of cement and lime;
- Operations other than production in relation to organic and inorganic chemicals;
- Manufacturing operations involving ammonia;
- Pulp and panel manufacturing;

- Operations involving treatment of animal and vegetable and food industries other than processing of food; and
 - Intensive farming, carbon capture and storage.
- 2.9 Incineration of waste and other operations in relation to waste are prescribed as Part A or B operations requiring an environmental permit under the UK legislation. These operations are not being prescribed under the Air Pollution legislation as they are already prescribed as requiring a licence under the existing Guernsey waste control and disposal legislation.
- 2.10 Certain operations carried on at larger existing service stations (with a petrol refuelling throughput of greater than 3000m³ in any 12-month period) or new petrol stations (with a petrol refuelling throughput likely to exceed 500m³ in any 12-month period) are proposed to be included as prescribed operations. To provide reassurance, the level of air pollution controls that would be required under licences (where the threshold for licensing is met) would be commensurate with modern standards and it is not foreseen that this will necessitate additional measures being taken. It will, however, ensure that standards are maintained and that enforcement action could be taken in the unlikely event of actual, or possible, polluting incidents in particular resulting from a breach of a licence condition. It is also noted that the Health and Safety Executive (HSE) deal with petroleum safety locally, but there is no power under the Law to impose conditions on a licence solely for health and safety purposes and, therefore, there will not be significant overlapping regulatory activities.
- 2.11 These inclusions are within the principle of the legislation approved by the 2017 resolutions and set out in the Director's report and the initial Policy Letter but they are not mentioned expressly in the policy referred to in resolution 1(c) following the 2017 States debate. As per the comments in paragraph 4.2 of the Director's report, these are not processes that are common in Guernsey but they are proposed to be included to ensure that suitable controls can be applied in the event that these activities are undertaken. If these additions are approved the list of premises in Appendix 3 to the Director's report, where prescribed operations requiring a licence would be carried on, will no longer be exhaustive.

Additional powers to make statutory instruments

- 2.12 It is proposed that additional powers, to those detailed in the Director's report, are provided for the Director to make technical amendments via statutory instruments. The proposals do not alter the nature or substantive content of the policy that was agreed but rather they allow technical alterations to be made to ensure that the legislation remains up to date with scientific and technical progress.

2.13 The proposed changes, as set out in the attached Environmental Pollution (Air Pollution) Ordinance, 2019, and accompanying rationale are –

- Power in section 1(7) to adapt and keep up to date the ambient air quality standards in line with technical or scientific progress;
- Power to amend Schedule 3 in relation to limits on emissions of grit, dust from non-domestic furnaces and boilers and to extend it to other pollutants. The Director's report referred to limits being placed on other pollutants in paragraph 6.2 but the legislation currently places limits only on grit and dust, consistent with the UK Clean Air Act legislation, but with a power for the Director to provide for limits for other emissions from boilers/furnaces;
- Power to amend the burning rates of furnaces/boilers subject to requirements in relation to fitting of equipment arresting emissions (sections 7(3) and 10(4)) in order to remain consistent with technical and scientific progress;
- Power to substitute any reference to EU legislation for a reference to equivalent legislation applying in part of the UK (section 21) allowing for amendments to EU legislation and if the UK implements different national legislation (e.g. in the event of Brexit); and
- Power for the Director to prescribe another occasion for the purposes of bonfire exemptions (Schedule 6, para 7(1)(d)) to reflect cultural or religious changes within the community.

3 Points of clarification regarding the content of the legislation and other matters

Guidance on uncontrolled burning

3.1 The original proposals in relation to uncontrolled burning of non-garden waste (control of bonfires) were subject to four amendments which were debated by the States of Deliberation. In recognition of the public interest in the approved policy and its wide application to both domestic and commercial bonfires, the Director of Environmental Health and Pollution Regulation will issue (not-statutory) guidance on the legislation and its practical application. This is intended to assist the public and businesses to ensure that there is a clear understanding of the nature and extent of the new legislation including available exemptions. The guidance will also set out the proposed approach to enforcement which will be in line with best practice including a proportionate approach.

Extent of application of the composition of fuels

3.2 Paragraph 8.4 of the Director's report stated that "gas oil for maritime use by ships" and "fuels used by ships on military service and by any ship to ensure its

own safety or for saving life at sea, or the use of which is necessitated as a result of damage” would be excluded from the proposed prohibitions on the use of gas oil and fuel oils containing certain levels of sulphur.

- 3.3 The disapplication in section 13(2) of the Air Pollution Ordinance has, however, been widened so that the prohibitions relating to sulphur content do not apply to “any petroleum derived liquid fuel intended for use or in use on board a vessel, including those fuels defined in international standard ISO 8217, except to the extent the particular fuel is used, or intended for use, on land”. The disapplication therefore applies to all marine fuels except those used or intended for use on land.
- 3.4 The reason for broadening the exemption is that in the EU there are additional controls, from those mentioned in the Director's report, on the sulphur content of marine fuels. In the UK controls on the composition of marine fuels are implemented under separate Merchant Shipping legislation which implements Annex VI of the International Convention for the Prevention of Pollution from Ships, 2017 (MARPOL Convention) relating to air pollution. The UK's ratification of the MARPOL convention has not been extended to Guernsey but there are Ordinance making powers in the Merchant Shipping (Bailiwick of Guernsey) Law, 2002 in relation to prevention of pollution from ships, to implement international conventions including provision to implement MARPOL. It was thought preferable that controls on the sulphur content of marine fuels should be considered together and consideration given, with other relevant Committees, as to whether or not it would be more appropriate to implement all or part of them under merchant shipping legislation.

Fees for the approval of installation of furnaces and boilers

- 3.5 Paragraph 14.4 of the Director's report previously proposed that a fee would be charged in relation to approvals of the Director for the installation of boilers and furnaces under existing powers of the Policy & Resources Committee to set fees by Regulations under section 8 of the Law. It is not anticipated that there will be a large number of appliances which will require such approvals, therefore, it is now proposed that a fee is not applied at the outset. Once the legislation has been enacted, the scale of applications and the associated administrative and operational impacts can be assessed and, as necessary, fees can be proposed to the Policy & Resources Committee at a later stage dependent upon the evidence base.
- 3.6 As the fee is set by Regulations, the States is not being asked to make a decision on the fee but the Policy Letter is informing the States of the change in policy from the Director's report.

4 Compliance with Rule 4

- 4.1 In accordance with Rule 4(4) of the Rules of Procedure of the States of Deliberation and their Committees, it is confirmed that the propositions above have the unanimous support of the Committee.
- 4.2 In accordance with Rule 4(5), it is confirmed that the propositions relate to the purpose and policy responsibilities of CfE&I, as the Committee with the policy mandate for the protection of the natural environment.

Yours faithfully

The Environmental Pollution (Guernsey) Law, 2004 (Commencement) Ordinance, 2019

THE STATES, in exercise of the powers conferred on them by section 76 of the Environmental Pollution (Guernsey) Law, 2004^a and of all other powers enabling them in that behalf, hereby order:-

Commencement of Part VII of the Environmental Pollution Law.

1. Part VII (Air Pollution) of the Environmental Pollution (Guernsey) Law, 2004 shall come into force on 2nd of December, 2019.

Citation.

2. This Ordinance may be cited as the Environmental Pollution (Guernsey) Law, 2004 (Commencement) Ordinance, 2019.

^a Order in Council No. XIII of 2004 as amended by Order in Council No. XIII of 2010 and No. XVI of 2015, Ordinance No. XXXIII of 2003, No. XXXVIII of 2006, No. XLIX of 2006, No. XIII of 2007, No. XVIII of 2010, No. V of 2011, No. IX of 2016 and the Environmental Pollution (Enforcement and Appeals) Ordinance, 2019.

The Environmental Pollution (Air Pollution) Ordinance, 2019

ARRANGEMENT OF SECTIONS

PART I AMBIENT AIR QUALITY STANDARDS

1. Establishment of ambient air quality standards.

PART II PRESCRIBED OPERATIONS AND LICENSING

2. Operations in Schedule 2 to be prescribed operations.
3. Application of licensing provisions in 2010 Ordinance.

PART III DARK SMOKE

4. Prohibitions in relation to emission of dark smoke.

PART IV FURNACES AND BOILERS INSTALLED ON PREMISES OTHER THAN A DWELLING HOUSE

5. Requirement for new furnaces and boilers.
6. Emission of grit, dust and other pollutants from furnaces or boilers.
7. Arrestment plant for new furnaces or boilers.
8. Exemptions from section 7.
9. Application for an approval in relation to a furnace or boiler.
10. Measurement of grit and dust by occupiers.
11. Information about furnaces or boilers and fuel consumed.
12. Grit and dust from outdoor furnaces or boilers etc.

PART V SULPHUR CONTENT OF LIQUID FUELS

13. Application.
14. Maximum sulphur content of heavy fuel oil.
15. Maximum sulphur content in gas oil.

16. Sampling and analysis.
17. Defences to offences concerning contraventions of Part V.
18. Interpretation of Part V.

PART VI BURNING OF WASTE ON LAND IN THE OPEN AIR

19. Prohibition on uncontrolled burning of waste on land in the open air.

PART VII GENERAL PROVISIONS

20. Notices to provide information on air pollution.
21. Power to substitute references to EU instruments.
22. Relationship with public health legislation.
23. Interpretation.
24. Transitional provisions in relation to prescribed operations.
25. Consequential amendments.
26. Extent.
27. Citation.
28. Commencement.

- | | |
|-------------|---|
| SCHEDULE 1: | Ambient air quality standards. |
| SCHEDULE 2: | Prescribed Operations. |
| SCHEDULE 3: | Limits on emissions of grit and dust from chimneys of furnaces. |
| SCHEDULE 4: | Furnaces exempt from section 7 requirements in relation to arrestment plant. |
| SCHEDULE 5: | Requirements in relation to recording of emissions of grit and dust from furnaces or boilers. |
| SCHEDULE 6: | Burning of waste on land in the open air - exemptions. |

The Environmental Pollution (Air Pollution) Ordinance, 2019

THE STATES, in pursuance of their Resolutions of the 1st February, 2017^a and the 27th November, 2019^b, and in exercise of the powers conferred on them by sections 3, 13, 14, 22, 25(3)(k), 25(10), 49 to 54, 58 to 62, 64, 69(2), and 72 of the Environmental Pollution (Guernsey) Law, 2004^c, and all other powers enabling them in that behalf, hereby order:-

PART I AMBIENT AIR QUALITY STANDARDS

Establishment of ambient air quality standards.

1. (1) The standards for ambient air in Schedule 1 are established for the purposes of section 3(3) to (5) of the Law.

(2) The standards comprise –

(a) objectives for ambient air quality in Table 1 of Schedule 1 ("**Table 1**"),

^a Article III of Billet d'État No. III of 2017.

^b Article * of Billet d'État No. * of 2019.

^c Order in Council No. XIII of 2004; as amended by Order in Council No. XIII of 2010; Nos. XV and XVI of 2015; Ordinance No. XXXIII of 2003; No. XXXVIII of 2006; No. XLIX of 2006; No. XIII of 2007; No. XVIII of 2010; No. V of 2011; No. IX of 2016 and the Environmental Pollution (Enforcement and Appeals) Ordinance, 2019.

- (b) maximum limits for the level of pollutants in ambient air in Table 2 of Schedule 1 ("**Table 2**"), and
- (c) target values for concentrations of arsenic, cadmium, nickel, benzo(a)pyrene and PM_{2.5} in Parts I and II of Table 3 of Schedule 1 ("**Table 3**").

(3) The objectives for the pollutants in ambient air described in column 1 of Table 1, measured as set out in the corresponding entry in column 3 of Table 1 –

- (a) are set out in the corresponding entry in column 2 of Table 1, and
- (b) should be achieved by the date set out in the corresponding entry in column 4 of Table 1.

(4) The maximum limit values for the level of the pollutants in ambient air described in column 1 of Table 2, measured over the period set out in the corresponding entry in column 2 of Table 2 –

- (a) are set out in the corresponding entry in column 3 of Table 2, and
- (b) are subject to any allowed margin of tolerance set out in the corresponding entry in column 4 of Table 2.

(5) The target values for concentrations of the pollutants, referred to in column 1 of Parts I and II of Table 3, are set out in the corresponding entry in

column 2 of Parts I and II of Table 3 and should be achieved by the date set out in the corresponding entry in column 3 of Parts I and II of Table 3.

(6) The Director –

(a) is required to take into account any relevant objectives, target values or maximum limits established under this section in considering an application for a licence in accordance with section 14(3)(b) of the Law, and

(b) may attach to a licence, conditions intended to ensure the attainment of the maximum limits prescribed under subsection (4) in accordance with section 16(2)(b) of the Law.

(7) The Director may by Regulations amend or substitute subsection (2)(c) or Schedule 1 in order to adapt it to, and keep up to date with, technical or scientific progress.

PART II

PRESCRIBED OPERATIONS AND LICENSING

Operations in Schedule 2 to be prescribed operations.

2. (1) The operations described in Schedule 2, being operations, which in the opinion of the States, may involve a risk of environmental pollution, are prescribed as operations for the carrying on of which a licence is required under Part III of the Law.

(2) If any operation falls within a description –

(a) in Schedule 2, and

(b) in section 1(1) of the 2010 Ordinance,

it shall be treated as only being prescribed under the 2010 Ordinance.

(3) For the avoidance of doubt, the descriptions of operations in Parts I to V of Schedule 2 are subject to any relevant application and interpretation provisions in Part VI of Schedule 2 and other Parts of that Schedule.

Application of licensing provisions in 2010 Ordinance.

3. (1) Despite any provisions of the 2010 Ordinance to the contrary, the following licensing provisions of the 2010 Ordinance apply in relation to a description of operation prescribed under section 2 –

(a) section 3 (exemptions),

(b) section 4 (licence and related applications and fees), and

(c) section 5 (requirements for applications, accompanying plans, maps and other documents).

(2) For the avoidance of doubt, the Director may specify different requirements under sections 4 and 5 of the 2010 Ordinance in relation to different descriptions of operation set out in Schedule 2.

PART III

DARK SMOKE

Prohibitions in relation to emission of dark smoke.

4. (1) An occupier of a building, other than a dwelling house, must not on any day cause or permit any dark smoke to be emitted from a chimney of the building.

(2) A person having possession of a fixed boiler or industrial plant must not on any day cause or permit dark smoke to be emitted from a chimney (not being a chimney of a building), which serves the furnace of the fixed boiler or industrial plant.

(3) A person must not on any day cause or permit any dark smoke to be emitted from premises, other than a dwelling house, in the course of the burning of commercial waste on the premises.

(4) Subsection (3) does not apply to the emission of dark smoke from any chimney to which subsections (1) or (2) applies.

(5) The owner of a vessel and the master or other officer or person in charge of a vessel must not on any day cause or permit any dark smoke to be emitted from a chimney of the vessel.

(6) The Director may by Regulations provide for exemptions from the prohibitions in this section for emissions taking place at such times and places, lasting no longer than such periods and otherwise in such circumstances as the Director may prescribe in those Regulations.

(7) In proceedings for an offence under the Law in relation to a contravention of any provision of this section, there is taken to have been an emission of dark smoke from a chimney or premises in any case where –

- (a) a substance is burned on or in the building, fixed boiler, industrial plant or vessel in question, and
- (b) the circumstances are such that the burning would be likely to give rise to the emission of dark smoke,

unless the person charged with the offence shows that no dark smoke was emitted.

(8) In any proceedings for an offence under the Law in relation to a contravention of subsections (1), (2) or (5) of this section, it is a defence to prove one or more of the following –

- (a) that the alleged emission was solely due to the lighting up of a furnace or boiler which was cold and that all practicable steps had been taken to prevent or minimise the emission of dark smoke,
- (b) that the alleged emission was solely due to some failure of the furnace or boiler, or of apparatus used in connection with a furnace or boiler, and that –
 - (i) the failure could not reasonably have been foreseen, or, if foreseen, could not reasonably have been provided against, and

- (ii) the alleged emission could not reasonably have been prevented by action taken after the failure occurred, or
- (c) that the alleged emission was solely due to the use of unsuitable fuel and that –
 - (i) suitable fuel was unobtainable and the least unsuitable fuel which was available was used, and
 - (ii) all practicable steps had been taken to prevent or minimise the emission of dark smoke as the result of the use of that fuel.

PART IV

FURNACES AND BOILERS INSTALLED ON PREMISES OTHER THAN A DWELLING HOUSE

Requirement for new furnaces and boilers.

5. (1) A person who, or on whose instructions, a furnace or boiler is installed on any premises, other than a dwelling house, must not so install, or cause the installation of the furnace or boiler unless it is, insofar as is practicable, capable of being operated continuously without emitting smoke when burning fuel of a type for which the furnace or boiler was designed.

(2) Any furnace or boiler installed in accordance with plans and specifications submitted to, and approved for the purposes of this section by, the

Director is treated as complying with subsection (1).

(3) For the avoidance of doubt, this section applies in relation to the attachment to premises of industrial plant which already contains a furnace or a boiler.

(4) The Director may by Regulations provide for exemptions from subsection (1) for boilers or furnaces of the same or a similar description, including in size and rates of emissions, to those commonly installed in a dwelling house.

Emission of grit, dust and other pollutants from furnaces or boilers.

6. (1) Schedule 3 prescribes the limits on the rates of emission of grit and dust from the chimneys of furnaces (including furnaces of boilers) installed on premises, other than a dwelling house, for the purposes of section 51(2) of the Law.

(2) The occupier of premises, other than a dwelling house, in which a furnace or boiler is installed must –

- (a) in the case of a limit prescribed under subsection (1), not on any day cause or permit grit or dust to be emitted from a chimney serving the furnace at a rate exceeding the relevant limit set out in Schedule 3, or
- (b) in a case of a chimney of a boiler which has no furnace or another case where no limit is prescribed in Schedule 3, use any practicable means there may be for minimising the emission of grit and dust from the chimney.

(3) In any proceedings under the Law for an offence in relation to a contravention of subsection (2), it is a defence to prove that the best practicable means had been used for minimising the alleged emission.

(4) The Director may by Regulations –

- (a) amend or substitute any provision of Schedule 3, or
- (b) make any necessary amendments to this section and to Schedule 3 to extend their requirements in relation to prescribing limits on the rates of emissions -
 - (i) to chimneys of other types of furnace or boiler, or
 - (ii) to other specified pollutants.

Arrestment plant for new furnaces or boilers.

7. (1) An occupier of premises, other than a dwelling house, must not, subject to subsection (5) and section 8, on any day use a furnace or boiler in the premises –

- (a) to burn pulverised fuel,
- (b) to burn, at a rate of 45.4 kilograms or more an hour, any other solid matter, or
- (c) to burn, at a rate equivalent to 366.4 kilowatts or more, any liquid or gaseous matter,

unless the furnace or boiler meets the conditions in subsection (2).

(2) The conditions referred to in subsection (1) are that –

(a) the furnace or boiler is provided with plant for arresting grit and dust which has been –

(i) approved by the Director, or

(ii) installed in accordance with plans and specifications submitted to and approved by the Director, and

(b) the plant referred to in paragraph (a) is properly maintained and used.

(3) The Director may by Regulations substitute the rates mentioned in subsection (1)(b) or (c).

(4) Regulations under subsection (3) which reduce any rate shall not apply to a furnace or boiler which has been installed, the installation of which has been begun, or an agreement for the purchase of which has been entered into, before the date on which the Regulations come into force.

(5) Subsection (1) does not apply to a furnace or boiler which was installed, the installation of which has been begun, or an agreement for the purchase or installation of which was entered into, on or before the 2nd December, 2019.

Exemptions from section 7.

8. (1) Furnaces of a description in column 1 of the Table in Schedule 4 are exempt from section 7(1) when used for the purpose set out in the corresponding entry in column 2 of that Table.

(2) The Director may, on the written application of the occupier of the premises where a furnace or boiler is used, exempt –

(a) a furnace from section 7(1) whilst it is used for a specific purpose other than one set out for the relevant description of furnace in the Table in Schedule 4, or

(b) a boiler from section 7(1) whilst it is used for a specific purpose,

if the Director is satisfied that the emission of grit and dust from any chimney serving a furnace or boiler on the premises, without compliance with section 7(1), will not give rise to a risk of significant environmental pollution if the furnace or boiler is used for that purpose.

(3) The Director must give written notice to the applicant of the Director's decision on an application under subsection (2) and, in the case of a refusal, of the reasons for the same.

(4) An occupier of premises must not, on any day, use a furnace or boiler which is exempt from section 7(1) for a purpose other than one in relation to which the furnace or boiler is exempt under subsection (1) or (2).

Application for an approval in relation to a furnace or boiler.

9. (1) This section applies to an approval of the Director referred to in section 5(2) or 7(2).

(2) An application for an approval must be -

- (a) made to the Director in such manner as the Director thinks fit including, without limitation, by means of the submission of a specified form of application completed in such manner as the Director may approve, and
- (b) accompanied by such plans, maps and other documents, including copies of any specified form as may be specified for the purpose by the Director.

(3) A fee or charge may be prescribed under section 8 of the Law in relation to work undertaken by the Director in connection with an application for an approval.

(4) The Director is not obliged to consider an application for an approval unless –

- (a) it complies with the requirements of subsection (2),
- (b) any specified form of application has been fully completed by the applicant,

- (c) the application satisfies the requirements set out in subsection (5),
 - (d) the plans, maps and other documents, which are submitted with the application are accurate, clear and as reasonably up to date as is possible in the circumstances, and
 - (e) any fee or charge prescribed under section 8 of the Law is paid when due.
- (5) The requirements for the purposes of subsection (4)(c) are that the application –
- (a) properly identifies the applicant, the owner and occupier of the premises, the furnace or boiler, and any equipment associated with the same, which are the subject of, or otherwise relevant to, the application, and
 - (b) contains sufficient information to enable the Director–
 - (i) to be satisfied that the building, furnace or boiler, and any equipment associated with the same, will be installed and operated in accordance with all relevant provisions under this Ordinance, and
 - (ii) to impose such conditions on the approval as

may be reasonably necessary.

(6) The Director may attach to an approval such conditions as appear to the Director to be appropriate.

(7) The Director must give written notice to the applicant of a decision on an application for an approval and in the case of –

(a) a grant subject to conditions, or

(b) a refusal,

the reasons for the same.

(8) A decision of the Director to refuse to grant an approval or to attach a condition to an approval is prescribed, for the purposes of section 25(3)(k) of the Law, as a decision of the Director against which an appeal shall lie under section 25 of the Law.

(9) In this section, "**specified**" means specified in writing by the Director.

Measurement of grit and dust by occupiers.

10. (1) If a furnace or a boiler in premises, other than a dwelling house, is used –

(a) to burn pulverised fuel,

(b) to burn, at a rate of 45.4 kilograms or more an hour,

any other solid matter, or

- (c) to burn, at a rate equivalent to 366.4 kilowatts or more, any liquid or gaseous matter,

the Director may, by written notice served on the occupier, direct that the provisions of subsection (2) apply to the furnace or boiler.

(2) Where this subsection applies to a furnace or a boiler, the occupier must comply with Schedule 5 which makes provision relating to –

- (a) the installation and use of apparatus for the recording of emissions of grit and dust from the furnace or boiler,
- (b) the maintenance and recording of measurements of such emissions, and
- (c) providing, or otherwise making available to, the Director the results obtained from the measurements.

(3) The occupier of premises, who is subject to a duty under subsection (2) to use apparatus for the recording of measurements of grit and dust, must permit the Director to be represented during the making and recording of those measurements.

(4) The Director may by Regulations –

- (a) substitute the rates mentioned in subsection (1)(b) or

(c),

(b) amend or substitute any requirements set out in Schedule 5, or

(c) make any necessary amendments to this section and Schedule 5 to extend their requirements in relation to the recording of emissions of other specified pollutants.

(5) A direction under subsection (1) may be revoked by the Director by subsequent written notice served on the occupier.

(6) Subsection (5) is without prejudice to the Director's power to issue a further direction under subsection (1) in relation to the same furnace or boiler.

(7) A decision of the Director to issue a notice under paragraph 1(1) or 2(2) of Schedule 5 is prescribed, for the purposes of section 25(3)(k) of the Law, as a decision of the Director against which an appeal shall lie under section 25 of the Law.

Information about furnaces or boilers and fuel consumed.

11. (1) The Director may, for the purpose of carrying out the Director's functions under this Part, require the occupier of any premises other than a dwelling house by written notice served on the occupier, to provide such information as the Director may reasonably require for that purpose, relating to the furnaces or boilers on the premises and the fuel or other substance burned in them.

(2) The Director may in a notice under subsection (1) require the information to be provided within –

- (a) 14 days starting from the date of the notice, or
- (b) such longer period as may be set out in the notice.

(3) An occupier must comply with the requirements of a notice served on the occupier under subsection (1) within the time period set out in the notice.

Grit and dust from outdoor furnaces or boilers etc.

12. (1) Any reference in this Part to the occupier of premises is, in relation to a furnace of any fixed boiler or industrial plant, to be read as a reference to a person having the possession of the boiler or plant.

(2) The reference in section 7(4) and (5) to the installation and to the purchase of a furnace is to be read, in relation to a furnace which is already contained in any fixed boiler or industrial plant, as a reference to attaching the boiler or plant to the premises or fixing it to or installing it on any land forming part of the premises and to purchasing the boiler or plant respectively.

PART V

SULPHUR CONTENT OF LIQUID FUELS

Application.

13. (1) This Part does not apply to heavy fuel oil or gas oil intended for –

- (a) the purpose of research and testing,
- (b) processing prior to final combustion, or
- (c) processing in the refining industry.

(2) This Part does not apply to any petroleum derived liquid fuel intended for use or in use on board a vessel, including those fuels defined in international standard ISO 8217, except to the extent the particular fuel is used, or intended for use, on land.

Maximum sulphur content of heavy fuel oil.

14. (1) For the purposes of section 53(1) of the Law, any heavy fuel oil must not have a sulphur content exceeding 1 per cent by mass.

(2) A person must not use or cause or permit another person to use any heavy fuel oil that has a sulphur content exceeding that set out in subsection (1).

Maximum sulphur content in gas oil.

15. (1) For the purposes of section 53(1) of the Law, any gas oil must not have a sulphur content exceeding 0.1 per cent by mass.

(2) A person must not use or cause or permit another person to use any gas oil that has a sulphur content exceeding that set out in subsection (1).

Sampling and analysis.

16. (1) The Director must take all necessary measures to ensure that periodic sampling is carried out of heavy fuel oil and gas oil and that the samples are

analysed to check that the use of those fuels complies with sections 14 and 15.

(2) Sampling must be carried out with sufficient frequency and in such a way that the Director is satisfied that the samples are representative of the fuels examined.

(3) The reference method adopted for determining the sulphur content of fuels sampled under subsection (1) must be as defined by European standard EN ISO 8754: 2003 or EN ISO 14596: 2007.

Defences to offences concerning contraventions of Part V.

17. In any proceedings for an offence relating to a contravention of this Part it is a defence for the accused to prove that –

- (a) the accused acted under instructions from the accused's employer and the accused neither knew, nor had reason to suppose, that the acts done by the accused constituted an offence under the Law, or
- (b) the acts alleged to constitute the offence were done in an emergency in order to avoid danger to the public and that, as soon as reasonably practicable after they were done, particulars of them were sent to the Director in writing.

Interpretation of Part V.

