

Where are the fuel storage facilities?

The main fuel storage sites in the north of the island are at:

Channel Islands Fuels Limited
Fuel Supplies (C I) Limited
Guernsey Gas Limited

Due to the close proximity of the Guernsey Electricity site, this organisation has also been consulted with regards to the content of the emergency plan and the response to any incident. However, it is considered highly unlikely that any incident at the Guernsey Electricity site will impact upon other operators. But there is a possibility through the 'domino effect' of an incident that an incident at one of the other operator sites may impact upon Guernsey Electricity operations.
