Dear Sir

Vale Primary School, Vale

I am pleased to enclose a Planning application with reference to the project to provide a cycle shelter in the corner of the school playground.

This is the latest in a programme to make the journey to schools more cycle friendly, with obvious health and environmental benefits. The type of shelter is the same as others fitted over the last couple of years. The materials chosen for the shelter, while not from a sustainable source, have high longevity and recyclability and therefore have a reduced environmental impact. When considered alongside the reduction in vehicular emissions we believe that the proposal is compliant with IDP policy GP9.

Please contact me if anything needs clarification or if you require any ancillary information.

Yours faithfully

Paul Henney