18. (1) In this Part, unless the context requires otherwise –

"ASTM method" means a method laid down by the American Society

for Testing and Materials in the 1976 edition of standard definitions and specifications for petroleum and lubricating products,

"**CN Code**" means the code set out in Annex I to Council Regulation (EEC) No. 2658/87 of 23rd July, 1987 on the tariff and statistical nomenclature and on the Common Customs Tariff^d,

"**gas oil**" means any petroleum-derived liquid fuel –

- (a) that falls within CN Code 2710 19 25, 2710 19 29, 2710 19 47, 2710 19 48, 2710 20 17 or 2710 20 19, or
- (b) where less than 65% by volume (including losses) distils at 250°C and at least 85% by volume (including losses) distils at 350° C by the ASTM D86 method,

except for diesel fuels (as defined by Article 2(2) of Directive 98/70/EC^e of the European Parliament and of the Council of 13th October, 1998 relating to the quality of petrol and diesel fuels) and fuels used in non-road mobile machinery or agricultural tractors,

"**heavy fuel oil**" means any petroleum-derived liquid fuel –

- (a) that falls within CN code 2710 19 51 to 2710 19 68, 27 20 31, 2710 20 35 or 2710 20 39,

^d OJ L 256, 7. 9. 1987, p. 1.

^e OJ L 350, 28. 12. 1998, p. 58.

- (b) which by reason of its distillation limits, falls within the category of heavy fuel oils intended for use as a fuel and of which less than 65% by volume (including losses) distils at 250°C by the ASTM D86 method, or
- (c) where the distillation cannot be determined by the ASTM method, that is categorised as heavy fuel oil,

except for gas oil.

(2) Expressions used in this Part which are not defined elsewhere in this Ordinance, have the same meaning as in Directive (EU) 2016/802 of the European Parliament and of the Council of 11th May, 2016 relating to a reduction of the sulphur content of certain liquid fuels^f.

PART VI

BURNING OF WASTE ON LAND IN THE OPEN AIR

Prohibition on uncontrolled burning of waste on land in the open air.

19. (1) A person must not burn waste, or cause or knowingly permit the burning of waste, on land in the open air, other than in a receptacle which is designed and constructed –

- (a) for that purpose, and

^f O.J. L 132, p. 58.

- (b) to prevent or reduce to the minimum, in accordance with best practice, the introduction of pollutants into the environment.

(2) Subsection (1) does not apply to the burning of waste which consists of dry plant matter provided that the waste is burnt on the land where the plants were grown.

(3) Subsection (1) does not apply to the burning of waste on land in the open air when carried out –

- (a) under and in accordance with a licence for a prescribed operation, or
- (b) in accordance with the terms or conditions of any exemption under the Law from the requirement to hold a licence for a prescribed operation.

(4) Schedule 6, which provides for exemptions from subsection (1), has effect.

PART VII

GENERAL PROVISIONS

Notices to provide information on air pollution.

20. (1) The Director may require by written notice –

- (a) the occupier of any premises, other than a dwelling house, or

- (b) the owner of any vessel, plant or machinery,

to provide to the Director, by periodical returns or other means, such estimates or other information concerning the pollution of air, or the risk of the same, arising from emissions of pollutants into the air from the premises, vessel, plant or machinery in question.

- (2) A notice under subsection (1) –

- (a) must specify the premises, vessel, plant or machinery to which it relates,

- (b) must specify that a person who –

- (i) fails to comply with a requirement of the notice may be guilty of an offence under section 66(1)(a) or 67(2) of the Law, and

- (ii) provides information in response to the notice which is false, deceptive or misleading may be guilty of an offence under section 67(3) of the Law,

- (b) may, without limiting the generality of subsection (1), relate to the emission of pollutants from any chimney used for the discharge, from any premises, vessel, plant or machinery to the atmosphere, of any emission of –

- (i) sulphur dioxide or particulate matter derived from any combustion process where the material being heated does not contribute to the emission,
- (ii) any gas or particulate matter derived from any combustion process where the material being heated contributes to the emission, or
- (iii) any gas or particulate matter derived from any non-combustion process or other similar industrial activity.

(3) A notice under subsection (1) may, without limiting the generality of subsection (1), require the provision of estimates or other information of the following kinds, in respect of the premises, vessel, plant or machinery –

- (a) in relation to emissions of sulphur dioxide during any specified period –
 - (i) the total duration of all discharges from the specified premises, vessel, plant or machinery during that period, or
 - (ii) the temperature in degrees Celsius, the efflux velocity in metres per second, and the volume flow rates in cubic metres per hour, of the gases discharged from any specified chimney

during that period, and the height in metres above ground level at which each such discharge takes place,

- (iii) the total quantity of sulphur dioxide discharged during that period, to be ascertained, in the case of sulphur dioxide derived from a combustion process, either –

- (A) by calculation from the quantity of fuel or other matter burnt and its sulphur content, or

- (B) if the occupier of the premises and the Director so agree, by direct measurement,

- (b) in relation to total emissions of particulate matter of all kinds during any specified period –

- (i) the total duration of all discharges from the specified premises, vessel, plant or machinery during that period,

- (ii) the temperature in degrees Celsius, the efflux velocity in metres per second, and the volume flow rates in cubic metres per hour, of the gases discharged from any specified chimney during that period, and the height in metres above

ground level at which each such discharge takes place,

(iii) the average concentration of particulates in the gases discharged during that period in grams per cubic metre at standard temperature and pressure (i.e. a temperature of 15 degrees Celsius and a barometric pressure of one bar), or

(iv) the total quantity of particulates discharged during that period, and

(c) in relation to emissions of gas other than sulphur dioxide or emissions of any specified particulate matter during any specified period –

(i) the total duration of all discharges from the specified premises, vessel, plant or machinery during the period,

(ii) the temperature in degrees Celsius, the efflux velocity in metres per second, and the volume flow rates in cubic metres per hour, of the gases discharged from any specified chimney during that period, and the height in metres above ground level at which each such discharge takes place,

(iii) the average concentration of specified pollutants in the discharges made during the period, or

(iv) the total quantity of specified pollutants discharged during the period.

(4) Where a notice under subsection (1) relates to an emission which has taken place before the giving of the notice, it may not require information of a kind set out in subsection (2) or (3) concerning that emission, except and insofar as that information is in the possession of –

(a) the occupier of the specified premises, or

(b) the owner of the specified vessel, plant or machinery,

as the case may be, or is immediately available to that person.

(5) In this section, "**specified**" means specified in the relevant notice under this section.

(6) The person on whom a notice is served under this section must comply with the notice within six weeks starting from the date of service of the notice, or within such longer period as the Director may specify in the notice.

(7) A notice under this section must not –

(a) require returns at intervals of less than three months,
or

- (b) in the case of a single notice, require a person to provide returns (whether periodic or otherwise) covering a period of more than twelve months.

(8) A decision of the Director to issue a notice under subsection (1) is prescribed, for the purposes of section 25(3)(k) of the Law, as a decision of the Director against which an appeal shall lie under section 25 of the Law.

(9) In addition to the grounds of appeal in section 25(4) of the Law, a person making an appeal against a decision of the Director to issue a notice under subsection (1), may appeal on the ground –

- (a) that providing the Director with all or part of the information required by the notice would –
 - (i) prejudice to an unreasonable degree some private interest by disclosing information which is about a trade secret, or
 - (ii) be contrary to the public interest, or
- (b) that the information required by the notice is not immediately available and cannot be readily collected or obtained without incurring undue expenditure for the purpose.

Power to substitute references to EU instruments.

21. The Director may by Regulations substitute any reference to an EU

instrument under this Ordinance for a reference to equivalent legislation applying in any part of the United Kingdom.

Relationship with public health legislation.

22. For the avoidance of doubt, nothing in this Ordinance affects the operation of the Loi relative à la Santé Publique^g or any enactment made under it.

Interpretation.

23. (1) In this Ordinance, unless the context requires otherwise –

"**2010 Ordinance**" means the Environmental Pollution (Waste Control and Disposal) Ordinance, 2010^h,

"**ambient air**" means outdoor air in the troposphere, excluding workplaces where members of the public do not have regular access,

"**arsenic**", "**cadmium**", "**nickel**" and "**benzo(a)pyrene**", except in Schedule 2, mean the total content of those elements and compounds present within the PM₁₀ present in ambient air,

"**boiler**" means a fuel burning apparatus for heating water,

"**dark smoke**" means smoke which, if compared in the appropriate manner with a Ringelmann Smoke Chart, would appear to be as dark as or

^g Ordres en Conseil Vol. IX, p. 386; there are amendments not relevant to this Ordinance.

^h Ordinance No. XVIII of 2010; as amended by Ordinance No. IX of 2016.

darker than shade 2 on that Chart,

"day" means a period of twenty-four hours beginning at midnight,

"fixed boiler or industrial plant" means any boiler or industrial plant which is attached to a building or is for the time being installed on any premises,

"furnace" means an enclosed chamber in which material can be heated to very high temperatures,

"Guernsey" includes the Islands of Guernsey, Herm and Jethou, all other islands, islets and rocks around the coasts of those Islands, whether or not attached at low water, and all of the territorial waters adjacent thereto,

"industrial plant" means any still, melting pot or other plant used for any industrial or trade purposes, and also any incinerator used for or in connection with any such purposes,

"installed on premises" includes fixed on or attached to premises,

"the Law" means the Environmental Pollution (Guernsey) Law, 2004,

"limit value" means a limit fixed on the basis of scientific knowledge, with the aim of avoiding, preventing or reducing environmental pollution, to be attained within a given period and not to be exceeded once attained,

"margin of tolerance" means the percentage of the limit value by which that value may be exceeded in a given year,

"the occupier" means the occupier of the premises,

"particulate matter" means PM_{2.5} and PM₁₀,

"PM_{2.5}" means particulate matter which passes through a size-selective inlet as defined in the reference method for the sampling and measurement of PM_{2.5}, European standard EN 14907, with a 50% efficiency cut-off at 2.5 µm aerodynamic diameter,

"PM₁₀" means particulate matter which passes through a size-selective inlet as defined in the reference method for the sampling and measurement of PM₁₀, European standard EN 12341, with a 50% efficiency cut-off at 10 µm aerodynamic diameter,

"practicable" means reasonably practicable having regard, amongst other things, to local conditions and circumstances, to the financial implications and to the current state of technical knowledge and, **"practicable means"** includes the provision and maintenance of plant and its proper use,

"premises" has the same meaning as in the Law and, for the avoidance of doubt, does not include a vessel,

"Ringelmann Smoke Chart" means –

- (a) a Ringelmann chart which conforms to British Standards publication BS2742C, as referred to in British Standard BS2742: 2009, or

- (b) a miniature smoke chart that conforms to British Standards publication BS2742M, as referred to in British Standard BS2742: 2009,

"**target value**" means a level fixed with the aim of avoiding, preventing or reducing environmental pollution, to be attained where possible over a given period,

"**µm**" means a micrometre (one millionth of a metre), and

"**vessel**" includes every description of vessel used in navigation.

(2) In this Ordinance any reference to a chimney of the building includes a reference to a chimney which serves the whole of part of a building but is structurally separate from that building.

(3) A reference to a British standard or the standard of a European or international standards organisation under this Ordinance is, unless the context requires otherwise, a reference to that standard as from time to time revised or replaced.

Transitional provisions in relation to prescribed operations.

24. (1) Subject to subsection (2), where an operation prescribed under section 2 is being carried on immediately before the commencement of this Ordinance, such operation shall, on or after the commencement of this Ordinance, be deemed to be one in respect of which a licence has been issued under Part III of the Law to the person carrying on the operation provided that an application for a licence to carry on such operation is made to the Director -

- (a) in accordance with sections 4 and 5 of the 2010 Ordinance as applied by section 3 of this Ordinance, and
- (b) within two months starting from the date of the commencement of this Ordinance.

(2) The person carrying on the operation in question shall be treated as a licensee for the operation in question under subsection (1) until -

- (a) the application to carry on the prescribed operation in question is granted by the Director (whether or not subject to conditions), or
- (b) if such an application is refused -
 - (i) the expiry of the period for appealing against the refusal under section 25(5) of the Law, or
 - (ii) where an appeal is duly instituted against the refusal, the date the appeal is finally determined or withdrawn; and an appeal is finally determined when the appeal and any further appeal is finally determined.

Consequential amendments.

25. In section 25 (right of appeal) of the Law, after subsection (8A) add –

"(8B) Despite subsection (8), on an appeal against a decision of the

Director which is not suspended under subsection (8A), the appellate body may on –

- (a) the application of the appellant, and
- (b) such terms as the appellate body thinks just,

suspend or modify the operation of decision pending the determination of the appeal."

Extent.

26. This Ordinance has effect in Guernsey.

Citation.

27. This Ordinance may be cited as the Environmental Pollution (Air Pollution) Ordinance, 2019.

Commencement.

28. This Ordinance shall come into force on the 2nd December, 2019.

SCHEDULE 1

Section 1

AMBIENT AIR QUALITY STANDARDS

TABLE 1 AIR QUALITY OBJECTIVES

Column 1	Column 2	Column 3	Column 4
Pollutant	Objective	Measured as	To be achieved by
Benzene	16.25 µg/m ³	Running Annual Mean	31 st December, 2020
Benzene	5 µg/m ³	Annual Mean	31 st December, 2020
1, 3-Butadiene	2.25 µg/m ³	Running Annual Mean	31 st December, 2020
Carbon Monoxide	10.0 mg/m ³	Maximum daily 8 Hour Mean	31 st December, 2020
Lead	0.25 µg/m ³	Annual Mean	31 st December, 2020
Nitrogen dioxide	200 µg/m ³ Not to be exceeded more than 18 times per year	1 Hour Mean	31 st December, 2020
Nitrogen dioxide	40 µg/m ³	Annual Mean	31 st

			December, 2020
Nitrogen Oxides	(V) 30 µg/m ³	Annual Mean	31 st December, 2020
Particles (PM ₁₀) (gravimetric)	50 µg/m ³ Not to be exceeded more than 35 times per year	24 Hour Mean	31 st December, 2020
Particles (PM ₁₀) (gravimetric)	40 µg/m ³	Annual Mean	31 st December, 2020
Particles (PM _{2.5}) Exposure Reduction	25 µg/m ³	Annual Mean	31 st December, 2020
Sulphur dioxide	266 µg/m ³ Not to be exceeded more than 35 times per year	15 Minute Mean	31 st December, 2020
Sulphur dioxide	350 µg/m ³ Not to be exceeded more than 24 times per year	1 Hour Mean	31 st December, 2020
Sulphur dioxide	125 µg/m ³ Not to be exceeded more than 3 times per year	24 Hour Mean	31 st December, 2020
Sulphur dioxide	(V) 20 µg/m ³	Annual Mean	31 st December, 2020
Sulphur dioxide	(V) 20 µg/m ³	Winter Mean (01	31 st

		October-31 st March)	December, 2020
--	--	---------------------------------	-------------------

TABLE 2 LIMIT VALUES

Column 1	Column 2	Column 3	Column 4
Pollutant	Averaging Period	Limit Value	Margin of Tolerance
Sulphur Dioxide	One hour	350 µg/m ³ not to be exceeded more than 24 times a calendar year	150 µg/m ³ (43%)
Sulphur Dioxide	One day	150 µg/m ³ not to be exceeded more than 3 times a calendar year	
Nitrogen Dioxide	One hour	200 µg/m ³ not to be exceeded more than 18 times a calendar year	
Nitrogen Dioxide	Calendar year	40 µg/m ³	
Benzene	Calendar year	5 µg/m ³	
Carbon Monoxide	Maximum daily 8 Hour Mean	10 mg/m ³	
Lead	Calendar year	0.5 µg/m ³	100%
Particles (PM ₁₀)	One day	50 µg/m ³ not to be exceeded more than 35 times a calendar year	50%
Particles	Calendar year	40 µg/m ³	20%

(PM ₁₀)			
Particles (PM _{2.5})	Calendar year	25 µg/m ³ to be achieved by 31 st December, 2020	

TABLE 3 TARGET VALUES

PART I

Column 1	Column 2	Column 3
Pollutant	Target Value for the Total Content in the PM ₁₀ Fraction Averaged Over a Calendar Year	Date by which Target Value Should be Met
Arsenic	6 ng/m ³	31 st December, 2020
Cadmium	5 ng/m ³	31 st December, 2020
Nickel	20 ng/m ³	31 st December, 2020
Benzo(a)pyrene	1 ng/m ³	31 st December, 2020

PART II

Column 1	Column 2	Column 3
Pollutant	Target Value	Date by which Target Value Should be Met
PM _{2.5}	25 µg/m ³	31 st December, 2020

Notes to the Schedule.

1. In this Schedule, unless the context requires otherwise –

"**ng/m³**" means nanograms per cubic metre,

"**nitrogen oxides**" means the sum of the volume mixing ratio (part per billion by volume) of nitrogen monoxide (nitric oxide) and nitrogen dioxide expressed in units of mass concentration of nitrogen dioxide ($\mu\text{g}/\text{m}^3$),

" **$\mu\text{g}/\text{m}^3$** " means micrograms per cubic metre, and

"**mg/m³**" means milligrams per cubic metre.

2. The "**maximum eight hour daily mean**" concentration of carbon monoxide referred to in Table 1 and Table 2 should be selected by examining eight hour running averages, calculated from hourly data and updated each hour; and each eight hour average so calculated should be assigned to the day on which it ends so that the first calculation period for any one day would be from 17.00 on the previous day to 01.00 on that day and the last calculation period for any one day would be the period from 16.00 to 24.00 on that day.

SCHEDULE 2

Section 2

PRESCRIBED OPERATIONS

PART I

ENERGY INDUSTRY OPERATIONS

Combustion operations.

1. (1) The burning of any fuel in an appliance or a combination of appliances with a rated thermal input of 0.4 megawatts or more where carried on by way of business, as a public service or in the course of the activities of a non-profit organisation.

(2) For the purposes of subparagraph (1) –

(a) "**appliance**" means a boiler, furnace, gas turbine or compression ignition engine,

(b) where two or more appliances with an aggregate rated thermal input of 0.4 megawatts or more are operated on the same site by the same operator those appliances are to be treated as a single appliance with a rated thermal input of 0.4 megawatts or more, and

- (c) "non profit organisation" has the meaning in the Charities and Non Profit Organisations (Registration) (Guernsey) Law, 2008ⁱ.

Refining, gasification and liquefaction operations.

2. (1) The refining of gas including natural gas or its products.
- (2) The production of coke.
- (3) Pyrolysis, carbonisation, distillation, gasification, liquefaction, partial oxidation or other heat treatment of coal (other than drying of coal), lignite, oil, or other carbonaceous material or mixtures, otherwise than with a view to making charcoal.
- (4) The gasification or liquefaction of fuels other than as described in subparagraph (3) in installations with a total rated thermal input of 20 megawatts or more.
- (5) The refining of mineral oils, or the loading, unloading or other handling of, or other physical, chemical or thermal treatment of –
- (a) crude oil, or
- (b) stabilised crude petroleum.

ⁱ Order in Council No. XXVI of 2008; amended by Ordinance No. XXXVI of 2008; there are other amendments not relevant to this Ordinance.

(6) The purifying or refining of any of the products of an operation mentioned in subparagraph (1) or its conversion into a different product.

(7) The blending of odorant for use with natural gas or liquefied petroleum gas.

(8) The storage of petrol in stationary storage tanks at a terminal, or the loading or unloading of petrol into or from a road tanker at a terminal.

(9) The unloading of petrol into stationary storage tanks at a service station if the total quantity of petrol unloaded into such tanks at the service station in any 12 month period is likely to be equal to or greater than 500m³.

(10) Motor vehicle refuelling operations at an existing service station if the petrol refuelling throughput at the station in any 12 month period is more than 3000m³.

(11) Motor vehicle refuelling operations at a new service station if the petrol refuelling throughput at the station in any 12 month period is, or is intended to be, 500m³ or more.

(12) Motor vehicle refuelling operations at a new service station if the petrol refuelling throughput at the station in any 12 month period is, or is intended to be, 100m³ or more and the service station is under permanent living quarters or working areas.

(13) Nothing in subparagraph (3) or (6) refers to the use of any substance as a fuel or to any operation in relation to waste.

(14) In this paragraph –

"**carbonaceous material**" includes charcoal, coke, peat, rubber and wood,

"**existing service station**" means a service station –

- (a) which is put into operation, or
- (b) for which planning permission under the Land Planning and Development (Guernsey) Law, 2005^j is granted,

before 2nd December, 2019,

"**new service station**" means a service station which is put into operation on or after 2nd December, 2019, and includes an existing service station where a major refurbishment is completed on or after that date (and for that purpose a major refurbishment means a significant alteration or renewal of the station infrastructure, in particular the tanks and pipes),

"**petrol**" means any petroleum derivative, with or without additives, having a Reid vapour pressure of 27.6 kilopascal or more which is intended for use as a fuel for motor vehicles, other than liquefied petroleum gas,

^j Order in Council No. XVI of 2005; there are amendments not relevant to this Ordinance.

"**service station**" means any premises where petrol is dispensed to motor vehicle fuel tanks from stationary storage tanks, other than premises described in subparagraphs (10) to (12) used only in connection with the construction and delivery of new vehicles, and

"**terminal**" means any premises which are used for the storage and loading of petrol into road tankers.

(15) Any expression used in subparagraphs (7) to (14) and in either of the following Directives has the same meaning as in the relevant Directive –

- (a) European Parliament and Council Directive 94/63/EC^k on the control of volatile organic compound (VOC) emissions resulting from the storage of petrol and its distribution from terminals to service stations, and
- (b) Directive 2009/126/EC^l of the European Parliament and the Council on stage II petrol vapour recovery during the refuelling of motor vehicles at service stations.

^k OJ L 365 31.12.1994, p. 24.

^l OJ L 285, 31. 10. 2009, p. 36.

PART II

PRODUCTION AND PROCESSING OF METALS

Operations in relation to ferrous metals.

3. (1) The roasting or sintering of metal ore, including sulphide ore, or any mixture of iron ore with or without other materials.

(2) The production, melting or refining of iron or steel (including pig iron or steel) or any ferrous alloy including continuous casting unless falling within subparagraph (7).

(3) The processing of ferrous metals and their alloys by using hot-rolling mills with a production capacity of more than 20 tonnes of crude steel per hour.

(4) The loading, unloading or otherwise handling or storing of more than 500,000 tonnes in total in any period of 12 months of –

(a) iron ore (except in the course of mining operations), or

(b) burnt pyrites.

(5) The operation of hammers in a forge (the energy of which is more than 50 kilojoules per hammer) where the calorific power used is more than 20 megawatts.

(6) The application of protective fused metal coatings with an input of more than 2 tonnes of crude steel per hour.

(7) The casting of ferrous metal at a foundry with a production capacity of more than 20 tonnes per day.

(8) The desulphurising of iron, steel or any ferrous alloy.

(9) The heating of iron, steel or any ferrous alloy (whether in a furnace or other appliance) to remove grease, oil or any other non-metallic contaminant (including such operations as the removal by heat of plastic or rubber covering scrap cable) unless it –

(a) is carried out in one or more furnaces or other appliances the primary combustion chambers of which have in aggregate a net rated thermal input of less than 0.2 megawatts,

(b) does not involve the removal by heat of plastic or rubber covering from scrap cable or of any asbestos contaminant, and

(c) is not related to any other operation falling within this paragraph.

(10) The casting of iron, steel or any ferrous alloy from deliveries of 50 tonnes or more of molten metal falling within any of subparagraphs (1) to (7).

(11) In this paragraph, "**ferrous alloy**" means an alloy of which iron is the largest constituent, or equal to the largest constituent, by weight, whether or not that alloy also has a non-ferrous metal content greater than any percentage specified in paragraph 4.

Operations in relation to non-ferrous metals.

4. (1) The production of non-ferrous metals from ore, concentrates or secondary raw materials by metallurgical, chemical or electrolytic activities; and in this paragraph "**secondary raw materials**" includes scrap and other waste.

(2) The melting, including making alloys, of non-ferrous metals, including recovered products, and the operation of non-ferrous metal foundries in an installation with a melting capacity exceeding-

(a) 4 tonnes per day for lead or cadmium, or

(b) 20 tonnes per day for all other metals in aggregate.

(3) The production, melting or recovering (whether by chemical means or by electrolysis or by the use of heat) of cadmium, mercury or any alloy containing more than 0.05 per cent by weight of either of those metals or of both of those metals in aggregate.

(4) The melting (including making of alloys of non-ferrous metals, including recovered products), refining and foundry casting in a furnace, bath or other holding vessel which has a design holding capacity of 5 tonnes or more unless falling within another subparagraph of paragraph 4.

(5) The melting (including making of alloys, of non-ferrous metals, including recovered products) refining, foundry casting or carrying on of similar operations in an installation which has a design holding capacity of less than 5 tonnes, other than in respect of an operation –

- (a) described in any of subparagraphs (1) to (4), or
- (b) carried out in respect of tin, or an alloy which in molten form contains 50 per cent or more by weight of tin.

(6) The separation of copper, aluminium, magnesium or zinc from mixed scrap by differential heating.

(7) The heating in a furnace or any other application of any non-ferrous metal or non-ferrous metal alloy for the purpose of removing grease, oil or any other non-metallic contaminant, including such operations as the removal by heat of plastic or rubber covering from scrap cable, if not related to another operation described in any of subparagraphs (5) to (9); but an operation does not fall within this subparagraph if it-

- (a) involves the use of one or more furnaces or other appliances the primary combustion chambers of which have in aggregate a rated thermal input of less than 0.2 megawatts, and
- (b) does not involve the removal by heat of plastic or rubber covering from scrap cable or of any asbestos contaminant.

(8) The melting of zinc or a zinc alloy in conjunction with a galvanising operation at a rate not exceeding 20 tonnes per day.

(9) The melting of zinc, aluminium or magnesium or an alloy of one or more of these metals in conjunction with a die-casting operation at a rate not exceeding 20 tonnes per day.

(10) In this paragraph, "**non-ferrous metal alloy**" means an alloy which is not a ferrous alloy as defined in paragraph 3.

(11) Nothing in subparagraphs (3) to (9) prescribes the activities of hand soldering, flow soldering or wave soldering for the purposes of section 2 of this Ordinance.

Operations in relation to the surface treatment of metals and plastic materials.

5. (1) The surface treatment of metals and plastic materials using an electrolytic or chemical operation where the aggregated volume of the treatment vats exceeds 30m³.

(2) The surface treatment of materials using cadmium or any compound of cadmium where the operation may result in the release into the air or water of cadmium and its compounds, as listed in column 1 of the Table set out in paragraph 31(7), in a quantity which, in any 12 month period, exceeds the background quantity for cadmium and its compounds by more than the amount specified in relation to it in column 2 of that Table.

(3) Any process for the surface treatment of metal that is likely to result in the release into air of any acid-forming oxide of nitrogen and which does not fall within a description in subparagraph (1) or (2).

PART III
MINERAL INDUSTRY OPERATIONS

Operations in relation to the production of cement, lime and magnesium oxide.

6. (1) The production of cement clinker in rotary kilns with a production capacity exceeding 500 tonnes per day or in other kilns with a production capacity exceeding 50 tonnes per day.

(2) The production of lime or magnesium oxide in kilns with a production capacity exceeding 50 tonnes per day.

(3) The storing, loading or unloading of cement or cement clinker in bulk prior to further transportation in bulk.

(4) The blending of cement in bulk or using cement in bulk other than at a construction site, including the bagging of cement and cement mixture, the batching of ready-mixed concrete and the manufacture of concrete blocks and other cement products.

(5) The grinding of cement clinker.

(6) The slaking of lime for the purpose of making calcium hydroxide or calcium magnesium hydroxide.

(7) The heating of calcium carbonate or calcium magnesium carbonate for the purpose of making lime.

Operations involving asbestos.

7. (1) The production of asbestos or manufacturing products based on or containing asbestos.

(2) The stripping of asbestos from railway vehicles except –

- (a) in the course of the repair or maintenance of the vehicle,
- (b) in the course of recovery operations following an accident, or
- (c) where the asbestos is permanently bonded in any material, including in particular in cement, plastic, rubber or resin.

