Date of response: 01 August 2022

Freedom Of Information request regarding Diplomas in Education and Training (Level 5)

Request:

Students are required to complete eight assessed observations in total for the Diploma in Education and Training (level 5) course. How many students, if any, from the previous group passed/qualified with one or more grade 3's in their total of eight assessed observations.

Response provided by the Committee *for* Education, Sport & Culture:

Six students studied towards a Diploma in Education and Training (Level 5) in the 2018-2020 cohort. All six students completed the course and obtained the qualification. Of the six, four students received at least one 'grade 3' assessment in the four observed assessments during the first year of their studies. All six students received 'grade 2' or 'grade 1' assessments across the four observed assessments during the second year of their studies. (It should be noted that for some of this cohort, additional material was submitted for assessment in the second year of their studies, as required by City & Guilds where COVID-19 restrictions prevented an observation taking place.)
