

Access to Public Information Response

Date: 15 April 2021

Date request received: 15 March 2021

For each calendar year from 2014- 2020 inclusive (or such time frame that this data is available) please could you provide the following information:

Q1. Cumulative number of;

a) babies admitted to the Guernsey Neonatal Unit for 7 days or more.

AND;

b) number of “Guernsey babies”* born in UK admitted to a UK Neonatal Unit for 7 days or more.

* “guernsey babies” meaning babies born to mothers who were under care of Guernsey maternity services but transferred to UK hospitals under the service agreements with NHS.

To avoid “double counting” where possible babies who transferred between UK Neonatal Unit AND Guernsey Neonatal unit to be counted as “1”.

Q2. For each of the babies admitted to a NNU for more than 1 week in Q1, what was the total length of stay (“LOS”) in days in the Neonatal Unit from the birth to baby’s discharge from hospital. If split between uk and guernsey, the number given as a cumulative LOS),

This can be provided to the nearest week, if easier. ,I.e. 120 total day LOS = 17 weeks

Annual breakdown is preferred however if there are concerns that providing an annual figure may compromise on individual privacy, this information could be provided over periods or 2 or more years without being differentiated in to calendar years. (I.e., 2014-2016)

Response:

1 - Number of babies born in Guernsey who were admitted to the neonatal unit for 7 days or more for 2014 -2020

| | |
|------|----|
| 2014 | 15 |
| 2015 | 18 |
| 2016 | 22 |
| 2017 | 14 |
| 2018 | 13 |
| 2019 | 12 |
| 2020 | 14 |

It is not possible to provide data (by year) for the following 2 questions due to the very low numbers of babies concerned and the risk of them being identified (with the exception of the individual years shown). We would normally only provide data for 5 or more individuals. Using a moving average of 3,4 or 5 years does not bring the number above 5.

2 - Number of babies not born in Guernsey who were transferred from a UK hospital to the PEH and admitted to the neonatal unit for 7 days or more for 2014 - 2020

| | |
|------|---|
| 2016 | 7 |
|------|---|

3 - Number of babies born in Guernsey who were then transferred to the UK and then transferred back to the PEH and admitted to the neonatal unit for 7 days or more 2014 - 2020

| | |
|------|---|
| 2015 | 7 |
|------|---|

| 1 – Length of Stay of babies born in Guernsey who were admitted to the neonatal unit for 7 days or more for 2014 - 2020 | | | | | | | | | | | | | | |
|---|------------------|--|------|------------------|------|------------------|------|------------------|------|------------------|------|------------------|------|------------------|
| Year | PEH Neonatal LOS | | Year | PEH Neonatal LOS | Year | PEH Neonatal LOS | Year | PEH Neonatal LOS | Year | PEH Neonatal LOS | Year | PEH Neonatal LOS | Year | PEH Neonatal LOS |