(3) The industrial finishing (including shaping, drilling, or fitting manufactured asbestos products) of any of the following products where not carried out in conjunction with manufacture –

- (a) asbestos filters,
- (b) asbestos friction products,
- (c) asbestos jointing, packaging, and reinforcement material,
- (d) asbestos packing, or

- (e) asbestos textiles.

(4) In this paragraph, "**asbestos**" includes any of the following fibrous silicates: actinolite, amosite, anthophyllite, chrysotile, crocidolite and tremolite.

Operations involving glass and glass fibre manufacture.

8. (1) The manufacture of glass or glass fibre in an installation with a melting capacity exceeding 20 tonnes per day.

(2) Unless it is an operation described in subparagraph (1) –

(a) the manufacture of glass at any location with the capacity to make 5,000 tonnes or more in any 12 month period, and any operation involving the use of glass which is carried on at any such location in conjunction with its manufacture,

(b) the manufacture of glass where the use of lead or any lead compound is involved,

(c) the making of any glass product where lead or any lead compound has been used in the manufacture of the glass except –

(i) the making of products from lead glass blanks,

- (ii) the melting, or mixing with another substance, of glass manufactured elsewhere to produce articles such as ornaments or road paint,
- (d) the polishing or etching of glass or glass products in the course of any manufacturing operation if -
 - (i) hydrofluoric acid is used, or
 - (ii) hydrogen fluoride may be released into the air, and
- (e) the manufacture of glass frit or enamel frit and its use in any operation where that operation is related to its manufacture.

Operations in relation to production of other mineral fibres.

9. The melting of mineral substances, including the production of mineral fibres, in an installation with a melting capacity exceeding 20 tonnes per day.

Other mineral operations.

10. (1) The manufacture of cellulose fibre reinforced calcium silicate board.

(2) Unless it falls within any other description of operation in this Schedule, the crushing, grinding or other size reduction (other than the cutting of stone), or the grading, screening or heating of any designated mineral or mineral

product, except where the operation is unlikely to result in the release into the air of particulate matter.

(3) Any of the following operations, unless carried on at an exempt location –

- (a) the crushing, grinding or otherwise breaking up of coal or coke or any other coal product,
- (b) the screening, grading or mixing of coal, or coke or any other coal product, or
- (c) the loading or unloading of petroleum coke, coal, coke or any other coal product, except unloading on retail sale.

(4) The crushing, grinding or other size reduction, with machinery designed for that purpose, of bricks, tiles or concrete.

(5) The screening of the product of any operation described in subparagraph (4).

(6) The coating of road stone with tar or bitumen.

(7) The loading, unloading, or storing of pulverised fuel ash in bulk prior to further transportation in bulk.

(8) The fusion of calcinated bauxite for the production of artificial corundum.

(9) In this paragraph –

"**coal**" includes lignite,

"**designated mineral or mineral product**" means –

- (a) clay, sand and any other naturally occurring mineral other than coal or lignite,
- (b) metallurgical slag,
- (c) boiler or furnace ash produced from the burning of coal, coke or any other coal product, or
- (d) gypsum which is a by-product of any operation,

"**exempt location**" means –

- (a) any premises used for the sale of petroleum coke, coal, coke or any coal product where the throughput of such substances at those premises in any 12 month period is in aggregate likely to be less than 10,000 tonnes, or
- (b) any premises to which petroleum coke, coal, coke or any coal product is supplied only for use there, and

"**retail sale**" means sale to the final customer.

(10) Nothing in this paragraph applies to any operation carried on underground.

Operations relating to ceramic production.

11. (1) The manufacture of ceramic products (such as roofing tiles, bricks, refractory bricks, tiles, stoneware or porcelain) by firing in kilns –

(a) with a production capacity exceeding 75 tonnes per day, or

(b) where the kiln capacity exceeds 4m³, and the setting density of the kiln exceeds 300 kg/m³.

(2) The firing of heavy clay goods or refractory goods, other than heavy clay goods in a kiln, where the operation does not fall within a description in subparagraph (1).

(3) Vapour glazing earthenware or clay with salts.

(4) In this paragraph –

"**clay**" includes a blend of clay with ash, sand or other materials, and

"**refractory**" means refractory material (such as fireclay, silica, magnesite, chrome-magnesite, sillimanite, sintered alumina, beryllia and boron nitride) which is able to withstand high temperatures and

to function as a furnace lining or in other similar high temperature applications.

PART IV
CHEMICAL INDUSTRY OPERATIONS

Operations in relation to organic chemicals.

12. (1) The production of organic chemicals including –
- (a) hydrocarbons, linear or cyclic, saturated or unsaturated, aliphatic or aromatic,
 - (b) organic compounds containing oxygen, including alcohols, aldehydes, ketones, carboxylic acids, esters, acetates, ethers, peroxides, phenols, epoxy resins,
 - (c) organic compounds containing sulphur, including sulphides, mercaptans, sulphonic acids, sulphonates, sulphates and sulphones and sulphur heterocyclics,
 - (d) organic compounds containing nitrogen including amines, amides, nitrous, nitro or azo-compounds, nitrate, nitriles, nitrogen heterocyclics, cyanates, isocyanates, di-isocyanates and di-isocyanate prepolymers,
 - (e) organic compounds containing phosphorus including substituted phosphines and phosphate esters,

- (f) organic compounds containing halogens, such as halocarbons, halogenated aromatic compounds and acid halides,
- (g) organometallic compounds, such as lead alkyls, Grignard reagents and lithium alkyls,
- (h) plastic materials such as polymers, synthetic fibres and cellulose-based fibres,
- (i) synthetic rubbers,
- (j) dyes and pigments,
- (k) surface-active agents, and
- (l) any other organic compounds not described in items (a) to (k) above which have the potential to pollute the environment.

(2) Unless described in subparagraph (1), the carrying on of any operation involving the use, in any 12 month period, of –

- (a) 5 tonnes or more of diphenyl methane di-isocyanate or other di-isocyanate of lower volatility than toluene di-isocyanate, or
- (b) partly polymerised di-isocyanates or prepolymers containing 5 tonnes or more of di-isocyanate

monomers, where the operation may result in a release into the air of such monomers.

(3) The flame bonding or cutting with heated wires of polyurethane foams or polyurethane elastomers.

(4) Any operation, if not related to any other operation falling within subparagraph (1), for the polymerisation or co-polymerisation of any pre-formulated resin or pre-formulated gel coat which contains any styrene, which is likely to involve, in any 12 month period, the polymerisation or co-polymerisation of 100 tonnes or more of styrene.

(5) Any operation, if not related to any operation falling within subparagraph (1), for polymerising or co-polymerising any unsaturated hydrocarbons or a product of an operation described in subparagraph (1) (other than a pre-formulated resin or pre-formulated gel coat which contains any unsaturated hydrocarbons), which is likely to involve, in any 12 month period, the polymerisation or co-polymerisation of 50 tonnes or more of any of those materials or, in aggregate, of any combination of those materials.

(6) In this paragraph, "**pre-formulated resin or pre-formulated gel coat**" means any resin or gel coat which has been formulated before being introduced into a polymerisation or co-polymerisation operation, whether or not the resin or gel coat contains a colour pigment, activator or catalyst.

Operations in relation to inorganic chemicals.

13. (1) The production of inorganic chemicals including –

- (a) inorganic substances, including those in gaseous form, such as ammonia, hydrogen chloride, hydrogen fluoride, hydrogen cyanide and hydrogen sulphide, carbon oxides, sulphur compounds, nitrogen oxides, hydrogen, sulphur dioxide, and phosgene,
- (b) acids, such as chromic acid, hydrofluoric acid, hydrochloric acid, hydrobromic acid, hydroiodic acid, phosphoric acid, nitric acid, sulphuric acid, oleum, sulphurous acids, and chlorosulphonic acid,
- (c) bases, such as ammonium hydroxide, potassium hydroxide, sodium hydroxide and calcium hydroxide,
- (d) salts, such as ammonium chloride, potassium chlorate, potassium carbonate, sodium carbonate, perborate, silver nitrate, cupric acetate, ammonium phosphomolybdate,
- (e) non-metals, metal oxides, metal carbonyls or other inorganic compounds such as calcium carbide, silicon, silicon carbide,
- (f) halogens or any compound comprising only -
 - (i) two or more halogens, or
 - (ii) any one or more of those halogens and oxygen.

(2) Unless falling within a description in any other paragraph of this Schedule, any production operation which is likely to result in the release into –

(a) the air of any hydrogen halides (other than the coating, plating or surface treatment of metal), or

(b) the air or water of any halogens or any of the compounds mentioned in subparagraph (1)(f) (other than the treatment of water by chlorine).

(3) Unless falling within a description in any other paragraph of this Schedule, any production operation which uses, or is likely to result in the release of, hydrogen cyanide or hydrogen sulphide.

(4) Unless falling within a description in any other paragraph of this Schedule, the production of any compounds, or using or recovering any mixture (other than in the application of a glaze or vitreous enamel), containing any of the following substances or their compounds –

(a) antimony,

(b) arsenic,

(c) beryllium,

(d) gallium,

(e) indium,

- (f) lead,
- (g) palladium,
- (h) platinum,
- (i) selenium,
- (j) tellurium,
- (k) thallium,
- (l) cadmium, or
- (m) mercury,

where the operation may result in the release into the air of any of those elements or their compounds or the release into water of any substance listed in column 1 of the Table set out in paragraph 31(7) in a quantity which, in any 12 month period, exceeds the background quantity by more than the amount specified in relation to that substance in column 2 of that Table.

(5) Unless falling within a description in any other paragraph of this Schedule, recovering any compound of, or engaging in any process of production which involves the use of, cadmium or mercury or of any compound of either of those elements or which may result in the release to air of either of those elements or their compounds.

(6) Any other operation (except the combustion or incineration of carbonaceous material as defined in paragraph 2(14)) which does not fall within a description in paragraphs 3, 4 or 5 and which may result in the release into the air of any acid forming oxide of nitrogen.

Operations in relation to chemical fertiliser production.

14. The production of phosphorous, nitrogen or potassium based fertilisers (simple or compound).

Operations in relation to biocide production.

15. The production of plant protection products and biocides.

Operations in relation to pharmaceutical production.

16. The production of pharmaceutical products, including intermediates.

Operations in relation to explosives production.

17. The production of explosives, other than as part of an operation described in any other paragraph of this Part.

Manufacturing operations involving ammonia.

18. Any operation for the manufacture of a chemical which may result in the release of ammonia into the air other than an operation in which ammonia is only used as a refrigerant.

Operations in relation to storage of chemicals in bulk.

19. (1) The storage, other than –

(a) as part of an operation falling within a description in any other paragraph of this Schedule, or

- (b) in a tank for the time being forming part of a powered vehicle,

of any substance listed in column 1 of the following Table 1, except where the total capacity of tanks used for storage is less than the amount specified in the corresponding entry in column 2 of that Table.

Table 1

Column 1	Column 2
Substance (in tonnes)	Amount (in tonnes)
Any one or more acrylates	20
Acrylonitrile	20
Anhydrous ammonia	100
Anhydrous hydrogen fluoride	1
Toluene di-isocyanate	20
Vinyl chloride monomer	20
Ethylene	8000

- (2) In the table in subparagraph (1), "**acrylates**" means –

- (a) acrylic acids,
- (b) substituted acrylic acids,

(c) esters of acrylic acids, and

(d) esters of substituted acrylic acids.

Interpretation of this Part.

20. In this Part, "**production**" means the production by chemical or biological processing on an industrial scale of any listed substance or group of substances.

PART V

OTHER OPERATIONS

Operations in relation to paper, pulp and panel manufacturing.

21. The production, in an industrial installation of –

- (a) pulp from timber or other fibrous materials,
- (b) paper or cardboard if the production capacity is more than 20 tonnes per day,
- (c) if the production capacity is more than 600 m³ per day, one or more of the following wood-based panels-
 - (i) fibreboard,
 - (ii) orientated strand board, or
 - (iii) particleboard.

Operations in relation to carbon activities.

22. The production of carbon or hard-burnt coal or electro-graphite by means of incineration or graphitization.

Tar and bitumen operations.

23. (1) The distillation of tar or bitumen in connection with any process of manufacture where the carrying on of the operation by the person concerned at the location in question is likely to involve the use in any 12 month period of 5 tonnes or more of tar or bitumen or, in aggregate, of both.

(2) An operation does not fall within subparagraph (1) where the process of manufacture is carried on in connection with any other operation falling within a description in another paragraph of this Schedule at the same location where that operation is carried on.

(3) The heating (but not distillation) of tar or bitumen in connection with any process of manufacture, where the carrying on of those activities by the person concerned at the location in question is likely to involve a qualifying amount.

(4) The oxidation of bitumen by blowing air through it, at installations where there are no other operations described in this Schedule and where the carrying on of the activities by the person concerned at the location in question is likely to involve a qualifying amount.

(5) An operation does not fall within subparagraphs (3) or (4) if it falls within any other description of operation in this Schedule.

(6) In this paragraph –

"**qualifying amount**" means the use in any 12 month period of 5 tonnes or more of tar or bitumen or, in aggregate, of both, and

"**tar**" and "**bitumen**" include pitch.

Operations in relation to coating, printing and textile treatments.

24. (1) The pre-treatment of textile fibres or textiles by operations such as washing, bleaching, mercerisation or dyeing, where the treatment capacity is more than 10 tonnes per day.

(2) The surface treatment of substances, objects or products using organic solvents, in particular for dressing, printing, coating, degreasing, waterproofing, sizing, painting, cleaning or impregnating, with a consumption capacity of more than 150 kilogrammes per hour or more than 200 tonnes per year (whichever is the lesser).

(3) Unless it is an operation falling within subparagraph (1) or (2), any operation (other than the repainting or respraying of, or of part of, an aircraft or road or railway vehicle) for applying to a substrate, or drying or curing after such application, printing ink or paint or any other coating material as, or in the course of, a manufacturing operation, where the operation may result in the release into the air of particulate matter or of any volatile organic compound, and is likely to involve the use in any 12 month period at any location of –

- (a) 20 tonnes or more of any printing ink, paint or other coating material which is applied in solid form (other than in respect of an operation falling within paragraph 3(6)),

- (b) 20 tonnes or more of any metal coating which is sprayed on in molten form,
- (c) 25 tonnes or more of organic solvents in respect of any cold set web offset printing operation or any sheet fed offset litho printing operation, or
- (d) 5 tonnes or more of organic solvents in respect of any operation other than one described in item (c).

(4) The repainting or respraying of road vehicles or parts of them

if–

- (a) the operation does not fall within subparagraph (1) or (2),
- (b) may result in the release into the air of particulate matter or of any volatile organic compound, and
- (c) the carrying on of the operation by the person concerned at the location in question is likely to involve the use of 2 tonnes or more of organic solvents in any period of 12 months.

(5) The repainting or respraying of aircraft or railway vehicles or

parts of them if –

- (a) the operation may result in the release into the air of particulate matter or of any volatile organic compound, and
 - (b) the carrying on of the operation by the person concerned at the location in question is likely to involve the use in any period of 12 months of—
 - (i) 20 tonnes or more of any paint or other coating material which is applied in solid form,
 - (ii) 20 tonnes or more of any metal coating which is sprayed on in molten form, or
 - (iii) 5 tonnes or more of organic solvents.
- (6) In subparagraphs (3) to (5) –
- (a) the amount of organic solvents used in an operation is calculated using the formula $A - B$, where –
 - (i) A is the total input of organic solvents into the process, including both solvents contained in coating materials and solvents used for cleaning or other purposes, and
 - (ii) B is the amount of organic solvents that are removed from the process for re-use or for recovery for re-use.

(7) In this paragraph –

"aircraft" includes gliders and missiles,

"coating material" includes paint, printing ink, varnish, lacquer, dye, any metal oxide coating, any adhesive coating, any elastomer coating, any metal or plastic coating,

"organic solvent" means any volatile organic compound which is used alone or in combination with other agents, and without undergoing a chemical change, to dissolve raw materials, products or waste materials, as a –

(a) cleaning agent to dissolve contaminants,

(b) dissolver,

(c) dispersion medium,

(d) viscosity adjuster,

(e) surface tension adjuster,

(f) plasticiser, or

(g) preservative, and

"volatile organic compound" means –

- (a) any organic compound having a vapour pressure of 0.01 kilopascal or more at 293.15K or having a corresponding volatility under the particular conditions of use, or
- (b) the fraction of creosote having a vapour pressure of 0.01 kilopascal or more at 293.15K.

Operations in relation to the manufacture of dyestuffs, printing ink and coating materials.

25. (1) The manufacture of dyestuffs if the activity involves the use of hexachlorobenzene and is carried out at an installation not falling within any other description in this Schedule.

(2) An operation, unless carried out at an installation described in any other part of this Schedule, involving –

- (a) the manufacture or formulation of any coating material (such as printing ink) containing, or involving the use of, an organic solvent, where the carrying on of the activity by the person concerned at the location in question is likely to involve the use of 100 tonnes or more of organic solvents in any 12 month period, or
- (b) the manufacture of a powder for use as a coating material where the installation has capacity to

produce 200 tonnes or more of such powder in any 12 month period.

(3) In subparagraph (2), the amount of organic solvent used in an activity is calculated using the formula $A - B$, where –

(a) A is the total input of organic solvents into the process, including both solvents contained in coating materials and solvents used for cleaning or other purposes, and

(b) B is the amount of organic solvents, not contained in coating materials, that are removed from the process for re-use or for recovery for re-use.

(4) In this paragraph "**coating material**" and "**organic solvent**" have the same meanings as in paragraph 24.

Operations in relation to timber.

26. (1) The preservation of wood or wood products with chemicals, other than exclusively treating against sapstain, in an installation with a production capacity of more than 75 m³ per day.

(2) The manufacture of wood products at any works, unless in connection with an operation described in paragraph 21(c), if the manufacture involves a relevant operation and the throughput of the works in any 12 month period is likely to exceed –

(a) 10,000 m³ in the case of works at which –

(i) wood is sawed but not otherwise subjected to a relevant operation, or

(ii) wood is subjected only to exempt operations, or

(b) 1,000 m³ in any other case.

(3) In this paragraph, "**wood**" includes any product consisting wholly or mainly of wood.

(4) In subparagraph (2) -

"**exempt operations**" means a relevant operation where, if no sawing were carried on at the works, any such operation would be unlikely to result in the release into the air of any substances listed in paragraph 31(6) of this Schedule in a quantity which is capable of causing significant harm,

"**relevant operation**" means the sawing, drilling, sanding, shaping, turning, planing, shredding, curing or chemical treatment of wood,

"**throughput**" is calculated by reference to the amount of wood which is subjected to a relevant operation, provided that where wood is subject to two or more relevant operations at the same works no account is taken of the second or subsequent operation, and

"**works**" means any premises, such as a sawmill, on which a relevant operation is carried out on wood.

Operations involving rubber.

27. (1) The manufacture of new tyres, other than remoulds or retreads, involving the use in any 12 month period of 50,000 tonnes or more of one or more of natural rubber, or a synthetic organic elastomer, or any substance mixed with rubber or such an elastomer.

(2) The mixing, milling or blending of natural rubber, or a synthetic organic elastomer, in which carbon black is used.

(3) Any operation which converts the product of an operation described in subparagraph (2) into a finished product, if related to an operation falling within that subparagraph.

Operations involving treatment of animal and vegetable matter and food industries.

28. (1) The tanning of hides and skins where the treatment capacity exceeds 12 tonnes of finished products per day.

(2) The slaughtering of animals in slaughterhouses with a carcass production capacity of more than 50 tonnes per day.

(3) The treatment and processing, other than exclusively packaging, of the following raw materials, whether previously processed or unprocessed, intended for the production of food or feed from –

- (a) only animal raw materials (other than milk only) with a finished product production capacity of more than 75 tonnes per day,
- (b) only vegetable raw materials with a finished product production capacity of more than—
 - (i) 300 tonnes per day, or
 - (ii) 600 tonnes per day where the installation operates for a period of no more than 90 consecutive days in any year,
- (c) animal and vegetable raw materials (other than milk only), both in combined and separate products, with a finished product production capacity in tonnes per day greater than -
 - (i) 75 if A is equal to 10 or more, or
 - (ii) $300 - (22.5 \times A)$ in any other case,

where 'A' is the portion of animal material in percent of weight of the finished product production capacity.

(4) The treatment and processing of milk where the quantity of milk received is more than 200 tonnes per day (average value on an annual basis).

(5) The processing, storage or drying by heat of any part of a dead animal or of vegetable matter, unless it is an exempt operation, or an operation described in subparagraph (8), which may –

- (i) result in the release into the air of a substance referred to in paragraph 31(6) of this Schedule, or
- (ii) give rise to an offensive smell noticeable outside the premises in which the operation is carried on.

(6) The breeding of maggots in any case where 5 kilograms or more of animal or of vegetable matter or, in aggregate, of both are introduced into the process in any week.

(7) The ensiling or storage of dead fish or fish offal in plant capable of retaining volumes of –

- (a) less than or equal to 10m³ of ensiled liquor,
- (b) more than 10m³ and less than or equal to 50m³ of ensiled liquor, or
- (c) more than 50m³ of ensiled liquor.

(8) The treatment and processing of dry vegetable or dry vegetable and animal matter intended for the production of animal food products through drying by the application of heat and milling, unless it is an exempt operation, which may –

- (a) result in the release into the air of a substance referred to in paragraph 31(6) of this Schedule, or
- (b) give rise to an offensive smell noticeable outside the premises in which the operation is carried on.

(9) When calculating the weight of finished product for the purposes of subparagraph (3), the weight of packaging must be ignored.

(10) In this paragraph –

"animal" includes a bird or a fish,

"ensiling" means treatment by the application of acid or alkaline solutions for the purpose of rendering the material free from infectious disease or preventing the formation of offensive odours,

"exempt operation" means –

- (a) any operation carried out on a farm or agricultural holding, other than the manufacture of goods for sale,
- (b) the manufacture or preparation of food or drink for human consumption, but excluding –
 - (i) the extraction, distillation or purification of animal or vegetable oil or fat, otherwise than as an operation incidental to the cooking of food for human consumption,

- (ii) any operation involving the use of green offal or the boiling of blood, except the cooking of food (other than tripe) for human consumption, or
 - (iii) the cooking of tripe for human consumption elsewhere than on premises on which it is to be consumed,
- (c) the fleshing, cleaning and drying of pelts of fur-bearing mammals,
- (d) any operation carried on in connection with premises used in connection with the business of killing, flaying or cutting up animals, the flesh of which is not intended for human consumption, other than premises –
 - (i) which are hunt kennels or other premises where the flesh is fed to animals,
 - (ii) used for diagnostic, educational or research purposes, or
 - (iii) where animals are cut up solely for the purpose of incineration,

- (e) any operation for the manufacture of soap not falling within a description in paragraph 12(1),
- (f) the storage of vegetable matter otherwise than as part of any prescribed operation,
- (g) the cleaning of shellfish shells,
- (h) the manufacture of starch,
- (i) the salting of hides or skins, unless related to any other prescribed operation,
- (j) any operation for cleaning, and any related operation for drying or dressing, seeds, bulbs, corms or tubers,
- (k) the drying of grain or pulses, or
- (l) any operation for the production of cotton yarn from raw cotton or for the conversation of cotton yarn into cloth,

"**food**" includes drink, articles and substances of no nutritional value which are used for human consumption, and articles and substances used as ingredients in the preparation of food, and

"**green offal**" means the stomach and intestines of any animal, other than poultry or fish, and their contents.

Intensive farming.

29. (1) The rearing of poultry or pigs intensively in an installation with more than –

- (a) 40,000 places for poultry,
- (b) 2,000 places for production pigs (over 30 kilograms),
or
- (c) 750 places for sows.

(2) In this paragraph, "poultry" has the same meaning as in Article 2(1) of Council Directive 2009/158/EC of 30th November 2009^m on animal health conditions governing intra-Community trade in, and import from, third countries of poultry and hatching eggs.

Carbon capture and storage.

30. (1) The capture of carbon dioxide streams from an installation for the purposes of geological storage unless –

- (a) the total intended storage is less than 100 kilotonnes,
and
- (b) the storage is undertaken for research, development
or testing of new products and processes.

^m OJ L347, 22.12.2009, p. 74.

PART VI
APPLICATION AND INTERPRETATION OF SCHEDULE 2

Application and interpretation.

31. (1) An operation does not fall within Parts I to V if –
- (a) it cannot result in the release into the air of a substance listed in subparagraph (6), or
 - (b) there is no likelihood that it will result in the release into the air of any such substance except in a quantity such that -
 - (i) it is incapable of causing environmental pollution, or
 - (ii) its capacity to cause environmental pollution is insignificant.
- (2) Subparagraph (1) does not apply to an operation which may give rise to an offensive smell noticeable outside the site where the operation is carried on.
- (3) An operation does not fall within Parts I to V if it is –
- (a) carried out in a working museum to demonstrate an industrial operation of historic interest,

- (b) carried out for educational purposes in a school, within the meaning of section 1(1) of the Education (Guernsey) Law, 1970ⁿ, or in a college of further education,
- (c) carried out at an installation or mobile plant (or part of such an installation or plant) used solely for –
 - (i) research operations,
 - (ii) development operations, or
 - (iii) the testing of new products and processes,
- (d) the running on or within a vehicle of an engine which propels any such vehicle, locomotive or vessel, or provides electricity for propulsion,
- (e) the running of an engine –
 - (i) in order to test it before it is installed, or
 - (ii) for the purposes of developing the engine.

ⁿ Ordres en Conseil Vol. XXII, p. 318; there are amendments not relevant to this Ordinance.

(4) The use of a fume cupboard is not an operation falling within Parts I to V if the fume cupboard is used in a laboratory for research or testing and it is not –

- (a) a fume cupboard which is an industrial and continuous production operation enclosure, or
- (b) a fume cupboard in which substances or materials are manufactured.

(5) References in Parts I to V to related operations are references to separate operations being carried on by the same person on the same site.

(6) A reference in this Part or in any of Parts I to V to, or to the release into the air of, a substance listed in this subparagraph is a reference to any of the following substances –

- (a) oxides of sulphur and other sulphur compounds,
- (b) oxides of nitrogen and other nitrogen compounds,
- (c) oxides of carbon,
- (d) organic compounds and partial oxidation products,
- (e) metals, metalloids and their compounds,
- (f) asbestos (suspended particulate matter and fibres), glass fibres and mineral fibres,

- (g) halogens and their compounds,
- (h) phosphorus and its compounds, or
- (i) particulate matter.

(7) A reference in Parts I to V to the table in this paragraph is a reference to the table below.

Table

Column 1	Column 2
Substance	Amount in excess of background quantity (in grams) in any 12 month period
Mercury and its compounds	200 (expressed as metal)
Cadmium and its compounds	1000 (expressed as metal)
All isomers of hexachlorocyclohexane	20
All isomers of DDT	5
Pentachlorophenol (PCP) and its compounds	350 (expressed as PCP)
Hexachlorobenzene	5
Hexachlorobutadiene	20
Aldrin	2
Dieldrin	2
Endrin	1
Polychlorinated biphenyls	1
Dichlorvos	0.2

1,2-dichloroethane	2000
All isomers of trichlorobenzene	75
Atrazine	350
Simazine	350
Tributyltin (TBT) compounds	4 (expressed as TBT)
Triphenyltin (TPT) compounds	4 (expressed as TPT)
Trifluralin	20
Fenitrothion	2
Azinphos-methyl	2
Malathion	2
Endosulfan	0.5

(8) In the Table, where both Atrazine and Simazine are released, the figure for both substances in aggregate is 350 grammes.

