

Description of proposal – updated from pre planning enquiry

- 1) Block up existing gable end window and add new Velux rooflight in roof above garage as part of bathroom refurbishment.

- 2) Remove and replace existing wooden shed in back garden and erect an open sided weather proof seating area (Lean to style with sloping roof)

You will note that the pre-planning enquiry stated that we would be removing fencing and replacing with a wall. This is no longer the case and the fence has been replaced by another fence.

With reference to part C of the application form that asks if work has already commenced. The existing shed has been removed already as it was rotten and in a state of disrepair, and a bespoke sloping roof shed built as a replacement for it (included on attached drawing).
