

IP11: Small – Scale Infrastructure Provision

Guernsey Electricity – Distribution Pillar

This information note has been prepared in support of our planning application for 2095 Les Hubits Pillar

This proposal will replace the existing distribution pillar to improve the distribution network within the site. Given that the distribution pillar provides isolation and protection of the distribution equipment and cabling system, GEL should ensure that every distribution pillar must be accessed in a very short time in the event of equipment faults and maintenance. This will allow GEL to minimise down times and outages of its service to customer and maintain its mission to provide a good service to its clients.