(9) In this Schedule -

"**background quantity**" means, in relation to the release of a substance resulting from an operation, such quantity of that substance as is present in –

- (a) water supplied to the site where the operation is carried on,
- (b) water abstracted for use in the operation, and
- (c) precipitation onto the site on which the operation is carried on,

"directly associated operation" means in relation to an operation carried on in a stationary technical unit, any directly associated operation which has a technical connection with the operation carried on in the unit and which could have an effect on pollution,

"installation" means –

- (a) a stationary technical unit where one or more operations described in this Schedule are carried on, and
- (b) any other location on the same site where any directly associated operations are carried on,

and references to an installation include references to part of the same,

"mobile plant" means plant which is designed and intended to move or be moved regularly from place to place with a view to being reused at each place (or if not so designed capable of being, and intended to be, so moved),

"organic compound" means any compound containing carbon and one or more of hydrogen, halogens, oxygen, sulphur, phosphorus, silicon or nitrogen, with the exception of carbon oxides and inorganic carbonates and bicarbonates,

"**rated thermal input**" means the rate at which fuel can be burned at the maximum continuous rating of the appliance multiplied by the net calorific value of the fuel and expressed as megawatts thermal, and

"**waste**" has the meaning in the Law except that it does not include –

- (a) radioactive waste, or
- (b) any substance which is explosive within the meaning of the Explosives (Guernsey) Law, 1905^o.

(10) In this Part –

"**fume cupboard**" has the meaning given by British Standard BS EN 14175 on Fume Cupboards, and

"**vehicle**" means an aircraft, hovercraft, mechanically propelled road vehicle, railway locomotive, or vessel.

(11) Unless the context requires otherwise, expressions not defined in this Ordinance and used in Directive 2010/75/EU of the European Parliament and

^o Ordres en Conseil Vol. III, p. 414; as amended by Ordres en Conseil Vol II, p. 473, Vol. V, p. 30 and Vol. XV, p. 11; there are amendments not relevant to this Ordinance.

of the Council of 24th November, 2010^P on industrial emissions (integrated pollution prevention and control) (Recast), have the same meaning for the purposes of this Schedule as they do for the purposes of that Directive.

^P OJL334, 17.12.2010, p. 17.

SCHEDULE 3

Section 6

LIMITS ON EMISSIONS OF GRIT AND DUST FROM CHIMNEYS OF FURNACES

PART I

THE LIMITS IN PARTS II AND III AND THEIR CALCULATION AND APPLICATION

Limits on emissions of grit and dust from certain furnaces.

1. (1) The quantities of grit and dust emitted during any period from the chimney of a Part II furnace or a Part III furnace with a heat output or input which is within the highest and lowest values specified in column 1 of the table in the relevant Part of this Schedule must not exceed the quantities prescribed by that Part.

(2) For the purposes of this Schedule, where a chimney serves more than one furnace—

- (a) if it is a multiflue chimney, each flue must be treated as a separate chimney serving a separate furnace, and
- (b) in any other case, it must be treated as a single chimney serving a single furnace with a heat output or input equivalent to the aggregate of the heat outputs or inputs of the furnaces concerned,

but any part of the emission which comes from a furnace to which this Schedule does not apply must be disregarded.

(3) Where the rating of a Part II furnace or the heat input of a Part III furnace is a value intermediate between two adjacent values in column 1 of the table in the relevant Part, the prescribed quantities referred to in subparagraph (1), in respect of the chimney of the furnace must be arrived at as follows –

- (a) by interpolating the intermediate value into column 1 of the relevant table in Part II or III between the two adjacent values ("**the two values**"),
- (b) by calculating the interval between the lower of the two values and the intermediate value as a proportion of the interval between the two values, carried to two places of decimals, and
- (c) by interpolating a figure, carried to two places of decimals, into column 2 or column 3, as the case may be, of the relevant table in Part II or III, against the intermediate value at the same proportionate interval between the quantities prescribed in that column against the two values.

Schedule to apply in respect of periods of standard operation.

2. This Schedule applies to a furnace in respect of any period during which the furnace is operating –

- (a) at or close to the loading to which it is subject for the greater part of its working time, or

- (b) at any higher loading to which it is regularly subject for a limited time (whether or not that loading exceeds its maximum continuous rating or designated heat input).

Disapplication to incinerators etc.

3. This Schedule does not apply to any appliance used to burn waste, whether solid or liquid, and whether or not the resulting heat is used for any purpose.

PART II

FURNACES RATED BY HEAT OUTPUT

Part II furnaces.

1. "Part II furnace" means a furnace of —

- (a) a boiler, or
- (b) an indirect heating appliance in which the material heated is a gas or liquid,

and where any such furnace also falls within the definition of "**Part III furnace**", it is to be treated as a Part II furnace.

Heat output.

2. The quantities of grit and dust which may be emitted from the chimney of a Part II furnace must be ascertained by reference to heat output, designated by the maximum continuous rating of the boiler or appliance in pounds

of steam per hour (from and at 100 degrees C (212 degrees F)) or in thousands of British thermal units per hour.

Quantities which may be emitted.

3. (1) Subject to paragraph 4, the quantities of grit and dust, in pounds per hour, which may be emitted by the chimney of a Part II furnace the heat output of which is within the highest and lowest values specified in column 1 of the following table must not exceed—

- (a) if the furnace burns solid matter, the quantities prescribed in column 2 against the value representing the output of that furnace, or
- (b) if the furnace burns liquid matter, the quantities prescribed in column 3 against that value.

Maximum Continuous Rating in pounds of steam per hour (from and at 100°C. (212°F.)) or in thousands of British thermal units per hour	Maximum permitted quantities of grit and dust in pounds per hour	
	Furnaces burning solid matter	Furnaces burning liquid matter
Column 1	Column 2	Column 3
Value representing heat output		
825	1.10	0.25
1,000	1.33	0.28

2,000	2.67	0.56
3,000	4.00	0.84
4,000	5.33	1.12
5,000	6.67	1.4
7,500	8.50	2.1
10,000	10.00	2.8
15,000	13.33	4.2
20,000	16.67	5.6
25,000	20.0	7.0
30,000	23.4	8.4
40,000	30	11.2
50,000	37	12.5
100,000	66	18
150,000	94	24
200,000	122	29
250,000	149	36
300,000	172	41
350,000	195	45
400,000	217	50
450,000	239	54.5
475,000	250	57

Limitation on grit.

4. In the case of a Part II furnace which burns solid matter, the prescribed quantities may not contain more than the following proportion of particles exceeding 76 microns in diameter —

- (a) 33 per cent where the maximum continuous rating does not exceed 16,800 pounds per hour of steam or 16,800,000 British thermal units per hour, or
- (b) 20 per cent in any other case.

PART III FURNACES

FURNACES RATED BY HEAT INPUT

Part III furnaces.

1. Subject to paragraph 1 of Part II, the expression "**Part III furnace**" means a furnace –

- (a) of an indirect heating appliance, or
- (b) in which the combustion gases are in contact with the material being heated, but that material does not itself contribute to the grit and dust in the combustion gases.

Heat input.

2. The quantities of grit and dust which may be emitted from the chimney of a Part III furnace must be ascertained by reference to the designated heat input, expressed as British thermal units per hour.

Quantities which may be emitted.

3. Subject to paragraph 4, the quantities of grit and dust, in pounds per hour, which may be emitted by the chimney of a Part III furnace the heat input of

which is within the highest and lowest values specified in column 1 of the following table must not exceed –

- (a) if the furnace burns solid matter, the quantities prescribed in column 2 against the value representing the heat input of that furnace, or
- (b) if the furnace burns liquid matter, the quantities prescribed in column 3 against that value.

Heat input in millions of British thermal units per hour	Maximum permitted quantities of grit and dust in pounds per hour	
	Furnaces burning solid matter	Furnaces burning liquid matter
Column 1	Column 2	Column 3
Value representing heat input		
1.25	1.1	0.28
2.5	2.1	0.55
5.0	4.3	1.1
7.5	6.8	1.7
10	7.6	2.2
15	9.7	3.3
20	11.9	4.4

25	14.1	5.5
30	16.3	6.6
35	18.4	7.7
40	20.6	8.8
45	22.8	9.8
50	25	10.9
100	45	16
200	90	26
300	132	35
400	175	44
500	218	54
575	250	57

Limitation on grit.

4. In the case of a Part III furnace which burns solid matter, the prescribed quantities may not contain more than the following proportion of particles exceeding 76 microns in diameter –

- (a) 33 per cent where the designed heat input of the furnace does not exceed 25 million British thermal units, or
- (b) 20 per cent in any other case.

PART IV

INTERPRETATION OF SCHEDULE

- 1. In this Schedule –

"indirect heating appliance" means a heating appliance in which the combustion gases are not in contact with the material being heated,

"maximum continuous rating" is the hourly evaporation that can be maintained for 24 hours,

"multiflue chimney" means a chimney structure which for the whole or greater part of its vertical length carries separate flues from more than one furnace, and

"Part II furnace" and **"Part III furnace"** mean respectively a furnace described in Part II and a furnace described in Part III of this Schedule, being in either case a furnace to which section 6 applies.

SCHEDULE 4

Section 8(1)

FURNACES EXEMPT FROM SECTION 7 REQUIREMENTS IN RELATION TO ARRESTMENT PLANT

1 Description of exempt furnace	2 Purpose
1. Mobile or transportable furnaces	<p>(a) providing a temporary source of heat or power during any construction work within the meaning of the Construction (Design and Management) Regulations, 2015⁹,</p> <p>(b) providing a temporary source of heat or power for investigation or research, or</p> <p>(c) providing heat or power for the purposes of agriculture.</p>
2. Furnaces, other than furnaces designed to burn solid matter at a rate of 0.989 tonne an hour (or 989 kg an hour) or more, which fall within any of the following descriptions and in which the matter being heated does not contribute	Any purpose except the incineration of waste.

⁹ U.K. S.I. 2015/51; there are amendments not relevant to this Ordinance.

<p>to the emission of grit and dust-</p> <p>(a) furnaces burning liquid matter, gas, or liquid matter and gas,</p> <p>(b) hand-fired sectional furnaces designed to burn solid matter at a rate of not more than 122 kg/m²/hour of grate surface,</p> <p>(c) magazine type gravity-fed furnaces de-signed to burn solid matter at a rate of not more than 122 kg/m²/hour of grate surface,</p> <p>(d) furnaces fitted with an under-feed stoker designed to burn solid matter at a rate of not more than 122 kg/m²/hour of the plan area of the combustion chamber,</p> <p>(e) furnaces fitted with a chain grate stoker designed to burn solid matter at a rate of not more than 122 kg/ m²/hour of grate surface, or</p>	
--	--

<p>(f) furnaces fitted with a coking stoker designed to burn solid matter at a rate of not more than 122 kg/m²/hour of the area covered by the fire bars excluding the solid coking plate.</p>	
---	--

In this Schedule –

"**agriculture**" includes horticulture, fruit growing, seed growing, dairy farming and livestock breeding and keeping, the use of land as grazing land, meadow land, osier land, market gardens and nursery grounds, and the use of land for woodlands where that use is ancillary to the farming of land for other agricultural purposes, and

" **kg/m²/hour**" means kilograms per hour per square metre.

SCHEDULE 5

Section 10(2)

REQUIREMENTS IN RELATION TO RECORDING OF EMISSIONS OF GRIT AND DUST FROM FURNACES OR BOILERS

Installation and use of apparatus for the recording of emissions.

1. (1) On the receipt of not less than 6 weeks written notice from the Director, requiring the installation and use of apparatus specified in subparagraph (2), the occupier must, within the period specified in the notice, take such steps as are reasonably necessary to install and put into use that apparatus to measure and record emissions.

(2) The apparatus is such apparatus as the Director may reasonably require, in accordance with best practice from time to time, for the making and recording of emissions of grit and dust emitted from the furnace or boiler.

(3) The occupier must maintain the apparatus, installed for the purposes of this paragraph, in good working order.

Making and recording of measurements.

2. (1) This paragraph applies when the requirements of paragraph 1 have been complied with or equipment the same or equivalent to that required in the written notice referred to in paragraph 1 is already installed.

(2) On the receipt of not less than 28 days written notice from the Director, requiring the occupier to make and record measurements referred to in subparagraph (3), the occupier must within the period specified in the notice make and record such measurements.

(3) The measurements are of emissions of grit and dust from the furnace or boiler made and recorded in accordance with such procedures and other requirements as the Director may reasonably require in accordance with best practice from time to time.

(4) Before making any measurements to record emissions the occupier must give the Director not less than 48 hours' notice in writing of the date and time at which the occupier proposes to commence the same.

(5) The occupier must, in relation to each chimney to which this Schedule applies, keep a written record containing the following particulars –

- (a) the date on which any measurements of emissions were made,
- (b) where relevant, the number of furnaces or boilers discharging into the chimney on that date, and
- (c) the measurements in terms of pounds or kilogrammes per hour of grit and dust emitted and the percentage of grit contained in the solids emitted,

and must send a copy of such particulars to the Director within 14 days starting from the date of making of the measurements in respect of which the particulars are recorded.

(6) A notice served for the purposes of subparagraph (2) may require the making of measurements of emissions from time to time or at stated intervals but an occupier must not be required to make measurements of emissions in respect of any one chimney more than once in any period of 3 months unless in the opinion of the Director the true rates of emission of grit and dust cannot be determined without the making of further measurements.

SCHEDULE 6

Section 19(4)

BURNING OF WASTE ON LAND IN THE OPEN AIR-EXEMPTIONS

Burning of waste in the course of small scale relevant events - general exemption.

1. The burning of waste on land in the open air in the course of the lighting and burning of fires for use during small scale relevant events is exempt from the prohibition in section 19(1) if –

- (a) the burning of waste, is supervised by a responsible adult,
- (b) the fuel used is wood or dry plant matter,
- (c) the volume of waste burnt during the event does not exceed –
 - (i) three metres in height (at its highest point),
 - (ii) three metres in width (at its widest point), and
 - (iii) six cubic metres in total volume,
- (d) the waste burnt includes none of the following -
 - (i) waste white goods, cables, paint or paint tins,

- (ii) mixed household waste, or
 - (iii) any other description of waste the burning of which is likely to involve a risk of significant environmental pollution,
- (e) the burning of waste, whether continuous or intermittent, is carried on for no more than 24 hours, and
- (f) the burning of the waste does not result in the emission of dark smoke or other significant environmental pollution.

Burning of waste in the course of small scale relevant events - discretion to exempt.

2. The Director may by written notice exempt from the prohibition in section 19(1) the burning of waste on land in the open air in the course of the lighting and burning of fires for use during small scale relevant events where one or more of the conditions in items (a) to (e) of paragraph 1 have not been met, if –

- (a) the burning of the waste does not result in the emission of dark smoke or other significant environmental pollution, and
- (b) the holder of the event complies with such other conditions, specified in the written notice, as the

Director considers necessary or expedient to reduce the risk of significant environmental pollution.

Definition of small scale relevant events.

3. In paragraphs 1 and 2, "**small scale relevant events**" means social, sporting, entertainment or similar events including –

- (a) camping activities,
- (b) outdoor parties or barbecues, and
- (c) events to celebrate designated occasions,

at which no more than 20 individuals are present.

Burning of waste in the course of large scale relevant events-discretion to exempt.

4. (1) The Director may by written notice exempt from the prohibition in section 19(1) the burning of waste on land in the open air in the course of the lighting and setting of fires for use during large scale relevant events, if -

- (a) the burning of the waste does not result in the emission of dark smoke or other significant environmental pollution, and
- (b) the holder of the event complies with such other conditions, specified in the written notice, as the Director considers necessary or expedient to reduce the risk of significant environmental pollution.

(2) In this paragraph "**large scale relevant event**" means social, sporting, entertainment or similar events including –

- (a) camping activities,
- (b) outdoor parties or barbecues, and
- (c) events to celebrate designated occasions,

at which more than 20 individuals are present.

Material Considerations for discretionary exemptions.

5. In determining whether or not to grant an exemption under paragraph 2 or 4 the Director must consider in particular –

- (a) the arrangements for the supervision of the burning of the waste,
- (b) the fuel to be used,
- (c) the volume and types of waste to be burnt,
- (d) the number of individuals for which the event is planned,
- (e) the period over which waste is to be burnt, and
- (f) whether or not the burning of the waste is likely to result in a risk of significant environmental pollution.

Provisions applying to discretionary exemptions.

6. An exemption granted under paragraph 2 or 4 –
- (a) may be granted to a person or a specified class of person,
 - (b) may be granted subject to such terms or conditions as may be specified,
 - (c) when granted to a particular class of persons, must be published, and
 - (d) unless previously revoked in accordance with any term contained in the exemption, shall continue in force for such period as may be specified by or under the exemption.

Definition of designated occasion.

7. (1) In this Schedule, "**designated occasion**" means –
- (a) Guy Fawkes night,
 - (b) New Year's Eve,
 - (c) Liberation Day, or
 - (d) such other occasion as the Director may by Order designate for the purposes of this paragraph.

(2) For the purposes of paragraphs 3(c) and 4(2)(c), events are only considered to be events to celebrate a designated occasion if the event commences no more than 48 hours before or after-

(a) the date of the occasion being celebrated, or

(b) where the occasion takes place over a period of more than one day, the beginning or end of that period.

The Environmental Pollution (Enforcement and Appeals) Ordinance, 2019

ARRANGEMENT OF SECTIONS

PART I POWERS OF ENTRY AND TO MAKE REQUIREMENTS

1. Statutory powers of entry upon premises.
2. Warrant to enter dwelling.
3. Statutory powers to make requirements.
4. Statutory powers to take samples and do other necessary things.
5. Results of examination etc. to be provided by Director.
6. Obtaining information by written notice.

PART II COMPLIANCE NOTICES

7. Compliance notices - prescribed operations.
8. Compliance notices in relation to provisions of the Air Pollution Ordinance.
9. Requirements for compliance notices under section 7 or 8.

PART III THE APPEALS PANEL AND TRIBUNAL

10. Provisions relating to the Environmental and Public Health Appeals Panel and Tribunal.
11. Designation of President of Panel.
12. Duties of Director following service of summons.
13. Constitution and appointment of Tribunal.
14. Voting in hearings of Tribunal.
15. Hearings of Tribunal to be in public.
16. Procedure of the Tribunal.
17. Costs of the parties.
18. Costs, fees, expenses and allowances of Panel and Tribunal members and expert witnesses.
19. Appointment of secretary to the Panel or the Tribunal.

PART IV
MISCELLANEOUS PROVISIONS

- 20. Relationship with enforcement provisions under the Law.
- 21. Interpretation.
- 22. Consequential amendments.
- 23. Extent.
- 24. Citation.
- 25. Commencement.

SCHEDULE: Consequential amendments.

The Environmental Pollution (Enforcement and Appeals) Ordinance, 2019

THE STATES, in pursuance of their Resolutions of the 1st February, 2017^a and 27th November, 2019^b, and in exercise of the powers conferred on them by sections 24(6), 58 to 62, 64 and 72 of the Environmental Pollution (Guernsey) Law, 2004^c, and all other powers enabling them in that behalf, hereby order:-

PART I

POWERS OF ENTRY AND TO MAKE REQUIREMENTS

Statutory powers of entry upon premises.

1. (1) Subject to subsection (3), the Director may enter any premises without the consent of the owner or occupier for any of the purposes indicated in subsection (2) and the power to enter created by this section includes the power for the Director to be accompanied by –

- (a) any person authorised by the Director including, where the Director has reasonable cause to apprehend any serious obstruction in the carrying out of the Director's functions, a police officer, and

^a Article III of Billet d'État No. III of 2017.

^b Article * of Billet d'État No. * of 2019.

^c Order in Council No. XIII of 2004; as amended by Order in Council No. XIII of 2010; Nos. XV and XVI of 2015; Ordinance No. XXXIII of 2003; No. XXXVIII of 2006; No. XLIX of 2006; No. XIII of 2007; No. XVIII of 2010; No. V of 2011 and No. IX of 2016.

- (b) any equipment or materials required for any purpose for which the power of entry is being exercised.

(2) The purposes are –

- (a) establishing whether any prohibition, restriction, requirement or condition –

- (i) imposed under the Law, and

- (ii) for which the Director is responsible for regulating,

is being, or has been, complied with,

- (b) where the Director reasonably believes that any premises or activity is a source, or potential source, of environmental pollution or nuisance –

- (i) inspecting or examining any –

- (A) plant or equipment,

- (B) substance or article, or

- (C) any waste or by-product,

- (ii) investigating any contravention of any

provision under the Law, or

(iii) taking any sample,

located upon or relating to those premises or that activity, and

(c) exercising any other function conferred on the Director under the Law.

(3) The power of entry under subsection (1) shall not be exercisable –

(a) in the case of private premises (other than in a case of emergency), unless –

(i) it is exercised at a reasonable time of the day, and

(ii) the Director –

(A) gives to the owner or occupier of the premises concerned at least 24 hours notice of the Director's intention to enter the premises, and

(B) if requested by the owner or occupier of the premises, produces evidence of the Director's authority, or

(b) in the case of premises used wholly as a dwelling except under, and in accordance with –

(i) the authority of a warrant issued by the Bailiff under, and

(ii) the provisions of,

section 2.

(4) In this section "**private premises**" means all premises other than premises –

(a) which are wholly owned and occupied by the States,

(b) which are used wholly as a dwelling, or

(c) which are, or have been (and the condition of which is reasonably believed to be such as to give rise to a significant risk of environmental pollution), used for the purposes of a prescribed operation.

Warrant to enter dwelling.

2. (1) If the Bailiff is satisfied by information on oath supplied by the Director that there are reasonable grounds for suspecting that any premises used wholly as a dwelling (or any articles or substances or other thing which may be in or on such dwelling) are in a condition giving rise to a significant risk of environmental pollution, the Bailiff may grant a warrant to the Director.

(2) A warrant granted under subsection (1) shall authorise the Director and any person authorised by the Director including, where the Director has reasonable cause to apprehend any serious obstruction in the carrying out of the Director's functions, a police officer, at any time within 28 days of the date of the grant –

- (a) to enter the dwelling, and
- (b) to exercise in respect of the dwelling (and any substances or articles or other things found in or on the dwelling), all such powers as the Director, and any person authorised by the Director, may exercise in respect of any other premises under this Part,

for one or more of the purposes indicated in section 1(2).

(3) The Bailiff must not issue a warrant under subsection (1) unless the Bailiff is satisfied –

- (a) that the Director has given 7 days' notice in writing to the occupier of the dwelling in question demanding access to the dwelling, and
- (b) that either –
 - (i) access was demanded at a reasonable hour and was unreasonably refused, or

(ii) although entry to the dwelling was granted, the occupier unreasonably refused to comply with a request by the Director or any person authorised by the Director to permit the Director or person to do any of the things referred to in subsection (2), and

(c) that the occupier has, after the refusal, been notified by the Director of the application for the warrant and has had an opportunity of being heard by the Bailiff on the question whether or not it should be issued.

(4) Subsection (3) shall not apply if the Bailiff is satisfied that the case is one of urgency or that compliance with those provisions would defeat the object of the entry.

(5) A person executing a warrant issued under this section may use such reasonable force as may be necessary.

(6) A warrant issued under this section must be executed at a reasonable hour unless it appears to the person executing it that there are grounds for suspecting that any material evidence of environmental pollution would not be found if it were so executed.

(7) If the person who occupies the dwelling in respect of which a warrant is issued under this section is present when the warrant is executed, the person must be shown the warrant and supplied with a copy of it; and if that person is not present a copy of the warrant must be left in a prominent place on the dwelling.

(8) A person seizing anything in pursuance of a warrant under this section must give a receipt for it if asked to do so.

Statutory powers to make requirements.

3. (1) Where the Director reasonably believes that any premises or activity is a source, or potential source, of environmental pollution or nuisance the Director may require –

- (a) the occupier of those premises, or
- (b) any person reasonably believed by the Director to be carrying on, or to have carried on, that activity,

to comply with any of the requirements indicated in subsection (2).

(2) The requirements for the purpose of subsection (1) are –

- (a) to make available for examination by the Director any –

- (i) plant or equipment,
- (ii) substance or article, or
- (iii) waste or by-product,

used, stored or produced at those premises or in connection with that activity,

- (b) to provide the Director with such information, including records and other documents, relating to the premises or to that activity as the Director may reasonably require, and
- (c) to answer such questions relating to those premises or to that activity as the Director may reasonably ask.

(3) Anything provided or made available to the Director in compliance with a requirement under this section may be detained by the Director for so long as is necessary for all or any of the following purposes, namely –

- (a) to take it for further examination (including dismantling it or subjecting it to any process or test (but not so as to damage or destroy it unless this is necessary)),
- (b) to ensure that it is not tampered with before the Director's examination of it is completed, or
- (c) to ensure that it is available for use –
 - (i) as evidence in any proceedings for an offence under the Law, or
 - (ii) in connection with the enforcement of the requirements of a compliance notice or other notice issued under the Law.

Statutory powers to take samples and do other necessary things.

4. Where the Director reasonably believes that any premises or activity is a source, or potential source, of environmental pollution or nuisance the Director may, as regards any premises which the Director has power to enter under section 1–

- (a) direct that those premises or any part of them, or anything in them, must be left undisturbed (whether generally or in particular respects) for so long as is reasonably necessary for the purpose of any examination or investigation under this Ordinance,
- (b) take such measurements and photographs and make such recordings as the Director considers necessary for the purpose of any examination or investigation under this Ordinance,
- (c) take samples of any article or substance found in or on any premises, and of the air, water or land in, on, or in the vicinity of, the premises,
- (d) in the case of any article or substance found in or on any premises, being an article or substance which appears to the Director to have caused or to be likely to cause environmental pollution, to cause it to be dismantled or subjected to any process or test (but not so as to damage or destroy it unless this is necessary), and
- (e) in the case of any such article or substance as is

mentioned in paragraph (d), to take possession of it and detain it for so long as is necessary for all or any of the following purposes, namely –

- (i) to examine it and do to it anything which the Director has power to do under that paragraph,
- (ii) to ensure that it is not tampered with before the Director's examination of it is completed,
- (iii) to ensure that it is available for use –
 - (A) as evidence in any proceedings for an offence under the Law, or
 - (B) in connection with the enforcement of the requirements of a compliance notice or other notice issued under the Law.

Results of examination etc. to be provided by Director.

5. (1) Where, under this Part, the Director takes, is provided with or obtains any –

- (a) plant or equipment,
- (b) substance or article, or
- (c) waste or by-product,

the Director must, so far as is reasonably practicable, comply with the requirements of subsection (2).

(2) The requirements are –

(a) that the results of any examination of anything referred to in subsection (1) are made available to any person who, in the opinion of the Director, has a material interest in those results,

(b) that duplicates of any –

(i) substance or article, or

(ii) waste or by-product,

are provided to any person who, in the opinion of the Director, has a material interest in those duplicates, and

(c) that except in the case of waste, or any substance or article required to establish the commission of any offence under the Law, anything referred to in subsection (1) is returned to the person who, in the opinion of the Director, appears to be the rightful owner of the thing.

Obtaining information by written notice.

6. For the purpose of carrying out any function of the Director under

Parts II, III, V, VI or IX of the Law, the Director may serve a written notice on any person requiring that person to provide such information specified in the notice as the Director reasonably considers is needed –

- (a) in such form, and
- (b) within such period following service of the notice,

as is specified in the notice.

PART II COMPLIANCE NOTICES

Compliance notices - prescribed operations.

- 7. (1) If the Director is of the opinion that –
 - (a) a licensee –
 - (i) is contravening, or
 - (ii) is likely to contravene,

any term or condition of a licence issued to the licensee under the Law,
 - (b) as respects the carrying on of a prescribed operation for which a valid licence has been issued, that –
 - (i) to continue to carry it on, or

(ii) to continue to carry it on in a particular way,

gives rise to an imminent risk of environmental pollution or nuisance,

(c) a person carrying on an operation which is exempt from the requirement to hold a licence –

(i) is contravening, or

(ii) is likely to contravene,

any term or condition to which such exemption is subject under the Law, or

(d) as respects the carrying on of a prescribed operation by a person without holding a valid licence in contravention of section 13(4) of the Law, that the carrying on of that operation without a licence gives rise to a risk of environmental pollution or nuisance,

the Director may serve a compliance notice on the licensee or the person carrying on the operation.

