Dear Sir

Widening of pedestrian footpath at St Martin's Primary School.

I am pleased to enclose a Planning application with reference to the above project to widen the footpath in the vicinity of the school car park.

Despite various attempts to cut down the number of vehicles visiting the school at start and finish times the school car park remains an ongoing problem for the pedestrian visitors to the school. As cars manoeuvre out of the carpark having picked up or dropped off the pupils, they invariably swing out over the footpath where other parents, grandparents or younger siblings are walking. An obvious potential hazard.

The scheme is designed to mitigate these hazards by increasing the separation between the two parties in as unobtrusive way as possible. The minimum amount of bank will be removed and all new materials have been chosen to match the existing.

Please contact me if anything needs clarification or if you require any ancillary information.

Yours faithfully
