Dear Sir

Re: **Proposed replacement of doors at Wesley Methodist Church,
Grand Bouet, St Peter Port for Wesley Methodist Church**

Please find enclosed four copies of drawing No. 20-007-01 being the Digimap Sketch for the above that I submit with the associated forms for your approval.

As indicated, it is my client's proposal to improve the external appearance of the Church and ease access into the buildings by replacing three door sets.

Door Set 1

It is proposed to remove the existing timber solid doors and install new fully glazed bespoke doors. These new doors will be like those at Church of Scotland a photograph of which is included.

Door Set 2

To allow a view from the entrance into the Church a new set of fire doors are proposed. These doors will again be timber but will also be fully glazed units. The existing self-closers will be re-used.

Door Set 3

To improve access for wheelchairs/pushchairs and to increase natural light levels within the building it is proposed to remove the existing solid white upvc door and replace with a new ½ glazed 885mm wide door unit complete with an opening ½ glazed slave door.

As required, I confirm that the above proposals have been considered in accordance with the criteria of IDP GP9 & the new external elements will utilise thermally efficient products to meet the criteria of GTS building regulations.

I trust that this submission to improve access and the appearance of the Church will be favourably received and I would be grateful if this application could be processed at your earliest opportunity.

Yours sincerely

P C Vaudin