(2) A compliance notice issued under subsection (1), must –

(a) as respects a notice served on a licensee, or a person carrying on an operation, as the case may be, under

subsection (1)(a) or (c) –

(i) state that the Director is of the opinion that a contravention of a term or condition of a licence or an exemption, as the case may be –

(A) is taking place, or

(B) is likely to take place,

(ii) specify the matters –

(A) constituting the contravention, or

(B) making it likely that a contravention will take place,

(iii) specify the steps that must be taken –

(A) to remedy the contravention, or

(B) to remedy the matters making it likely that the contravention will arise,

(iv) identify by name or description the person required to take the steps specified under subparagraph (iii), and

(v) specify the period within which the steps

specified under subparagraph (iii) must be taken, and

(b) as respects a notice served on a person carrying on the operation under subsection (1)(b) –

(i) state that the Director is of the opinion that –

(A) to continue to carry on a prescribed operation, or

(B) to continue to carry on a prescribed operation in a particular way,

gives rise to an imminent risk of environmental pollution or nuisance,

(ii) specify the nature of the risk involved,

(iii) specify the steps that must be taken to eliminate or remove the risk involved,

(iv) identify by name or description the person required to take the steps specified under subparagraph (iii),

(v) specify the period within which the steps specified under subparagraph (iii) must be taken, and

- (vi) direct that the licence relating to the prescribed operation is, insofar as it authorises the activity giving rise to the risk involved, suspended until the steps specified under subparagraph (iii) have been taken to the satisfaction of the Director, and
- (c) as respects a notice served on a person carrying on the operation under subsection (1)(d) –
 - (i) state that the Director is of the opinion that the carrying on of the prescribed operation without a licence gives rise to a risk of environmental pollution or nuisance,
 - (ii) specify the nature of the risk involved,
 - (iii) specify the steps that must be taken to eliminate or remove the risk involved,
 - (iv) identify by name or description the person required to take the steps specified under subparagraph (iii),
 - (v) specify the period within which the steps specified under subparagraph (iii) must be taken, and

- (vi) specify that a person who causes or permits the occurrence or the risk of environmental pollution, by contravening section 13(4) of the Law, is guilty of an offence under section 65(2) of the Law.

Compliance notices in relation to provisions of the Air Pollution Ordinance.

- 8. (1) If the Director is of the opinion that –
 - (a) a person is contravening or is likely to contravene any term or condition of an approval issued to the person under the Air Pollution Ordinance,
 - (b) a person is contravening or is likely to contravene any prohibition, restriction, requirement or condition imposed on that person under the Air Pollution Ordinance, other than one in relation to which a compliance notice may be served under section 7, or
 - (c) a person is contravening or is likely to contravene any term, condition or proviso of any exemption or disapplication (however worded) from any prohibition, restriction or requirement under the Air Pollution Ordinance,

the Director may serve a compliance notice on that person.

- (2) A compliance notice issued under subsection (1) must –

- (a) state that the Director is of the opinion that a contravention of –
 - (i) a term or condition of an approval referred to in subsection (1)(a),
 - (ii) any prohibition, restriction, requirement or condition referred to in subsection (1)(b), or
 - (iii) any term, condition or proviso of any exemption or disapplication referred to in subsection (1)(c),

as the case may be, is taking place or is likely to take place,

- (b) specify the matters –
 - (i) constituting the contravention, or
 - (ii) making it likely that a contravention will take place,
- (c) specify the steps that must be taken –
 - (i) to remedy the contravention, or
 - (ii) to remedy the matters making it likely that the contravention will arise,

- (d) identify by name or description the person required to take the steps specified under paragraph (c), and
- (e) specify the period within which the steps specified under paragraph (c) must be taken.

Requirements for compliance notices issued under section 7 or 8.

9. A compliance notice issued under section 7 or 8 must –

- (a) state the provision of this Ordinance under which it is served,
- (b) specify that the notice is a compliance notice within the meaning of section 62(1) of the Law and that –
 - (i) if a requirement of it is not, in the Director's opinion, adequately complied with within the relevant period specified in the notice, the Director may take action to secure compliance under section 63 of the Law, and
 - (ii) a person who contravenes it is guilty of an offence under section 66(1) of the Law, and
- (c) inform the person served with the notice of the right of appeal under section 25 of the Law.

PART III
THE APPEALS PANEL AND TRIBUNAL

Provisions relating to the Environmental and Public Health Appeals Panel and Tribunal.

10. The provisions of sections 11 to 19 shall have effect in relation to –
- (a) the Environmental and Public Health Appeals Panel ("the Panel") drawn up under the provisions of section 24(1) of the Law, and
 - (b) an Environmental and Public Health Appeals Tribunal ("the Tribunal") appointed under the provisions of section 24(5) of the Law.

Designation of President of Panel.

11. The States must, when drawing up the Panel under the provisions of section 24(1) of the Law, designate one of the members of the Panel as President and another as vice-President thereof.

Duties of Director following service of summons.

12. (1) Where an appeal to the Tribunal against a decision of the Director is instituted by summons in accordance with the provisions of section 25 of the Law the Director must, within 7 days after service of the summons upon the Director –

- (a) send a copy thereof to the President of the Panel (or, if the President is unavailable, to the vice-President), together with copies of the documents described in

subsection (2) which –

- (i) have been served upon the Director with the summons, or
 - (ii) are otherwise available to the Director,
- (b) request the President (or, if the President is unavailable, the vice-President) to appoint from the membership of the Panel the members of the Tribunal to hear and determine the appeal, and
- (c) notify the appellant that the Director has sent a copy of the summons to the President, or the vice-President, as the case may be.

(2) The documents for the purpose of subsection (1)(a) are –

- (a) any statement of the grounds of appeal,
- (b) where the appeal relates to a decision concerning a licence or an approval –
 - (i) any relevant form of application,
 - (ii) any plans, maps or other documents accompanying the application, and
 - (iii) any relevant licence or approval,

- (c) where the appeal relates to a decision concerning a determination under section 10(5) of the Law, any statement of the information to which the determination relates,
- (d) where the appeal relates to a decision to refuse to consent to a collection or transport of specially controlled waste under section 28(4)(b) of the 2010 Ordinance, any proposed consignment note served on the Director under section 28(2) of the 2010 Ordinance,
- (e) where the appeal relates to a decision concerning the issue of a compliance notice or other notice, the notice,
- (f) any relevant correspondence,
- (g) any other document the Director believes is relevant for the purpose of enabling the determination of the appeal, and
- (h) any statement made by, or on behalf of, the appellant indicating whether the appellant wishes the appeal to be dealt with –
 - (i) by way of a hearing, or
 - (ii) on the basis of written representations, without any hearing.

(3) For the purposes of subsection (2)(b), "**a decision concerning a licence**" includes –

- (a) a decision of a description set out in section 25(3)(b) to (i) of the Law, and
- (b) such other description of decision prescribed by Ordinance under section 25(3)(k) of the Law, which relates to or concerns a licence in any manner whatsoever.

Constitution and appointment of Tribunal.

13. (1) The Tribunal shall consist of a minimum of three and a maximum of five persons drawn from the Panel and appointed in accordance with subsection (2).

(2) Following receipt of a request under section 12(1)(b), the President or, if the President is unavailable, the vice-President of the Panel must –

- (a) from the members of the Panel, appoint the members of the Tribunal who are to hear and determine the appeal,
- (b) nominate one of the members so appointed to chair the Tribunal, and
- (c) unless the President or vice-President determines otherwise, cause notice to be given in La Gazette

Officielle, or in such other manner as the President or vice-President thinks fit, of –

- (i) the appointment and nomination under paragraphs (a) and (b), and
- (ii) the reason for which the Tribunal has been appointed.

(3) For the avoidance of doubt, the President or vice-President may be appointed or nominated, as the case may be, under subsection (2)(a) and (b).

Voting in hearings of Tribunal.

14. (1) Each member of the Tribunal shall, subject to subsection (2), have one vote, and the decisions of the Tribunal shall be taken by a simple majority.

(2) The person chairing the Tribunal shall not have a vote except where there is an equality of votes, in which case the person chairing shall have a casting vote.

Hearings of Tribunal to be in public.

15. (1) A hearing before the Tribunal must be held in public unless the Tribunal directs otherwise on the ground that it is dealing with evidence or representations –

- (a) which are commercially confidential, or
- (b) which, in the opinion of a Law Officer of the Crown, should be treated as confidential for the purpose of

safeguarding the security of the British Islands.

(2) The Tribunal may at any time exclude, from a hearing or any part thereof, any person who, in its opinion, is acting in a disruptive manner and may–

- (a) refuse to permit that person to return, or
- (b) permit that person to return only on such conditions as the Tribunal may specify,

but any such person may submit to the Tribunal any evidence or other matter in writing before the close of the hearing.

Procedure of the Tribunal.

16. (1) The Committee for the Environment & Infrastructure may, if requested by the Panel, by order prescribe rules of procedure making such provision as the Committee, acting upon the advice of the Panel, thinks fit in relation to –

- (a) the hearing, investigation, settlement and determination by the Tribunal of appeals,
- (b) the proceedings and powers of the Tribunal including, without limitation, provision as to procedure (including the method of pleading, the practice to be followed, the means by which particular facts may be proved and the method by which evidence may be given),

- (c) the summoning of witnesses, the service of documents and otherwise as to the giving of evidence,
- (d) the carrying out by the Tribunal of any of its functions under the Law, and
- (e) ancillary matters.

(2) Rules of procedure under subsection (1) may, without limitation –

- (a) regulate procedure in connection with matters preparatory to hearings (including the publication of notice of hearings) and subsequent to hearings (including the publication, interpretation and enforcement of decisions and reasons for decisions), as well as in connection with the conduct of hearings,
- (b) make provision for the striking out of appeals (or of any claim or application in an appeal), and
- (c) make provision as to the representation, and joining, of parties.

(3) The Tribunal shall, subject to the provisions of this Part, and subject also to the provisions of any rules of procedure made by the Committee for the Environment & Infrastructure under this section, determine its own procedure.

Costs of the parties.

17. Each party to an appeal shall bear its own costs incurred in connection with an appeal and, for the avoidance of doubt, the Tribunal shall not have any power to order that the costs of an appeal, or any part thereof, incurred by one party shall be paid for by another.

Costs, fees, expenses and allowances of Panel and Tribunal members and expert witnesses.

18. (1) There shall be paid to the members of the Panel and the Tribunal such allowances as the Committee for the Environment & Infrastructure may determine, together with the travelling and other expenses incurred by them in connection with the exercise of their functions under the Law.

(2) There shall be paid to any expert or other advisor, appointed by the Tribunal to advise in connection with the determination of any particular appeal, the reasonable charges claimed by that expert or advisor, together with any travelling and other expenses incurred by that expert or advisor in connection with the provision of their advice.

(3) The costs, fees, expenses and allowances described in this section must be paid by the Committee for the Environment & Infrastructure from the general revenue account of the States.

Appointment of secretary to the Panel or the Tribunal.

19. The Committee for the Environment & Infrastructure may –

- (a) appoint a secretary to the Panel or to the Tribunal on such terms and conditions and with such functions, and

- (b) provide such other officers and facilities to the Panel or the Tribunal as the Committee thinks fit.

PART IV

MISCELLANEOUS PROVISIONS

Relationship with enforcement provisions under the Law.

20. (1) For the avoidance of doubt, the enforcement functions exercisable by the Director under this Ordinance are exercisable in addition to, and not in substitution for, enforcement functions exercisable by the Director under the Law.

(2) The institution of criminal proceedings under sections 65 to 68 of the Law does not –

- (a) prevent the exercise by the Director of the power to issue a compliance notice or other notice under the Law, or
- (b) prejudice the continuation of any proceeding or the taking of any action under section 63 of the Law.

Interpretation.

21. (1) In this Ordinance, unless the context requires otherwise -

"2010 Ordinance" means the Environmental Pollution (Waste Control

and Disposal) Ordinance, 2010^d,

"the Air Pollution Ordinance" means the Environmental Pollution (Air Pollution) Ordinance, 2019,

"Guernsey" includes the Islands of Guernsey, Herm and Jethou, all other islands, islets and rocks around the coasts of those Islands, whether or not attached at low water, and all of the territorial waters adjacent thereto,

"the Law" means the Environmental Pollution (Guernsey) Law, 2004,

"notify" means notify in writing,

"the Panel": see section 10(a),

"plant" includes any type of machinery, implement or apparatus, whether affixed to or at a specific site or capable of being operated at more than one site,

"prescribed operation": see section 13(1) of the Law, section 1 of the 2010 Ordinance, and section 2 of the Air Pollution Ordinance,

"President of the Panel" means the person designated as President of the Environmental and Public Health Appeals Panel under section 11,

"specially controlled waste": see section 37(1) of the Law and section

^d Ordinance No. XVIII of 2010; as amended by Ordinance No. IX of 2016.

26 of the 2010 Ordinance,

"specified" means specified in writing by the Director,

"the Tribunal": see section 10(b),

"vice-President" means the person designated as vice-President of the Environmental and Public Health Appeals Panel under section 11, and

"water": see section 2(4)(b) of the Law.

Consequential amendments.

22. The Schedule, which provides for consequential amendments, has effect.

Extent.

23. This Ordinance has effect in Guernsey.

Citation.

24. This Ordinance may be cited as the Environmental Pollution (Enforcement and Appeals) Ordinance, 2019.

Commencement.

25. This Ordinance shall come into force on the 2nd of December, 2019.

SCHEDULE

Section 22

CONSEQUENTIAL AMENDMENTS

Amendment of the 2010 Ordinance-

1. The 2010 Ordinance is amended as follows -
 - (a) sections 7 to 16 of Part II (appeals) and Part VI (Director's statutory powers of entry, examination, inspection and investigation and to issue compliance notices) are repealed, and
 - (b) in section 42(1) (interpretation), the definitions of **"Bailiff"**, **"compliance notice"**, **"Committee for the Environment & Infrastructure"**, **"Law Officer of the Crown"**, **"nuisance"**, **"Panel"**, **"police officer"**, **"President of the Panel"**, **"the Tribunal"** and **"vice-President"** are repealed.

Amendment of the Environmental Pollution (Public Register) Regulations, 2010.

2. (1) The Environmental Pollution (Public Register) Regulations, 2010^e are amended as follows.
 - (2) For each reference to "Part VI of the Ordinance" substitute "the Environmental Pollution (Enforcement and Appeals) Ordinance, 2019".

^e G.S.I. No. 52 of 2010.

- (3) In regulation 3(1) (interpretation) -
- (a) in the definition of "**compliance notice**", for "section 41 of the Ordinance" substitute "sections 7 and 8 of the Environmental Pollution (Enforcement and Appeals) Ordinance, 2019, and
 - (b) in the definition of "**inspection and monitoring activities**" –
 - (i) in paragraph (a), for "section 35, 37 or 38 of the Ordinance" substitute "section 1, 3 or 4 of the Environmental Pollution (Enforcement and Appeals) Ordinance, 2019",
 - (ii) in paragraph (b), for "section 36 of the Ordinance" substitute "section 2 of the Environmental Pollution (Enforcement and Appeals) Ordinance, 2019", and
 - (iii) in the definition of "**a prescribed operation**", for "and section 1 of the Ordinance" substitute "
", section 1 of the Ordinance and section 2 of the Environmental Pollution (Air Pollution) Ordinance, 2019".

Amendment of the Environmental Pollution (Appeals and References) Order, 2010.

3. (1) The Environmental Pollution (Appeals and References) Order, 2010^f is amended as follows.

(2) In article 13(1) (interpretation) –

(a) for the definition of "**the Ordinance**" substitute -

""**the Ordinance**" means the Environmental Pollution (Enforcement and Appeals) Ordinance, 2019,"

(b) in the definition of "**person chairing the Tribunal**" for "section 10(2)(b)" substitute "section (13)(2)(b)",

(c) in the definition of "**President of the Panel**", for "section 8" substitute "section 11",

(d) in the definition of "**the Secretary**" for "section 16" substitute "section 19", and

(e) in the definition of "**vice-President of the Panel**", for section 8" substitute "section 11".

Deputy G St Pier
The President
Policy & Resources Committee
Sir Charles Frossard House
La Charroterie
St Peter Port
GY1 1FH

17 October 2019

Dear Deputy St Pier

Preferred date for consideration by the States of Deliberation

In accordance with Rule 4(2) of the Rules of Procedure of the States of Deliberation and their Committees, the Committee *for the* Environment & Infrastructure requests that the propositions relating to the Environmental Pollution (Guernsey) Law, 2004, Part VII – Air Pollution – Supplementary Policy Letter be considered at the States' meeting to be held on 27 November, 2019.

This date is requested as the States of Deliberation directed the drafting of legislation to commence Part VII (Air Pollution) of the Environmental Pollution (Guernsey) Law, 2004 in 2017, and the legislative drafting prioritisation is classified as high. There are currently insufficient regulatory controls in relation to air pollution and this has implication regarding burning associated with waste (linked to the Waste Strategy) and the regulation of local point-source emitters.

The propositions are asking the States to approve the legislation directed in 2017 and some changes to that policy. Consideration of the propositions in November, 2019 will allow Guernsey's first specific air pollution legislation to come into force in early December.

Yours sincerely

Deputy B L Brehaut
President
Committee *for the* Environment & Infrastructure

THE STATES OF DELIBERATION
of the
ISLAND OF GUERNSEY

REQUÊTE

DEVELOPMENT OF THE BUSINESS CASE AND COST BENEFIT ANALYSIS FOR THE EXTENSION
OF THE RUNWAY AT GUERNSEY AIRPORT TO CREATE A 1,700 METRE RUNWAY

THE HUMBLE PETITION of the undersigned Members of the States of Deliberation SHEWETH
THAT:

1. At their meeting on 13th December, 2018 the States of Deliberation resolved as follows –

- "1. To approve the Core Strategic Objectives, Critical Success Factors and Investment Objectives as set out in Appendix 1 of the policy letter.
2. To note that the Core Strategic Objectives, Critical Success Factors and Investment Objectives as approved by the States will be taken forward and used to assess the cost/benefit evaluation of options that will be put forward for further investment to secure, improve and optimise the Bailiwick's air and sea links."¹

2. Paragraph 6.1 of the policy letter stated:

“The work currently being commissioned by the Policy & Resources Committee will result in detailed cost/benefit analysis of the different options for air and sea link infrastructure and future policy development. The Investment Objectives set out in this policy letter will be used as a framework for this analysis in order to assess which options would best meet the Investment Objectives.”

3. On 26th April, 2019 the States of Deliberation agreed the following Resolution –

“1 (a) TO NEGATIVE THE PROPOSITION to agree that no further work is carried out to assess the business case for extending the airport runway outside its current boundaries given the other options available for meeting Guernsey's air links objectives including the work of the States' Trading Supervisory Board investigation to examine the possibility of commissioning 107 metres of starter strip/paved

¹ See item 19 (P.2018/133) on Billet d'État No. XXVII of 2018.

runway end safety area ("RESA") to increase the current available runway length from 1463 metres to 1570 for take-off and landing on RW09 and landing on RW27."²

4. Your Petitioners recognise that the work undertaken by the States' Trading Supervisory Board has now concluded, and at their meeting on 26th September, 2019 the States of Deliberation resolved as follows:

"1. To approve that no further work is carried out to assess the option to extend the airport useable runway within the current airport boundary by reducing the Runway End Safety Area, at the eastern end of the runway, in accordance with the Director of Civil Aviation's formal advice."³

5. In the current circumstances your Petitioners believe that there is merit in the Committee for Economic Development meeting the Resolution of December 2018 and progressing with work to develop the business case and cost benefit analysis of an extension of the runway at Guernsey Airport to achieve a length of 1,700m.

THESE PREMISES CONSIDERED, YOUR PETITIONERS humbly pray that the States may be pleased to resolve:

1. To direct the Committee *for* Economic Development to present a business case and cost benefit analysis for the extension of the runway at Guernsey Airport to achieve a length of at least 1,700m.
2. To agree that this work should be completed by May 2020.
3. To direct the Policy and Resources Committee to make available the necessary funds to carry out this work, should they be required, to not exceed £360,000.

AND YOUR PETITIONERS WILL EVER PRAY
GUERNSEY

22nd November 2019

Dear Sir

Letter of Comment – Requête – P.2019/105

Development of the Business Case and Cost Benefit Analysis for the Extension of the Runway at Guernsey Airport to create a 1,700 Metre Runway

I refer to the above Requête which is scheduled for debate by the States of Deliberation on 27th November 2019.

Deputy Kuttelwascher and six other Members of the States of Deliberation are seeking for the States to agree to:

1. direct the Committee *for* Economic Development to present a business case and cost benefit analysis for the extension of the runway at Guernsey Airport to achieve a length of at least 1,700m;
2. agree that this work should be completed by May 2020; and
3. direct the Policy & Resources Committee to make available the necessary funds to carry out this work, should they be required, to not exceed £360,000.

The Policy & Resources Committee acknowledges that these matters have wide-ranging implications and in accordance with Rule 28(2)(b) of the Rules of Procedure of the States of Deliberation and their Committees, consulted with the various Committees mandated with responsibility for the matters set out in the Requête.

Having due regard to these responses together with its mandated responsibility for leadership and co-ordination in the work of the States, especially developing and

promoting the States' overall objectives, the Committee does not support the Requête. It considers that it is premature following the decision of the States of Deliberation in their debate of the States of Guernsey Annual Budget for 2020.

The Policy & Resources Committee is commencing work, in consultation with the Committee *for* Economic Development and the States' Trading Supervisory Board, drafting a co-ordinated and coherent government framework considering all aspects of air route operation and support that is under the control or influence of the States of Guernsey. It is noted from its consultation response that the Committee *for* Economic Development will be well positioned to advise on the strategic case or otherwise for the extension of the runway at Guernsey Airport which it is already progressing as part of the work relating to the Committee's policy letter on air and sea links investment and policy objectives, resolved by the States of Deliberation in December 2018.

The Committee is also mindful that the question of whether the runway at Guernsey Airport should be extended has been subject of two recent debates in 2018 and 2019.

Further, whilst noting that Rule 23(5)(c)¹ of the Rules of Procedure applies specifically to the preparation of the Policy & Resource Plan Phase 2, it is appropriate that in prioritising resources this Rule should be considered when advising the States of all policy matters which will draw on its resources, including those proposed in a Requête.

The Policy & Resources Committee therefore proposes to lay a Sursis Motivé because the Propositions within the Requête:

- Are in direct conflict with Resolution 37 of the 2020 Budget;
- Will require the Committee *for* Economic Development to undertake an additional piece of work; and
- Conflict with previous directly relevant Resolutions of the States.

It was very clear from debate that the Assembly is looking for a co-ordinated approach, and it is illogical to now support and fund another analysis piece of air route operation and support in tandem. The Committee is working to a schedule to ensure that the April 2020 deadline will be achieved to inform States debate on a co-ordinated and coherent government framework considering all aspects of air route operation and support that is under the control or influence of the States of Guernsey.

The Policy & Resources Committee thanks the committees of the States for their policy advice with regards to the Requête. In particular, it wishes to also draw Members'

¹ Rule 23(5)(c) states: "The Policy & Resources Committee also works with Committees to ensure that, so far as possible, their policy plans are co-ordinated and consistent with the States' objectives and with each other; any conflicts and areas where prioritisation is necessary are identified; and the Policy & Resources Committee facilitates cross-committee working where policy areas span more than one Principal Committee."

attention to the Committee *for the* Environment & Infrastructure's response which refers to its on-going work on the development of a Long-term Infrastructure Investment Plan and concerns that there is a policy gap between the solution sought through the Requête and whether it is the right or best one for Guernsey. In other words, as identified by the Committee *for* Economic Development, the strategic case for any change at Guernsey Airport is not yet made, and certainly not the solution of a length of at least 1,700m promoted by the Requête. Similarly, the Director of Civil Aviation underlines the need for the consideration of an extension to the runway to be part of a wider review of all aspects of air route operation if the strategic case is to be made.

The Policy & Resources Committee recommends that the Requête should not be supported for the reasons set out in this letter. It invites Members to support the Sursis Motivé which will allow the Assembly to decide if, after consideration of the co-ordinated and coherent government air transport framework, there is a strategic need to re-open the debate on the length of the runway. Indeed, it is self-evident that any future debate on this Requête will benefit from a full understanding of the issues informed by an agreed framework considering all aspects of air route operation and support that is under the control or influence of the States of Guernsey.

Yours faithfully

Deputy G St Pier
President
Policy & Resources Committee

Enclosed consultation responses:

4 November 2019

Dear Deputy St Pier

Requête P.2019/105 - Development of the Business Case and Cost Benefit Analysis for the Extension of the Runway at Guernsey Airport to Create a 1,700 Metre Runway

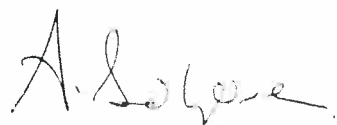

Thank you for the opportunity to provide a view from the Committee *for* Economic Development on this matter.

The Committee considered this at its meeting on 24 October 2019. Deputy Mooney recused himself from the discussion as he is a signatory to the requête, and Deputy Inder was not present at this meeting. While the President of the Committee has confirmed his support for the requête, Deputy De Lisle and I were in a majority of those present for the discussion and able to vote in not supporting the requête.

The reason for this is that I do not support the extension of the airport runway, and therefore do not believe that any further financial resource should be provided to this work; and Deputy De Lisle supports a runway extension, but only within the airport perimeter to 1570m with EMAS.

We have taken this view while acknowledging that officers are continuing to explore this option as part of the work relating to the Committee's policy letter on air and sea links investment and policy objectives, agreed by the States of Deliberation in December 2018.

Yours sincerely,

Deputy Andrea Dudley-Owen
Vice-President
Committee for Economic Development

Committee *for the*
Environment & Infrastructure

12 November 2019

Dear Deputy St Pier

Requête P.2019/105

Development of the Business Case and Cost benefit Analysis for the Extension of the Runway at Guernsey Airport to Create a 1,700m Runway

Thank you for your letter dated 17 October 2019 regarding the above requête and seeking the Committee's views on this matter.

One of the roles of the Committee *for the* Environment & Infrastructure is to advise the States and to develop and implement policies on matters relating to the Island's infrastructure, which includes the airports in Guernsey and Alderney.

Predominantly, it is the Committee's responsibility to establish the need for infrastructure and develop policies in relation to that identified need (the 'what' and 'when').

If a strong case can be made, which fits with the priorities of the States as set out in the Future Guernsey Plan, the Committee would need to consider the strategic implications of providing that infrastructure. One of the States priorities, as set out in the Policy & Resource Plan, is the development of an Infrastructure Investment Plan. This is still in development but in its absence, the Committee will, from time to time, need to make decisions about infrastructure and it may be that the provision of some major infrastructure, like a runway extension, would mean that another infrastructure projects would have to be delayed. The Committee would then advise the States on any such implications, in accordance with its mandate.

Therefore, it is disappointing that the Committee has not been approached by those who have laid the requête to give it a greater understanding of the aims of the requête and to discuss why it believes that the current infrastructure is insufficient to meet Guernsey's needs. The policy gap must be established before the States endeavour to propose solutions, as it is only by taking this approach that we can be assured that the solutions are more likely to be the right ones

SLUP

The Strategic Land Use Plan (SLUP) provides the overall strategic policy direction for the planning system to manage the use of land in Guernsey. It emphasises the importance of achieving a balance between social, environmental, and economic land use requirements and recognises the importance of the timely provision of modern infrastructure, when needed. The SLUP has, as one of its core objectives, the maintenance and enhancement of modern key strategic infrastructure.

