Desktops

Network = Faster, greater, improved

- **Creation of a BYOD network** for all schools deployed.
- **Improved features** to increase the speed of access.
- **Improved resilience** to ensure continuity of service.
- **Dedicated networks** for students, staff and visitors.
- **Management centre** to allow the health of the network to be constantly monitored.
- JT is working to provide a **resilient future proof network** to connect Guernsey's schools.
- It is flexible, and readily scalable to meet the growing needs of staff and student.
- This cutting edge network will connect **120 sites, 26 schools** (19 on JT physical fibre) and uses nearly **50k** of fibre optic cabling.

Wireless

52

extra wireless access points installed across the education estate

which brings the total to

404

Storage and Filing

Move to use of cloud storage

Application Delivery

Flexible access to software and applications

Current internet Usage

425,000

average Google requests per day
The equivalent of 976 hours of HD video tutorials

Over

290,000MB

average data internet traffic per day
This is the equivalent of 290,000 eBooks downloaded per day

1.5m MB

average total volume of data transmitted over the internet per week
