Good afternoon,

Please find our planning application form amended as requested.

I will also deliver the hard copy and the three copies of the plans this afternoon.

The building was until recently used as a residential care home, which closed. Our intention, subject to gaining the correct permissions would be to operate it as staff quarters for our staff involved in the horticultural activity of growing Cannabis and the processing of it thereafter. CIB (Guernsey) have been advised that their licence application has been successful. This property would purely be used for the accommodation of staff.

We have met on site with the Fire Prevention officer, Mr Martin Lucas and have spoken to Catherine Rirsch of Environmental House, both of which appear to be supportive of our application.

Should you require any additional information, please do not hesitate to contact me.

Kind regards,
Bruno