The SLUP highlights the importance of ensuring that the Airport can meet transport needs and acknowledges that external factors may trigger the consideration of a runway extension at some time in the future. Therefore, it directs the Island Development Plan to put policies in place which make provision for airport related development that ensures Guernsey Airport can meet modern operational standards and respond to opportunities to strengthen its contribution to the economy.

There are, therefore, no strategic land use principles which would preclude the principle of a runway extension being considered should the States decide there is sufficient evidence to demonstrate that should happen.

Areas of consideration

A project of this size would have a significant impact on the surrounding area and therefore any work to assess the costs, benefits, and disbenefits of it would be a huge undertaking.

The cost of the potential extension of the runway must not only be measured in terms of construction costs. A study on expansion of the runway would need to include an evaluation of the potential impact on all the following areas of importance to the Committee. These include the impact on:

- The environment
- Biodiversity
- Agricultural land (and potential loss of)
- Farming
- Climate change (including potential increase in carbon emissions)
- Energy policy (including future energy sources for aviation)
- The road network and its users
- The on-Island Integrated Transport Strategy
- Water reserves
- Pollution – Including - noise, light, water, and air pollution
- Security of supply of essential commodities

A negative impact on any of these areas would need to be accounted for by any study and must be included in any cost-benefit analysis. As an example, a loss of biodiversity could be measured using Ecosystem accounting.

It should also be borne in mind that on the 28 June 2019 the States resolved,

“that all Committees of the States of Deliberation when laying policy letters before the Assembly should assess therein any consequential impact on climate change of their proposals together with, where appropriate, their adaptation and mitigation actions”

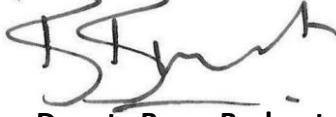

Any cost in any of these areas would need to be evaluated, together with the cost of any potential offsetting or mitigation measures and included in any business case presented to the States. Notwithstanding the fact that the Committee for Economic Development has already started looking at the merits of a possible runway extension, the Committee

believes that it would not be possible to complete the work by May 2020. To do so would be to invite real risk that some of the important factors listed above would not be considered in decision making.

The creation of a report, even if delivered by external bodies, would need significant input from officers on the areas highlighted above as part of this process. This work has not been prioritised because there has been no direction from the States that it should do so and the Committee is determined to deliver the valuable work it needs to as part of the Future Guernsey Plan and its own Policy Priority Plan such as Energy Policy, a Climate Change Action Plan, Long term Infrastructure Investment Plan, the On-Island Integrated Transport Strategy, and the Biodiversity Strategy.

Given that several reports have been considered by the States and debates have taken place in the Assembly on related issues, the Committee has not, to date, seen evidence that a business case can be formed that makes a robust case for the extension of the runway. In particular, as stated above, there has been no articulation of the policy gap and the Committee believes the States would be ill-advised to proceed without an understanding of the problem. Until such time that the States indicates this is a priority, and allocates the appropriate resources, the Committee is of the view that it is best focussed on delivering its existing priorities, already set out by the States.

Yours sincerely

29 October 2019

Dear Deputy St Pier

Requête – P.2019/105

Development of the Business Case and Cost Benefit Analysis for the Extension of the Runway at Guernsey Airport to Create a 1,700 Metre Runway

Thank you for your letter of 17 October 2019 concerning the above Requête.

The Island Development Plan (IDP) which was approved by the States in November 2016 identifies a safeguarded area on land to the east of airport land at Guernsey Airport for a possible runway extension. In this respect, the IDP states in paragraph 20.6.4 as follows:

“Ensuring that Guernsey Airport is able to meet transport needs in the future is essential to the co-ordinated and cost effective delivery of a key public service for Islanders and visitors and is also vital to the local economy. The Strategic Land Use Plan requires provision to be made in the Island Development Plan to ensure that Guernsey Airport is able to meet modern operational standards and respond to opportunities to strengthen its contribution to the economy (see Policy IP4: Airport Related Development). While there is no current evidence that an extension to the length of the airport runway is required to meet economic or operational needs and while advances in aircraft technology might reduce the need for a longer runway in the future, this is something beyond local control. It is also possible that other external factors, such as United Kingdom hub airports not accepting smaller regional aircraft, may trigger the consideration of a runway extension sometime in the future.”

The safeguarded area is shown by a brown outline and vertical hatching on the extract from the IDP Proposals Map below.

IDP Policy IP5: Safeguarded Areas, provides that:-

Development within Safeguarded Areas will be supported where:

- a. the proposal is in accordance with an approved Development Framework; or,
- b. the proposal would not inhibit the implementation of an approved Development Framework or prejudice the future implementation of development the purpose for which the area has been safeguarded; or,
- c. the development is of a minor or inconsequential nature which would not prejudice the future implementation of the development the purpose for which the area has been safeguarded; and,
- d. the proposal is in accordance with all other relevant policies of the Island Development Plan.

The IDP however also confirms that by designating this safeguarded area it is not implied that there is any commitment that such development will take place but that the purpose is to protect the area identified from any development that may compromise its possible future use for a runway extension.

Development of an extension to the runway within the safeguarded area will require a Development Framework. Where a Development Framework is approved it will be taken into account when considering proposals in the area to which it relates and proposals will be expected to accord with the approved Development Framework. Proposals for extension of the runway will also require an Environmental Impact Assessment.

Should part of a proposed future runway extension be located outside of the safeguarded area on land to the east of airport land at Guernsey Airport, then it is likely that, notwithstanding Policy IP5, this would be considered on the basis of IDP Policy S5: Development of strategic importance, for which a Local Planning Brief would be required, which would necessitate a Planning Inquiry along with reference to the States for approval.

I hope this this information is helpful. Beyond this the Development & Planning Authority has no comment to make at this stage concerning the prayer of the Requête.

Yours sincerely

A handwritten signature in black ink, appearing to read 'Dawn Tindall', written in a cursive style.

Deputy Dawn Tindall

President, Development & Planning Authority

St Peter Port
Guernsey
GY1 1FH

Dear Mr President,

The DfT (Department for Transport) policy position is that the UK (including all its constituent parts – UK main, CDs and OTs) are to comply with ICAO's (International Civil Aviation Organisation) standards and recommended practices (SARPs). The RESA (Runway End Safety Area) "The surface surrounding the runway prepared or suitable for reducing the risk of damage to airplanes in the event of an undershoot, overshoot, or excursion from the runway" in Guernsey is not currently compliant with the SARPs, there should have been a safety case based on a risk assessment that explained how the risks of not meeting the SARP were being mitigated. There are examples where it is not possible due to topography to meet the recommended practice (cliff, river or mountain) but all airports should meet the standard and there are risk assessments in place to mitigate the risks of not meeting the recommended practice.

My regulatory view regarding extending the current declared distances by reducing the RESA is not acceptable as it is currently not compliant, and I would also be taking on risk in allowing the airport to reduce safety levels.

If the intention is to extend the runway at Guernsey, ICAO is clear that when extensions are planned to existing runways, complying with the SARPs should be factored in at the design stage. I will always plan to be compliant rather than planning not to be; doing the latter would be indefensible should an accident occur where the lack of a compliant RESA was a contributory factor. Also, it is inappropriate to 'carry over' an existing non-compliance when doing runways expansion works. In other words, an argument that the runway has never had a compliant RESA would be challenged as the opportunity existed to meet the SARP during the extension work. This sometimes results in the work not viable as very little is gained for what is a significant financial output. However, as the Regulator, any extension of the runway with a fully compliant (ICAO recommended length of 240m) RESA would be acceptable.

Yours Faithfully,

Dominic Lazarus
Director Civil Aviation

**THE STATES OF DELIBERATION
of the
ISLAND OF GUERNSEY**

27th November, 2019

Proposition No. P.2019/105

Requête

**Development of the business case and cost benefit analysis for the extension of
the runway at Guernsey Airport to create a 1,700 metre runway**

SURIS MOTIVÉ

Proposed by: Deputy G A St Pier

Seconded by: Deputy L S Trott

To suris the Propositions until after the States of Deliberation have considered the report prepared by the Policy & Resources Committee, in consultation with the Committee *for* Economic Development and the States' Trading Supervisory Board, on a co-ordinated and coherent government framework on air connectivity. This report will consider all aspects of air route operation and support that is under the control or influence of the States of Guernsey and on which they have already made policy decisions, to include the strategic benefits and dis-benefits of extending the runway, as set out in Resolution 37 of P.2019/104 – The States of Guernsey Annual Budget 2020 and approved on 8th November 2019.

Rule (4) 3

There are no additional costs associated with the Proposition as set out in this Suris Motivé.

Explanatory note

On 5th November 2019, the States of Deliberation approved Proposition 38 in the States of Guernsey Annual Budget for 2020. As a result, the Policy & Resources Committee, in consultation with the Committee *for* Economic Development and the States' Trading Supervisory Board, has commenced work on a co-ordinated and coherent government framework considering all aspects of air route operation and support that is under the control or influence of the States of Guernsey. As part of this work, as set out in its response to the invitation to comment on the Requête,

the Committee *for* Economic Development is preparing an outline business case for the extension of the runway at Guernsey Airport.

This Sursis Motivé seeks to defer consideration of the Requête until after the Policy & Resources Committee has reported back to the States by no later than April 2020. That is, the Sursis Motivé would defer by five to six months the debate on whether the States should support the development of the business case and cost benefit analysis for the extension of the runway at Guernsey Airport to create a 1,700 metre runway.

The question of whether the runway at Guernsey Airport should be extended has been subject of two recent debates in 2018 and 2019.

The Policy & Resources Committee believes that the Propositions within the Requête are in direct conflict with the agreed direction of the States on the matter of air connectivity and government's intention to develop a coordinated and coherent framework for the consideration of all aspects of air route operation and support that is under the control or influence of the States of Guernsey.

Further, it dilutes the resources available to support the Committee *for* Economic Development, requiring it to undertake a separate and additional piece of work outside the States' Resolution to expedite the development of a coordinated and coherent government framework covering all aspects of air route operation.

ORIGINAL PROPOSITION

THE STATES OF DELIBERATION
of the
ISLAND OF GUERNSEY

POLICY & RESOURCES COMMITTEE

SCHEDULE FOR FUTURE STATES' BUSINESS

The States are asked to decide:-

Whether, after consideration of the attached Schedule for future States' business, which sets out items for consideration at the Meeting of the 11th December 2019 and subsequent States' Meetings, they are of the opinion to approve the Schedule.

STATES OF DELIBERATION

SCHEDULE for FUTURE STATES' BUSINESS (For consideration at the Ordinary Meeting of the States commencing on the 27th November, 2019)

Items for Ordinary Meeting of the States commencing on the 11th December, 2019

- (a) communications by the Presiding Officer including in memoriam tributes;
- (b) statements;
- (c) questions;
- (d) elections and appointments;

P.2019/118 – Independent Monitoring Panel – Appointment of Members

P.2019/119 – Election of Baroness Couttie as an Ordinary Member of the
Guernsey Financial Services Commission

- (e) motions to debate an appendix report (1st stage);
- (f) articles adjourned or deferred from previous Meetings of the States;
- (g) all other types of business not otherwise named;

No. 105 of 2019 - The Legal Aid (Guernsey and Alderney) Rules, 2019

No. 106 of 2019 - The Health Service (Benefit) (Limited List) (Pharmaceutical
Benefit) (Amendment No. 6) Regulations, 2019

No. 108 of 2019 - The States Reform (Performance of Functions) (Public
Transport) Regulations, 2019

P.2019/121 - The Income Tax (Guernsey) (Amendment) (No.2) Ordinance,
2019*

P.2019/122 - The Income Tax (Zero 10) (Company Higher Rate) (Amendment)
(Guernsey) Ordinance, 2019*

P.2019/123 - The Income Tax (Zero 10) (Company Intermediate Rate)
(Amendment) (Guernsey) Ordinance, 2019*

P.2019/124 - The Asian Infrastructure Investment Bank (Privileges and
Immunities) (Bailiwick of Guernsey) Ordinance, 2019*

P.2019/126 - The Criminal Justice (International Co-operation) (Bailiwick of Guernsey) (Amendment) Ordinance, 2019*

P.2019/127 - The Drug Trafficking (Bailiwick of Guernsey) (Amendment) Ordinance, 2019*

P.2019/128 - The Criminal Justice (Proceeds of Crime) (Bailiwick of Guernsey) (Amendment) Ordinance, 2019*

P.2019/129 - The Disclosure (Bailiwick of Guernsey) (Amendment) Ordinance, 2019*

P.2019/130 - The Terrorism and Crime (Bailiwick of Guernsey) (Amendment) Ordinance, 2019*

P.2019/132 – States’ Assembly & Constitution Committee – General Election 2020 – Second Policy Letter*

P.2019/120 - Committee *for* Economic Development – Proposed Amendments to the Guernsey Competition and Regulatory Authority Ordinance, 2012 and Appointment of the Chairman*

P.2019/117 – States’ Trading Supervisory Board - Guernsey Post Limited – Annual Report and Accounts*

P.2019/125 – States’ Trading Supervisory Board - Guernsey Electricity Limited – Annual Report and Accounts*

P.2019/131 – Policy & Resources Committee – International Tax Measures – Miscellaneous Amendments to the Income Tax Legislation*

P.2019/133 – Committee *for* Home Affairs – Bailiwick Security Policy*

P.2019/134 – Committee *for* Home Affairs – Telecommunications Supply Chain Security Framework*

(h) motions to debate an appendix report (2nd stage);

(i) Schedule for future States’ business.

Amendments to the proposed meeting dates and order are permitted only for those items marked with an *.

Items for Ordinary Meeting of the States commencing on the 26th February, 2020

(N.B. A meeting of the States of Election will be convened for this date prior to the meeting of the States of Deliberation.)

Item for Special Meeting of the States commencing on the 21st April, 2020

P. 2019/xx Policy & Resource Plan (End of Term)

Annual Report

2018

For the period 25 May 2018 – 31 Dec 2018

Foreword

A flying start. Elaborating those three words, this first Annual Report sets out what has been achieved on the journey to the establishment of an effective independent Data Protection Authority for the Bailiwick of Guernsey.

25 May 2018 saw two events on the same start date. The coming into force of a new and complex Law, based on the EU's General Data Protection Regulation. And the creation – to use the language of GDPR - of a new Supervisory Authority. An ambitious programme for any jurisdiction. Simultaneously, the challenges of getting to grips with new rights for individuals, new requirements for those processing personal data and new regulatory powers and duties. Plus the strategic, governance, financial and administrative responsibilities involved in setting up any new organisation.

This has also been a time of massive cultural change as data protection has globally come of age. There can be very few who do not now recognise the absolutely central role of data – the 'new oil' – in all aspects of economic and governmental activity and in the social well-being of all citizens. Technology has brought many benefits and these will continue and will accelerate. But the risks – of harm to individuals and of societal harm – have also increased and go to the very heart of how we live our lives. Data protection seeks to minimise those harms, while not stifling beneficial innovation.

The ODPA has numerous new responsibilities and we are seeking to make the best possible use of the carrots and sticks available to us. As teachers, we must educate. As police-officers, we must enforce the law. And as referees, we must deal with complaints. In broad terms we want to help those who want to get things right, but be tough on those who do not.

Challenges still lie ahead. A new team has to get to full strength. Many parts of the Law have yet to be tested. We do not yet find ourselves on a firm financial footing. There are still those who have yet to understand the crucial role of data protection for the prosperity of financial services and other enterprises based in the Bailiwick. Public bodies are having to change. Above all this, the European Commission's imminent assessment of the 'adequacy' of the Bailiwick's data protection regime will present a day of judgment.

We are on our way and – as this report spells out – a huge amount has been achieved. I pay tribute to the excellent members of the Authority's Board who bring a wealth of experience and insight. And the whole Bailiwick is extremely fortunate to have Emma Martins as its Commissioner, leading a carefully-selected team of such obvious talent and commitment.

Richard Thomas CBE, Chair, The Data Protection Authority (Bailiwick of Guernsey)

Introduction

I am pleased to present this Annual Report for the Office of the Data Protection Authority for the period 25 May – 31 December 2018 in accordance with the requirements of Schedule 6, para.13 of *The Data Protection (Bailiwick of Guernsey) Law, 2017*.

The General Data Protection Regulation came into effect across the European Union on 25 May 2018. On the same day, our own equivalent legislation came into effect for the Bailiwick. It marked what was probably one of the most significant dates in the history of data protection; not just for the Bailiwick or Europe, but globally. The data economy is increasingly borderless and the reach of this enhanced regulatory framework goes well beyond national or geographical borders.

The commitment to a continued high-quality regulatory environment for data is important to ensure the free flow of data necessary for business, as well as enhanced individual rights; both of which are key for economic success and social justice for the Islands in this digital era.

The comprehensive reform programme to ensure the Bailiwick is able to meet these new standards was well underway at the time the new legislation took effect and has continued to make good progress. With the new Chair and Authority Members already in place, the inaugural Authority meeting was held on the 25 May 2018.

Shortly after that we relocated to new office accommodation which provides sufficient space for the required additional members of staff as well as a board room which is also used as a small events space, supporting the delivery of our communications programme.

With independence such a crucial requirement of the new Authority, we moved away from reliance on government for financial administration, budgeting, audit and HR to ensure the Authority has autonomy in these areas. The first full financial audit is due in 2019.

We have thought carefully about our overall direction and are developing a strategic plan from which all our activities will flow. We will perform our duties with clarity about our wider strategic direction and how we can enhance the Bailiwick's reputation.

Whilst it is the case that the regulated community need to commit to delivering on the new legal standards, it is also the case that we, as the regulator, need to commit to delivering on our obligations in an accountable, fair and consistent matter. The long-term funding model for the office is yet to be agreed, but whatever model the States of Guernsey settle on, we will continue to build the regulatory office constantly mindful of the need for us to make effective use of our resources. The breadth and depth of data protection regulation means that we have to regulate in a smart way if we are to secure good outcomes. We are consciously targeting resources at actively engaging with and supporting the regulated community, and we are working towards launching several initiatives in 2019, including drop-in sessions for local businesses, a free events programme, study visits, and a schools programme.

In seeking to embed a culture of data protection into the Islands, we want to leverage the opportunities that present themselves in this data driven economy without compromising on the highest standards of data protection. Against the global backdrop of economic and political uncertainty, we want to ensure that the Bailiwick maintains a high-quality, stable and forward-looking regulatory environment which recognises that innovation and good governance are mutually dependent.

Lastly, I want to thank my team who have worked so tirelessly and with such commitment and focus. We are extremely fortunate to have an exceptionally experienced Chair and Authority Members who have already contributed so much in ensuring we are a fit for purpose regulatory office that supports our jurisdiction's social and economic wellbeing. The task in hand is considerable and I am extremely proud of the progress that has been made. All data protection authorities are faced with an environment of unprecedented social and technological change. The need for us to fulfil our role with independence and integrity has never been greater.

Emma Martins, Data Protection Commissioner (Bailiwick of Guernsey)

About the Authority

The Office of the Data Protection Authority (ODPA) is the independent regulatory authority for the purposes of *The Data Protection (Bailiwick of Guernsey) Law, 2017* and associated legislation.

The Law creates the independent Data Protection Authority which is tasked with the development and implementation of the new regulatory regime necessary to oversee the requirements of the Law. Comprising a Chair and between four and eight Members, the Authority provides governance to the Office of the Data Protection Authority (ODPA).

The ODPA is the operational body that carries out the regulatory functions of the Law delegated by the Authority. These include recording data breaches, investigating complaints, running education programmes and examining proposed legislation and how it may affect individual privacy. The ODPA strives to empower individuals to exercise their rights as well as to support organisations to meet their compliance requirements and take action where they fall short.

The Office of the Data Protection Authority:

Empowers individuals and protects their rights

Promotes excellence in data protection

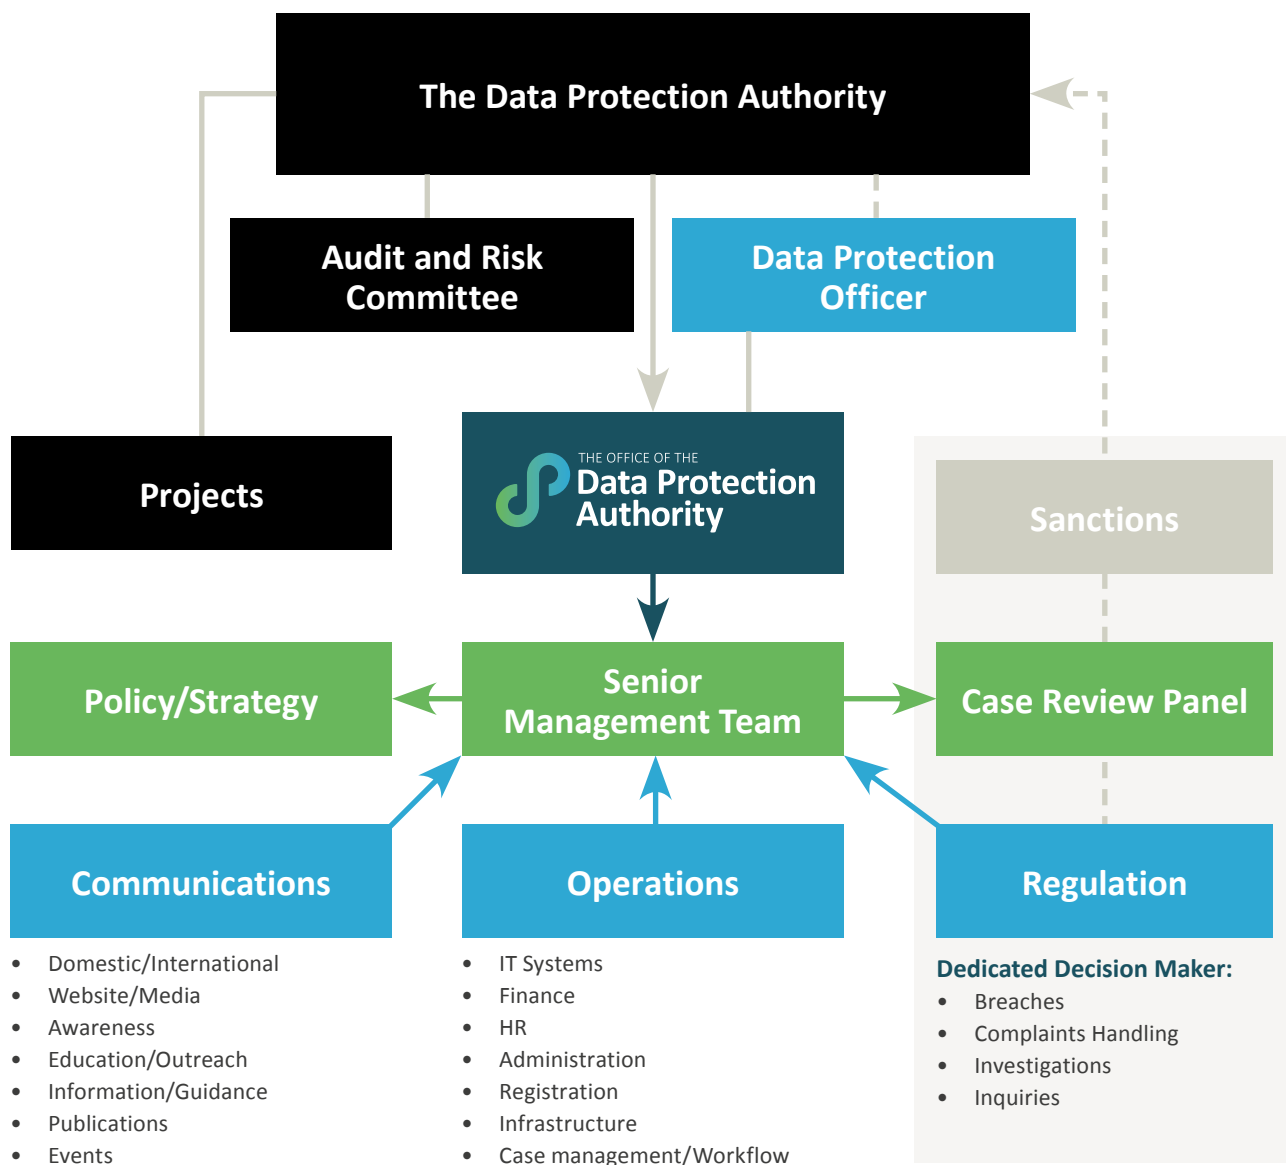

Supports the data economy to embrace innovation

**Regulates data protection legislation
through an ethics-based approach**

Organisational chart

The Data Protection Authority

- Chair – Richard Thomas CBE
- Voting Member – John Curran
- Voting Member – Christopher Docksey
- Voting Member – Simon Entwisle
- Voting Member – Mark Lempriere
- Voting Member – Jennifer Strachan
- Commissioner as *ex-officio* and non-voting Member – Emma Martins

The Office of the Data Protection Authority

- Chief Executive / Data Protection Commissioner – Emma Martins
- Deputy Commissioner – Rachel Masterton
- Chief Operating Officer – Tim Loveridge
- Office Manager – Mike Appelqvist
- Operations and Compliance Manager – Lawrence West
- Communications Manager – Leanne Archer
- Executive Officer – Lesley Le Bailly

Strategic aims

For the purposes of this report we present the ODPa's strategic aims for 2018 across four themes:

1. Reform and governance

- 1.1. We will play an integral part in the successful reform of the Bailiwick's data protection regime, ensuring enhanced rights for our citizens as well as continued 'adequacy'.
- 1.2. We will work to support the creation of a robust and effective governance structure including supporting the constitution of the new Authority and associated financial and operational control mechanisms for our Office.

2. Regulatory approach

- 2.1. We will ensure, through effective structuring and resourcing of our Office, that we are capable of delivering our statutory requirements, demonstrating the highest standards of data protection regulation for the Bailiwick.
- 2.2. We will ensure regulatory action is targeted, proportionate and fair in the knowledge that most organisations want to do the right thing.
- 2.3. We will adopt a risk-based approach to deliver cost-effective outcomes. This will be done in the knowledge that choices have to be made because of resource pressure and we commit to making those decisions intelligently and openly.

3. Raising awareness

- 3.1. We will support organisations and individuals to embrace and deliver on the higher standards the reform entails and society demands.
- 3.2. We will raise the profile of data protection, demonstrating its role as a key builder of trust between organisations and the individuals with which they interact, aiming for enlightened self-interest as a motivator for regulatees, not simply a way of avoiding sanction.
- 3.3. We will improve standards of data protection practice through clear, meaningful and inspiring communications, engagement and influence.

4. Relationships

- 4.1. We will maintain existing connections and work to develop new key, strategic relationships within the data protection regulatory community, and beyond, in the knowledge that there is increasing overlap with regulatory and other bodies in the areas such as consumer rights and cyber security.
- 4.2. We will engage in constructive relationships with all stakeholders to improve overall compliance without compromising our independence, recognising that effective data protection requires multi-disciplinary skills and approach.

Strategic activity - highlights

Below is what the ODPA achieved in line with its strategic aims for 2018, more detail can be found in Appendices 1 - 4:

1. Reform and governance

- 1.1. We will play an integral part in the successful reform of the Bailiwick's data protection regime, ensuring enhanced rights for our citizens as well as continued 'adequacy'.
- 1.2. We will work to support the creation of a robust and effective governance structure including supporting the constitution of the new Authority and associated financial and operational control mechanisms for our Office.

What the ODPA did

- Became an independent regulator on 25 May 2018.
- Held three board meetings of The Data Protection Authority (25 May 2018, 11 September 2018 and 6 December 2018).
- Completed their move into new fit-for-purpose premises (July 2018).
- Completed systems and data migration projects to achieve fully independent status (July 2018).
- Recruited three new permanent members of staff (Tim Loveridge, Mikael Appelqvist, and Leanne Archer).
- Set up separate banking arrangements and auditors, independent of the States of Guernsey (July/August 2018).
- Submitted a proposal of how their activities could be funded by the regulated community instead of the States of Guernsey, to the Committee for Home Affairs (November 2018).

