

## Stocking Density Values (per bird)

- Turkeys/Geese:  $1.5 \text{ m}^2$  (15,000  $\text{cm}^2$ ) = 122cm x 122cm
- Chickens:  $1 \text{ m}^2$  (10,000  $\text{cm}^2$ ) = 100cm x 100cm
- Bantams:  $0.8 \text{ m}^2$  (8,000  $\text{cm}^2$ ) = 90cm x 90cm
- True Bantams:  $0.5 \text{ m}^2$  (5000  $\text{cm}^2$ ) = 70cm x 70cm
- Quail:  $0.3 \text{ m}^2$  (3000  $\text{cm}^2$ ) = 55cm x 55cm

Example 1: For every one metre squared, one chicken may be kept.

Example 2: If a pen is 5 x 5 metres, 25 chickens may be kept in that area.