2. Regulatory approach

- 2.1. We will ensure, through effective structuring and resourcing of our Office, that we are capable of delivering our statutory requirements, demonstrating the highest standards of data protection regulation for the Bailiwick.
- 2.2. We will ensure regulatory action is targeted, proportionate and fair in the knowledge that most organisations want to do the right thing.
- 2.3. We will adopt a risk-based approach to deliver cost-effective outcomes. This will be done in the knowledge that choices have to be made because of resource pressure and we commit to making those decisions intelligently and openly.

What the ODPA did

- Made the deliberate choice to seek informal resolution to investigations, wherever possible.
- Made thoughtful, evidence-based, impartial determinations in all cases.
- Started developing a project on investigation, case-handling, and compliance best practice.
- Focused efforts and resources on investigating the most harmful complaints.
- Introduced a secure online system for breach reporting.

3. Raising awareness

- 3.1. We will support organisations and individuals to embrace and deliver on the higher standards the reform entails and society demands.
- 3.2. We will raise the profile of data protection, demonstrating its role as a key builder of trust between organisations and the individuals with which they interact, aiming for enlightened self-interest as a motivator for regulatees, not simply a way of avoiding sanction.
- 3.3. We will improve standards of data protection practice through clear, meaningful and inspiring communications, engagement and influence.

What the ODPA did

- Raised awareness of new Law through effective PR, and engagement with regulated community through commissioner/deputy commissioner's attendance or speaking at 18 local events (May-Dec 2018).
- Published a suite of guidance documents around key areas of the law (May 2018).
- Published statistics about self-reported personal data breaches with key message of enlightened self-interest included each time (regularly from June 2018 onwards).
- Established an ODPA motto 'Excellence through Ethics' (July 2018).
- Focused on sharing message of importance of ethical data use, through key channels (July – Dec 2018).
- Developed and published a Communications Strategy (September 2018).
- Started work on scoping the re-development of ODPA's web services and associated internal systems (September 2018).
- Continued to focus on producing and updating key guidance documents, written in plain English.
- Started posting regular, high-quality content on an ODPA LinkedIn page (September 2018).
- Started producing a monthly newsletter (October 2018).
- Started work on developing a free public events programme (November 2018 onwards).

4. Relationships

- 4.1. We will maintain existing connections and work to develop new key, strategic relationships within the data protection regulatory community, and beyond, in the knowledge that there is increasing overlap with regulatory and other bodies in the areas such as consumer rights and cyber security.
- 4.2. We will engage in constructive relationships with all stakeholders to improve overall compliance without compromising our independence, recognising that effective data protection requires multi-disciplinary skills and approach.

What the ODPA did

- Started establishing memoranda of understanding with key entities.
- Continued to work closely with the regulated community, focusing on positive engagement.
- Represented the Bailiwick at the British, Irish and Islands' Data Protection Authorities (BIIDPA) forum in June 2018.
- Visited the UK Information Commissioner's Office (ICO) communications team in July 2018.
- Visited the European Data Protection Supervisor communications team in October 2018.
- Represented the Bailiwick at the International Conference of Data Protection & Privacy Commissioners (ICDPPC) in October 2018.
- Visited the Irish Data Protection Commission's senior management team in November 2018.

Case studies

To promote awareness of the diverse range of complaints received by data protection authorities, below are three anonymised examples:

1. Employment scenario

Complainant (data subject): Mr A, an employee of Company B

Controller: Company B

Mr A was under disciplinary action by his employer and was currently off work. All correspondence was being sent to his home address. He moved house and believed he had advised his employer that he had done so. Personal data relating to this disciplinary action was sent to his old address by his employer. It was opened by the new occupant who advised Mr A that he had done so in error.

Mr A subsequently discovered that people were gossiping about his disciplinary action. Until then, it had been kept confidential. This gossip negatively affected his future employment prospects.

Outcome

Mr A had no way of proving that gossip about his disciplinary action had emanated from the new occupant of his old house. Even if he was able to, the damage was done.

- Mr A's complaint was addressed with his employer, Company B (the controller). The controller's HR department denied that Mr A had advised them of his change of address. Mr A had no proof that he had notified the HR department. It is incumbent upon employees to advise employers of a change of address in writing and to obtain confirmation that this has been recorded. Had this been done this data breach, with serious consequences, would not have occurred, or if it had, action could have been taken.
- No formal action could be taken against the controller.

2. Sole trader scenario

Complainant (data subject): Mr C, a sole trader, contracted by Company D

Controller: Company D

Company D is a building consultancy using several building contractors, including Mr C. They were aware that different rates might be charged by the same contractor for different clients. Company D, however, disclosed to a client the lower rates that Mr C had charged to another client. As Mr C is a sole trader, his rates were classed as personal data.

Outcome

- An investigation concluded that, whilst the action of the controller was inappropriate and it was clear that the controller should have not disclosed Mr C's personal data, it had admitted its conduct.
- It was decided that no further action should be taken, as the controller had admitted the oversight, learnt from the mistake and was unlikely to repeat it.
- Additionally, it was concluded that Mr C had not suffered much in the way of privacy damage.

3. Public figure

Complainant (data subject): Ms E, a TV presenter

Controller: Company F, a telecoms provider

Ms E was employed as a TV presenter. Wishing to separate her personal life from her professional life, her home telephone number was ex-directory. A member of the public became very attracted to Ms E and was constantly sending her messages to her work email address, hanging around outside the studio and posting messages about her on social media. This unwanted attraction was tantamount to stalking.

Company F published a new telephone directory with Ms E's name, home telephone number and home address appearing in both the hard copy directory and online, contrary to her previously stated instructions. When Ms E discovered this, she contacted Company F immediately and her details were removed from the online directory. However, the hard copy directory had already been widely distributed. Company F advised Ms E that they could not assist further. She complained to the regulator.

Outcome

- It was recognised that the issue was causing Ms E a great deal of stress, not only in respect of her own safety but of that of her family. There was also the potential for harm.
- An investigation was launched to ascertain how the error had occurred and determined that it was human error, not a failure in process. Appropriate action was taken against Company F.
- In communicating with senior employees of Company F, the regulator was very concerned at the apparent lack of appreciation of Ms E's distress and concern. In such an instance, public and customer relations are paramount and, although the distributed directories could not be amended, the regulator suggested that the distress might be mitigated by some form of recompense. Company F eventually took this on board.

Key statistics

For period 25 May 2018 – 31 Dec 2018

570

Number of **additional local organisations** who fulfilled their legal obligation to register with the ODPA

66

Number of **email enquiries** ODPA answered, on average each month

14

Number of **speaking engagements** by the commissioner and deputy commissioner

£554,129

The ODPA's **operating budget**

3

Number of **board meetings** held by The Data Protection Authority

3

Number of **additional staff** recruited to ODPA

34

Number of data protection **complaints** received

30

Number of **investigations** conducted

1

Number of **inquiries** conducted

0

Number of **investigations resulting in a determination** that an operative provision has been or is likely to be breached

Note: zero determinations made owing to ODPA's desire to find informal resolutions.

0

Number of **inquiries resulting in a determination** that an operative provision has been or is likely to be breached

Note: zero determinations made owing to ODPA's desire to find informal resolutions.

0

Number of **sanctions** imposed by the Authority under section 73

Note: zero as ODPA has not made a determination under section 71, thus not triggering sections 76 and 73.

Appendix 1

Reform and governance strategic activity details

Legislation

Part XI of *The Data Protection (Bailiwick of Guernsey) Law, 2017* (the Law) sets out the statutory obligations in respect of the Data Protection Authority (the Authority).

Section 60 refers to the establishment and constitution of the Authority as a body corporate with perpetual succession and a common seal.

Section 61 sets out the general functions of the Authority.

Section 62 requires the Authority to be independent and free from direct or indirect external influence in the exercising or performing of its duties.

The Authority

The Law came into force on the 25 May 2018. The Law created the Data Protection Authority and at its meeting on 16 May 2018, the States of Deliberation approved the appointment of the following Authority members, with effect on and from 25 May 2018:

- Chair – Mr Richard Thomas CBE
- Voting Member – Mr John Curran
- Voting Member – Mr Christopher Docksey
- Voting Member – Mr Simon Entwisle
- Voting Member – Mr Mark Lempriere
- Voting Member – Mrs Jennifer Strachan
- Commissioner as *ex-officio* and non-voting Member – Mrs Emma Martins

The launch event on 25 May 2018 was preceded by a meeting of the Authority at which the following matters were addressed:

- Implementation project plan
- Budget for the Authority
- Resources and recruitment
- Office accommodation
- Corporate governance
- Code of practice for Authority members
- Disclosure of Interests
- Memorandum of Understanding with Committee *for* Home Affairs
- Funding project
- Appointment of auditors
- Resolution on frequency of future meetings

During the period of this report the Authority met a further two times (on 11 September 2018 and 6 December 2018).

Members are fully committed to ensuring the highest quality oversight and are ready to demonstrate that the Authority is acting with complete independence from the States of Guernsey in the delivery of their statutory roles.

Human Resources

Prior to the creation of the Authority, the Office of the Data Protection Commissioner was reliant upon government for staffing and the individuals working at the Office were civil servants.

Since 25 May 2018, staff have been employed directly by the Authority with day to day employment administration matters being handled internally. Additional administrative support for employment related matters is in place using a trusted external provider.

Financials and audit

Prior to the creation of the Authority, the Office of the Data Protection Commissioner was reliant upon government for all financial administration and budgeting, including audit.

Since 25 May 2018, the Authority has completely separated all banking arrangement, taken over control of its accounts and has appointed independent auditors.

New funding model

The ODPA submitted a detailed proposal of its funding model post-2019 to the States of Guernsey in November 2018. This proposal contained innovative features which would ensure that the bulk of funding is received from the regulated community with minimum administrative burden.

Appendix 2

Regulatory approach strategic activity details

Legislation

Parts II, III, IV, V, VI, VII, VIII and X of the Law set out the compliance duties of controllers and processors. These statutory requirements reflect the standards of the GDPR.

Strategic aims

Section 61 of the Law sets out the general functions of the Authority. These functions include administering and enforcing the Law as well as promoting awareness for individuals and the regulated community.

Prior to the Law coming into force on 25 May 2018, data protection legislation had been in place for the Bailiwick since 1986. The ODPA continues to build on the compliance foundations of the previous legislation and is drafting a four-year strategic plan that develops on the former but focuses on the enhanced compliance requirements.

These strategic aims will reflect careful consideration of the suite of regulatory duties and objectives the ODPA has and how they may be best approached with the available resources. Further, it will develop and incorporate its approach of ‘predict – prevent – detect – enforce’ when seeking to deliver meaningful regulatory outcomes. Each of these key regulatory areas, including how they interrelate as well as how the ODPA plans to approach them, will be further explored as the strategic plan develops and matures.

The strategic aims will set out how the ODPA aims to support organisations in delivering on their statutory obligations in a proactive and enlightened way. With the Bailiwick of Guernsey being a small jurisdiction already well accustomed to high standards of professional compliance in financial services regulation, the ODPA has unrivalled access and proximity to the regulated community which it will seek to leverage in delivering high quality data protection regulation.

Internal systems

A major review of the ODPA’s casework system began in 2018 now that there are dedicated resources available to manage complaint-handling. The aim will be to ensure complaints are well-managed with objective and agreed criteria for handling, investigation and oversight which are consistently and fairly applied.

The IT infrastructure is being actively developed to enhance:

- Community engagement
- Information gathering and straight-through processing
- Workflow and case-management
- Performance monitoring and reporting
- Regulatory/statutory compliance
- Regulatory effectiveness and capacity

Further, procedures and systems are being put in place to ensure maximum use is made of the rich intelligence that complaints can provide and feed that into the awareness and compliance work programmes.

The ODPA is committed to exploring the opportunities that alternative dispute resolution may offer in case handling.

Complaint handling

The ODPA deals with complaints made by data subjects under section 67 of the Law as well as conducting inquiries under its own initiative (section 69). An investigation is concluded with a determination as to whether a breach of an operative provision has occurred, and if appropriate, the issuance of a sanction.

The ODPA employs a core team of casework officers to progress such matters. However, the nature and complexity of some complaints makes it challenging for small regulatory offices such as the ODPA to retain capacity for specialised technological and/or legal inquiries. The ODPA has secured the services of trusted third party providers that can be engaged as required to provide forensic IT as well as legal support where investigations or inquiries require it.

Management of personal data breach reports

In line with GDPR standards, the Law requires controllers to report certain personal data breaches to the ODPA. The information contained within such reports is a rich source of intelligence, highlighting (often in almost real-time) harms and risks in the area of data processing. The ODPA has been clear from the outset of these reporting requirements that the regulated community must have trust and confidence in the office to handle the reports appropriately. Work continues to engage with industry to support this objective and the ODPA has been open and transparent with the public about the nature and volume of such breach reports via regular press release on breach statistics, these have been released to all local media (and published on odpa.gg) on a bi-monthly basis since June 2018.

Since the early days of the Law, the level of engagement in respect of personal data breach reports has been extremely positive. It is clear that the reporting of breaches is starting to be effectively built into the business processes of the local regulated community. Furthermore, the collated reporting is helping the ODPA to build an understanding of harms and increasingly identify potential systemic risks.

The ODPA will be developing communications and compliance work around the personal data breach report trends in order to improve awareness and reduce the likelihood of recurrence. Such information will also assist in informing the future targeting of compliance, inspection and enforcement resources, recognising the benefits of evidence-based activities.

The ODPA continues to work closely with the Cyber Security Lead for the States of Guernsey to ensure a consistent and constructive approach to all data security related matters and will, in the future, be exploring the sharing of statistical information where doing so may benefit industry or the jurisdiction as a whole.

Prior consultation

Section 46 of the Law requires the ODPA to be consulted in certain new legislative proposals where such draft legislation involves the processing of personal data. This important enhanced requirement of the Law reflects the significance and potential impact of the processing of personal data by government which by its nature carries with it special responsibilities in that it applies to everyone and is mandatory.

Individuals' rights

Part III of the Law sets out the statutory rights for individuals, some of which were in place in the previous legislative regime; some of which are new.

Individuals are able to pursue legal remedies to ensure compliance and enforce their legal rights. Such actions may be taken directly against controllers or raised with the regulator or the courts.

The ODPA has put in place procedures to ensure the investigation of complaints and conduct of inquiries is independent. There are permanent members of staff who are experienced investigators and the ODPA has secured the services of specialist legal and investigative support that can be called upon when investigations or inquiries require it.

The strategic aims of the ODPA will reflect careful consideration of its suite of regulatory duties and objectives and how they may be best achieved with the available resources. Further, it will develop its approach of 'predict – prevent – detect – enforce' when seeking to deliver meaningful regulatory outcomes.

In striving to support and encourage a raising of compliance in the community as a whole, the risks and harms to individuals can be minimised. The work programme to support controllers and processors is, therefore, neither strategically nor operationally separate from the focus on individuals and their rights.

The ODPA has included outreach work aimed at individuals in its communications strategy and where collaborative working will assist in these objectives, partnerships with suitable third parties are being explored.

The ODPA recognises that data harms are real and have the potential to impact individuals in significant and detrimental ways. Seeking to predict and prevent these harms is a priority whilst ensuring that the ODPA has the ability to respond to allegations of infringements in a timely and appropriate manner.

Redress mechanisms

Section 73 of the Law provides that all or any of the following sanctions may be imposed by the ODPA where it has determined that a breach has occurred or is likely to occur:

- A reprimand;
- A warning;
- An order (including an administrative fine).

The procedures which must be followed for the issuing of sanctions and the ordering of administrative fines (the latter is a reserved function of the Authority itself) are set out in detail in the Law.

The Law provides individuals with effective administrative and judicial remedy. Under section 79, a data subject can bring an action against a controller or processor for the breach of an operative provision. A court in which an action is brought may grant an order, relief or remedy (including damages) in respect of any distress, inconvenience or other adverse effect suffered by a data subject even if there is no physical or financial loss or damage.

Section 85 of the Law allows for the ODPA to bring similar proceedings before the court in respect of any breach or anticipated breach by a controller or processor.

Section 87 of the Law provides for the offence of unlawful obtaining or disclosure of personal data to which a custodial sentence is attached.

Appendix 3

Raising awareness strategic activity details

Legislation

Part XI (section 61) of the Law set out the Authority's duty to: 'promote public awareness of risks, rules, safeguards, and rights in relation to processing, especially in relation to children'; and 'to promote the awareness of controllers and processors of their duties under this Law'.

Communications strategy

The ODPA has developed and published a comprehensive communications strategy that will reinforce the strategic plan. This strategy aims to support the approach of constructive engagement with the regulated community to help them embrace and deliver on their obligations, as well as with citizens to help them to understand their rights and how to exercise them.

The communications strategy's objectives are:

- To promote public awareness of risks, rules, safeguards and rights in relation to processing of personal information, especially in relation to children.
- To promote Guernsey's position as a jurisdiction with excellent and innovative data protection standards which retains its 'adequacy' recognition from the EU
- To promote awareness of the legal duties placed on organisations who are controlling or processing personal information.
- To protect the ODPA / Data Protection Authority's reputation by communicating in-line with its mission, vision and values.

The main communication channels are:

- the odpa.gg website;
- newsletter;
- PR;
- public statements;
- annual report;
- official guidance;
- events (the ODPA's, and others);
- social media.

The communications activities seek to put more emphasis on the human being at the heart of data protection legislation with less emphasis on box-ticking, dis-engaged, compliance. The ODPA motto, as featured in the communications strategy, is 'Excellence through Ethics'. This motto reflects the foundation of the ODPA's approach, striving to weave the thread of ethics into all communications activities.

The ODPA focused on sharing this message of the importance of ethical data use, through key channels (e.g. published blog pieces on data ethics and history of privacy; Business Life article in Sept/Oct 2018 issue on data ethics; Data Protection Leader article in November 2018 issue; Emma Martins interviewed for Thought Leaders in Privacy video series recorded in October 2018).

Plain English

The ODPA provides clear and accessible information for individuals seeking to exercise their rights directly with controllers and works explicitly to seek to empower individuals in respect of managing their own data and questioning the practices and approach of controllers.

The ODPA aims to be accessible to individuals seeking information or advice. The offices have been specially designed to ensure maximum privacy for members of the public who wish to discuss their concerns, explore the possibility of making a formal complaint or otherwise discuss data-related matters.

In line with the overarching communications strategy the ODPA is wholeheartedly committed to using plain English in all communication, to ensure that it does not lose people due to using legal or business jargon. Because of this, it plans to continue publishing plain English guidance documents for controllers/processors and for members of the public to ensure that the legislation is as accessible as possible. The ODPA is also planning to develop its website - odpa.gg - to improve the amount, accessibility and quality of information available.

Local media

As with any jurisdiction, local media coverage of data protection and related matters is important in promoting awareness in the community as well as encouraging relevant and searching questions of government, the ODPA as regulator, and industry in respect of data protection and related issues.

The ODPA recognises the important and positive part local media coverage can play in raising awareness and encouraging engagement and debate.

In line with the communications strategy, the ODPA ensures it contributes where it is considered appropriate to do so and where there are opportunities to advance those discussions and raise awareness.

In recognition of the public interest around data breaches, from June 2018 the ODPA committed to publishing information on a regular basis about the number of data breaches reported. It included the key message of enlightened self-interest in each press release (issued: 25 June, 27 August, 25 October, 20 December).

Events

A key channel identified in the communications strategy of the ODPA is events. Work on developing the events programme began in 2018 with a view to putting together a proposed plan for members of the public and the regulated community to comment on early in 2019.

The aim of the events programme is to effect positive cultural change by:

- being accessible to local organisations and citizens of all ages
- improving compliance by building awareness of topical issues in data protection
- encouraging innovation and excellence in data protection practices
- exploring official guidance with the regulated community
- gathering feedback from local industry and individuals

Schools programme

The ODPA began work towards developing an education programme for school-age children, to be delivered in partnership with local schools. This is an important activity, as there are two-fold benefits to building children's awareness: firstly, a well-informed young person is more likely not to fall victim to harms that may arise from misuse of their personal data; and secondly, a well-informed young person may share their new awareness with adults in their lives, so the message is spread wider. Furthermore, these engaged and informed individuals will enter the workforce in years to come and could serve to strengthen compliance through their own actions and behaviour.

The ODPA is now able to offer student visits, either as work experience or in support of their academic courses. The aim is to support and encourage interest in the area of data and data protection as a career option as well as to encourage awareness and consideration of the younger generation's perspective of data-related matters by the ODPA in its own work.

Appendix 4

Relationships strategic activity details

Engagement with local regulated community

The ODPA benefits from many years of building positive and respected relationships with the regulated community. With a significant percentage of data processing being undertaken by the financial services industry, the ODPA takes advantage of the numerous professional and industry bodies that represent key areas within this sector. Working with these bodies enables access to these groups in support of the communications strategy.

The ODPA is developing tools and templates that provide a framework to support and facilitate the accountability requirements, recognising the enhanced obligations for controllers and processors specifically in respect of the necessity to demonstrate compliance to the ODPA.

The ODPA is working with industry representative groups to ensure, as far as is practicable, those tools and templates are tailored to and responsive of the different sectors and environments of the regulated community.

Where such representative groups exist for other sectors, such as small businesses and third sector, the ODPA proactively seeks early engagement and support. Such groups can also act as useful conduits for updates and guidance issued by the ODPA.

Guernsey has a newly constituted Association of Data Protection Officers (ADPO) which seeks to support and develop data protection professionals in the jurisdiction. The ODPA is pleased to support the work of the ADPO, recognising the key role played by data protection officers in delivering high standards of compliance for controllers and processors.

The ODPA continues to work with the local training agency in supporting the delivery of data protection professional development.

The ODPA's new offices were specially designed to ensure maximum privacy for representatives of controllers and processors who attend for meetings. In addition, there is a dedicated boardroom which is used for Authority meetings as well as being a space which can be used for small public and consultation events.

Engagement with other regulators

The ODPA continues to benefit from its links with regulators further afield by sharing knowledge and learning from different approaches through informal and formal channels.

Informally, an ODPA staff member visited both the UK Information Commissioner's Office (ICO) and the European Data Protection Supervisor to learn from their respective communications teams. Two staff members visited the Irish Data Protection Commission's senior management team to share knowledge around regulation and operational process.

In June 2018 two ODPA staff members represented the Bailiwick at the annual British, Irish and Islands' Data Protection Authorities (BIIDPA) forum in the Isle of Man. This gathering of regulators takes a slightly different format to other events and is invaluable for the cooperation and development of all involved.

The Deputy Commissioner represented the Bailiwick at the closed session of the International Conference of Data Protection & Privacy Commissioners (ICDPPC) in October 2018. The Commissioner and an additional ODPA staff member attended the open sessions of this event. This large-scale week-long event in Brussels made international news due to a keynote speaker, Apple CEO Tim Cook, calling for comprehensive federal privacy laws in the US.

Consultation exercises with citizens and regulated community

The ODPA recognises that having a genuine understanding and appreciation of the experiences and views of the regulated community matters if it is to be a relevant and responsive regulator. Ensuring regular communication with controllers, processors and citizens plays an important part. The first of a series of consultation exercises relating to the ODPA's event programme is planned for 2019. The ODPA will continue to ensure meaningful and regular communications with industry, utilising public consultation exercises where appropriate.

Collaborative working

Data protection increasingly involves other regulatory arenas. To ensure consistency as well as efficient use of limited and/or specialist resources, the ODPA is working towards agreeing Memorandums of Understanding (MoUs) with key third parties who work in the regulatory space where such collaborative working assists in delivering on the strategic and operational objectives of the office.

A MoU was signed with the States of Guernsey in 2018 and a MoU is being sought with the Guernsey Financial Services Commission. Whilst the ODPA has officers capable of conducting criminal investigations, a MoU is being drawn up with Guernsey Police to ensure appropriate resources and support for criminal investigations.

The Data Protection Authority

Members' Report For the Period from 25 May to 31 December 2018

The members present their report and the financial statements for the period ended 31 December 2018.

Members' responsibilities statement

The members are responsible for preparing the Members' Report and the financial statements in accordance with the requirements of The Data Protection (Bailiwick of Guernsey) Law, 2017 ("the Law") and generally accepted accounting practice.

The members are responsible for keeping proper financial accounts and adequate accounting records that are sufficient to show and explain the Authority's transactions to enable them to ensure that the financial statements comply with the Law and associated legislation. They are also responsible for safeguarding the assets of the Authority and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Principal activity

The Data Protection Authority is the independent regulatory authority for the purposes of the Data Protection (Bailiwick of Guernsey) Law, 2017 and associated legislation.

Results

The deficit for the period is set out in detail on page 5.

Members

The members who served during the period were:

Richard Thomas CBE
Simon Entwisle
John Curran
Christopher Docksey
Mark Lempriere
Jennifer Strachan

Establishment

These are the first financial statements of the Authority which commenced activities on 25 May 2018.

Disclosure of information to auditors

Each of the persons who are members at the time when this Members' Report is approved has confirmed that:

- so far as the member is aware, there is no relevant audit information of which the Authority's auditors are unaware, and
- the member has taken all the steps that ought to have been taken as a member in order to be aware of any relevant audit information and to establish that the Authority's auditors are aware of that information.

The Data Protection Authority

Members' Report (continued) For the Period from 25 May to 31 December 2018

Independent auditor

The auditor, Grant Thornton Limited, has expressed a willingness to continue in office.

Post balance sheet events

There have been no significant events affecting the Authority since the period end.

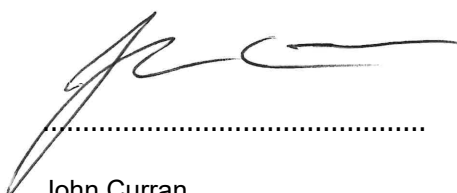

Going concern

The Authority is in a net liability position at the balance sheet date and therefore will require funding to support the future working capital and operational requirements. The members are satisfied that the Authority will be able to meet its liabilities as and when they fall due as a result of the legal obligation of the States of Guernsey to provide sufficient funding and assurances received in relation to funding for the year commencing 1 January 2020. Accordingly, the members have prepared these financial statements on a going concern basis.

This report was approved by the members and signed on their behalf:

Independent auditor's report
To the members of The Data Protection Authority

Opinion

We have audited the financial statements of The Data Protection Authority (the 'Authority') for the period ended 31 December 2018 which comprise the Statement of Comprehensive Income, the Balance Sheet and notes to the financial statements, including a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards, including Financial Reporting Standard 102 'The Financial Reporting Standard applicable in the United Kingdom and the Republic of Ireland' ('FRS 102'), Section 1A 'Small Entities'.

In our opinion, the financial statements:

- give a true and fair view of the state of the Authority's affairs as at 31 December 2018 and of its deficit for the period then ended;
- are in accordance with United Kingdom Accounting Standards, including FRS 102 Section 1A 'Small Entities'; and

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the 'Auditor's responsibilities for the audit of the financial statements' section of our report. We are independent of the Authority in accordance with the ethical requirements that are relevant to our audit of the financial statements in Guernsey, including the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Who we are reporting to

This report is made solely to the Authority's members, as a body, in accordance with Paragraph 12 of Schedule 6 of The Data Protection (Bailiwick of Guernsey) Law, 2017. Our audit work has been undertaken so that we might state to the Authority's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Authority and the Authority's members as a body, for our audit work, for this report, or for the opinions we have formed.

Conclusions relating to going concern

We have nothing to report in respect of the following matters in relation to which the ISAs (UK) require us to report to you where:

- the members' use of the going concern basis of accounting in the preparation of the financial statements is not appropriate; or
- the members have not disclosed in the financial statements any identified material uncertainties that may cast significant doubt about the Authority's ability to continue to adopt the going concern basis of accounting for a period of at least twelve months from the date when the financial statements are authorised for issue.

Other information

The members are responsible for the other information. The other information comprises the information included in the Members' Report set out on pages 1 to 2, other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of members for the financial statements

As explained more fully in the members' responsibilities statement set out on page 1, the members are responsible for the preparation of the financial statements which give a true and fair view in accordance with UK GAAP, and for such internal control as the members determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the members are responsible for assessing the Authority's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the members either intend to liquidate the Authority or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

The notes on pages 7 to 10 form part of these financial statements.

The Data Protection Authority

Notes to the Financial Statements For the Period from 25 May to 31 December 2018

1. Accounting policies

1.1 Basis of preparation of financial statements

The financial statements have been prepared under the historical cost convention and in accordance with Section 1A of Financial Reporting Standard 102, the Financial Reporting Standard applicable in the UK and the Republic of Ireland.

The preparation of financial statements in compliance with FRS 102 requires the use of certain critical accounting estimates. It also requires management to exercise judgment in applying the Authority's accounting policies.

The following principal accounting policies have been applied:

1.2 Going concern

The Authority is in a net liability position at the balance sheet date and therefore will require funding to support the future working capital and operational requirements. The members are satisfied that the Authority will be able to meet its liabilities as and when they fall due as a result of the legal obligation of the States of Guernsey to provide sufficient funding and assurances received in relation to funding for the year commencing 1 January 2020. Accordingly, the members have prepared these financial statements on a going concern basis.

1.3 Income

Annual notification fees are recognised to the extent that it is probable that the economic benefits will flow to the Authority and the income can be reliably measured. Income from annual notification fees is measured at the fair value of the consideration received or receivable.

1.4 Government grant and other income

Grants received are of a revenue nature and are recognised in the statement of comprehensive income in the same period as they relate. Any grant amounts not expended are returned to the Budget Reserve and not retained by the Authority. Amounts not expended reduce the grant income and are accrued for in these financial statements as 'Amounts payable to the States of Guernsey'.

The grant received is reflected in the statement of comprehensive income in order to match the expenditure incurred in relation to data protection law matters during 2018 and those incurred in setting up and operating the Authority.

In addition to the grant above, the States of Guernsey settled expenses on behalf of the Authority in the sum of £31,776. This amount has also been reflected in income to match the expenditure incurred.

1.5 Tangible fixed assets

Tangible fixed assets under the cost model are stated at historical cost less accumulated depreciation and any accumulated impairment losses. Historical cost includes expenditure that is directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

The Data Protection Authority

Notes to the Financial Statements For the Period from 25 May to 31 December 2018

1. Accounting policies (continued)

1.5 Tangible fixed assets (continued)

Depreciation is charged so as to allocate the cost of assets less their residual value over their estimated useful lives.

The estimated useful lives range as follows:

Leasehold improvements	- 6 years
Furniture and fittings	- 20% straight line
Office equipment	- 20% straight line

1.6 Debtors

Short term debtors are measured at transaction price, less any impairment.

1.7 Cash at bank and in hand

Cash at bank and in hand is represented by cash in hand, current bank accounts and deposits with financial institutions repayable without penalty on notice of not more than three months.

1.8 Financial instruments

The Authority only enters into basic financial instruments transactions that result in the recognition of financial assets and liabilities like trade and other debtors and creditors, loans from banks and other third parties, loans to related parties and investments in non-puttable ordinary shares.

Debt instruments (other than those wholly repayable or receivable within one year), including loans and other accounts receivable and payable, are initially measured at the present value of the future cash flows and subsequently at amortised cost using the effective interest method. Debt instruments that are payable or receivable within one year, typically trade debtors and creditors, are measured, initially and subsequently, at the undiscounted amount of the cash or other consideration expected to be paid or received. However, if the arrangements of a short-term instrument constitute a financing transaction, like the payment of a trade debt deferred beyond normal business terms or financed at a rate of interest that is not a market rate or in case of an out-right short-term loan not at market rate, the financial asset or liability is measured, initially, at the present value of the future cash flow discounted at a market rate of interest for a similar debt instrument and subsequently at amortised cost.

Financial assets that are measured at cost and amortised cost are assessed at the end of each reporting period for objective evidence of impairment. If objective evidence of impairment is found, an impairment loss is recognised in the Statement of Comprehensive Income.

For financial assets measured at cost less impairment, the impairment loss is measured as the difference between an asset's carrying amount and best estimate of the recoverable amount, which is an approximation of the amount that the Authority would receive for the asset if it were to be sold at the Balance Sheet date.

1.9 Operating leases

Rentals paid under operating leases are charged to the Statement of Comprehensive Income on a straight line basis over the lease term.

The Data Protection Authority

Notes to the Financial Statements For the Period from 25 May to 31 December 2018

1. Accounting policies (continued)

1.10 Administrative expenses

Administrative expenses are measured at transaction price and accounted for on an accruals basis.

2. Employees

The average monthly number of employees during the period was 12.

3. Taxation

The Authority is exempt from the provisions of the Income Tax (Guernsey) Law, 1975 as amended.

4. Tangible fixed assets

	Leasehold improvements £	Furniture and fittings £	Office equipment £	Total £
Cost				
Additions during the period and at 31 December 2018	65,731	1,262	76,009	143,002
Depreciation				
Charge for the period	2,497	12	5,960	8,469
Net book value				
At 31 December 2018	63,234	1,250	70,049	134,533

5. Debtors and prepayments

	2018 £
Amount receivable from the States of Guernsey	76,865
Prepayments and accrued income	20,091
	96,956

The Data Protection Authority

Notes to the Financial Statements For the Period from 25 May to 31 December 2018

6. Creditors

	2018 £
Trade creditors	66,162
Deferred rent	34,422
Amount payable to the States of Guernsey	631,055
Accruals	15,366
	<u>747,005</u>

On 26th April 2019 and 2nd July 2019 the Authority repaid £47,912 and £334,055 respectively, to the States of Guernsey. £297,000 of the balance payable at 31 December was in relation to a transition loan. For the purposes of these financial statements, the loan is considered to be interest free, unsecured and has no fixed date of repayment.

7. Commitments under operating leases

At 31 December 2018 the Authority had future minimum lease payments under non-cancellable operating leases as follows:

	2018 £
Within one year	67,242
Within two to five years	345,817
Total	<u><u>413,059</u></u>

8. Related party transactions

During the period, £292,768 was received from the States of Guernsey in the form of a grant and a further £31,776 was received to cover specific expenditure. An additional amount of £631,055 is payable to the States of Guernsey as at the Balance Sheet date. This balance comprises two amounts lent to the Authority in relation to the set-up and transition period totalling £238,232 and £297,000 respectively and £95,823 in relation to a grant under spend.

9. Controlling party

The members are of the opinion that there is no ultimate controlling party.

The Data Protection Authority

Detailed Statement of Comprehensive Income (unaudited) For the Period from 25 May 2018 to 31 December 2018

	Period from 25 May to 31 December 2018 £

Data Protection (Bailiwick of Guernsey) Law, 2017 Update	16
Income and Expenditure Account for the year ended 31 December 2017	18

Foreword

Welcome to the Annual Report for the Office of the Data Protection Commissioner for the Bailiwick of Guernsey for 2017 and up to May 2018 which I am very pleased to present.

In light of the decision taken towards the end of 2017 by the governments of the Bailiwick of Guernsey and Jersey to move away from a pan-Island regulatory model for data protection, this report covers only matters relating to the Bailiwick of Guernsey although many events and activities were attended in a pan-Island capacity.

Much of the conversation around data protection during this time, both locally and internationally, related to preparation for the General Data Protection Regulation (GDPR) which came into force across the European Union on 25 May 2018.

Large and small jurisdictions alike dedicated significant resources to ensuring readiness for the new legislation in the lead up to May. It is also true that there remains much uncertainty about how individual member states will implement specific key elements of the GDPR which despite being a Regulation (and therefore with direct effect) provides flexibility for individual jurisdictions in important areas such as exemptions and the age at which a child is afforded higher protections. Whilst allowing for rules to be adapted for member states, it does add to the complexity for organisations processing data across a number of jurisdictions. Regulators in Europe and beyond must remain alive to the challenges this poses for those tasked with compliance. Our task is to ensure the legislative requirements deliver for individuals' rights and the best way we can do that is to ensure the compliance obligations for controllers and processors are achievable.

Although outside the European Union, the Bailiwick committed early to ensuring regulatory reform which has seen its citizens provided with updated and improved rights for this digital era as well as ensuring the continued free flow of data across its borders. The significant social as well as economic benefits of reform provide us with a unique opportunity which requires the full commitment of government, industry, ourselves and the community if we are going to take full advantage.

The Data Protection (Bailiwick of Guernsey) Law, 2017 was drafted throughout the year and was approved by the States of Guernsey in November. After Privy Council approval in early 2018 it came into force on 25 May that year, at the same time as GDPR.

Early in 2017 a meeting was held in Brussels with the European Commission to commence dialogue in respect of our adequacy position. The Bailiwick was recognised as an adequate jurisdiction for the purposes of the EU Directive 95/46/EC (the European regulatory framework that was in place prior to the GDPR). The continuation of this position is a priority for us and we are pleased to have had the opportunity to meet with the European Commission so early in our law drafting project. Our thanks go to the Channel Islands Brussels Office who continue to be extremely supportive of the work the Islands are doing.

Wisely, the States of Guernsey has provided for transitional relief in a number of areas which has allowed local controllers and processors time to prepare and also allowed my office to provide the necessary guidance and support to help them do so. This pragmatic approach to reform is to be welcomed and will position local businesses strongly in the months ahead.

Planning for the reform implementation project gained momentum throughout the year. At my office we understand the enormity of the task ahead and there can be no shortcuts. We have limited resources at our disposal but we worked tirelessly to communicate information about the impending reform to all sectors. Data is taking on a new role for all of us and effective regulation is necessarily taking on a much higher priority. If we are to deliver on the requirements of the new regime we recognise that we need to transform ourselves. This will not happen overnight and any major change needs to be handled intelligently and in partnership with all stakeholders. The depth and breadth of reform calls for more than a veneer of compliance and it requires a multi-disciplinary approach. I am clear that ineffective legislation undermines the legitimacy of the entire area and not applying the law is worse than not having a law at all. We have undertaken an honest evaluation of where we are and where we need to be and have instigated a robust, carefully considered plan to deliver on the identified objectives.

The States of Guernsey has committed to providing funding for the implementation of reform for our office to allow us to create a new fit for purpose regulatory office with the capability of delivering on the new obligations. Work commenced during 2018 to develop a permanent new funding model. Businesses large and small are working against a challenging global economic backdrop and for every penny we spend in providing for regulatory oversight we must be transparent, accountable and clear about our objectives. Those we regulate need to have absolute confidence in us and in the integrity of our actions. Equally, those who seek to exercise their legal rights need to be confident that we will do our job without fear or favour. We are committed to earning that confidence from all parties.

Our plans are ambitious and we make no apology for that. Doing this well will position the Bailiwick to deliver on the demands placed upon it by the new legislation, it will also harness the opportunities that await well regulated jurisdictions in this data driven era. We are part of a race to the top to deliver high quality regulation, skills and compliance standards. Data protection is taking on truly global importance and being a small jurisdiction need be no barrier to success. The States of Guernsey has set out its vision for the digital era and with data protection reform an integral part of that vision, we want to continue to build a new regulatory future for the Bailiwick, one which benefits all parties and which stimulates innovation as much as it protects individuals' rights. Despite some claims to the contrary, I firmly believe that enlightened regulation allows for these two important elements to no longer be seen as mutually exclusive. Good data protection needs to be understood as part of the solution, not the problem, in this internet age when trust and confidence is increasingly key for successful, sustainable relationships.

Whilst the GDPR has been the topic of most conversations around Data Protection, we must not forget that we had legislation in place prior to May 2018. The Data Protection (Bailiwick of Guernsey) Law, 2001 (the 2001 Law) provided a strong regulatory framework for the

processing of all personal data in the Bailiwick. The new legislation undeniably provides a more robust set of rights and responsibilities as well as tougher sanctions and we all need to respond proactively to these. However, for those who took their previous legal duties seriously, the changes have been entirely achievable.

What does need to change is the appreciation of how fundamental and how valuable data is to any organisation. Equally how vulnerable it is when proper attention is not given to its care. My aim is for local organisations to understand the importance of compliance, not simply because they are concerned about sanction, but because they recognise the importance of looking after such a valuable asset. This often needs a re-evaluation of the culture of an organisation. Data protection can no longer be the sole domain of a compliance officer or IT support. There is not one area of any business that does not need to step up and take ownership of this issue. It must start at board level and every member has a huge responsibility to lead from the front in this area. Culturally, what is your business approach to data and its protection? The tone set in the boardroom will always filter across the whole organisation. The greatest vulnerability for any business in respect of data security is always going to be staff. So, across the whole of any organisation, each and every member of staff has a role to play. Encourage ownership and accountability for compliance. Encourage your staff to come up with ideas about how to look after data better. And importantly, keep your staff trained and informed about the risks - they will always be your best line of defence.

I have been hugely encouraged by the approach to this locally. My staff and I have attended a great number of events where we have been invited to provide an update on the GDPR and the local data protection reform project. Without exception, those events have been hugely positive. We cannot pretend to have all the answers, but we can commit to working hard to engage and communicate meaningful messages. All such events are invaluable for us as they give us the opportunity for direct conversations with the regulated community and allow that community to connect with us. I was particularly pleased to be invited to speak at an event aimed specifically at non-executive directors. Board members, regardless of sector, are uniquely placed to be able to influence the entire organisation. They need a good knowledge of many areas and data protection is now another, important, addition to that list. Individuals working in all areas, but especially areas with direct influence such as members of a board, should not underestimate the impact their own approach can have on their organisation.

By engaging in conversations about the tangible benefits of looking after data, for us as individuals, for our economy and for our Bailiwick, we can move from an environment in which data protection compliance is seen as a rather tiresome tick-box exercise to being something absolutely core to every business and if done well could transform the jurisdiction. There is nothing stopping us from becoming a centre of excellence for data protection.

Now is the time for us to change the nature of the conversation, from one of considering the protection of data as a regulatory burden, to one of extraordinary and unprecedented opportunity. The world is changing fast and the world of data is changing faster. Those who accept and embrace the significant responsibilities that come with the opportunities will

undoubtedly have an edge. As a small jurisdiction we can be nimble and responsive and as we have better direct access to the regulated community than larger jurisdictions we can also communicate a strong and workable message. If there was ever an opportunity for this small Island to punch above its weight, it's now.

Emma Martins

Data Protection Commissioner – Bailiwick of Guernsey

Governance Statement

The position of Data Protection Commissioner was established in the Data Protection (Bailiwick of Guernsey) Law, 2001. Under the terms of the EU Directive 95/46, the Commissioner must be independent of government and this has been enshrined in legislation. In Guernsey the sponsoring department for the Office was the Office *of the* Committee *for* Home Affairs. Under the 2001 Law, the Commissioner was accountable to the States of Guernsey for the exercise of statutory functions and was subject to States audit.

Risks: Risks are routinely assessed.

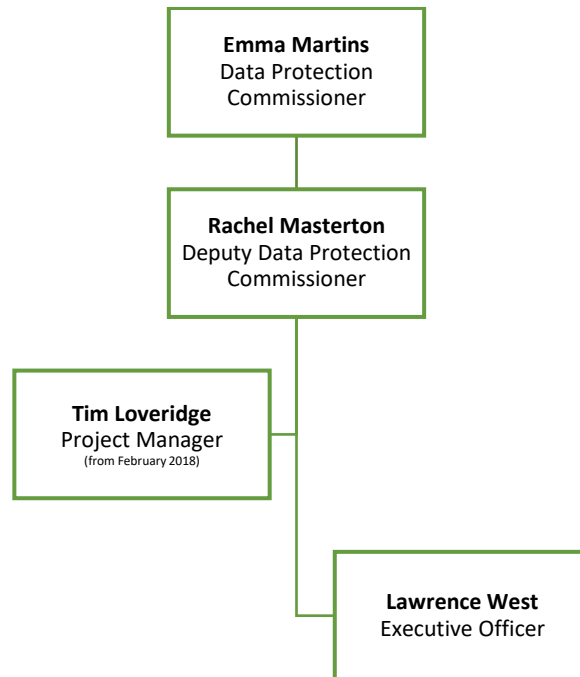

Budgeting: The requirements of the new GDPR equivalent legislation are such that the Office needs additional resources, over and above the budget already agreed for 2018. Failure to secure this additional funding will impact adversely on the ability to undertake the new statutory functions.

IT strategy: The Office has taken the extremely important step of moving away from government IT support. Independence is a crucial part of successful data protection regulation and we must ensure our own data is held securely and independently. Preparation has started on the major internal IT reform needed to deliver the new legislation.

Resources: An important element of our work is to ensure individuals are informed of their rights and empowered to raise concerns. If we do this well, we are then faced with managing the volume of enquiries and complaints. Not only does our workload expand year on year, the increased complexity of cases is also noticeable. Managing the volume of work as well as expectations at the same time going through significant changes will be a challenge for us.

Independence: In order for us to be an effective regulator and to deliver on the new Law's requirements, we need to ensure a workable and sustainable funding system as well as a clearer guarantee of independence from government.

Office Structure

Operational Statistics

Total cases – 51

Seven of the cases were self-reported breaches; the remaining 44 were formal requests for assessment.

Six cases were related to Privacy and Electronic Communications Regulations (PECR) matters (enshrined in local law in the European Communities (Implementation of Privacy Directive) (Guernsey) Ordinance, 2004). The remaining 45 were data protection complaints.

Two Information Notices were served.

Data Protection (Bailiwick of Guernsey) Law, 2017 Update

Approval of and Enactment of the New Law

The States of Deliberation approved the new Data Protection (Bailiwick of Guernsey) Law, 2017 on 29 November 2017. This then received royal assent from the Privy Council in early 2018, in time for its commencement on 25 May 2018.

In addition to the primary law, the following pieces of subordinate legislation were also enacted:-

- The Data Protection (Commencement, Amendment and Transitional) (Bailiwick of Guernsey) Ordinance, 2018
- The Data Protection (Law Enforcement and Related Matters) (Bailiwick of Guernsey) Ordinance, 2018
- The Data Protection (International Cooperation and Assistance) (Bailiwick of Guernsey) Regulations, 2018
- The Data Protection (General Provisions) (Bailiwick of Guernsey) Regulations, 2018

Governance and Independence

In order to bring the Bailiwick's regulatory regime in line with that laid out within the GDPR, steps were taken at the beginning of 2018 to further separate the ODPC from government. The Data Protection (Bailiwick of Guernsey) Law, 2017 brings into being the Data Protection Authority, to provide oversight, direction and accountability for the data protection regulator in the Bailiwick.

The Authority comprises the following individuals:-

- Richard Thomas CBE as Chairman (five-year term)
- Simon Entwisle (five-year term)
- John Curran (five-year term)
- Christopher Docksey (four-year term)
- Mark Lempriere (four-year term)
- Jennifer Strachan (four-year term) and
- Emma Martins, Commissioner (non-voting member)

Work was also undertaken to separate the ODPC from the financial and human resources management that had been provided by the States of Guernsey in order to reinforce the independence that was expected post-May. The services of a project manager were engaged to assist with this together with the separation of IT functions from the pan-Island arrangements, to find the ODPC office accommodation suitable for its expanding remit and to secure the necessary funding from government. This enabled staff to devote more of their time to preparing Bailiwick organisations for the changes.

Guidance and Resources

To assist controllers and processors prepare for the new Law and to advise individuals of their new and enhanced rights, 19 guidance notes were created and made available on the ODPC's website. In addition, a number of tools and resources were produced to supplement the guidance provided.

As 25 May 2018 approached, the ODPC saw a marked increase in the number of telephone calls and email enquiries as controllers and processors sought assistance and further guidance as to how the law applied to them and their operations. This was encouraging as it meant the Bailiwick organisations were engaging with the impending changes and was seeking to tackle them proactively rather than waiting till something went wrong.

Staffing

The increased functions and powers for which the ODPC would be responsible under the new Law meant an increase in staff numbers was necessary as well as the developing of new capabilities. In early 2018 efforts were made to recruit to key roles, such as communications, office management and case handling meaning headcount had expanded from 3 in January to 5 with 2 impending new joiners by 25 May.

Accounts for 2018 will be included with the Guernsey Data Protection Authority's Annual Report for the period from 25 May 2018 to 31 December 2018.

**IN THE STATES OF THE ISLAND OF GUERNSEY
ON THE 27th DAY OF NOVEMBER, 2019**

**The States resolved as follows concerning Billet d'État No XXIII
dated 8th November, 2019**

**ELECTION OF A MEMBER OF THE
ELIZABETH COLLEGE BOARD OF DIRECTORS**

P.2019/115

I: To elect Mrs Rosemary Anne Bowyer as a member of the Elizabeth College Board of Directors to replace Mrs Anne-Marie Collivert, whose term of office expired on the 5th January 2020, in accordance with Rule 16 of The Rules of Procedure of the States of Deliberation, as set out in Section 1 of The Rules of Procedure of the States of Deliberation and their Committees.

STATUTORY INSTRUMENTS LAID BEFORE THE STATES

No. 98 of 2019

**THE FINANCIAL SERVICES OMBUDSMAN (CASE FEE AND LEVIES) (BAILIWICK OF GUERNSEY)
AMENDMENT ORDER, 2019**

In pursuance of Section 27(3) of The Financial Services Ombudsman (Bailiwick of Guernsey) Law, 2014, as amended, "The Financial Services Ombudsman (Case Fee and Levies) Bailiwick of Guernsey) (Amendment) Order, 2019", made by the Committee *for* Economic Development on 12th September, 2019, was laid before the States.

No. 99 of 2019

**THE WEIGHTS AND MEASURES (PRESCRIBED QUANTITIES)
(EXEMPTIONS) REGULATIONS, 2019**

In pursuance of sections 20(1) and 61(1) of the Weights and Measures (Guernsey and Alderney) Law, 1991, The Weights and Measures (Prescribed Quantities) (Exemptions) Regulations, 2019, made by the Committee *for* Home Affairs on 30th September 2019, were laid before the States.

No. 100 of 2019

THE WEIGHTS AND MEASURES (INTOXICATING LIQUOR) (AMENDMENT) REGULATIONS, 2019

In pursuance of sections 18(1) and (2) and 61(1) of the Weights and Measures (Guernsey and Alderney) Law, 1991, The Weights and Measures (Intoxicating Liquor) (Amendment) Regulations, 2019, made by the Committee *for* Home Affairs on 30th September 2019, were laid before the States.

THE SOCIAL INSURANCE (RATES OF CONTRIBUTION AND BENEFITS, ETC.) ORDINANCE, 2019
P.2019/108

- II. To approve the draft Ordinance entitled "The Social Insurance (Rates of Contributions and Benefits, etc.) Ordinance, 2019", and to direct that the same shall have effect as an Ordinance of the States.

THE HEALTH SERVICE (BENEFIT) (AMENDMENT) ORDINANCE, 2019
P.2019/109

- III. To approve the draft Ordinance entitled "The Health Service (Benefit) (Amendment) Ordinance, 2019", and to direct that the same shall have effect as an Ordinance of the States.

THE LONG-TERM CARE INSURANCE (GUERNSEY) (RATES) ORDINANCE, 2019
P.2019/110

- IV. To approve the draft Ordinance entitled "The Health Service (Benefit) (Amendment) Ordinance, 2019", and to direct that the same shall have effect as an Ordinance of the States.

THE SEVERE DISABILITY BENEFIT AND CARER'S ALLOWANCE ORDINANCE, 2019
P.2019/111

- V. To approve the draft Ordinance entitled "The Severe Disability Benefit and Carer's Allowance Ordinance, 2019", and to direct that the same shall have effect as an Ordinance of the States.

THE INCOME SUPPORT (IMPLEMENTATION) (AMENDMENT) ORDINANCE, 2019
P.2019/112

- VI. To approve the draft Ordinance entitled "The Income Support (Implementation) (Amendment) Ordinance, 2019", and to direct that the same shall have effect as an Ordinance of the States, subject to the following amendment -

Immediately after section 1 add the following section –

"1A. In paragraph 6 (rent) of the First Schedule to the Ordinance –

(a) in subparagraph (1)(b), for "£75" substitute "£76.50", and

(b) in subparagraph (2A)(a), for "£75" substitute "£76.50".

**THE FINANCIAL SERVICES OMBUDSMAN (BAILIWICK OF GUERNSEY) (AMENDMENT) (NO. 2)
ORDINANCE, 2019
P.2019/113**

VII. To approve the draft Ordinance entitled "The Financial Services Ombudsman (Bailiwick of Guernsey) (Amendment) (No. 2) Ordinance, 2019", and to direct that the same shall have effect as an Ordinance of the States.

**THE ELECTORAL ROLL ORDINANCE, 2019
P.2019/114**

VIII. To approve the draft Ordinance entitled "The Electoral Roll Ordinance, 2019", and to direct that the same shall have effect as an Ordinance of the States.

COMMITTEE *FOR THE ENVIRONMENT & INFRASTRUCTURE*

**ENVIRONMENTAL POLLUTION (GUERNSEY) LAW, 2004
PART VII – AIR POLLUTION
SUPPLEMENTARY POLICY LETTER
P.2019/107**

IX. After consideration of the Policy Letter entitled "Environmental Pollution (Guernsey) Law, 2004, Part VII – Air Pollution – Supplementary Policy Letter", dated 17th October 2019:-

1. To prescribe the following as operations requiring a licence under Part III of the Environmental Pollution (Guernsey) Law, 2004 –
 - a) the 'Part B' processes described in paragraphs 2.3 to 2.5 of that Policy Letter; and
 - b) the 'Part A' processes described in paragraphs 2.8 to 2.10 of that Policy Letter.
2. To approve the additional powers for the Director of Environmental Health and Pollution Regulation to make statutory instruments in relation to the technical matters set out in paragraph 2.13 of that Policy Letter.
3. To approve the draft Ordinances entitled –

- a) "The Environmental Pollution (Guernsey) Law, 2004 (Commencement) Ordinance, 2019", as set out in Appendix 1;
- b) "The Environmental Pollution (Air Pollution) Ordinance, 2019", as set out in Appendix 2; and
- c) "The Environmental Pollution (Enforcement and Appeals) Ordinance, 2019", as set out in Appendix 3,

and to direct that each of the same shall have effect as an Ordinance of the States.

C. FOSTER

HER MAJESTY'S DEPUTY GREFFIER

**IN THE STATES OF THE ISLAND OF GUERNSEY
ON THE 28th DAY OF NOVEMBER, 2019**

Adjourned from the 27th November 2019

**The States resolved as follows concerning Billet d'État No XXIII
dated 12th November, 2019**

REQUÊTE

**DEVELOPMENT OF THE BUSINESS CASE AND COST BENEFIT ANALYSIS FOR THE EXTENSION OF
THE RUNWAY AT GUERNSEY AIRPORT TO CREATE A 1,700 METRE RUNWAY
P.2019/105**

X. After consideration of the Requête titled "Development of the Business Case and Cost Benefit Analysis for the Extension of the Runway at Guernsey Airport to create a 1,700 Metre Runway", dated 6th October 2019:-

1. To direct the Committee *for* Economic Development to present a business case and cost benefit analysis for the extension of the runway at Guernsey Airport to achieve a length of at least 1,700m.
2. To agree that this work should be completed by May 2020.
3. To direct the Policy and Resources Committee to make available the necessary funds to carry out this work, should they be required, to not exceed £360,000.

POLICY & RESOURCES COMMITTEE

**SCHEDULE FOR FUTURE STATES' BUSINESS
P. 2019/116**

XI. After consideration of the Schedule for future States' business, which sets out items for consideration at the Meeting of the 11th December 2019 and subsequent States' Meetings, to approve the Schedule.

**J. TORODE
HER MAJESTY'S GREFFIER**
